CAMBRIDGE, MASS (NOV. 6) BUSINESS WIRE - Lotus Development Corp. Tuesday announced shipment of the network editions of 1-2-3 Release 3.1, the company's advanced graphical spreadsheet for DOS and DOS with Windows 3.0.

The network editions provide an efficient method of installing, managing and using 1-2-3 on a local area network.

''Network editions are playing an increasingly significant role in our customer's decision to upgrade users to new Lotus applications,'' said Don Casey, vice president of Lotus' PC Spreadsheet division. ''The availability of 1-2-3 Release 3.1 network editions, so closely following the initial shipment of Release 3.1 and its positive reception in the marketplace, is yet another example of our commitment to support the network computing needs of Lotus customers.''

1-2-3 Release 3.1 is now available in three editions: Standard, Server and Node. The Standard Edition, which shipped in September, is intended for use in a standalone or networked environment and contains full documentation, software, and a single user license.

The Server Edition is licensed for shared use from a central network file server and contains complete network administration software and documentation product software and documentation, and a single user license. The Node Edition provides an additional license for network use and contains complete documentation and software.

1-2-3 Release 3.1 network editions deliver the tools necessary to fully exploit 1-2-3 in a network environment. This includes the ability to share 1-2-3 data and program files, as well as network resources, such as printers and fonts.

Network edition features include: password protection, used to control access to sensitive information; file reservations, which allow users to share files

without concern for data integrity; and the ability to ''seal'' files with a password, so that spreadsheet templates and macros can be easily distributed on the network.

LAN management tools included in the Server Edition give LAN administrators greater control over the installation and management of 1-2-3 on a network. For example, 1-2-3 will, at the LAN administrator's request, automatically make any required changes to the network users' system configuration files. This simplifies installation and frees the administrator from learning the manual commands necessary to install many network products.

Joint customer support programs with Novell, 3Com and Banyan allow users to direct all their 1-2-3 related network questions to Lotus product support staff who, in turn, have access to the network vendor for assistance in answering customers' questions.

System Requirements, Pricing, and Upgrades 1-2-3 Release 3.1 network editions are designed for users with DOS 3.1 compatible network operating systems, including: IBM PC LAN Program 1.2 and 1.3; IBM LAN Server 1.2; 3Com 3+Share 1.6; 3Com 3+Open LAN Manager 1.1; Novell Advanced and SFT 286 NetWare 2.15; Novell 386 NetWare 3.0; and Banyan Vines 3.1.

Server and Node Editions of 1-2-3 Release 3.1 are available at a suggested retail price of $795 and $495, respectively. The Server Edition includes 5 1/4-inch and 3 1/2-inch disk media in the same package.

Registered users who buy or have bought 1-2-3 Release 3.0 Server or Node Editions on or after May 7, 1990, are eligible to receive a Release 3.1 Server or Node Edition free of charge. Free network upgrades may be redeemed through March 31, 1991. All other Release 3.0 network users may upgrade for a suggested retail price of $35.

Release 2.2 Server and Node users may upgrade to the respective Release 3.1 edition for a suggested retail price of $75 through March 31, 1991. In addition, 1-2-3 Release 1, 1A, 2, or 2.01 users may upgrade to the Release 3.1 Node Edition for a suggested retail price of $150.

Lotus Development Corp. (NASDAQ:LOTS), founded in 1982, develops, markets and supports business software and CD-ROM databases that help users access, analyze, communicate and share information. The company's first product, Lotus 1-2-3, is the most popular computer software program in the world with more than 12 million users. Lotus markets its broad range of products in more than 65 countries and offers users comprehensive support options, including 24-hour-a-day, 7-day-a-week support in the U.S. for PC versions of its 1-2-3 spreadsheet.

#90310b0777 11/06/1990 ~Business Wire
RESEARCH TRIANGLE PARK, NC (NOV. 6) BUSINESS WIRE - CompuChem Corp. (NASDAQ:CCEM) has been awarded environmental testing contracts by the Department of Energy, Department of Defense and the Environmental Protection Agency with a combined value of $9.8 million.

The DOE and DOD awards are mixed waste analytical contracts involving EPA Contract Laboratory Program protocols and analysis of low level radio isotopes. Work under these contracts, valued at over $1 million, began in October. Earlier this year, CompuChem opened its new mixed waste facility which is equipped with the latest automated state-of-the-art equipment, including low-background alpha-beta counting, alpha spectroscopy, liquid scintillation counting and gamma spectroscopy.

Analytical techniques include ion-exchange, co-precipitation and solvent extraction used with low-level background detectors for ultra-sensitive measurement of low-level radionuclides. CompuChem also maintains complete facilities for the handling and analysis of mixed waste.

CompuChem's EPA contracts, valued in excess of $8.8 million over the next 30 months, concern EPA sample analyses associated with the Contract Laboratory Program (CLP). The awards are for both organics and inorganics work and will be performed at the Company's facilities in North Carolina and California. CompuChem is one of 14 labs awarded new organics contracts by the EPA and today ranks as the single largest recipient of analytical testing awards from the EPA.

According to Thomas R. Weschler, Vice President and General Manager of CompuChem's Environmental Division, ''The EPA has made significant changes to the CLP protocols for the first time in five years and many laboratories are unable to meet the new requirements. We made a significant investment in equipment, training, systems and procedures in order to be able to perform to the new levels expected by the EPA.''

Weschler continued, ''CompuChem has differentiated itself in the environmental testing industry - in terms of size, range of capabilities, customer service, experience and quality assurance and control. For example, we believe that CompuChem is the only lab in the United States that provides CLP organics, CLP inorganics, and a mixed waste capability. Our facility in North Carolina houses the largest Gas Chromatography/Mass Spectrometry laboratory in the world.

''We have been associated with the USEPA Contract Laboratory program on a continuous basis since 1980. Our Company has performed analyses for government, commercial and industrial clients in all ten USEPA Regions

accumulating over two million man-hours of analytical experience. These factors, coupled with our proprietary Environmental Site Profile (ESP) system which provides our clients with on-line access to their laboratory data by downloading it directly to their personal computer, make us confident in continued growth of our environmental division.''

CompuChem Corp., through its three subsidiaries, CompuChem Laboratories, Inc., ChemWest Analytical Laboratories, Inc. and Lifedata Medical Services, Inc., provides specialized analytical testing services for the accurate measurement of toxic chemicals and hazardous wastes in the environment, urinalysis collection and testing services for the detection of drugs of abuse, as well as physical examinations for life insurance applicants.

The Company also provides on-line data management systems for use by customers in managing their environmental and drug testing data bases. The Company's environmental testing services are provided to major industrial companies, waste management companies, and consulting engineering firms, as well as the Environmental Protection Agency. The Company's forensic drug testing services are provided to the military, other government agencies and major industrial firms. The Company's physical examination services are provided to insurance carriers nationally.

#90310b0786 11/06/1990 ~Business Wire

COLLEGE POINT, NY (NOV. 6) BUSINESS WIRE - EDO Corp. (NYSE:EDO) Tuesday reported sales and earnings for the fiscal 1990 third quarter and nine months ended Sept. 29, 1990.

Net earnings for the 1990 third quarter were $1,328,000, or 18 cents per share (after preferred dividends of 7 cents per share), on sales of $34,121,000. In the year ago quarter, net earnings were $1,409,000, or 19 cents per share (after preferred dividends of 7 cents per share), on sales of $35,278,000.

For the first nine months of 1990, net earnings were $4,038,000, or 54 cents per share (after preferred dividends of 21 cents per share), on sales of $101,313,000. In the comparable 1989 nine months period, net earnings were $4,347,000, or 59 cents per share (after preferred dividends of 21 cents per share), on sales of $103,388,000.

Net earnings for the 1990 third quarter include an extraordinary gain realized through the purchase, in open market transactions, of approximately $3 million principal amount of EDO's 7 percent convertible subordinated debentures, due 2011, at prices below par value.

The net gain from retirement of the repurchased debentures contributed $837,000 to net earnings in the third quarter and $1,363,000 in the first nine months of 1990.

Gerald Albert, EDO's president and CEO, stated, ''Year to date sales for the company were essentially the same as the prior year period. Reductions in our military systems segment sales were offset by higher sales from the Canadian CF-18 composite fuel tank program in our marine and special products segments.

''Profitability in our military systems segment decreased as a result of an unfavorable mix of high and low margin shipments on lower sales volume.

''Profitability in our marine systems and specialized products segment was adversely affected by costs associated with the consolidation and modernization of our Electro-Ceramic facilities. This consolidation, while reducing operating results during the past few quarters, should begin to positively impact profitability in the fourth quarter.

''Acknowledging the uncertain defense environment, EDO continues to implement initiatives focused on balancing effective cost reductions with strategic business development investments.

''These initiatives will continue to improve our competitive position and have already provided increased commercial product opportunities. Looking forward, we expect the fourth quarter backlog to increase over the current level.''

The backlog of unfilled orders at Sept. 29, 1990 was $153.6 million, vs. $147.8 million at the close of the year ago quarter.

EDO Corp. designs and manufactures advanced electronic and specialized equipment for military and commercial aerospace, marine and industrial markets.

#90310b0792 11/06/1990 ~Business Wire

BASKING RIDGE, N.J. (NOV. 6) BUSINESS WIRE - AT&T Tuesday announced new features and reduced pricing for two of its Global Messaging services, AT&T Enhanced FAX and AT&T Mail.

''The enhancements answer our customers' challenge to provide new options and lower costs for our advanced facsimile services,'' said James Tenner, director

of marketing for AT&T's Global Messaging business. ''AT&T offers one of the most comprehensive lines of global messaging products in the market today, and we're committed to supporting our customers expanding needs for this capability,'' he said.

For AT&T Enhanced FAX, a network-based, store-and- forward fax service, new ''economy delivery'' and ''custom logo'' options will be available January 1, 1991.

Economy delivery will provide a 10 percent price discount when customers schedule their non-urgent messages for delivery during the most economical periods for the AT&T network. That period is typically from 11 p.m. to 5 a.m.

The custom logo option will allow customers to personalize their messages with a corporate logo on the cover sheet for an annual fee of $12. Customers can also use an AT&T logo cover sheet or no cover.

AT&T MailFAX will also offer new customized features, economy delivery and reduced prices, effective January 1, 1991.

AT&T MailFAX is a store-and-forward feature of AT&T Mail that allows customers to create messages on personal computers or terminals for delivery to virtually any Group 3 fax machine worldwide.

AT&T MailFAX will offer custom logos and a custom signature option that will allow customers to add signatures or other personalized images to their fax messages. Logos and signatures will cost $12 a year each. Customers can also customize their own cover sheets or request no covers.

MIAMI (NOV. 6) BUSINESS WIRE - Atlantis Group Inc. (AMEX:AGH) announced Tuesday that its board of directors has approved a long-term strategy for Atlantis that is designed to concentrate the efforts and resources of the company in the plastics industry.

On Nov. 1, Atlantis reported that it had entered into a definitive agreement, subject to regulatory and other conditions, to sell its Western Pioneer Insurance Co. subsidiary to Old Dominion Insurance Co., a Florida-domiciled multi-lines, property and casualty insurance company.

Atlantis announced Tuesday that it had received an offer, subject to certain conditions, including financing, from certain existing management employees of the companies comprising the Atlantis Furniture Group on behalf of an acquisition entity to be formed by them and affiliates of Trivest Inc., an affiliate of Atlantis, to purchase the Atlantis Furniture Group for approximately $25 million.

The Atlantis Furniture Group consists of Loewenstein Inc., Gregson Furniture Industries Inc., Excel Office and Contract Inc. and Southern Wood Products Inc.

Atlantis also announced that its board of directors had appointed a Special Committee of outside directors to consider the existing offer, any competing offers that may be received for the Furniture Group and any other options available to Atlantis to maximize shareholder value with respect to the Furniture Group.

The Special Committee has retained Wheat First Butcher & Singer Capital Markets, a nationally recognized investment banking firm, as its financial adviser and to render an opinion as to the fairness of the existing offer to the shareholders of Atlantis from a financial point of view.

Craig A. Brumfield, Atlantis' chief financial officer, said that he expects the two sale transactions to be consummated by late December or early January. Brumfield added that the sale of the Furniture Group as well as the previously announced sale of Western Pioneer will allow Atlantis to focus all of its attention and resources on its plastics operations.

If completed as contemplated, the sale of these two segments should result in an after-tax gain to Atlantis of approximately $8 million.

NEW ORLEANS (NOV. 6) BUSINESS WIRE - Babcock and Wilcox and General Atomics Tuesday announced their intention to form a joint venture company to supply Gas-Cooled Reactor fuel and other related products.

The new company will be named TRISO, with each party having a 50 percent interest, and will be headquartered in Lynchburg, Va. TRISO's principal product will be coated particle nuclear fuel utilizing both high and low-enriched uranium. Initial TRISO activities will provide fuel, technology, and equipment for the Department of Energy's New Production Reactor Program, the ''NPR-MHTGR.''

TRISO will also supply fuel in the United States for commercial gas-cooled reactors which are expected to be built later in this decade.

General Atomics is a privately-owned company located in San Diego. GA has significant expertise in the areas of fuel design for coated particle fuel, worldwide marketing of High-Temperature Gas-Cooled Reactor systems and fuel, and extensive coated particle fuel manufacturing experience.

GA is the primary developer of gas-cooled nuclear power reactor technology in the United States. Their TRIGA research reactors have operated around the world for over 30 years. GA also carries out the largest and most successful fusion program in private industry.

Babcock and Wilcox's Naval Nuclear Fuel Division, located in Lynchburg, has expertise in the development of large enriched uranium manufacturing facilities, support structures, equipment design, and fuel production to meet Department of Defense and Department of Energy requirements.

Babcock and Wilcox is a major operating unit of McDermott International Inc. (NYSE:MDR), a leading worldwide energy services company. McDermott International Inc. and its subsidiaries manufacture steam-generating equipment, defense products, and tubular products. They also provide engineering and construction services for industrial and utility facilities onshore, and to the oil and gas industry offshore.

APPLETON, WI (NOV. 6) BUSINESS WIRE - Air Wis Services Inc. (NASDAQ/NMS:ARWS) Tuesday reported operating revenues of $54,234,000 for the third quarter of 1990, an increase of 26 percent for the like 1989 period.

The company incurred a net loss of $302,000 for the period, or 3 cents per share, compared with a net loss of $427,000, or 5 cents per share, for the prior year's third quarter. All per share amounts have been adjusted to reflect a 10 percent stock dividend declared in May 1989, and paid the following month.

Aspen Airways Inc. was acquired by Air Wis Services on April 30 of this year. Aspen results have been included along with those of Air Wisconsin Inc. for the third quarter of this year. Aspen operating revenue was $3,916,000 and its net operating loss was $1,475,000 for the period. Aspen's loss reduced net income for the period by 11 cents per share. While fuel prices have hindered efforts to shrink Aspen losses to planned off-season levels, advance bookings for the 1991 skiing season are very encouraging.

Revenue passenger miles (RPMs) rose 17 percent in the quarter to 134.8 million while available seat miles (ASMs) climbed 11 percent to 267.9 million, resulting in a load factor increase to 50.3 percent compared to 47.9 percent a year ago. Aspen accounted for 6.2 million RPMs and 9.8 million ASMs during the quarter.

Net income for the first nine months of 1990 was $1,767,000, or 20 cents per share, slightly above the $1,634,000, or 18 cents per share, earned during the first three quarters of 1989.

Air Wis Services Inc. is a publicly-owned company trading on the OTC National Market System under the symbol ARWS.

#90310b0803 11/06/1990 ~Business Wire

MOUNT AIRY, NC (NOV. 6) BUSINESS WIRE - Workmen's Bancorp Inc. (NASDAQ: WRKB) recorded net income of $891,000, or 55 cents per share for the quarter ended Sept. 30, 1990, it was announced Tuesday by Thomas M. Faw, president and chief executive officer. Workmen's earned $158,000 during the comparable quarter one year ago.

Net income for the nine months ended Sept. 30, 1990 amounted to $2,589,000 compared with $980,000 earned during the nine months which ended Sept. 30, 1989.

Workmen's principal subsidiary, Workmen's Federal Savings Bank, converted from a mutual to a stock savings bank and was acquired by Workmen's Bancorp on Jan. 10, 1990.

In commenting on the results, Faw indicated that the increased earnings for both the quarter and the nine months were led by increases in net interest income.

"Net interest income for the quarter amounted to almost $2,163,000, an increase of $1,252,000 over the approximately $911,000 recorded in the quarter ended Sept. 30, 1989. For the nine months, net interest income amounted to almost $6,446,000 compared to the $3,953,000 earned in the comparable nine months of 1989.

"The improved core earnings also reflected the increase in Workmen's net interest margin which reached 2.99 percent for the September 1990 quarter. Workmen's Bancorp benefitted from the investment of the proceeds of the stock sale," Faw said. "In addition, prior to the conversion of Workmen's Federal, we made provision for, and subsequently charged off, a loan in the principal

sum of $558,000.

"While we are continuing to make adequate provisions for loan losses, no comparable provision was made in the nine months ended Sept. 30, 1990," he added.

Stockholders' equity at Sept. 30, 1990 amounted to $33 million compared to the $15.5 million recorded at Dec. 31, 1989, prior to the conversion of Workmen's Federal.

Savings deposits at Sept. 30, 1990 had increased by almost $5 million from $204,200,000 at Dec. 31, 1989, to $209,100,000 at Sept. 30, 1990. Loans receivable increased $6.2 million from $193.8 million at Dec. 31, 1989 to $200 million at Sept. 30, 1990.

Workmen's Bancorp Inc. is a unitary savings and loan holding company headquartered in Mount Airy. The holding company's subsidiary, Workmen's Federal Savings Bank, operates five retail banking offices; two in Mount Airy and one each in Sparta, Pilot Mountain and King, N.C.

TIMONIUM, MD (NOV. 6) BUSINESS WIRE - Kirschner Medical Corp. (NASDAQ:KMDC) announced Tuesday it has executed a definitive agreement to sell to MIDMARK Corp. of Versailles, Ohio its Chick Medical Products Division located in Greenwood, S.C.

Kirschner said MIDMARK will pay approximately $9 million for Kirschner's surgical table and operating room light business, will lease Kirschner's 80,000 square foot manufacturing facility located in Greenwood, and will receive an option to purchase the land and building in one year for $2.2 million. The closing under the agreement will occur as soon as the specified conditions in the agreement have been completed.

Bruce J. Hegstad, president and CEO of Kirschner, said the sale of Chick meets Kirschner's previously stated objective to concentrate on its core orthopedic business.

MIDMARK is a closely held manufacturer of high quality medical products, including medical examination furniture, casework, sterilizers, stools, stretches, cribs, lighting and procedure carts found in physicians' offices, hospitals, HMO's, and outpatient centers throughout the world.

Kirschner develops, manufactures and markets orthopedic instruments and implants including Reconstructive Surgery and Trauma Devices, Orthopedic Support Products and Medical Endoscopic Systems.

The company operates facilities in Timonium; Fairlawn, N.J.; Delray Beach, Fla.; Marlow, Okla.; Hopkinton, Mass.; and Valencia, Spain.

DAYTON, OHIO (NOV. 6) BUSINESS WIRE - DPL Chairman and Chief Executive Officer Peter H. Forster announced Tuesday that the board of directors has elected Thomas M. Jenkins as group vice president and treasurer of DPL Inc. and group vice president of The Dayton Power and Light Co., effective immediately.

Forster said, ''Mr. Jenkins' background in finance and operations for DP&L, combined with his contributions as chief financial officer of the company, are examples of his proven leadership abilities.''

In this new position, Jenkins will continue to be responsible for the treasury functions, fuel procurement areas, sales forecasting, insurance, system planning and subsidiary operations. Prior to this election, Jenkins was vice president and treasurer of both DPL Inc. and The Dayton Power and Light Co.

Jenkins, age 39, joined DP&L in 1977 as a planning analyst. He has held positions in Power Production at Killen station and in Service Operations prior to becoming assistant treasurer in 1986. Jenkins received his B.A. in economics from Ohio Wesleyan University in 1974 and an M.S. economics from Wright State University in 1975. He serves on the board of trustees of Arts Dayton, the Dayton Foundation Investment Committee and Kettering Chamber of Commerce.

He and his wife, Betsy, and their four daughters, Abby, Jamie, Robyn and Kelsey, reside in Beavercreek, Ohio.

TUCKER, GA (NOV. 6) BUSINESS WIRE - Southern Electronics Corp. (NASDAQ: SECX) Tuesday reported record sales for the first quarter of its 1991 fiscal year.

For the quarter ended Sept. 30 net sales totaled $33,899,000, up 36 percent from $24,897,000 in the same quarter for the previous year. Earnings before extraordinary credit were $1,008,000, up 55 percent compared with $650,000 in the year-earlier period.

Earnings per share before extraordinary credit were 34 cents compared with 22 cents for the year-earlier period. The year-earlier period net earnings included an extraordinary credit of $252,000, or nine cents per share. Net earnings per share totaled 34 cents, compared to 31 cents, a year ago.

Gerald Diamond, president and chief executive officer, said, "With the strong operating results of the first fiscal quarter of 1991, we were able to retire the remaining senior debt of $1 million on Oct. 2, 1990. The company is optimistic about its prospects for fiscal year 1991 as we move forward with our efforts to reach new customers through an increased salesforce."

Southern Electronics Corp. is a distributor of microcomputers, computer peripheral products and cellular telephone products, serving dealers and value-added resellers located primarily in the Southeastern United States.

SIDNEY, OHIO (NOV. 6) BUSINESS WIRE - The board of directors of The Monarch Machine Tool Co., meeting on Nov. 6, voted to decrease the regular quarterly dividend to a new rate of 5 cents per share, payable Dec. 1 to Monarch common shareholders of record on Nov. 20.

The reduction of the dividend by the directors resulted from the uncertainties of the business environment projected for 1991 and from the need to conserve cash for reinvestment to strengthen the position of the company.

The board of directors also declared a dividend of 45 cents per share, payable Dec. 1 to Monarch Series A preferred shareholders of record on Nov. 20.

1991 is the 78th consecutive year in which Monarch has paid dividends to its shareholders.

WESTBURY, NY (NOV. 6) BUSINESS WIRE - New York Testing Laboratories Inc.

(NYLT) Tuesday announced its results for the first nine months of 1990.

During the third quarter of 1989, the company's wholly-owned subsidairy, Laboratory Testing Services Inc. (''LTS'') completed approximately $400,000 on a contract for emergency response work.

LTS did not complete any similar contract in the third quarter of 1990 which accounts for the change in the revenues for this period.

Gerald J. Harvey, the company's president expressed confidence in the continued growth of the company's subsidiary, LTS, which according to Harvey, received orders for new work totalling approximately $1,750,000 in the month of October. The company expects that this work will be completed during 1991.

Harvey also stated that the company is endeavoring to further reduce its operating costs and has implemented new policies and procedures to achieve this goal. The company expects to realize the full benefit of these changes over the course of the coming year.

In order to provide liquidity and additional capital to its businesses, the company is offering for sale certain of its assets. Harvey indicated that he expects the proceeds from the sale of these assets will enable the company to improve its profitability and operating efficiency by allowing the company to invest in new equipment and expand its businesses.

ALBANY, NY (NOV. 6) BUSINESS WIRE - Home & City Savings Bank Tuesday announced that the board of directors has declared a quarterly cash dividend of 33 cents per common share.

The dividend is payable on Dec. 31 to shareholders of record at the close of business on Dec. 14.

Commenting on the third quarter dividend, John J. Brunner, chairman, president and chief executive officer, said ''Since converting to stock ownership in 1986, Home & City has reported solid earnings.

''We have demonstrated an ability to steadily produce income from core banking activities, and despite the current adverse economic conditions, we have still been able to increase our reserves and maintain earnings.''

NEW YORK (NOV. 6) BUSINESS WIRE - Global Utility Fund Inc. October 1990 press release.

Investment Adviser Commentary:

- The Fund outperformed utility stocks in general during September due to a 20 percent weighting in bonds and an overweighted position in gas utility stocks.

- Utility stocks outperformed the S & P 500 during the negative third quarter investment environment.

- Foreign stocks tended to drag down the performance of the Fund in September, as markets in continental Europe underperformed the U.S. market. The falling dollar, however, had a positive impact on the Fund's performance.

- As previously announced, on Oct. 15, 1990, the board of directors approved a proposal to convert the Fund to an open-end mutual fund. A special meeting of shareholders has been called for December 20, 1990 to consider this proposal.

Global Utility Fund Inc. is a diversified closed-end management investment company whose investment objective is to provide total return, without incurring undue risk, by investing primarily in income-producing equity and debt securities of domestic and foreign companies in the utility industries. The Fund's Investment Manager is Wellington Management Co. For further information on the Fund, call 212/214-3334.

HAMPTON, NH (NOV. 6) BUSINESS WIRE - John R. Ranelli has been named chief financial officer for The Timberland Co., an integrated manufacturer of footwear, accesories, and apparel for men and women, according to Jeffrey Swartz, executive vice president.

Ranelli replaces Larry Mihalchik, who recently resigned.

In this position, Ranelli oversees all financial and administrative affairs for the company. Timberland (TBL) is publicly traded on the American Stock Exchange

Prior to his position with Timberland, Ranelli served from 1988 to 1990 as

vice president and treasurer of Ames Department Stores Inc., in Rocky Hill, Conn.

Previously, Ranelli held various positions as CFO/treasurer/division president with companies including Allied Tube and Conduit Manufacturing Co.; ARA Services Inc.; Northern Telecom LTD; and General Motors. He has a proven record of consistently contributing to the improvement of shareholder value throughout his 17 year career.

A Fulbright Scholar, Ranelli received an M.B.A. from the Darmouth's Amos Tuck School, and an A.B. from College of the Holy Cross. He is a member of the board of directors fro College of the Holy Cross, and Easter Seals of Connecticut. A former Navy submarine officer, Ranelli will relocate to New Hampshire with his wife and three children.

The Timberland Co. designs and manufactures premium-quality footwear, apparel and accessories for men and women. Timberland products are sold nationally and in 16 countries worldwide.

The company has been a leader in technical innovation, developing the first guaranteed waterproof leather boots, mastering the traditional art of handsewn shoes, and developing an exclusive GORE-TEX LEATHER liner technology.

#90310c0020 11/06/1990 ~Comtex

WASHINGTON (NOV. 6) COMTEX - The 8-K report filed at the SEC shows Centurion Mines Corp.(TICKER: CTMC) was served with a complaint filed in the Third Judicial District Court in Tooele County, Utah, involving a dispute over approximately 200 acres of property located in Utah.

In 1988, Centurion leased the property, and the plaintiff claims Centurion failed to file proof of labor on certain claims, causing a loss of such claims; failed to make a $4,000 lease payment and to reassign claims to the plaintiff at the termination of the lease; failed to deliver reports on the claims; located mining claims in Centurion's name covering claims leased to Centurion; and breached its duty to the plaintiff.

Centurion denies all allegations.

The plaintiff is seeking up to $5.0 million in punitive damages and up to $2.0 million in specific damages.

Centurion states the dispute does not affect its joint venture with Crown Resources Corp.(TICKER: CRRS).

The company reports that until Nov. 1, it did not believe the suit would be actively pursued, but now believes the suit will be pursued.

Centurion says it will vigorously defend itself, believing the suit to be frivolous.

In other news, on Oct. 1, 1990, effective Aug. 1, 1990, Centurion entered into the First Amendment to Mining Lease with Sharon Steel Corp. (TICKER: SHAR), amending a lease dated Aug. 1, 1985, and covering approximately 1,100 acres in the main Tintic District of Juab and Utah counties in Utah.

WASHINGTON (NOV. 6) COMTEX - The 8-K report filed at the SEC shows on Oct. 15 1990, CIP Corp's board of directors determined to elect a new board of directors and officers for its majority-owned subsidiary, Inter-Continental Management Co. (ICMC).

CIP, as the majority shareholder of ICMC, took the following actions:

- Removed the current directors and officer of ICMC

- Elected Fred Morr as president and treasurer and Thomas J. Westerfield as VP and secretary of ICMC.

CIP's board of directors also determined that the above persons should be elected officers and directors of ICMC's subsidiaries and affiliates and that ICMC, its subsidiaries and affiliates should be placed under the jurisdiction

of the bankruptcy court.

On Oct. 22, 1990, ICMC filed a voluntary petition for reorganization under Chapter 11 of the bankruptcy code.

CIP Corp's two wholly owned subsidiaries, RAR Leasing Inc. and Sobod Inc., also filed Chapter 11 petitions on the same date.

In addition, the following subsidiaries of ICMC filed Chapter 11 petitions on the same date: J.B. Buse Inc., James R. Williams Investment Co., Gulf Coast CFM Inc., and Delcoast CFM Inc.

CIP Corp's executive office is located at 2174 Seymour Ave., Cincinnati, Ohio 45237 and its telephone number is (513) 731-1200.

WASHINGTON (NOV. 6) COMTEX - The 8-K report filed at the SEC shows on Oct. 26 1990, Payline Systems Inc. reached an agreement with Hampton Group Inc. on Oct. 26, 1990, with respect to an equity investment and recapitalization proposal.

The letter of agreement provides for Hampton to immediately purchase from Payline 5.50 million shares of the company's common stock for $500,000, in a private placement cash transaction.

It also provides that Hampton or other new investors be offered the right to purchase an additional $10.0 million of the company's common stock at prices and terms yet to be determined.

Proceeds from such private placement are to be used for additional capitalization of Payline for future acquisitions, both in the related telecommunications industry and other non-related industries.

The letter also provides that Hampton will identify and present potential acquisition candidates to Payline.

Hampton is to be granted the right to purchase Payline's preferred shares in exchange for a nonrecourse promissory note.

#90310c0050 11/06/1990 ~Comtex

WASHINGTON (NOV. 6) COMTEX - The 8-K report filed at the SEC shows lack of necessary financing has forced the company to discontinue its substrate business.

The company reports that although it had produced excellent products for over a year, it had not succeeded in producing production quantities with acceptable quality.

In August, 1990, the company says it liquidated all its assets not directly related to its technology.

Negotiations are underway, it reports, with several prospective buyers and/or joint venture partners with respect to its equipment.

The production facility in Campbell, California, was closed and offices were relocated to Brentwood, California.

The company's offices are located at 5001 Cabrillo Point, Byron, CA 95413, and its telephone number is (415) 634-2116.

TOKYO (NOV. 6) - Institutional investors and officials said Tuesday they expected Japan's participation in the current U.S. Treasury bond auction to remain prudent at 20 percent or less.

The U.S. government plans to use the quarterly auction to borrow a record of nearly 35 billion dollars between Tuesday and Thursday. The funds are needed to finance the federal budget deficit and service official debt.

A finance ministry official said he expected Japanese investors to buy 20 percent of the total.

In the last auction in August, Japanese bought 20 percent of U.S. debt sold, a drop from 30 percent in May and 30 to 40 percent three months earlier, the ministry said.

According to the economic newspaper Nihon Keizai Shimbun, a number of institutional investors have expressed a lack of enthusiasm for U.S. debt.

It cited Nippon Life, Daiwa Investment Trust, Yamaichi Investment Trust Management Co., Nikko Securities Co., Meiji Mutual Life and Dai+Ichi Mutual.

Others said they would not participate at all in the bond issue, including Sumitomo Life Insurance Co., Asahi Mutual Life Insurance Co., Mitsui Mutual

Life Insurance, Nikko Securities Investment Trust and Management Co. and Mitsubishi Trust and Banking Corp.

Finance specialists said increasing Japanese indifference in U.S. debt was due primarily to the closing gap between local and U.S. interest rates, which stood at about one percentage point.

Prospects for a stronger yen were also discouraging Japanese buyers, and few investors here were bullish on the U.S. Treasury bond markets in the short+term.

The future U.S. monetary policy, which was expected to loosen, has been put into question by inflationary pressures with the higher cost of imported oil, a factor which has also dampened prospects for overall economic growth.

In addition, large Japanese investors have suffered severe losses on the Tokyo Stock Exchange, resulting in a drop in their buying power.

Vice Finance Minister Makoto Utsumi, who is in charge of international affairs expressed an opposing view last week when he said he did not expect Japanese investors to bow out of this week's U.S. bond auction.

Mr. Utsumi said that a sharp drop in purchases of foreign bonds in September was caused by factors including the practice of insurance companies injecting funds into banks twice yearly to help them window-dress their balance sheets.

"In October we started seeing very substantial increase in net acquisitions of foreign currency-denominated bonds," he said, adding that the diversification of Japanese portfolios to include foreign assets was "deeply rooted."

Most Japanese interest was expected in three-year bonds, market sources said.

HONG KONG (NOV. 6) - Foreign investment in Hong Kong's manufacturing industries went up 14 percent to more than 29.7 billion Hong Kong dollars (3.8 billion U.S.) last year, the Industry Department said Tuesday.

T.H. Barma, director of the department, said the figure was nearly three times the 1984 total of 11.4 billion Hong Kong dollars (1.5 billion U.S.) when the first such survey was conducted.

He said the relative position of the big four investors had not changed with the United States remaining the largest, accounting for 31 percent, followed by Japan, 29 percent, China, 11 percent, and Britain, seven percent.

"Although Japan remained in second place, it accounted for nearly half (47

percent) of total overseas investment made in Hong Kong's manufacturing industries in 1989," Mr. Barma said.

Nearly 60 percent of total overseas investment was in the electronics, electrical products, textiles and clothing and chemical products industries, according to the survey conducted from June to September this year on 589 companies that reported an overseas investment interest.

TAIPEI (NOV. 6) - Taiwan's foreign trade regained momentum in October to score rises of nine percent and 14.2 percent in exports and imports respectively over a year earlier, government statistics showed Tuesday.

Exports in October amounted to 6.21 billion U.S. dollars, while imports in the month totalled 5.02 billion, leaving a trade surplus of 1.19 billion dollars, an 8.6 percent drop over October of last year, according to the Directorate General of Budget, Accounting and Statistics.

Economic officials attributed October's trade rally to a stabilized local currency against the greenback and a drop in the value of the Taiwan dollar against the Japanese yen and major European units over the past two months.

The once booming foreign trade had suffered from slower growth with several monthly declines in both imports and exports this year in a domestic economic slowdown mainly caused by a plunging stock market.

Exports in the January-October period inched up 0.5 percent to 55.67 billion dollars, while imports increased 3.6 percent to 45.19 billion dollars, the government office said.

The country's trade surplus in the first ten months of 1990 dipped 10.9 per cent over the same period of last year to 10.48 billion dollars, it said.

The trade surplus with the United States, the island's largest trading partner shed 23.8 percent to 7.8 billion dollars in the first ten months of 1990 amid Taipei's efforts to narrow the trade gap which hit 12 billion dollars last year, it said.

The U.S. took a 33 percent share of Taiwan's overall exports in the January-October period, followed by Japan with 12.4 percent, it added.

The long-standing trade deficit with Japan, Taiwan's biggest supplier, surged 8.6 percent to 6.27 billion dollars in the same period.

Japan sold products worth 13.15 billion dollars to the export-oriented island in the first ten months, accounting for 29.1 percent of Taiwan's total imports

it said.

KUALA LUMPUR, Nov 6 (AFP) - Malaysia's trade surplus shrank further to 342.8 million dollars (127 million U.S.) in the first eight months of the year,

falling 94 percent from the same period last year, Bernama news agency said Tuesday.

Exports totalled 49.532 billion dollars (18.345 billion U.S.) in the first eight months of the year, up 13.3 percent on the same period last year while imports rose 28.8 percent to 49.189 billion dollars (18.218 billion U.S.).

Malaysia suffered a trade deficit of 281.6 million dollars (104.3 million U.S.) in August compared to a deficit of 119 million dollars (44.1 million U.S.) in July and a surplus of 776.5 million dollars (287.6 million U.S.) a year earlier.

Bernama quoted the statistics department as saying that if the merchandise surplus continued to shrink until the end of the year, Malaysia's current account deficit looked certain to deteriorate further.

"This deterioration may weaken the ringgit," the department said.

MANILA (NOV. 6) - The Asian Development Bank (ADB) approved Tuesday an equity investment of 250 million baht (10 million dollars) and a 30 million-dollar loan to the Bangkok Expressway Company Ltd. (BECL) of Thailand.

The project involves the construction of an elevated, 37-kilometer (23-mile), multi-lane toll expressway system aimed at easing severe traffic jams in the Thai capital, the ADB said in a written statement.

The project would be operated under a 30-year, build, operate and transfer concept between BECL and the Expressways and Rapid Transit Authority of Thailand.

Financing will come from a local consortium of 11 Thai banks and an offshore consortium of 30 foreign banks, and includes the tapping of the local capital market by the direct issuance of medium-term notes supported by local and offshore bank guarantees.

The 1.05 billion-dollar project, expected to be completed in 1995, includes an option for an extension to Don Muang airport.

BECL is a public limited company incorporated in 1987. The major shareholder is the Japan-based international construction company Kumagai Gumi Co. Ltd.

BANGKOK, Nov 6 (AFP) - Thailand's major commercial banks have decided to raise their prime lending rate from 15 percent to 15.75 percent to cope with a tight money situation aggravated by the Gulf crisis, banking sources said Tuesday.

The raise, to be put into effect Wednesday, might affect the country's economic growth as it could discourage major investors from undertaking big projects, some analysts said.

The prime rate is a special lending interest rates banks offer to their major preferred borrowers with good credit standing.

MANILA (NOV. 6) - The Asian Development Bank (ADB) approved a 125 million dollar loan and three technical assistance grants totalling 500,000 dollars to Bangladesh, an ADB statement released here Tuesday said.

The loan will support a development program for Bangladesh's foodcrop sector that would increase rice output by four per cent and wheat yields by two per cent in order to meet the country's food requirements.

The interest-free loan has a 40-year maturity period, including a grace period of 10 years, the Manila-based ADB said.

The grants will go to formulating a new tariff structure for agriculture, identification of options for ground and surface water development and strengthening a food planning and monitoring unit, the ADB statement added.

TOKYO (NOV. 6) - Japanese shipbuilder Sumitomo Heavy Industries Ltd. said Tuesday its net profit climbed 24.1 percent from a year earlier to 1.3 billion yen (nine million U.S. dollars) in the six months to September.

Sales edged up 0.7 percent to 105 billion yen (761 million dollars) in the same period, the company said. General machinery sales rose 0.2 percent to 31 billion yen (225 million dollars) while sales of other machinery climbed 11.1 percent to 41 billion yen (297 million dollars).

But sales of ships and steel fell 6.9 percent to 30 billion yen (217 million dollars) and sales of quantum devices such as electron-beam irradiation equipment plunged 26.9 percent to three billion yen (22 million dollars).

Sumitomo forecast a net profit of 4.5 billion yen (33 million dollars) for the full year with sales reaching 280 billion yen (two billion dollars).

SUVA (NOV. 6) - Fiji's military-backed government has announced plans to cut defense spending, reduce import tariffs and price controls, deregulate the labour market and reform taxes.

Finance Minister Josevata Kamikamica told a news conference here Monday that measures would be introduced to "set the economic system free from ... a network of regulations that prevent the operation of free markets."

He said the country hoped to follow the economic successes of the four Asian Tigers: Singapore, Hong Kong, Taiwan and South Korea.

Mr. Kamikamica said Fiji's armed forces had grown in strength from 2,000 men before two military coups in 1987, to 5,015 today.

"It would take time to contain expenditure on the army but that is what we want to do," he said.

The defence budget was about five million Fiji dollars (4.45 million U.S.) before the coups and some 30 million dollars now.

The government intended to reduce import tariffs to "increase competition," he said.

Tariffs on some goods were currently as high as 107 per cent, but Mr. Kamikamica said attempts to isolate Fiji from global prices in the 20 years since independence were unrealistic.

He said imports of goods and services, even after two decades of import replacement policies, amounted to about 50 per cent of gross domestic product.

"With such a large import requirement, the country must export, and it must accept world prices as the determinant of what it produces," he said. "It has done so in tourism and should do so in manufactured goods and primary products."

He pointed to the Asian tigers, West Germany and Japan as examples of nations that "achieved success through exporting."

Mr. Kamikamica cited Fiji's construction industry as an example of a sector suffering from high prices of protected inputs.

"This in turn inhibits investment," he said.

In parallel, the government would reduce price controls, which were originally imposed to ensure that industries protected by high tariffs (like locally manufactured milk) did not make unreasonably high profits.

SINGAPORE (NOV. 6) - Singapore's Keppel Shipyard has been awarded a 14 million Singapore dollar (8.2 million U.S.) contract from Australia to convert a bulk carrier, Keppel announced Tuesday.

Keppel, part of the government-controlled Keppel Corp. Ltd., said the job involved the conversion of 32,452-dwt. bulk carrier M.V. Audax, owned by Austrlian National Line Limited (ANL), into a self-discharging bulk carrier.

The Senior General Manager of Keppel Shipyard, Kung Yew Hock, said Keppel was the first shipyard in Singapore "to be entrusted to carry out a complex conversion of this nature."

Current projects at Keppel included the conversion of the U.S.-owned Conkouati (formerly Enterprise 1) and the Russian-owned Sovietskaya Rossiya. The former is being converted from a storage tanker into a floating production storage offloading facility while the latter is converted from a whaling vessel into the world's largest fish factory ship.

Another Keppel company, Singmarine Industries, is in the process of completing a 120-TEU roll-on, roll-off container vessel for the ANL group.

NUREMBERG (NOV. 6) - The number of people out of work rose in eastern Germany but declined in the western part of the country in October, in comparison to the same month last year, it was announced here Tuesday.

The Federal Labor Office said the number of unemployed in former East Germany rose during the twelve-month period by 92,900 to 537,800, meaning that 6.1 of the population had no job.

But the number of jobless in western Germany went down by 186,200 to 1,687,434 people, or to 6.5 per cent, during the same period, it said.

Overall, 2,225,233 people were without work in Germany at the end of October, the Office added.

#90310d3660 11/06/1990 ~French/German News Agency

COLOMBO (NOV. 6) - The rebel-held Jaffna hospital in northern Sri Lanka, closed since Tamil guerrillas and government troops renewed fighting on June 11, was reopened Tuesday by the International Committee of the Red Cross, officials said.

The hospital was reopened after months of negotiations held by the Red Cross with leaders of the Liberation Tigers of Tamil Eelam (LTTE) and the Sri Lankan government, a Red Cross official here said.

He said the Tigers had vacated the large hospital, which caters to some 800,000 people in the Jaffna peninsula, and that ICRC officials were busy marking the boundary of a 350-meter (yard) safety zone around the facility.

Colombo vacated troops from a nearby army-held fort on September 26 and asked the Red Cross to move into the fort to facilitate the reopening of the hospital.

WARSAW (NOV. 6) - The number of people unemployed in Poland exceeded the level of one million at the end of October, the formerly Communist Trybuna daily newspaper reported on Tuesday.

The number of jobs available totalled 63,000 and the workforce totals 18 million people.

Governmental forecasts, published by the press on Tuesday, said that unemployment could double by the end of 1991 to total two million people.

The same forecasts, which were debated by the government on Monday, foresee an inflation rate of 52 percent and an increase of gross national product of four percent.

Output should grow by 5.5 percent and the trade balance could show a deficit of 900 million dollars in taking account of high oil prices.

#90310d3800 11/06/1990 ~French/German News Agency

LONDON (NOV. 6) - North Sea Brent crude oil for December delivery dipped to 31.30 dollars per barrel here Tuesday morning, continuing the easier trend in

motion since the start of the week, before stabilising to stand at 31.45.

The fall, from 32.80 dollars overnight took the total loss in the London market's benchmark quotation since the start of the week to 2.55 dollars per barrel, and came in line with weakening prices in other world crude oil markets.

Analyst Simon Irwin of Kleinwort Benson said that the slide reflected an inevitable markdown from the 34 dollar peak Friday.

"Everyone went home Friday discounted for an outbreak of war (in the Gulf) during the weekend. It didn't happen, so the market had only one way to go."

And Richard Jones of County NatWest said that the market had reacted to news that Saudi Arabian output had reached 8.2 million barrels per day and could go to 8.5 before long. He said that operators "are ignoring for the time being the growing feeling that conflict is around the corner."

Increasing signs that the current world downturn in economic activity could be steeper than anticipated were also weighing on sentiment, analysts said.

#90310d3910 11/06/1990 ~French/German News Agency

Jeddah, Saudi Arabia (NOV. 6) - U.S. troops based in Saudi Arabia would be under a joint command with Saudi forces in the event of an Iraqi attack but under American command in military operations outside the Saudi border, Western diplomats said Tuesday.

A diplomat told the German News Agency dpa that agreement on a field command and control of U.S. forces confronting Iraq was reached Monday night during talks in the Red Sea port of Jeddah between U.S. Secretary of State James Baker and Saudi Arabia's King Fahd and his cabinet.

The agreement provided for U.S. and Saudi forces to work under a joint command to defend Saudi Arabia against any Iraqi assault, the diplomat said.

But in the event of military operations inside Iraq or Iraqi-occupied Kuwait, U.S. troops would be under American command and their operations would be coordinated at the highest political level, the diplomat added.

The United States is spearheading an estimated 300,000-strong multinational force deployed in Saudi Arabia and other Gulf states to thwart any Iraqi attack, following Iraq's invasion of Kuwait on August 2.

TOKYO (NOV. 6) - The Asian Bankers Association wound up its annual meeting here Tuesday with newly elected chairman Tetsuya Horie calling for increased exchanges of credit information between regional banks.

"It is important to increase the efficiency of financial institutions as well as to improve the financial markets and systems in each country," the president of Long-Term Credit Bank of Japan Ltd. told a news conference.

Mr. Horie also called one the association's 107 member banks to boost exchanges between management, implement training programs and undertake joint studies to identify major challenges facing the Asia-Pacific region.

The proposed "credit information system" would complement existing exchanges of data between correspondent banks in the region. Such exchanges could be conducted in a "more friendly manner" although "there are various matters to be considered such as confidentiality," Mr. Horie said.

The new chairman said the two-day meeting repeatedly heard "negative views" towards the establishment of a protectionist trading bloc in the Asia-Pacific region and moves towards using a single currency for regional trade.

"Cooperation in this region will be different in nature from the (European Economic Community) single market. The Asia-Pacific region should be more diversified and outwardly open." he said.

"To further enhance the use of the yen in international transactions would not be compatible with the direction in which we are heading," he said.

Mr. Horie was elected as the association's chairman to replace Patrick Yeoh, president of Development Bank of Singapore Ltd. Reginald Nicolson, managing director of Australia and New Zealand Banking Group Ltd., was elected deputy.

The association, formed in Taiwan in 1981 and now comprising 93 banks from the Asia-Pacific region plus 14 non-regional banks, said it would hold its next annual meeting in Malaysia.

#90310d4110 11/06/1990 ~French/German News Agency

NUREMBERG, Germany (NOV. 6) - October, the month of German unification, saw unemployment in East Germany soar, overtaking the West German rate for the first time, the Federal Labour Office reported Tuesday.

In former West Germany, unemployment affected 5.8 percent of the workforce, a fall of 0.1 percent compared with September, it said.

But in the five Laender (states) that were East Germany, the rate soared from five percent in September to 6.1 percent, the agency said.

The president of the Federal Labour Office, Heinrich Franke, said the "upswing" in employment in the western part of the country was partly due to a slowdown in migration from the east after unification.

In the east, however, "necessary structural changes, for the time being, are eliminating more jobs than are being created," Mr. Franke said.

Unemployment in the united Germany in October was 2,225,000 after 2,172,000 in September.

The East German Laender joined the Federal Republic of Germany on October 3, after successive months of economic crisis that required repeated financial bailouts by Bonn.

The number of registered jobless in former East German territory rose 92,900 during October, to reach 537,800, a rise of 21 per cent, the office reported.

But added to this are East Germans who are "partially unemployed" - who still report for duty at state firms, and are still paid, but have little or no work to do as the enterprise is bankrupt in all but name.

There are 1.78 million East Germans who fall into this category, a rise of 39,300 over the month. Many of them are expected to join the dole queue in the coming weeks.

Some analysts predict that unemployment in former East Germany could rise to 20 percent before investment and economic growth take effect.

BRUSSELS (NOV. 6) - Belgium is to set up a "welcome center" for Japanese

firms, the Belgian foreign ministry confirmed here Tuesday following a meeting Monday between Economic Affairs Minister Willy Claes and Japanese businessmen.

The announcement came after annual talks between Belgium and Japan on industrial and technological cooperation, which Mr. Claes said were aimed at attracting Japanese business to Belgium.

The minister and his colleagues from regional government met with Japanese businessmen already active in Belgium and with representatives of major Belgian firms active in Japan.

In 1989 the value of Japanese investments in Belgium almost doubled to about 11.5 billion francs (360 million dollars).

There are about 200 Japanese firms in the country, employing around 2,000 people.

#90310d4190 11/06/1990 ~French/German News Agency

GENEVA (NOV. 6) - A war in the Gulf region could unleash a world ecological catastrophe comparable with the Chernobyl nuclear reactor accident, King Hussein said here Tuesday.

The possible use of chemical and biological weapons combined with destruction of oil fields would not only have serious environmental consquences for the region but for the whole planet, said King Hussein.

The Jordanian monarch was addressing the World Climate Conference here which is due to end Wednesday after ten days of discussion on measures to combat global warming.

British Prime Minister Margaret Thatcher told the conference that the threat of temperature increases in the global climate was real enough ''to make changes and sacrifices, so that we do not live at the expense of future generations.''

King Hussein conferred with French President Francois Mitterrand Monday in Paris where he laid out plans for an ''Arab solution'' to the Gulf crisis. He also had talks with Thatcher in Geneva on Tuesday morning.

#90310d4280 11/06/1990 ~French/German News Agency

TOKYO (NOV. 6) - Japan's Yamanouchi Pharmaceuticals Co. Ltd. said Tuesday its net profit climbed 18.7 per cent from a year earlier to 16.2 billion yen (117 million dollars) in the six months to September.

The company, one of the country's leading drug manufacturers and currently engaged in an aggressive expansion abroad, said sales grew 8.2 per cent to 106 billion yen in the same period (768 million dollars).

Sales of circulatory, respiratory, digestive and metabolic agents rose along with hormone turnover while sales of nervous and sensory agents, vitamins and antibiotics fell, the company said.

Net profit is forecast to reach 32 billion yen (232 million dollars) in the full year on sales of 210 billion yen (1.5 billion dollars).

-30- 938

#90310d4300 11/06/1990 ~French/German News Agency

TOKYO (NOV. 6) - Japan's five major life insurance firms suffered an on-paper loss of some 1.3 trillion yen (10 billion dollars) in transactions of stocks and bonds in the six months to September, Jiji Press said Tuesday.

The amount was a gap between the book value and the actual prices of securities at the end of September.

Without quoting sources, Jiji said the loss incurred by the insurance companies stemmed from sharp drops in the prices of Japanese stocks in August and September.

The five firms were Nihon Life Insurance Co., Dai-Ichi Life Insurance Co.,

Sumitomo Life Insurance Co., Meiji Life Insurance Co. and Asahi Life Insurance Co., all major investors in securities.

#90310d4310 11/06/1990 ~French/German News Agency
MANILA (NOV. 6) - Ayala Corp., a Philippine first real estate and financial holding, has set up two new companies including one to manage an industrial park in partnership with Mitsubishi and Kawasaki corporations of Japan, company spokesmen said Tuesday.

A 250 million peso (8.93 million dollar) holding company, Laguna Technopark Inc., will cover the operation and management of an industrial park that Ayala is setting up in Laguna province just outside the capital.

Ayala Corp. will own 60 per cent of Laguna Technopark with the Japanese firms owning the balance, company spokesmen said.

The one billion peso (35.7 million dollar) Ayala Hotels Inc. will serve as a holding company for two luxury hotels owned by Ayala as well as for the minority holdings that the real-estate firm has in two more luxury hotels still under construction in Manila.

This development appears to be an extension of the strategy of Ayala Corp. which transformed itself into a holding company for firms under the Ayala group of corporations and spun-off its flagship real-estate operations into a separate company called Ayala Land last year.

Ayala Corp., which has diversified into food processing and electronics, posted a net income of 1.24 billion pesos (54 million dollars) last year.

SEOUL (NOV. 6) - South Korea's shipyards received no orders in October as concern over the Gulf situation froze demand, news reports said Tuesday.

It was the first time since May 1988 that a month had gone by without sales, the national news agency, Yonhap, said.

The agency, quoting the Korea Shipbuilders Association, said that in addition to fears of a Gulf war, record high prices were keeping customers away.

South Korean shipbuilders were also more picky about customers, as they had enjoyed a very good year so far, Yonhap said.

Despite the lack of orders in October, 1990 will still be a very good year for the industry, it said.

-30- 830
#90310d4370 11/06/1990 ~French/German News Agency
Hong Kong (NOV. 6) - Overseas investment in Hong Kong's manufacturing

industry rose 14 percent to 29.7 billion Hongkong dollars (3.8 billion U.S. dollars) in 1989, according to a government survey released Tuesday.

However an overwhelming majority of foreign firms surveyed said that future political prospects were either unfavourable or neutral. Only 25 percent viewed future prospects as being favourable.

Commenting on the survey results, Tybejee Barma, the Director of Industry, said politics was only one factor in the assessment of foreign companies. He stressed that they found many other factors to be positive.

Despite the political traumas of 1989, investment had risen and was expected to stay at the same level this year, he said.

The United States remained the single largest investor in the colony, followed by Japan, which last year accounted for nearly half of all new investments.

Chinese companies were the third biggest investors and British firms were fourth in the league despite the fact that this was the only country showing a decline in its investment commitments.

#90310d4380 11/06/1990 ~French/German News Agency

BAGHDAD (NOV. 6) - There is now a 60 percent chance of peace in the Gulf, PLO Chairman Yasser Arafat declared here after talks with former Japanese prime minister Yasuhiro Nakasone.

Mr. Arafat and Mr. Nakasone late Monday discussed "the possibilities of military confrontation" in the Gulf, where some 340,000 foreign forces have assembled since Iraq's invasion of Kuwait, the Iraqi News Agency (INA) said.

The chances are now "60 percent for peace and 40 percent for war," the Palestine Liberation Organisation chief said.

"Chances for peace will be even greater after (Tuesday's) Congressional elections, as (U.S. President George) Bush could be under less pressure then than in the past few days," according to Mr. Arafat.

The PLO leader met Tuesday with Iraqi Foreign Minister Tareq Aziz to consider "the threats against the Arabs because of the foreign military presence on Arab territory, as well as the Palestinian question," INA reported.

#90310d4390 11/06/1990 ~French/German News Agency

JAKARTA (NOV. 6) - Indonesia Tuesday rejected an offer of peace talks from Fretilin, the rebel movement in the former Portuguese colony of East Timor,

describing it as "an old song unworthy of comment."

"The Indonesian government does not recognise the existence of Fretilin as representing the people of East Timor ... So why should we heed them," the official Antara news agency quoted Foreign Minister Ali Alatas as saying.

Xanana Gusmao, a leader of the East Timor National Liberation Front (Fretilin) which has been waging a guerilla war since Jakarta annexed the territory in 1976, told Australian journalists recently he was "ready to discuss any project for a solution without preconditions under the United Nations auspices".

Speaking from his mountain hideout in East Timor, Mr. Gusmao called on Indonesia to adopt "a more flexible policy" and proposed negotiations "between the people of East Timor and Jakarta" leaving out Portugal, which the United Nations continues to recognize as the territory's administering power.

"If Jakarta does not adopt a more flexible attitude, Fretilin is prepared to continue to resist for as long as necessary", he said, according to reports carried by the Australian Broadcasting Corporation and published by the The Age of Melbourne last week.

Indonesia invaded East Timor in late 1975 after Fretilin proclaimed it independent as the Portugese administration withdrew. Jakarta unilaterally incorporated the territory of some 600,000 people six months later.

As far as the Jakarta was concerned, the issue was resolved when the majority of East Timorese voted for integration with Indonesia when the territory was decolonised, Mr. Alatas said.

Indonesia is currently holding talks with Portugal in New York under the auspices of U.N. Secretary General Javier Perez de Cuellar.

#90310d4410 11/06/1990 ~French/German News Agency

MBARARA, UGANDA (NOV. 6) - News of the killing of Rwandan rebel leader Major-General Fred Rwigyema and his two most senior commanders has shocked Uganda, where they were almost national heroes.

Maj.-Gen. Rwigyema, like his right-hand men Major Peter Bayingana and Major Chris Bunyenyezi, fought with Ugandan President Yoweri Museveni when he was a guerrilla leader in the early 1980s. After Mr. Museveni took power in 1986, Maj.-Gen. Rwigyema became deputy commander of Uganda's armed forces.

All three rebel leaders fled Rwanda as children to escape tribal massacres in the late 1950s when their minority Tutsi tribe, Rwanda's traditional rulers,

lost power to the majority Hutu tribe in the runup to independence in 1962.

Uganda's role in the Rwandan conflict has raised many questions. The rebels, mostly Ugandan army deserters of Rwandan origin, invaded Rwanda from this neighbouring country on October 1.

The Ugandan government has denied supporting the rebels or having advance warning of their plans. But Western diplomats say the massing of about 4,000 rebels near the border could not have escaped notice.

The estimated 250,000 Rwandan exiles in Uganda almost certainly helped bankroll the rebels, who took arms and ammunition when they deserted the Ugandan army.

Their fight for the right to return to Rwanda has aroused the sympathy of many ordinary Ugandans.

They draw parallels between the Rwandan rebels' struggle and Mr. Museveni's years in the bush, comparing Rwanda under President Juvenal Habyarimana with Uganda under former president Milton Obote, despised for human rights abuses and corruption.

"Why shouldn't the Rwandans go home?" a local businessman asked here. "They've wanted to go back for so long."

"Before they fought with us, and now they're fighting for themselves," an official in this town near the border said recently.

Meanwhile, the rebels themselves, still reeeling from the loss of their three top men, say they are digging in for a hit-and-run guerrilla war that could last months or even years.

#90310d4460 11/06/1990 ~French/German News Agency

Essen (NOV. 6) - The German electrical utility and industrials concern Rwe reported here Tuesday a net profit of 784 million marks (523 million dollars) in the 1989-90 business year, up 25 percent from 629 million marks the year before.

Rwe chairman Friedhelm Gieske, presenting the results for the year ending last June 30, said the concern's group turnover reached 44.2 billion marks, up 13.5 percent from the 1988-89 figure.

He attributed the strong turnover growth to the first-time inclusion of the consolidated results of several subsidiaries, among them the construction firm Hochtief. Without such special factors, Rwe's turnover rise would have been a more modest 3.8 percent.

Gieske said the company would propose to the main shareholders' meeting on December 13 a dividend payout of 20 percent per share, up from last year's 18 per cent and from the 16 percent dividend two years ago.

Electrical utility business accounted for 43 percent of the overall group turnover of the Rwe concern, he reported.

The remaining 57 percent came from the company's various divisions, miningraw materials, machinebuildding, petroleumchemicals, construction, and waste management.

#90310d4490 11/06/1990 ~French/German News Agency

PHNOM PENH (NOV. 6) - An extraordinary session of the Cambodian National Assembly here Tuesday backed the government's decision to accept a U.N. Security Council peace blueprint on war-plagued Cambodia.

The meeting also approved three ministerial appointments already filled -- foreign affairs, commerce and agriculture -- and formally ended a friendship and cooperation treaty with what used to be East Germany, deputies said.

Parliament chairman Chea Sim, in a closing address, also called on the three-party resistance to reconvene a joint interim authority, the Supreme National Council (SNC).

He said the suspended first meeting of the body should gather again with 12 members to start negotiations "on the key problems of a political settlement of the Cambodian problem."

These included a "voluntary ceasefire, cessation of overseas military aid, the sending of an SNC delegation to the United Nations, the repatriation of refugees, free and fair general elections and ensuring that defence of independence and national sovereignty remains a crucial issue."

The SNC was set up September 10 at a meeting of the four warring factions in Jakarta but its first meeting was suspended in Bangkok due to differences over the final composition of the body that will head the country and take its U.N. seat until elections.

The two sides could not agree on the number of members or the leadership of the body, with Phnom Penh demanding parity and rejecting resistance leader Prince Norodom Sihanouk as chairman unless its Prime Minister Hun Sen became vice chairman.

The SNC was set up under a blueprint formulated by the five permanent members of the U.N. Security Council -- Britain, China, France, the Soviet Union and

the United States.

That plan also envisaged the SNC delegating certain administrative functions and the organising of elections to the United Nations during a transition period beginning with a ceasefire.

Munich (NOV. 6) - The German machinebuilding, vehicles and industrial group M.A.N. said here Tuesday it gained new orders of 4.66 billion marks (3.1 billion dollars) in the first quarter of the new business year, up 19 percent on the same period last year.

Maschinenfabrik-Augsburg-Nuremberg company chairman Klaus Goette said turnover in the July 1-September 30 period of the 199091 year had risen by 13 percent to 3.57 billion marks.

The figures were a continuation of the strong performance last year, when M.A.N. netted a 327.7 million mark surplus, up 19 percent from 198889, and turnover of 18.9 billion marks, up 11 percent.

Goette said that as of September 30, the M.A.N. concern had over 17.9 billion marks' worth of orders on its books, 10 percent higher than a year earlier.

NEW DELHI (NOV. 6) - India appeared heading Tuesday for an extended period of political uncertainty and religious turmoil with a snap poll seen as the only solution to the political impasse.

Even as the 11-month-old administration of Vishwanath Pratap Singh was set to bow out of office, Chandra Shekhar, 63, who has always been an also-ran for the post for the past decade, was close to fulfilling his life's ambition to occupy the chair of the prime minister.

Indian President Ramaswamy Venkataraman, a titular head in ordinary circumstances, holds the key to the country's political future.

With the Singh government likely to be defeated in a confidence vote in the Lok Sabha (lower house of Parliament) Wednesday, any incumbent government is bound to be of purely interim nature, with survival entirely dependent on narrow and compromising political adjustments among incompatible interests.

Even though none of the political parties, except the Hindu nationalist Bharatiya Janata Party, is keen on facing the electorate again, a snap poll appears to be the only option to clear the air.

Monday's split in the ruling Janata Dal party was an inevitable consequence of squabbling among its top leaders since it came to power after the November 1989 polls.

Shekhar, working in tandem with Devi Lal, 76, a maverick politician and former deputy prime minister, staged a rebellion by weaning away 82 deputies, including six ministers, to their side. The united Dal had a strength of 178 deputies in both houses of parliament.

But since the runaway group hardly has enough strength to form a new cabinet, Shekhar has sought support from the opposition Congress (I) Party led by former premier Rajiv Gandhi.

Shekhar has quietly forgotten that he once strongly criticised the ''personalised politics'' of Rajiv and his late mother, Indira Gandhi, and that Mrs. Gandhi jailed him when she clamped Emergency Rule on the country in 1975-77.

Congress, with 193 deputies of its own and an additional 29 members from its allied parties, is the biggest party in the 545-member lower house, where 20 seats are vacant.

The president will probably first ask Gandhi to form a government once Singh resigns. Only if Rajiv declines would Shekhar be requested to step in, provided Congress supports him.

Rajiv told newsmen Tuesday after a one-hour meeting with Shekhar, ''We have decided to work together. We will pull the country back from the brink.''

#90310d4560 11/06/1990 ~French/German News Agency

MUNICH, GERMANY (NOV. 6) - Mysterious lights flashing in the night sky over much of western Europe on Monday were due to an exploding meteorite, a spokesman at the Munich observatory said Tuesday.

The meteorite, travelling eastwards, shattered as it entered the earth's atmosphere, the spokesman said.

An airline pilot on a flight from Brussels to Frankfurt told the observatory that his aircraft, flying at 9,000 metres (18,000 feet) altitude, was overtaken by a "comet" which exploded into about 15 pieces.

Witnesses in France, who included pilots and air traffic controllers, described a "diamond-shaped flying saucer", "a kind of big, luminous metallic structure", and "a flashing triangular Unidentified Flying Object".

Strange lights in the sky were also observed over Britain by airline officials.

In northern Italy, an intense white light with five slipstreams in its wake was seen moving across the sky from west to east between Genoa and Turin.

BERLIN (NOV. 6) - German post offices on Tuesday began issuing two commemorative stamps to mark the anniversary of opening of the Berlin Wall, on November 9.

The stamps, priced at one Deutsche mark (66 cents) and 50 pfennigs (33 cents), portray a crowd on top of Berlin's Brandenburg Gate, and an opening, chiselled in the Wall, through which passes a rainbow in the German national colours.

CAPE TOWN (NOV. 6) - White liberal leader Zach de Beer, the former Anglo American Corporation executive who heads the Democratic Party, told the party faithful here Tuesday a lurch to either extreme would wreck the country.

Speaking at a party lunch, he said shift to the right, "presumably as a result of some bad behaviour by black leadership", could lead to anarchic violence, international rejection and economic collapse.

But a shift to the left, "if a new-style general election were held and if it brought to power a government which had a communist or socialist policy" would be just as disastrous in the long run, he warned.

"Government expenditure would soar, investment would cease, growth would be absent or negative, unemployment would mount, inflation would gallop and the currency would collapse.

"In the end, when there were no goods in the shops, the violence would come again," he said.

South Africa's economy was already in a mess, he said, pinning his hopes for a remedy on a moderate, democratic government with widespread legitimacy among both blacks and whites.

BAGHAD (NOV. 6) - President Saddam Hussein decided Tuesday to release 77 Japanese held in Iraq, as well as 29 Italian, Swedish, German and Portuguese nationals, the official Iraqi News Agency (INA) reported.

The Iraqi leader was authorizing 77 Japanese to leave Iraq following a request from the former Japanese prime minister, Yasuhiro Nakasone, INA said.

Twenty Italians, five Swedes, two Portuguese and two Germans were also being allowed to leave Iraq, the agency said.

BRUSSELS (NOV. 6) - Asian nations hoping to secure increased European Community development aid in the 1990s may be in for a long and frustrating wait.

Under a plan drawn up by the E.C. Executive Commission last May, Asian and Latin American countries are due to receive 2.9 billion Ecu (3.7 billion dollars) in aid for a five year period starting in 1991.

E.C. North-South Commissioner Abel Matutes, who came up with the idea of a 55 per cent rise in E.C spending in the two regions, has earmarked about 70 per cent of the new package for developing nations in Asia. Money will be spent in both South Asia and Asean.

But, despite six months of intensive debate, Matutes' proposals have still not received ministerial approval.

The twelve E.C. development ministers who discussed relations with Asia at their meeting in Brussels on Monday insisted that while their political commitment to Asia remained undimmed, there could be no quick go-ahead for increased E.C. development spending in the region.

#90310d4900 11/06/1990 ~French/German News Agency
Tokyo (NOV. 6) - Bilateral trade between Japan and Vietnam is expected to expand further amid Hanoi's ''doi moi'' (reforms) programme in the economy, trade industry sources say here.

Under the ''doi moi'' initiatives, Hanoi has introduced a series of free market mechanisms aimed at stimulating the domestic economy.

In addition, the moves toward a normalisation of diplomatic ties between Vietnam and the United States are contributing to the expansion of trade between Japan and Vietnam, the sources say.

Trade experts say Japanese investments in Vietnam have gone into developing mineral resources, including crude oil and iron ore, assembling home electric appliances, and supporting textile manufacturing.

A foreign ministry official in charge of Vietnam says that the main reason for expanding the bilateral trade now are increasing crude oil imports from Vietnam.

At the government level, Tokyo is hoping for wider trade with Vietnam, which abounds in natural resources and has a greater market potential, the official added.

A major trading firm official said Vietnamese companies had been enlarging their business links with western capitalist nations.

But some ''obstacles'' remained for Vietnam to become a good trade partner with Japan and other western advanced countries, he added.

STOCKHOLM (NOV. 6) - An attempt to extort money from 50 rich families in Sweden has been exposed by Swedish and German police, Swedish radio reported Tuesday.

One man had been arrested by police in the German city of Munich as he was trying to pick up money sent to him by one of the families, the report said.

The 50 families had all received letters saying they would be targets of a terror attack, unless they paid 400,000 Swedish krona (71,000 dollars) to an address in Germany.

The letters were typewritten in Swedish, and had been mailed in the southern Swedish city of Helsingborg on October 15.

Swedish radio news said several families had moved abroad out of fear for their lives.

The public prosecutor in charge of the case, Sven Olof Danielsson, said Tuesday that chances of catching the culprits were slim.

He said the man arrested by Munich police had been told to forward the letter containing the extortion money to another address in Europe.

''As it is now, I don't think anyone will try to pick up more letters sent according to instructions in the blackmail letters'', Danielsson said.

#90310d4960 11/06/1990 ~French/German News Agency

BEIJING (NOV. 6) - Details of China's latest census issued Tuesday revealed

the size of the People's Liberation Army (PLA) to be 3,199,100 men and women while the population of Shanghai is higher than projected.

The PLA had as many as four million in its ranks until senior leader Deng Xiaoping ordered a 25 percent cut in manpower during the 1980's.

First figures from the national census, concluded July 1, were issued a week ago and put the size of mainland China's population at just over 1.13 billion people.

Shanghai turned out to be bigger than expected, with 13,341,896 people including those living in its rural suburbs. Its size had been projected last year at 12.62 million.

#90310d4970 11/06/1990 ~French/German News Agency

ABIDJAN (NOV. 6) - Ivory Coast's parliament on Tuesday passed a constitutional change giving its speaker the office of head of state with full powers in the event of a vacancy in the presidency.

Parliament has since 1980 been presided over by Henri Konan Bedie, 56, whose name has in the past been cited among those who could succeed the octogenarian President Felix Houphouet-Boigny.

Mr. Houphouet-Boigny, 85, was last month reelected for a seventh term in office which he has said will be his last. He has not named a successor.

The national assembly also approved another measure on Tuesday authorizing the head of state to name a prime minister.

The elections last month were Ivory Coast's first ever multiparty poll. Supporters of Mr. Houphouet-Boigny's opponent, Laurent Gbagbo, have charged that fraud was widespread.

DHAKA (NOV. 6) - Major opposition parties in Bangladesh called Tuesday upon Western donors and the World Bank to link any future aid commitments to democracy and free elections in the country.

''Foreign aid is being squandered and not reaching the poor in Bangladesh,'' said Sheikh Hasina Wazed, chief of the Awami League, the largest opposition group.

He was addressing a rally of more than 50,000 protesters who had gathered in front of an international hotel where World Bank officials and representatives

of Western countries are meeting for a review of aid use in Bangladesh.

Bangladesh receives annually between 1.8 to 2 billion dollars of Western aid either as grants or soft loans.

Sheikh Hasina, who heads an eight-party alliance, said elections in the country were manipulated and a rubber-stamp parliament was unable to question the government about aid use.

Begum Khaleda Zia, another prominent opposition figure, made a similar plea to Western countries and asked them to be cautious about giving aid to Bangladesh.

Earlier, thousands of anti-government demonstrators called upon President Hussain Muhammad Ershad to resign and allow general elections under a caretaker government.

LAGOS (NOV. 6) - Nigeria would work with post-apartheid South Africa, Nigerian Minister of External Affairs Ike Nwachukwu said on Monday, who did not expect any leadership tussle between the two countries.

"There is no reason why Nigeria should engage South Africa in a political or economic race. Our policy should see to it that we do not develop an adversary relation with emergent South Africa, rather, we should develop a symbiotic relation with that country", he told the opening of a two-day conference on "economic diplomacy".

Nigeria and South Africa have great potentials which could be harnessed to pull the continent out its present poverty, the retired major general said, adding that South Africa had the technology and solid industrial base from which the West African natiion could profit.

Nigeria's present leadership position in Africa arose from the fact that 22 per cent of the continent's population lives in Nigeria, he said, adding that the nation's "preponderant positions lie in our human resources".

Apartheid is the major obstacle between both countries, which Nigeria is committed to eradicating, he said.

Nigeria's policy towards apartheid South Africa should be based on realism and caution until the on-going changes in that country becomes irreversible, he said.

"We must continue to call on the international community to maintain the limited economic sanctions and arms embargo which well-meaning nations and the United Nations have imposed on South Africa", he added.

AMMAN (NOV. 6) - A militant Islamic group said Tuesday that it had instructed its followers around the world to identify potential American and western targets to be hit in the case of war breaking out between Iraq and U.S.-led forcs deployed in the Gulf.

Nader Tamimi, spokesman for ''Islamic Jihad - Jerusalem,'' said members of the organisation ''have been given instructions to strike against the interests of western countries involved against Iraq in the Gulf.''

Tamimi, who is the eldest son of the group's spiritual leader, Sheikh As'ad Bayoud Tamimi, said his group ''has decided to fully and totally support Iraq's confrontation with the western alliance.''

He told a news conference that he welcomed Monday's assassination in New York of Meir Kahane, a militant Jew who advocated expelling Arabs from Israel and the Israeli-occupied Arab territories.

''We had allocated 20,000 dollars to kill Kahane some time ago,'' Tamimi said. ''But somebody else has apparently succeeded.''

Islamic Jihad - Jerusalem claimed responsibility for the stabbing deaths of three Israeli soldiers in Jerusalem last month in retaliation for the killing by Israeli police of 20 Palestinians during disturbances on Jerusalem's Temple Mount.

#90310d5080 11/06/1990 ~French/German News Agency
BREMEN, Germany (NOV. 6) - Greenpeace activists blocked a train carrying nuclear waste bound for Britain for several hours Tuesday, finally forcing it to return to the Unterweser nuclear plant where it took on the load, the ecological organization said.

It said the train was to pass through several big cities, including Bremen, Cologne and Trier, on its way to the French port of Dunkirk. From there, the load was to be shipped to Dover for treatment at the Sellafield plant in northern England.

Greenpeace had sent a protest letter to the German Unterweser plant charging that the waste could contaminate people along the train route as well as the sea.

Militants Greenpeace ecologists moved huge concrete blocks across the train tracks Monday night and continued the protest for several hours, into Tuesday

morning before clearing the tracks.

Police said there had been no risk to other train traffic.

DUBLIN (NOV. 6) - Ireland will vote for a new president on Wednesday in an election that, fired by a recent scandal with the ruling party candidate, has transformed into a battle between the generations and the sexes.

The contest is between the candidate of tradition, Brian Lenihan of the governing conservative Fianna Fail party, and a young feminist lawyer Mary Robinson, an independent who has promised to "blow away the cobwebs" in the Irish presidency.

Though a woman president was unthinkable at the start of the campaign, it has now become a real possibility.

Results will not be known before Thursday night at the earliest, and more likely on Friday because of Ireland's complex system of proportional representation.

This involves what is known as a single transferable vote, in which each voter submits a ballot listing the candidates in his or her order of preference.

Mr. Lenihan, 60, was Ireland's vice-premier until his dismissal from office last week. He was accused of pressuring President Patrick Hillery into appointing Charles Haughey as prime minister in 1982 without holding a general election during a constitutional crisis.

He had denied putting on any pressure, although he conceded the facts in a little-published student interview in May, 1989.

But he has remained the ruling party's candidate.

He lagged in opinion polls at the height of the scandal, at one point trailing 20 points behind Mrs. Robinson, a 46-year-old mother of three backed by the small Irish Labour Party.

But he has closed the gap in the latest poll, with both candidates standing at 43 per cent.

Some Dublin bookmakers are again giving him the advantage in what is now forecast as a close race.

Mr. Lenihan's party has couched his dismissal over the last week in the more sympathetic terms of a "sacrifice" to save his "old friend" Mr. Haughey.

The scandal has not damaged his enormous reserves of support, especially in the rural bastions of the nationalist Fianna Fail movement.

An adept politician, he is likeable, warm and embodies the traditional values of the Irish countryside and its staunchly Catholic background.

Long dubbed "Mr. No Problem", he is perhaps Ireland's most popular politician.

Mrs. Robinson, for her part, has countered with an energetic "liberal" campaign, refusing to mince words on her support for divorce and contraception long taboo subjects in the heavily Catholic republic.

She has clearly aimed for the vote from the middle classes, women and Ireland's new generations. Overall, Ireland has the highest percentage of young people in Europe.

"The presidency is not a consolation prize for sacked cabinet ministers," she said recently.

She has struck up a vote transfer agreement with the third candidate in the race, Austin Currie, who is standing for the main opposition party, Fine Gael. This accord remains the wild card in the race -- and could lead to Mr. Lenihan's defeat.

The election is the first presidential ballot in 17 years. They are usually a formality and spark little interest. The rule still held true until two months ago.

But Mrs. Robinson suddenly livened things up when she stormed onto the scene and promised to "blow away the cobwebs" from the presidental residence in Dublin's Phoenix Park. She said she would make the office a "national resource".

The Irish presidency has progressively lost its flare since Ireland elected its first president, the statesman and independence hero Eamon De Valera, in 1959.

Her slogan is, "A woman's place is in the Park", but her dynamism is such that even some supporters fear she may be overqualified for what is largely an honorific post.

#90310d5180 11/06/1990 ~French/German News Agency

RANDBURG, SOUTH AFRICA (NOV. 6) - Randburg, the plush middle- to upper-class suburb of Johannesburg, goes through the ritual Wednesday of electing an MP to a white-only parliament whose days are numbered. A two-horse race, it seems an

unequal contest.

On the one hand is Marthinus van Schalkwyk, a 31-year-old former Stellenbosch University academic who gave up the presidency of the liberal Afrikaner Jeugkrag in August to fight for the ruling National Party (NP) and President Frederik de Klerk's reforms.

Opposing him is 28-year-old garage owner Leonie Steele, whose campaign for the Conservative Party (CP) has warned of the annihilation facing whites if De Klerk is allowed to sell out to the anti-apartheid African National Congress.

The result will not affect the NP's absolute majority in parliament - it has 94 of the 166 seats - but both sides have billed the contest as a mini-referendum on reform.

That Mrs. Steele will lose is a foregone conclusion. Of the 22,785 registered voters, 60 percent of them English-speaking and 40 percent Afrikaans, she might get 3,000 to turn out for her, analysts predict.

That will still be a 400 percent improvement on the 755 votes the CP notched up in the September 1989 segregated general election, which De Klerk has said was the last in South Africa's history.

CP Deputy Leader Ferdi Hartzenberg claimed at the weekend that a 12 percent swing towards the CP would mean the party could win a whites-only general election - which De Klerk explicitly and emphatically ruled out when he gave the final campaign speech on Monday night.

A 17 percent swing, according to Hartzenberg, would mean the CP could get voters to say "no" in the referendum De Klerk has promised South African whites to pass judgement on the new constitution enfranchising the black majority he wants to negotiate from next year.

Van Schalkwyk told Agence France-Presse his main aim was to get as many voters as possible to the polling booths to deprive the CP of the opportunity to make claims about the significance of a swing.

He said he would revert to the old urban election tactics of mobilizing fleets of cars to patrol the constituency, urging voters to turn out and driving those with transport problems to polling stations.

"The important thing for us is to put on a good show and to bring in a good result," he said. "If we get more than 10,000 it will be a resounding victory, that would be wonderful."

At the back of his mind was the disastrous swing to the CP in the Natal by-election in Umlazi on June 6, which left the NP candidate's victory looking decidedly hollow.

Van Schalkwyk's election agent Jan Lutz said the prospects for getting liberals to the polls had improved with the announcement Monday that the NP would not contest Johannesburg's Yeoville constituency when Democratic Party (DP) MP Harry Schwarz resigns next year to become ambassador in Washington.

Lutz said that decision had gone a long way to overcoming the bitterness felt by DP supporters that the party had got nothing in return for its own decision not to contest Randburg, which fell vacant in July when former DP co-leader Wynand Malan retired from politics.

Malan polled 8,481 votes in September 1989, beating NP high-flyer Glenn Babb by 1,714 votes.

De Klerk was at pains Monday night to urge DP supporters to get behind him and his reforms, a cause helped by Malan's announcement last week that he would vote for the National Party.

PARIS (NOV. 6) - Djibouti and countries in the European Economic Community (EEC) have asked France to evacuate their nationals from Mogadishu, should the need arise, a French Foreign Ministry spokesman confirmed here Tuesday.

Diplomatic sources in Mogadishu, reached from Nairobi, had on Monday said the French Embassy there was making plans to evacuate several dozen Djibouti nationals from the capital of war-torn Somalia on Wednesday.

There has been speculation in the region that the move is related to the defection of three senior Somali army officers last week to Djibouti, which has agreed to help them find a country ready to give them asylum.

The soldiers were based in northern Somalia where recent gains have been made by the Somali National Movement (SNM), one of three main rebel forces seeking to topple the 21-year-old regime of Major-General Mohamed Siad Barre.

The foreign ministry spokesman said Tuesday that 25 French nationals and about 100 other EEC nationals are currently in Somalia, most of them in the Mogadishu region.

DUBLIN (NOV. 6) - Monsignor Cahal Brendan Daly, Bishop of Down and Connor, was appointed Archbishop of Armagh by the Vatican on Tuesday to become leader of Ireland's 3.7 million Roman Catholics, the apostolic nunciature said.

Msgr Daly, 73, who had been a bishop for 23 years, succeeds Cardinal Tomas O Fiaich who died in France last May.

Conservative and strictly orthodox, Msgr Daly is reputed to have views closely parallel to those of Pope John Paul II.

Known as a virulent opponent of the Irish Republican Army, he is likely to be well received by Ireland's Protestant community. The IRA's political branch, Sinn Fein, accuses the archbishop of being pro-British.

His predecessor, Cardinal Tomas O Fiaich, was often accused by Irish Protestants of being too weak in his criticism of the IRA.

Msgr Daly was born on Oct 1, 1917 in Loughguile, County Antrim. He studied at Queen's University, Belfast and at the Institut Catholique in Paris.

#90310d5360 11/06/1990 ~French/German News Agency
JOHANNESBURG (NOV. 6) - Some 200,000 miners at South Africa's gold mines could be out of jobs if the gold price does not rise above its present level of 380 dollars per ounce, state-run radio reported here Tuesday.

In the past three years, 72,000 miners had lost their jobs and prominent gold analysts told radio news the announcement of planned rationalisation at Harmony gold mine in the Orange Free State province could mean more lost jobs.

Harmony mine owners Rand Mines decided to cut production at the mine by 30 percent.

Some 4,000 miners at the mine, with a workforce of 27,000, had already lost their jobs.

Mining giant Anglo American Corporation also envisaged rationalisation at the Saaiplaats mine in the Orange Free State, the radio said.

The average gold price for the quarter ended September 30 was 996 rands (393 dollars) an ounce and 22 mines operated at a loss.

SANTIAGO (NOV. 6) - A military intelligence officer and secret police agent under the former military government of General Augusto Pinochet was shot to death inside a car here late Monday, police reported Tuesday.

Press reports linked the murder of Army Major Manuel Antonio Flores Gallano and the recent killing of another army sergeant and security officer for Gen. Pinochet to the disclosure of a clandestine money-lending and drug-trafficking ring inside the military.

Maj. Flores, 37, was killed by three shots as he was sitting inside a parked car with an unidentified woman near a road leading to the airport.

Police said the assailants first shattered the car's windshield with a brick before opening fire on their target. There were no suspects in the killing.

Maj. Flores became a member of the current military intelligence after the former secret police was disbanded in March, following Gen. Pinochet's transfer of power to elected President Patricio Aylwin.

Press reports have linked a number of attacks on the military -- including a brief kidnapping last week of a former senior member of the secret police -- to a drug smuggling ring reportedly run by an army major.

Authorities investigating the clandestine ring have dismissed 16 officers and disciplined hundreds of others, leading to a major restructuring of the highest military echelons.

Gen Pinochet has stayed on as head of the army despite repeated calls by Mr. Aylwin that he retire.

NAIROBI (NOV. 6) - Rwandan rebels murdered civilians and raped women and young girls when they stormed Gatuna, on the Ugandan border, sending terrified villagers fleeing for their lives, Rwandan radio said Tuesday.

In a Swahili broadcast monitored here, the national radio said rebels of the Rwandan Patriotic Front (RPF) had forced young men to join them at gunpoint.

The broadcast, which did not mention that the RPF had captured Gatuna, a strategic border post, said rebel fighters had set fire to grass-thatched

homes. It accused the rebels of killing and maiming villagers, and stealing their livestock.

"Women have been raped, girls -- some under 15 -- have been defiled, innocent people killed, domestic animals stolen and property looted," the radio said.

The rebels captured Gatuna on Saturday, but abandoned it on Sunday night, leaving two smouldering trucks in their wake. Government troops had not moved in by Monday evening, apparently fearing a trap.

Meanwhile Rwandan refugees who have fled to Uganda to escape the fighting say a devastating famine is sweeping northern Rwanda, according to relief workers looking after the nearly 14,000 refugees in Uganda.

The aid workers, interviewed in the Ugandan town of Mbarara, near the Rwandan border, were unable to give details of the places affected by the famine. But they said many refugees had said there was no food left in their villages.

The south of tiny, overpopulated Rwanda has suffered chronic famine in recent years sparked by overcrowding and soil erosion.

Until the rebel invasion, led by Rwandan exiles based in Uganda, Rwanda was heavily dependent on food imports which came via Uganda.

But the border has been closed to trucks since the RPF, led by Rwandan exiles based in Uganda, invaded Rwanda on October 1. Most of the rebel fighters are Ugandan army deserters of Rwandan origin.

The refugees who have poured into Uganda are currently clustered at Kinzinga, Kamwezi and Kitwe, many of them within sight of the border, sheltering in tents provided by relief organisations.

#90310d5520 11/06/1990 ~French/German News Agency

MAPUTO (NOV. 6) - The profile of Lenin on the wall of the office of the Josina Machel secondary school in Patrice Lumumba Avenue in central Maputo is scarcely visible now, almost hidden by a coat of paint and disfigured by obscene graffiti.

The people's assembly of Mozambique did much the same job last weekend when it approved a new constitution after six weeks of debate. When it becomes law on November 30, the ruling Frelimo group will no longer have the privilege to govern as the only legal party.

All mention of Marxism-Leninism that abounded in its independence constitution has been excised and replaced with language more akin to liberal democracy.

Moreover it goes far further than have most other African nations who are following in the footsteps of democratised eastern Europe.

Among reforms, the 200-article constitution outlaws the death penalty, presumes the innocence of charged persons, upholds press freedom and gives those arrested the immediate right to a lawyer.

Western human rights agencies have never regarded the Frelimo party as wilfully repressive, rather that the severe lack of infrastructure, skilled manpower and basic resources in the wartorn former Portuguese colony made it impossible for rights to be respected.

KHARTOUM (NOV. 6) - Sudan will be self-sufficient in oil supplies in three years, General Salah eddin Karrar, head of the ruling junta's economic commission, announced here Tuesday.

Gen. Karrar also contended that the Chevron oil company had stopped its prospection and production operations in south Sudan some seven years ago for "political reasons" and not on the stated security grounds.

The U.S. company ceased working in south Sudan shortly after the Sudan People's Liberation Army (SPLA) started attacking regular troops in the region in 1983.

Gen. Karrar said that Chevron had abandoned its concession at the Muglad oil field in southwest Sudan, while Sunoil, another American company, had given up its own concession in central Sudan.

Both were now government property, he said.

MASERU (NOV. 6) - King Moshoeshoe II of Lesotho was stripped of his office Tuesday by Major-General Metsing Lekhanya, head of the ruling military council an official statement here said.

King Moshoeshoe has been "on sabbatical" in London since March following his refusal in February to ratify the sacking of four senior officials.

He looked set to return to Lesotho after Gen. Lekhanya met him in London for talks last month on his way back from a visit to the United States.

But the row flared again, culminating in Gen. Lekhanya's statement Tuesday in the toothless National Assembly that a successor was being sought.

King Moshoeshoe would become a private citizen of Lesotho, Foreign Minister John Thabane told the independent radio station 702 in Johannesburg.

MOSCOW (NOV. 6) - Lithuanian President Vytautas Landsbergis on Tuesday called for the withdrawal of Soviet troops from the Baltic republic, 24 hours before a military parade on the anniversary of the Bolshevik revolution, the Baltic news service reported here.

Mr. Landsbergis, who has spearheaded the republic's struggle for independence from the Soviet Union, noted in a speech on local radio that more than 1.5 million Lithuanians last summer signed a petition calling for the withdrawal of Soviet forces.

"The Soviet Army must leave Lithuania as it is leaving Hungary and Czechoslovakia, he said.

"If the Soviet Army acted in a more polite manner and tried to agree with us on its temporary presence in Lithuania, we would not remind it of the attitude of Lithuanians towards it," he added.

Local authorities in all three Baltic republics have objected to the military parades, ordered by President Mikhail Gorbachev to mark the 73th anniversary of the revolution.

BRASILIA (NOV. 6) - A Senate committee Tuesday summoned Foreign Minister Francisco Rezek to answer allegations that the government had struck a secret deal with Iraq to secure the release of 256 Brazilian hostages early last month.

According to the O Globo daily, President Fernando Collor de Mello's administration guaranteed Baghdad that any contract it signed with Brazilian companies would be honored once the Gulf crisis was over and the U.N.-mandated trade embargo with Iraq was lifted.

The newspaper said the government promised to pay Iraq any fine incurred by Brazilian private companies if they reneged on these obligations.

The secret agreements, according the the report, were signed by Marcos Coimbra secretary general of the presidency.

A spokesman for the government Tuesday denied there had been secret dealings

behind the release of the Brazilian hostages.

Humberto Lucena, chairman of the Senate Foreign Relations Committee, said the seriousness of the charges warranted a hearing with Mr. Rezek.

Mr. Rezek recently denied any secret dealings with Baghdad, adding that it had merely "witnessed" the contracts signed by Brazilian firms and Iraq.

Brazil, he said, would do all it could to ensure the completion of the contracts once the Gulf crisis is over, "but there was no financial compromise."

O Globo said Mendes Junior construction company -- one of the Brazilian firms operating in Iraq-- was building a railway line between Baghdad and Basrah, which the Brazilian Government reportedly promised to complete or pay a 700 million dollar fine.

STOCKHOLM (NOV 6) - The Swedish Skanska construction and property company said on Tuesday that it had increased its stake in the Canadian Banister Inc. company from 15 percent to 23 percent, having bought 466,000 shares for 4.6 million Canadian dollars.

Skanska is now the biggest shareholder alongside the Canadian Trimac company, the company said.

Banister, a leading Canadian public works company, had sales in 1989 of 643 million Canadian dollars. In 1989 Skanska had sales of 29.8 billion Swedish krone (4.8 billion U.S. dollars) and made a pre-tax profit of two billion krone (325 million U.S. dollars).

PARIS (NOV. 6) - The U.S. customs services turned over a two-million dollar check to their French counterparts here Tuesday, part of the haul from a joint crackdown on cocaine trade, carried out also with help from British authorities.

Budget Minister Michel Charasse, who received the check from U.S. deputy treasury secretary John Robson, said authorities involved in the operation dubbed "cocaine chase" seized almost 32 million dollars in funds laundered through the French bank Banque de Credit et de Commerce International (BCCI).

He said the two million would be used to strengthen anti-laundering operations.

The investigation saw BCCI officials arrested in October 1988, and led to simultaneous arrests in Tampa, Florida, London and Paris. A Colombian drug trafficking network was smashed after being infiltrated by U.S. drug-enforcement agents.

PARIS (NOV 6) - Immigration in France rose sharply in 1989, while the number of refugees seeking political asylum jumped by 79.2 percent over the previous year, the French Social Affairs Ministry announced Tuesday.

The statistics compiled by the ministry's Population Department showed increases of 22.7 percent for permanent workers, and 61 percent for temporary workers.

Seasonal immigration was the only sector to record a dip of 12 percent.

Most of the asylum requests, or 38 percent out of a total 61,000, were from Africa, with only five percent from eastern Europe. Requests from countries such as India and Pakistan were up 100 percent over 1988.

But the rejection rate of asylum requests also rose, from 65.6 percent in 1988 to 71.9 percent last year, and 86 percent in the first quarter of this year.

#90310d6140 11/06/1990 ~French/German News Agency

STOCKHOLM (NOV. 6) - A swedish fighter plane and a passenger plane were involved in a near miss Tuesday, air officials said.

A j35 ''Draken'' class fighter passed only 200 metres from a Fokker F28 of the Swedish domestic airline Linjeflyg over southern Sweden, the Swedish Air Force information service said.

A commission has been set up to investigate the incident which happened as the fighter was taking part in a training attack against a target plane over Almhult.

For reasons unknown the fighter passed behind the civilian aircraft, at one time no more than 200 metres from its tail.

The fighter pilot noticed the civilian plane and quickly changed course, the officials said.

SANTA MONICA, CA (NOV 6) - A legal tangle over the testimony of Marlon Brando's daughter, Cheyenne, who is recovering from a drug overdose in Tahiti, has forced the indefinite postponement of the murder trial of Mr. Brando's son court officials said.

Christian Brando, 32, was scheduled to go on trial Monday for first-degree murder of his sister's lover, Dag Drollet, at the Brando estate in California March 16.

Miss Brando, 20, fled to Tahiti a month after the killing, which she witnessed and gave birth to Mr. Drollet's child. She has refused to return to California to testify and Tahitian authorities have barred her from leaving the island, charging her as an accomplice in Mr. Drollet's murder.

Prosecutors say her testimony is essential to winning the case.

A three-member California appeals court Monday ordered the indefinite postponement of the Brando murder trial to review the status of Miss Brando. Legal briefs on the matter are to be submitted by Mr. Brando's attorney November 13. Responding briefs are required from the prosecution November 19.

In Tahiti, Mr. Drollet's father, Jacques Denis, said a new trial date would be announced November 19 in Los Angeles and he said Miss Brando would be subpoened to testify.

Miss Brando is recovering from a drug overdose which plunged her into a coma last Thursday. She later regained consciousness but still requires mechanical breathing assistance in the intensive care unit of a Papeete hospital, the family's spokesman in Tahiti said.

Miss Brando has given conflicting accounts of what happened the night of the shooting. Christian Brando has said he accidentally killed Mr. Drollet in a scuffle over a gun.

Prosecutors say he decided to kill Mr. Drollet because he had been physically abusing his sister.

#90310d6180 11/06/1990 ~French/German News Agency

MUNICH (NOV. 6) - The West European project to build a 64-megabit chip is making technological progress, but is being hampered by gaps in financing, a top official said here Tuesday.

Raimondo Paletto, chairman of the Joint European Submicron Silicon (Jessi) program, said that the situation had worsened with the withdrawal of the Dutch electronics giant Philips from the project.

Paletto, speaking at the ''electronica 90'' international electronics components fair here, said that the Philips pullout meant that part of the Jessi program was blocked.

The Jessi project, aimed at breaking the Japanese dominance in the field of high-performance computer chips, will cost more than five billion dollars by the mid-1990s. Germany, Britain, France, Italy, the Netherlands and the European Community are sharing the costs.

Paletto said that despite the financial problems, he was confident the Jessi group would be able to start production of the 64-megabit chip - one which can store 64 million bits of information - by the start of 1995.

FREETOWN (NOV. 6) - Sierra Leone's Armed Forces Chief Major General Mohamed Tarawalli said Tuesday that a recent threat by Liberian rebel leader Charles Taylor against his country was "extremely delicate and provocative."

Mr. Taylor, leader of the National Patriotic Front of Liberia (NPFL),

threatened last week in a radio interview to "destroy" Sierra Leone's only international airport "if it continues to allow Nigerian and Ghanaian war planes to take off on bombing raids into Liberia."

Nigeria and Ghana, along with Guinea, Sierra Leone and the Gambia, have contributed troops to a 7,000-strong expeditionary force (ECOMOG) sent into Liberia in August by the Economic Community of West African States to impose a ceasefire in the country's bloody 10-month civil war.

Four Ghanaian airforce jets and three Nigerian fighters are currently stationed in Freetown from where thet are flying sorties to bombard rebel-held areas in Liberia, informed sources said.

Gen. Tarawalli told Agence France-Presse Tuesday that Mr. Taylor's statement "has not been taken lightly by us" but that "we are not frightened."

The government-owned Daily Mail newspaper said Tuesday that "Sierra Leone's benevolence and good Samaritan stance throughout the fratricidal fighting that has torn Liberia apart is not appreciated by some of the people we are trying to help."

The independent New Citizen said the threat "sent shock waves through the spirits of the hitherto uninvolved Sierra Leoneans.

"We have lost revenue at the ports, Sierra Leoneans are being kicked out of apartments to make way for prosperous Liberians with raw American dollars while accomodation of a numberless displaced people with not a cent in their pockets has resulted in a high incidence of crime."

ANKARA (NOV 6) - Eleanor Thomson, a retired U.S. journalist who formerly worked for Agence France-Presse, has been found strangled at her home in Selimiye, near the Mediterranean resort of Antalya, court officials said here Tuesday.

Ms. Thomson, 75, was probably killed Sunday night, according to the prosecutor in Manavgat, near Selimiye.

A native of California, she had been an AFP correspondent in Asia and headed AFP's English Service in the 1960s.

Prosecutor Selamettin Celep said Ms. Thomson was last seen late Sunday after returning from a local restaurant. Friends found her body and notified the police late Monday.

An investigation had been opened, the prosecutor said, without giving details.

Ms. Thomson had no relatives in Turkey but had frequent visitors in the holidays, he added. She had lived in Turkey since 1966.

BERLIN (NOV. 6) - Berlin investigators said Tuesday they had uncovered a fourth case of massive fraud, this time worth 51 million Deutsche marks (34 million dollars), arising from the July 1 German monetary union.

Police are already probing swindles that are believed to have netted 500 million marks (333 million dollars), 30 million marks (20 million dollars) and eight million marks (5.3 million dollars).

The spokeswoman for the Berlin ministry of justice, Jutta Burghart, said Tuesday that the latest case apparently involved only one person. She declined to give further details.

The affair was uncovered by a special unit of 30 customs investigators that was set up Monday, after two more cases came to light.

Under German monetary union, businesses could trade holdings in Ostmarks, the soft, non-convertible East German currency, for Deutsche marks.

Exporters who traded with East Germany's partners in Comecon could also swap their holdings of "convertible rubles," Comecon's unit of account, for Deutsche marks, provided that the rubles accrued from contracts signed before July 1.

The fraudsters, according to police, have been using fake or antedated contracts to claim the exchange.

The customs squad is tasked with vetting all applications for convertible-ruble swaps that were filed with the German External Trade Bank, the former East German state bank, after July 1.

The bank has been receiving 30,000 applications per month.

#90310d6440 11/06/1990 ~French/German News Agency

WASHINGTON (NOV. 6) - U.S. voters went to the polls Tuesday in mid-term elections widely expected to see the opposition Democrats further strengthen their hold on Congress and state governments.

The ailing economy and the possibility of war in the Gulf, however, have added an element of unpredictability to these elections which will define the political playing field for the latter half of President George Bush's mandate.

Voter have also been unsettled by last month's bitter debate between the Democratic-controlled Congress and the Bush White House over government spending cuts and higher taxes for the wealthy as part of a budget deficit reduction agreement reached 10 days ago.

All these uncertainties, according to observers, could reduce voter turnout -- traditionally low in mid-term elections -- or severly hamper the incumbents' chances, normally more than 80 per cent in favor of reelection.

Acknowledging that lower turnout would put them at a disadvantage, Republican candidates have stressed voter participation in their campaigns.

As voting booths opened all around the country, observers were forecasting further erosion of Republican minority representation in both houses of Congress and in state governments, basically due to the unhealthy state of the economy after 10 years of Republican administrations.

At stake are 34 Senate seats, the entire 435-seat House of Representatives, 36 of the country's 50 governorships, and more than 6,000 state legislators, as well as thousands of lower public offices.

In the outgoing legislature, the Democrats hold a 55 to 45 majority in the Senate; 259 to 176 in the lower house and control 29 of 50 state governorships.

Normally low profile state legislative races have drawn national attention this year as party officials battle for control of the once-a-decade redrawing of congressional districts to take into account population shifts recorded in a nationwide census earlier this year.

#90310d6460 11/06/1990 ~French/German News Agency
BAGHDAD (NOV. 6) - Germany's elder statesman, Willy Brandt, opened talks here Tuesday with the Baghdad leadership on the release of Western hostages and possible political solutions to the Gulf crisis, spawned by the August 2 Iraqi invasion of Kuwait.

Brandt, 76, a former West German chancellor and now honorary chairman of the opposition Social Democrat Party (Spd), met with Iraqi Vice Premier Taha Yassin Ramadan. Later in the day he was slated to meet Foreign Minister Tariq Aziz.

Brandt also had a surprise meeting with Palestine Liberation Oranisation (Plo) leader Yassir Arafat, who is also in Baghdad.

He told Ramadhan that it was also in the interest of Europe, especially Germany, to prevent the outbreak of a war in the region. ''We don't want a war ...,'' Brandt told him. ''If we can help to further the peace process this is something in our own interest.''

Brandt, whose mission is not officially backed by Bonn or the United Nations, said if he talked about peace he meant the entire region. Ramadan praised the Nobel peace laureate as a politician who was ''always on the side of law''.

AGANA, GUAM (NOV. 6) - The Republican governor of Guam, Joseph Ada, Tuesday became the first gubernatorial incumbent to win consecutive four-year terms in this U.S. Pacific territory.

He defeated democratic challenger Madeleine Bordallo, the first woman to run for governor on this island of less than 14,000 people.

"I just want to extend my gratitude to our supporters," Mr. Ada said at a victory party at his headquarters.

With 61 of 76 precincts reporting, Mr. Ada and his running mate, Lieutenant Governor Frank Blas, had 16,088 votes to 11,891 votes for Mrs. Bordallo and her running mate Jose 'Ping' Duenas.

"We were just not able to convince enough people," said Mrs. Bordallo, the wife of former Guam governor Ricardo Bordallo, who committed suicide last January, one day before he was to begin an 18-month federal prison term in California. He was not in office at the time.

Mr. Ada said he wanted to reassess the administration's management practices

and would ask for courtesy resignations from his cabinet.

DHAHRAN, Saudi Arabia (NOV 6) - Economic sanctions against Iraq are not working and the patience of U.S. President George Bush and the world community is wearing increasingly thin, Kuwait's Ambassador to the United Nations Mohammad Abu al-Hassan said on Tuesday.

But Mr. Al-Hassan stopped short of calling for an immediate attempt by the U.S.-led multinational force in Saudi Arabia to drive Iraqi troops from the emirate.

He told a press conference here there was no "timetable" for a possible invasion, but added: "I am pretty confident that not only President Bush's patience is getting thin, but all the members of the Security Council and interntional community are coming to be more impatient."

He said the U.N. had "exhausted maybe 99 per cent" of the peaceful options to force Iraq from Kuwait.

"My leadership wants to bring justice (to Kuwait) sooner rather than later. If justice does not come except with force then yes, my leadership does want force to be used sooner than later," he said.

"Once all the other options are used and have not been useful, than the military option might be a necessity," he warned.

Asked if war was inevitable, he said: "It depends on Iraq. If Iraq continues their defiance, it is."

"For the time being, sanctions, though very comprehensive and unprecedented in nature and scope, are not working," he said. "Not because there is some great violation but because the Iraqi regime does not care for the plight of their own people."

NEW YORK (NOV. 6) - The American afiliate of Swedish Volvo admitted in ads published in several U.S. newspapers Tuesday that it had aired a bogus commercial demonstrating the strength of its cars.

The televised advertisement had showed an oversized pickup crushing a row of cars with the Volvo car the only one remaining intact.

The public admission Tuesday, which appeared in the form of an open letter from Volvo, acknowledged the Volvo car had been reinforced. It follows a settlement announced Monday between Volvo North America Corp. and the Attorney General of Texas, Jim Mattox.

"The car-crushing competition was a hoax and a sham," he charged in court papers. Extras in the commercial - filmed in Texas - became suspicious of the ad and tipped Mr. Mattox.

He said the commercial should have been labeled as a "dramatization," adding that the structure of the other cars in the commercial had been weakened.

The open letters, which Volvo agreed to publish, appear in about 15 newspapers in Texas, as well as in USA Today and The Wall Street Journal.

#90310d7350 11/06/1990 ~French/German News Agency
PARIS (NOV. 6) - Lebanese President Elias Hrawi in an interview made available here Tuesday said he wants to disband all the country's militias and Palestinian groups by March 21, 1991.

Hrawi told the French Le Monde newspaper Syria had already reduced its troop presence in Beirut and would pull its forces out of the Bekaa valley by September 21, 1992.

All leaders of the six disbanded militias would become members of the government, Hrawi added. The Lebanese army had already integrated the 12,000 men loyal to Christian leader General Michel Aoun, and would in future have mixed units in all regions.

Within the next two weeks the Lebanese government will restore its authority in Beirut and the areas surrounding it. However, problems would occur with the pro-Iranian Hezbollah (Party of God) militias in southern Beirut and with Palestinians in the south of the country, he predicted.

Hrawi made clear that he would not allow Aoun to leave the country for France. Aoun has been holed up in the French embassy in Beirut since his forces were crushed by Syrian troops last month.

Instead Aoun would be brought to justice in Lebanon on charges of inciting war and rebellion and misappropriation of public funds.

Hezbollah and the rival pro-Syrian Amal signed a pact in Damascus Monday pledging to cease fighting each other as of November 10.

#90310d7600 11/06/1990 ~French/German News Agency
BANGKOK (NOV. 6) - Thai Commander-in-Chief Suchinda Kraprayoon Tuesday warned Prime Minister Chatichai Choonhavan of fading military support, as a row over a seized broadcast unit escalated into a national dispute.

Gen. Suchinda told reporters over army-run television Tuesday that the army was "ready to support (Supreme Commander Sunthorn Kongsompong) in any issue" that concerns "internal security and integrity of the armed forces."

Observers here said the statement was a threat to the government, which depends upon support from the military for its survival.

It follows a news conference Sunday by a minister attached to the prime minister's office, Chalerm Yoobamroong, in which Mr. Chalerm challenged Gen. Sunthorn to bring to police a mobile broadcast unit seized by the military if he believed it threatened national security.

Gen. Suchinda said Tuesday that "if the premier does not solve the problem, he will lose trust and faith from (the) military."

"I will talk to the prime minister on the matter again. We military do not look favorably at those who insulted our commander," he said.

"We told him many times about our opinion, and he promised to solve the problem but he has not done it so far," Gen. Suchinda said.

The military seized the 12 million baht (480,000 dollar) mobile broadcast station in June, charging it had an eavesdropping device to monitor military movement.

The charge prompted rumors the unit was used to monitor possible coup plots.

But Rachan Hussein, director of the Mass Communication Organization of Thailand and a close political aide to Mr. Chalerm, said the station was sent out to test FM radio signals following residents' complaints of bad reception on that band.

MOSCOW (NOV. 6) - A total of 1,680 Soviet nationals were evacuated from Iraq last month, Soviet Deputy Premier Igor Beloussov said Tuesday.

Beloussov told Soviet television viewers that 1,000 more of the 3,500 remaining Soviet citizens will return this month.

The evacuation of Soviet nationals was going ahead in line with the timetable agreed with Iraq, he said.

A rising number of Soviet specialists wanted to go home because of a lack of equipment caused by the trade embargo against Iraq.

DAKAR (NOV 6) - The World Bank will come to the aid of poor countries if oil prices remain high for another month, world bank president Barber Conable said here Tuesday.

Mr. Conable said the bank would aid poor states and even countries with medium-level revenues to ''reduce the financial gap'' created by high oil prices due to the crisis caused by Iraq's occupation of Kuwait.

This initiative would take place before the end of the year, Mr. Conable told reporters after a four-day visit to Senegal.

Mr. Conable met here Tuesday with President Abdou Diouf.

BRUSSELS (NOV. 6) - European Economic Community (EEC) farm and trade ministers reached an accord on farm subsidy cuts after two days of hard

negotiations here, the European Commission said Tuesday.

A commission spokesman said the decision, reached after the failure of five previous meetings, meant that the Uruguay Round of negotiations under the General Agreement on Tariffs and Trade (GATT) was now back on track.

A GATT conference in early December, to wind up four years of negotiations for lower trade barriers, had been endangered by the EEC's failure in five previous meetings recently to reach accord on the subsidy cuts.

The commission, the executive arm of the EEC, said all 12 community members had agreed on a 30 percent cut on farm subsidies, along with compromise measures to soften the impact on farmers.

British Farm Minister John Gummer said after the meeting that the accord was a "major success" but was little different from earlier proposals. The fact that the decision was so long in coming was a "major loss", he said. The decision had been held up, most recently by France and previously by Germany.

Ray MacSharry, the EEC's commissioner for agriculture, challenged other countries and trading blocs to match the EEC's offer. The EEC decision came three weeks after a mid-October deadline for trading nations and blocs to propose subsidy cuts for the GATT conference.

Asked whether the offer was too little and too late, MacSharry stressed that it had been approved unanimously by the 12 EEC countries and the commission "in the public view of the whole world".

By contrast, he said, the U.S. proposals on farm subsidies, although apparently much tougher, did not have the unanimous support of the U.S. Administration or Congress.

Earlier, commission sources had said that commission vice-president Frans Andriessen and MacSharry had opposed the softer compromise proposals, on the grounds that they would be difficult to defend at the GATT talks. But the two men subsequently went along with the decision. The most important compromise involved protecting local farm products against cheaper foreign imports when subsidies were lowered.

An Irish spokesman said this was a "damage limitation exercise" supported by France, Ireland and Germany. In recent weeks, France has led the objections to the EEC proposals.

Other concessions included more effective setting aside of farm land for non-food production, as requested by Germany, and attention to "less favored" areas affected by the subsidy cuts, notably the EEC's Mediterranean members. And the EEC also agreed that where domestic production quotas were set for products such as milk, import restrictions would be allowed to bolster them.

The EEC is the last major economic bloc to produce farm subsidy proposals, which are considered essential for the successful conclusion of the four-year Uruguay Round of trade negotiations at the GATT conference in December.

The EEC's proposal involves a global 30 percent cut in subsidies to farmers, backdated over a ten-year spread from 1986. This is far below the reductions demanded by the United States and other major food producers, which include 75 percent cutbacks in domestic farm supports and a 90 percent cut in export subsidies.

The U.S. proposal calls for these cuts to be made over ten years from 1991. Over the same time period, the EEC offer amounts to a subsidy cut of only 15 percent, since half of its 30 percent cuts have already been made.

Lower farm subsidies in developed countries are considered essential to win the approval of other nations for lower trade barriers in other areas at the GATT talks, and to prevent trade wars as the world slides towards recession.

LIMA (NOV 6) - Peru Tuesday announced it was reducing import tariffs and sales taxes in a bid to stimulate trade and production while creating a freer and more competitive market.

The Economy Ministry said a 10 percent surcharge on imports had been removed, tariffs on imports would be reduced gradually over a three-year period, and sales taxes on a series of products would be slashed immediately.

President Alberto Fujimori said Sunday he was satisfied with the the economic stability program he had introduced since he came to power in late July, saying the set of laws about to be introduced were aimed at protecting the free market from negative monopolistic tendencies.

According to a new timetable set out by the Economy Ministry, the current 50 percent import tariffs would be cut in half by July 1993 and 25 percent import duties would be reduced to 20 percent over the same period, although 15 percent duties would remain unchanged.

Sales taxes will come down to 10 percent for imported medium and compact automobiles, motorcycles, radios, photographic equipment, small televisions, firearms, alcoholic drinks -- including wine -- and mineral water.

A reduced 30 percent sales tax will apply for sugar-cane and fruit-based alcoholic beverages, home appliances, toiletries, china, carpets, video equipment and some luxury articles.

Furs, leather goods, expensive liqueurs, jewelry and caviar will be taxed at a lower rate of 50 percent, the official statement said.

Sales tax on air fares, currently at 31 percent, will be slashed to 10 per cent. There will be similar cut in the sales tax on other services such as insurance, telecommincations and accommodation.

The new law also creates a National Committee for the Defense of Free Competition, which will curb monopolistic tendencies in the Peruvian economy.

Another law allows banks and mining concerns to issue silver certificates on the stock market to stimulate savings and investments.

HANOI (NOV. 6) - The Thai Military Bank (TMB) has opened a representative office in Ho Chi Minh City, the official Vietnam News Agency (VNA) said Tuesday.

Representatives of both the Thai and Vietnamese defense ministries attended the opening on Monday, the agency said. TMB, one of Thailand's major banks, is the seventh foreign bank to open an office in the southern Vietnamese city.

Five French banks - Banque Indosuez, BNP, Credit Lyonnais, Societe Generale, and Banque Francaise du Commerce exterieur - and Britain's Standard Chartered Bank also have offices in Ho Chi Minh City.

-30- 771

#90310d7840 11/06/1990 ~French/German News Agency

HANOI (NOV. 6) - Textile exports by public and private companies in Vietnam are rising steadily, including to capitalist countries, foreign experts here say.

The private SMX textile firm in Ho Chi Minh City recently signed a contract to provide 300,000 shirts to a Taiwan company, the official Vietnam News Agency (VNA) said Tuesday. SMX also took 1991 orders from four Taiwan and Malaysian companies for one million shirts, the agency said.

The company, formed in 1988, last year exported textiles worth 1.5 billion dong (234,000 dollars) to the Soviet Union, Taiwan, Poland and Australia, VNA reported.

One Western expert said: "Vietnamese products will become increasingly competitive with other Asian textiles on world markets in the coming years." "Their quality is improving due to the modernization - slight but real - of machinery, and they are competitive because Vietnamese salaries are low," he

added.

The weekly Vietnam-Hebdo wrote recently that the Vietnamese textile industry was trying to redirect exports toward the West, particularly Europe and North America. "Between 1987 and 1990, the Soviet Union imported 153 million units while other Eastern European countries absorbed 20 million units annually," it said.

Aside from the private sector, expanding rapidly as a result of reformist economic policies begun in 1986, the strong and modernizing state sector comprises 40 major businesses, Vietnam-hebdo added.

OAKLAND, CA (NOV. 6) - A burglar broke into a researcher's car and carried off a cooler containing nine vials of AIDS-tainted blood, police said Tuesday.

They said the thief or thieves "should be alarmed because what they have is potentially fatal," said Police Sargent Joe Sweeney, particularly if a vial shatters in someone's hand.

A number of items were taken from the car Sunday night, including the cooler containing the contaminated blood.

The researcher has been identified as a 40-year-old woman who works for the California Heterosexual Partner Study, part of University of California project studying the fatal disease, acquired immune deficiency syndrome.

The blood was in the woman's car because she does some of her research at home Sgt. Sweeney added.

LOS ANGELES (NOV 6) - An elderly man taking a driving test plowed his car into the motor vehicle office, causing 40,000 dollars damage to the facility and sending people scurrying for safety.

"A 70-year-old man really flunked the driving test," police officer Dennis Smith said. "He ran right into the building."

Six minor injuries were reported, the driver not among them.

The office in suburban Canoga Park is to remain closed for repairs for several days.

NEW YORK (NOV 7) - An Egyptian immigrant charged with killing ultra rightwing Rabbi Meir Kahane probably acted alone and not as part of a conspiracy, police said Tuesday.

Police meanwhile stepped up security for both Jewish and Arab organizations in New York City in case of revenge attacks. Thousands of people turned out in Brooklyn for the funeral of the U.S.-born extremist Kahane.

The alleged assassin El-Sayyid Nosair, 34, a naturalized U.S. citizen, was under armed guard at Bellevue Hospital, where he was recovering from a bullet wound to the jaw sustained as he tried to flee the scene of Monday night's killing. Police said he was heavily sedated and unable to answer questions.

''With the information that we have right now, we do not think it has anything to do with any groups or conspiracies,'' Police Commmissioner Lee Brown said of the shooting, which occurred at a Zionist conference Monday night in a Midtown Manhattan hotel.

Investigators said Nosair's frantic and disorganized attack indicated he was not a professional terrorist assassin.

Nosair, an air-conditioner repairman since 1988, came to the United States from Egypt in 1981 and became a U.S. citizen in 1989 after marrying an American Moslem woman he met in a mosque, police said.

Nosair was charged with an array of charges, including murder. He allegedly pulled a .357 Luger revolver and fired two shots at Kahane, 58, as the rabbi answered questions after giving a speech at the New York Marriott East Side Hotel.

#90310d8760 11/06/1990 ~French/German News Agency
BAGHDAD (NOV 7) - Former West German Chancellor Willy Brandt was to meet Wednesday with Iraqi President Saddam Hussein in a bid to win the release of foreign hostages being held in the Gulf, according to sources close to Brandt.

The meeting could decide the number and nationality of those foreigners for whose release Brandt is striving.

Parallel to that, Brandt planned to ask Saddam whether a ''process of serious negotiations for a securing of peace,'' as he put it, could get underway.

Brandt met Tuesday with Deputy Premier Taha Yassim Ramadan as well as Foreign Minister Tariq Aziz. Brandt sources later said these talks had not produced any worsening of the existing situation.

The 76-year-old Social Democrat indicated during a meeting with about 100 Germans in the German Embassy in Baghdad that he wanted to take home a large number of Germans and their dependents when he leaves for Germany on Thursday.

But he said a release could entail two or three phases. It was announced in Baghdad Tuesday evening that Saddam had authorized the release of 77 Japanese citizens. This came in the wake of a mission by former Japanese Premier Yasohiro Nakasone.

#90310d8800 11/06/1990 ~French/German News Agency

WASHINGTON (NOV 6) - Washington Mayor Marion Barry lost his bid for a city council seat and Sharon Pratt Dixon beat Washington's former police chief Maurice Turner Tuesday in the mayor's race.

Mr. Barry has been sentenced to six months in prison and fined 5,000 dollars after being convicted on a cocaine possession charge. Early returns showed him running a distant third in his bid for an at-large council seat.

Former presidental hopeful Jesse Jackson won his first elected seat: an unpaid non-voting "shadow senator" whose main task is to lobby the U.S. Congress for statehood for the District of Columbia.

Ms. Dixon, a former vice president of a public utility, is a newcomer to electoral politics who has pledged to eliminate waste and corruption in the city.

Her opponent, Mr. Turner, switched from the Democratic to Republican Party and got the support of President George Bush.

Currently, residents of the capital city have no voting representatives in congress.

#90310d9090 11/06/1990 ~French/German News Agency
BUDAPEST (NOV 70 - In the shiny new offices of Manpower-Hungary, Csaba Halmos former Hungarian secretary of state for labor under the communist regime, is busy answering the phone.

He and his associates receive some 100 calls a day from Hungarians who, either unemployed, or faced with the prospect of losing their jobs within the next few weeks or months, are soon to discover the capitalist reality of temporary employment.

Since Manpower opened a branch here on October 31, the office has been assailed by job seekers.

According to government statistics, a third of all Hungarian firms will be forced to shut down within two years, and the number of jobless will leap from 50,000 to 200,000.

Most affected are the mining, steel, and textiles industries which must undergo major restructuring in order to meet the rigors of the free market.

Mr. Halmos explains: "It's not shameful to have unemployment. It only means we are moving towards a market economy."

Of all the leaders of the former communist government, Mr. Halmos has made the most rapid conversion. Within the space of a few months, after taking what he described a "brief vacation," he has transformed himself from communist bureaucrat to capitalist manager.

Other colleagues have made similar moves towards greener pastures. Former deputy premier Peter Medgyessy was last summer named director of

Paribas-Hungary, a branch of the prestigious French investment bank.

Peter Reiniger, former deputy minister of industry, is now part of the management of the Hungarian holding companies of the Olivetti and Benedetti groups.

Asked why he made the switch, Mr. Halmos said he welcomed the "challenge." Furthermore, he was able to bring to Manpower his "knowledge of the Hungarian labor world and a network of contacts."

#90310d9210 11/06/1990 ~French/German News Agency

GENEVA (NOV 7) - Developing countries Tuesday night held the European Economic Community (EEC), Japan and the United States collectively responsible for "major blockages" in world trade negotiations due to be concluded in barely four weeks.

They made their point as EEC ministers struck agreement in Brussels on a joint bargaining platform on agriculture, ending a month-long internal row that has blocked the tabling of an EEC proposal on cutbacks in farm aids.

African, Asian and Latin American countries warned that the highly industrialized countries must contribute their "full share" to prevent a collapse of the stalled Uruguay Round talks.

Trade officials said they indirectly pointed a finger at the United States for dragging its feet in talks on services, at Japan for its stance on agriculture and at the major traders as a group for failing to match "constructive" contributions from their less-developed partners.

The four-year old Round, to be concluded by a 105-nation ministerial session in Brussels next December 3-7, is the most ambitious attempt ever to liberalize international trade and pave the way for world economic expansion well into the next century.

Trade experts say the objective can be achieved only with the participation of the largest possible number of developing countries.

The United States and the Australian-led Cairns Group of farm exporting countries, which includes Canada, New Zealand and major Asian and Latin American food producers, have directed a barrage of criticism against the EEC this week, charging that the absence of a community proposal on agriculture has held up bargaining in several sectors.

Tuesday night's deal should enable EEC negotiators to put forward the EEC's formal "offer" on farm subsidies, now three weeks behind schedule, perhaps on Wednesday.

A senior trade negotiator said this implied the impasse on farm trade could no longer serve as a pretext for stalling in other key areas.

UNIVERSAL CITY, CALIFORNIA, (NOV 6) - A major fire broke out Tuesday at the Universal Studios movie facility here, burning an undetermined number of buildings, fire officials said.

It was not immediately known if the fire had caused any casualties, Los Angeles County fire spokesman Pat Marek said.

At least 18 fire trucks were sent to the blaze, which started in a sound stage area at the rear of the studio lot, said the spokesman.

-30- 624

#90310e0001 11/06/1990 ~Latin America New Agency

MEXICO CITY (NOV. 6) EFE - The Mexican government Monday blasted as an "economically-motivated dirty trick" a U.S. court's decision banning the import of Mexican tuna caught in nets that also trap and kill dolphins.

Mexico "will not give up catches as important as tuna because this country does not destroy, but on the contrary, preserves the environment," Fisheries Secretary Maria de los Angeles Moreno said.

Under heavy lobbying from environmentalist groups, a U.S. court last month banned the import of tuna caught by Mexican fishing boats because they allegedly use seine nets that trap and drown the dolphins that frequently swim alongside tuna.

Several major U.S. canning companies have also pledged not to use tuna caught by such methods.

Mexico has exported just 698 tons of tuna to the United States this year compared with the 10,000 tons it shipped in 1989, causing losses put at dlrs 1.5 million.

De los Angeles Moreno said Mexico would consider "drastic measures" if the United States fails to respond favorably to diplomatic moves urging that the ban be lifted.

The issue, she added, might be taken up at the summit between Mexican President Carlos Salinas de Gortari and his U.S counterpart George Bush slated for the end of this month.

#90310e0012 11/06/1990 ~Latin America New Agency
Vienna (NOV. 6) EFE - Romanian Prime Minister Petre Roman has threatened to resign unless the public stops protesting and accepts economic reforms that have boosted prices by up to 25 per- cent, the Romanian news agency Rompres reported Tuesday.

The reforms were needed to get Romania through a serious economic crisis and served the national interest, Rompres quoted Roman as telling trade unionists late Monday.

Thousands of people have taken to the streets of Bucharest in a series of protests that started Thursday, after the government freed prices and ended subsidies of all goods except essential foodstuffs, fuel and rent.

Roman told the labor leaders he would step down if the +destabilizing actions+ continued.

The trade unionists asked Roman to compensate for the price hikes with equivalent social measures, Rompres reported.

Roman's party, the National Salvation Front, took over the government on an interim basis after dictator Nicolae Ceausescu was toppled and executed last December.

The NSF won a landslide victory in May elections but critics charge the party is riddled with former communists and claim the vote was fraudulent.

LONDON (NOV. 6) EFE - A Briton hiding in Kuwait has called for swift military

action to end the stalemate in the Gulf and the misery of foreigners hiding in the Iraqi-occupied country, Britain's domestic Press Association news agency reported Tuesday.

"We are praying, yes praying, for a military solution to quickly free us and Kuwait from the agony of this situation," Ronald Sargeant said in faxed messages sent via satellite to the agency.

Sargeant called on British Prime Minister Margaret Thatcher and U.S. President George Bush to use military intervention or to withdraw U.S.-spearheaded multinational forces in the Gulf.

"This stalemate is only hurting us and our families," Sargeant said.

His messages drew attention to diminishing food resources in the Kuwaiti capital and give details of the plight of 650 Britons hiding in Kuwait.

Since Iraq's August 2 invasion of Kuwait, Sargeant said he has sought refuge in friends' houses and has travelled around in the boots of automobiles.

The British Foreign Ministry said that although it was unable to confirm every detail, it was sure the messages were authentic.

"Many of his descriptions about the resistance and situation in Kuwait correspond to information we have," a ministry spokesman said.

Hundreds of Japanese and Western men have been taken to strategic military and civilian locations in Iraq and occupied Kuwait to deter an attack by the forces massed in the Gulf.

#90310e0028 11/06/1990 ~Latin America New Agency

WASHINGTON (NOV. 6) EFE - Americans went to the polls Tuesday to vote for a new House of Representatives, a third of the Senate, 36 state governorships and thousands of local government officials.

Polls opened at 7 a.m. (1200 GMT in the eastern United States) in the mid-term elections, with surveys indicating that only a third of the electorate would turn out to vote.

President George Bush cast his vote in Houston, Texas, his adopted home, shortly after polls opened there and immediately headed off to Washington.

All 435 seats in the House of Representatives are up for grabs, along with 34 of the 100 Senate seats.

The elections come amid the most pessimistic atmosphere in the United States

since the late 1970s, according to surveys which show Americans worried about possible war in the Gulf and an impending economic recession.

Opinion polls have predicted a high rate of abstention, attributed in part to a belief held by 75 per cent of Americans that politics is controlled by big business.

Democrats are predicted to expand their 258-175 majority over the Republicans in the House of Representatives, gaining an additional four to 12 seats.

No change was predicted in the Democrats' 55-45 advantage in the Senate.

One of the most closely-watched races is in North Carolina, where incumbent Republican Senator Jesse Helms is being challenged by black Democrat Harvey Gantt, in a campaign tinged by racist overtones.

Women Democrats are bidding for the governorships of two of the largest states California and Texas.

Former San Francisco mayor Dianne Feinstein is seen as the likely loser in the California governor's race against Republican Senator Pete Wilson.

In Texas, Ann Richards is in a close race for the governorship against Republican millionaire Clayton Williams.

Guatemala City, Nov 6 (EFE).- Two unknown gunmen have shot dead a mayor from the ruling Christian Democrat (CD) party, the latest victim in a spiral of violence in the runup to Guatemala's general elections this weekend, police

said Tuesday.

Meanwhile, a member of the U.S.-based National Democratic Institute (NDI) said the wave of violence was worrying NDI election observers.

The attackers killed Antonio Bonilla, mayor of the southern town of Jalapa, during a CD party meeting on Monday, a police spokesman said.

The mayor's bodyguards killed one of the gunmen and wounded the other, the spokesman added.

"The increase in political violence is worrying because it can affect the democratic process in a country which is only days away from elections" on Sunday, said Deborah Hauger, NDI's legal consultant.

Bonilla was running for a second term of office in Sunday's elections supported by the CD and the Revolutionary Party.

Unknown groups have murdered more than twenty leading political figures and three journalists in the runup to the presidential ballot.

Many of the NDI's 35 observers, including legislators and politicians froThursday headed by former U.S. governor and presidential candidate Bruce Babbitt.

"The observers are not coming to intervene in Guatemala's internal affairs, nor to guarantee the process, but to observe and to exchange ideas," Hauger said.

Human rights groups have blamed extreme right-wing death squads for many of the political killings and the government attributes the wave of violence to "people interested in changing the electoral process".

Guatemala's Association of Lawyers and Notaries Tuesday condemnerd the violence, saying it showed "impunity and scorn towards the most elemental human rights".

The group appealed to the government of President Vinicio Cerezo, which has promised to do everything it can to curb the violence, to act as swiftly as possible.

The election campaigns have been dominated by disputes over the legitimacy of one of the leading presidential hopefuls, former military dictator Gen. Efrain Rios Montt.

RANDBURG, SOUTH AFRICA (NOV. 6) EFE - South African President F.W. de Klerk slammed the ultra-rightist Conservative party Tuesday, accusing the party of turning itself into a resistance movement.

During a local election campaign speech in Randburg, near Johannesburg, the president asked voters to demonstrate at the ballot box that they were opposed to the violent and illegal path which the Conservative party was taking.

De Klerk said that he would continue with reforms aimed at removing apartheid in South Africa even though Conservatives called him a traitor.

The president rejected a petition from the Conservatives, which won only 25 per cent of the white vote in the last parliamentary polls, to bring forward legislative elections.

He said that he did not accept that the Conservatives, the Afrikaaner Resistance Movement and the Boerestate party, all ultra-rightists, were representative of all white South Africans.

The results of the Randburg local election, which take place Wednesday, are considered by many observers as an important indication of white opinion on the system of anti-apartheid reforms which de Klerk began last February.

BOGOTA (NOV. 6) EFE - Eighteen Colombian leftist rebels and six police officers were killed in separate battles over the weekend, Defense Ministry sources said Tuesday.

They said the rebels, members of the Colombian Revolutionary Armed Forces (FARC), were killed in separate Army raids in the northwestern departments of Bolivar and Santander.

Some 130 kg of explosives, 40 weapons of varying calibre, homemade bombs, grenades and ammunition were seized during the raids.

The ministry said the six police officers were killed in a FARC ambush as they patrolled near the town of San Juan, 450 km northwest of Bogota. Six more officers were wounded in the ambush.

The Defense Ministery source also said that over the weekend Army intelligence uncovered a FARC plan to dynamite three Air Force runways during upcoming manoeuvres involving A-37 jet fighters.

FARC, the largest and longest-standing of Colombia's five leftist rebel groups has recently begun to coordinate its attacks with the National Liberation Army (ELN).

Both belong to the Simon Bolivar Guerrilla Coordinator (CGSB), an umbrella group for the five rebel organizations.

The CGSB has said it is willing to negotiate with the government over a peace plan initiated by former president Virgilio Barco.

That plan, backed by Barco's successor, Cesar Gaviria, envisages a unilateral ceasefire by the rebels, as well as the demobilization and incorporation of all five groups into the political mainstream.

But FARC and the ELN have refused the cease-fire plan.

#90310e0043 11/06/1990 ~Latin America New Agency

YAOUNDE (NOV. 6) EFE - Cameroonian President Paul Biya took the first step toward democracy Tuesday by opening a parliamentary debate on changes to the constitution and the institution of an official multi-party political system.

Parliament also discussed the possibility of reinstating the post of prime minister which was suspended in 1984.

Biya, who has run the single-party West African state since 1982, was fulfilling a promise made in June to return Cameroon to democracy.

Although political parties were banned in 1966, since last April unofficial political groups have called for changes.

Some of the groups have called for a return to the federalist system which prevailed until 1972, which they consider the only system capable of protecting the rights of the English-speaking minority against the French-speaking majority.

The exiled Cameroonian opposition living in France, Britain the United States

have asked Biya to convene a national conference on democracy.

GENEVA (NOV. 6) EFE - The success of the Uruguay Round of trade liberalizing talks is the key to eliminating the production of coca, the raw material for cocaine, Colombian Agriculture Minister Maria del Rosario Sintes said Tuesday.

Sintes said some countries were using agricultural subsidies to dump farm products in Colombia, depriving Colombian farmers of domestic and export markets for legal crops.

By suppressing prices for potential legal crops, the subsidies forced farmers to continue growing drug crops, she said.

"The problem is not so much to replace the illegal cultivation of coca and marijuana as to be able to sell the potential replacement crops," she said.

"We import wheat, vegetable oil and soybeans, and we should be exporting them " she added.

Sintes was in Geneva with a delegation from the so-called Cairns Group of 13 agricultural countries trying to persuade the European Community to lower farm subsidies.

The Cairns Group and the United States have insisted that a sharp lowering of the EC farm subsidies must be included in any eventual accord in the Uruguay Round of the General Agreement on Tariffs and Trade (GATT).

The Uruguay Round of talks among the more than 100 GATT members has been underway for four years and is scheduled to finish in December.

Sintes, along with ministers from Australia, Argentina and Chile, compose the Cairns Group delegation which plans to visit Bonn, Paris and Rome this week to persuade the EC to lower the farm subsidies.

Meanwhile in Brussels, EC agriculture and trade ministers have failed to agree on a proposal for lower agricultural subsidies to be presented at the Uruguay Round talks.

Germany, France and Spain were most resistant of the 12 EC countries to the proposal, sources close to the talks said.

ALICANTE, SPAIN (NOV. 6) EFE - Spanish police Tuesday arrested two young

Dutch women found smuggling 10 kg of heroin worth dlrs two million aboard a train bound for the northeastern city of Barcelona, officials said.

The two women, Zhor Abed and Margaretha Hihorst, both aged 29, had entered Spain on a tour coach bound for the holiday resort of Benidorm where they had then taken a train headed to Barcelona.

The drugs were found during a routine police check on board the train.

Police said the drugs were to be distributed throughout the Spanish Mediterranean coast.

LIMA (NOV. 6) EFE - At least 200,000 Peruvian state workers are to go on strike next week, joining a growing wave of labor discontent which has hit privately-owned factories and government offices alike.

The National Coalition of Public Business Unions, which includes workers in the electricity, water, oil, mineral, food, ports, iron and steel sectors, has called an indefinite strike starting November 15, union boss Sergio Solorzano said Tuesday.

On Thursday, 42,000 social security workers are to stop work indefinitely, and 200,000 construction workers are to stage a 24-hour strike.

Some 8,000 banking workers are already on a 10-day-old stoppage which the government has declared illegal.

Court employees have been on strike for a month, and oil workers are on a go-slow.

On Monday, police injured 16 people when they used a tank, tear gas and fire arms to dislodge workers from a three-week sit-in at Lima's Carbolan Pelikan factory.

Chemical workers have announced they will stop work Wednesday and the Drivers' Federation is planning a five-day strike starting on November 19.

Some unions are protesting the government's wide-ranging privatization plans.

But most strikers are demanding pay increases to cope with the effects of newly-elected President Alberto Fujimori's drastic austerity measures, implemented in August and aimed at stabilizing the country's shaky economy by reducing hyperinflation.

The legal minimum monthly salary in Peru is dlrs 57, and monthly inflation in

August reached 397 per cent.

Although the rate fell to 9.6 per cent for October, Peruvians have had to cope with the effects of the austerity measures which have led to 300 per cent hikes on the price of bread and milk, and 3,000 per cent rises on the price of gasoline.

In Peru, 55 per cent of the population -- some 12 million people -- live in poverty.

ROME (NOV. 6) EFE - The Italian embassy in Baghdad confirmed Tuesday that 10 Italians working in Baghdad before Iraq's August invasion of Kuwait would be among the 106 foreigners granted permission to leave.

The 10 former employees of the National Institute of Hydrocarbons are waiting for visas to leave Iraq.

Italian diplomats said the decision may have been thanks to the mediation of the International Union of Arab Workers.

Radio Baghdad reported earlier Tuesday that 20 Italians would be among 106 foreigners to be released. Some 400 Italians are still stranded in Iraq and occupied Kuwait.

Hundreds of Japanese and Western men have been taken to strategic military and civilian sites in Iraq and Kuwait to deter an attack by U.S.-spearheaded forces massed in the Gulf region.

#90310e0062 11/06/1990 ~Latin America New Agency

BRUSSELS (NOV. 6) EFE - European Community agriculture and trade ministers agreed Tuesday to cuts in farm subsidies paving the way for an international accord to open up world trade, EC officials said.

The ministers agreed unanimously to accept a 30 per cent reduction in grants to EC farmers over a 10 year period, but EC agricultural products will still be given preference over non-Community goods.

Tuesday's agreement was reached after two days of arduous negotiations in which Germany, France and Spain initially resisted the cuts because of the impact they would have on their farmers.

Trade officials had said that failure to reach an agreement on the cuts would endanger an accord to pull down world trade barriers due to be signed at the

end of this year under the Uruguay Round of the General Agreement on Tariffs and Trade.

The Cairns Group of 14 agricultural countries and the United States had called on the EC to slash farm subsidies by 75 per cent.

The Uruguay Round of talks among the more than 100 GATT members has been underway for four years and is scheduled to finish in December.

LIMA (NOV. 6) EFE - Six people were killed and several buildings bombed in the past 24 hours in a series of attacks throughout Peru by suspected leftist rebels, police said Tuesday.

Suspected Maoist "Shining Path" guerrillas gunned down five people Monday in the towns of Tarapato and Lamas in the northern department of San Martin, police said.

Suspected leftist rebels also killed a policeman Monday in the capital.

Police blamed Peru's other main leftist rebel group, the Tupac Amaru Revolutionary Movement (MRTA), for a bomb attack Monday on a Lima discotheque, causing extensive damage but no injuries.

Meanwhile, suspected Shining Path guerrillas attacked a farm Monday in the town of Huancavelica, some 220 km southeast of Lima, killing cattle and destroying equipment, the Lima daily El Comercio reported Tuesday.

The MRTA took up arms against the government in 1984. The larger Shining Path group began fighting in 1980.

More than 21,000 people have been killed in a decade of political violence in Peru.

WASHINGTON (NOV. 5) XINHUA - LIKE SOME BIRDS, VEGETARIAN DINOSAURS APPARENTLY SWALLOWED ROCKS TO HELP GRINDING UP THEIR FOOD, ACCORDING TO A NEW STUDY REVEALED AT THE RECENT ANNUAL MEETING OF THE SOCIETY OF VERTEBRATE PALEONTOLOGY. UTAH STATE PALEONTOLOGIST DAVID D. GILLETTE, FOUND TWO GROUPS OF PLUM-SIZED ROCKS LYING IN THE RIB CAGE OF A FOSSIL SEIMOSAURUS WHICH IS STILL UNDER EXCAVATION IN CENTRAL NEW MEXICO. THE SEISMOSAURUS, THE LONGEST DINOSAUR KNOWN, HAD A HEAD NO LARGER THAN THAT OF A MODERN HORSE. WHAT IS MORE REMARKABLE OF SUCH DINOSAURS IS THAT THEY HAD SMALL, WEAK TEETH WHICH MADE SCIENTISTS WONDER HOW THEY PULVERIZED TOUGH PLANT FIBER. GILLETTE SAID THE

DINOSAUR APPARENTLY BROKE DOWN THE FIBER USING GASTROLITHS, NAMELY ROCKS INGESTED THAT WOULD HELP IN GRINDING FOOD IN SPECIAL DIGESTIVE CHAMBERS.

HE ALSO SAID THAT THE TWO GROUPS OF ROCKS FOUND SUGGESTED THE CREATURE HAD TWO ROCK-GRINDING CHAMBERS: A CROP ABOVE THE STOMACH, FOUND IN BIRDS AND CROCODILES, AND A GIZZARD BETWEEN THE STOMACH AND THE SMALL INTESTINE, ALSO FOUND IN BIRDS.

ISTANBUL (NOV. 6) XINHUA - TURKEY'S DEPENDENCE ON ENERGY IMPORTS WILL INCREASE WITH THE COUNTRY EXPECTED TO MEET ONLY 39 PERCENT OF ITS ENERGY DEMAND BY 2010, THE "DAILY NEWS" REPORTED TODAY.

ACCORDING TO A STUDY CONDUCTED BY THE ENERGY MINISTRY, TURKEY WILL PAY 54 BILLION U.S. DOLLARS FOR NATURAL GAS, IIL AND COAL IMPORTS BETWEEN 1990 -, 20000, AND THE BILL MAY RISE TO 85.4 BILLION DOLLARS BETWEEN 2001 AND 2010.

PRESENTLY, 78 PERCENT OF ALL TURKEY'S ENERGY NEEDS ARE MET BY ITS OIL IMPORTS, WHICH STOOD AT ABOUT 19.5 MILLION TONNES IN 1989.

OIL IMPORTS MAY DECREASE IN THE FIRST DECADE OF THE 21ST CENTURY BUT COAL IMPORTS, ARE EXPECTED TO INCREASE.

TURKEY'S ENERGY NEEDS WILL BE MET THROUGH A COMBINATION OF COAL, OIL AND HYDRO POWER IMPORTS IN THE 2000S.

IN A RELATED DEVELOPMENT, THE TURKISH ELECTRICITY AUTHORITY AND THE TURKISH ATOMIC ENERGY COMMISSION EXPECT TO CONSTRUCT A NUCLEAR POWER PLANT BY 2008.

THE PLANT SHOULD BE ABLE TO PRODUCE 37 BILLION KILOWATT HOURS OF ELECTRICITY PER YEAR BY 2010.

COLOMBO (NOV. 6) XINHUA - FUEL PRICES IN SRI LANKA HAVE INCREASED BY ANOTHER 40 PERCENT EFFECTIVE FROM TODAY DUE TO THE RISE OF CRUDE OIL PRICE ON INTERNATIONAL MARKET.

THE PRICE OF A LITER OF PETROLEUM HAS BEEN RAISED BY 10 RUPEES (0.25 U.S. DOLLARS) FROM 25 RUPEES TO 35 RUPEES.

THE FUEL HIKE FOLLOWED THE INCREASE OF PETROLEUM PRICES ON AUGUST 15 THIS YEAR BY 25 PERCENT AFTER THE GULF CRISIS.

SRI LANKAN ECONOMY HAS BEEN BATTERED BY THE GULF CRISIS WHICH WILL DEPRIVE THE

COUNTRY OF 100 MILLION U.S. DOLLARS THIS YEAR AND 400 MILLION U.S. DOLLARS NEXT YEAR.

SRI LANKA WILL HAVE TO PAY AN EXTRA ANNUAL COST OF MORE THAN 100 MILLION U.S. DOLLARS ON ITS ANNUAL IMPORT OF ABOUT 165 MILLION TONS OF CRUDE OIL.

BEIJING (NOV. 6) XINHUA - MORE THAN FOUR MILLION PEOPLE WERE NEWLY EMPLOYED IN THE FIRST THREE QUARTERS OF THIS YEAR, ACCORDING TO AN OFFICIAL FROM THE MINISTRY OF LABOR.

THE OFFICIAL TOLD XINHUA HERE TODAY THAT LOCAL GOVERNMENTS HAVE STRESSED EMPLOYMENT AS A MAJOR FACTOR IN MAINTAINING SOCIAL STABILITY.

HE SAID THAT NEW EMPLOYEES HAVE GOT JOBS MOSTLY IN STATE-OWNED ENTERPRISES; OTHERS HAVE FOUND JOBS IN COLLECTIVE-OWNED ENTERPRISES, GOVERNMENT ORGANIZATIONS, THE PRIVATE SECTOR AND SINO-FOREIGN JOINT VENTURES.

ACCORDING TO THE MINISTRY, MOST OF THE 570,000 GRADUATES FROM UNIVERSITIES HAVE BEEN EMPLOYED IN STATE-OWNED UNITS SINCE THE GOVERNMENT HAS EXPANDED THE SCOPE OF STATE ASSIGNMENTS THIS YEAR.

STATISTICS PROVIDED BY THE STATE STATISTICS BUREAU SHOW THAT IN THE FIRST THREE QUARTERS UNEMPLOYMENT HAD DROPPED TO 4.5 MILLION BY THE END OF SEPTEMBER -- ABOUT THREE PERCENT.

THANKS TO MORE EMPLOYMENT OPPORTUNITIES, THE INDUSTRIAL AND COMMERCIAL WORKFORCE HAS GROWN STEADILY THIS YEAR TO 137 MILLION BY THE END OF SEPTEMBER. IT IS EXPECTED TO GROW TO 139.5 MILLION BY THE END OF THE YEAR, MAKING IT TWO MILLION MORE THAN LAST YEAR.

#90310h0134 11/06/1990 ~Chinese News Agency

TEHRAN (NOV. 6) XINHUA - IRANIAN PRESIDENT HASHEMI RAFSANJANI CALLED TODAY FOR TIGHTENED CONTROL OVER ATOMIC WEAPONS TO AVOID NUCLEAR HOLOCAUST.

AT A MEETING WITH VISITING DIRECTOR-GENERAL OF THE INTERNATIONAL ATOMIC ENERGY AGENCY (IAEA) HANS BLIX, THE PRESIDENT SAID: "IT WILL BE IMPOSSIBLE TO CONTROL NUCLEAR WEAPONS IF EVEN A SINGLE COUNTRY IS EQUIPPED WITH SUCH ARMS."

IT WAS IMPORTANT TO PREVENT THE DESTRUCTIVE EFFECTS OF SUCH WEAPONS BY COMPLETELY BANNING THEIR USES, HE ADDED.

IT WAS INSUFFICIENT TO MERELY SIGN AGREEMENTS PROHIBITING THE USE OF NUCLEAR WEAPONS, HE ASSERTED, ADDING THAT SOME COUNTRIES MIGHT NOT OBSERVE INTERNATIONAL LAWS WHENEVER THEIR INTERESTS WERE ENDANGERED.

IRAN WOULD REMAIN COMMITTED TO ITS OBLIGATIONS, BUT "THIS DID NOT APPLY TO ALL OTHER STATES," IRAN'S OFFICIAL NEWS AGENCY IRNA QUOTED THE PRESIDENT AS SAYING.

THE PRESIDENT CITED THE EXISTING BALLISTIC MISSILES IN THE WORLD AND IRAQ'S USE OF CHEMICAL WEAPONS DURING THE EIGHT-YEAR WAR WITH IRAN (1980 TO 1988) TO SUPPORT HIS VIEW.

APPARENTLY, HIS STATEMENT WAS NOT DIRECTLY RELATED TO THE GULF CRISIS TRIGGERED BY THE AUGUST 2 IRAQI INVASION OF KUWAIT, BUT THERE WERE FEARS OF NUCLEAR OR CHEMICAL WARFARE IF IRAQ AND THE WESTERN POWERS COME TO A SHOWDOWN.

IRAQ WAS ACCUSED OF USING CHEMICAL ARMS AGAINST IRANIAN TROOPS IN THE SOUTHERN WARFRONT AND THE ETHNIC KURDS IN NORTHERN IRAQ BEFORE THE GULF WAR ENDED IN

AUGUST 1988.

IT WAS PREDICTED THAT IRAQ MAY RESORT TO ITS CHEMCIAL STOCKPILES ONCE AGAIN IF IT IS IN REAL DANGER OF DESTRUCTION.

THE WESTERN FORCES IN THE GULF WERE SUSPECTED OF POSSESSING TACTICAL NUCLEAR ARMS WHILE REPORTS INDICATED THAT IRAQ HAD ACCESS TO MATERIALS FOR DEVELOPING ATOMIC WEAPONS.

#90310k0009 11/06/1990 ~Japanese News Agency

SEOUL (NOV. 6) KYODO - SOVIET PRESIDENT MIKHAIL GORBACHEV SAID ON MONDAY IN MOSCOW THAT HE EXPECTS SOUTH KOREAN COMPANIES WILL TAKE A LEADING ROLE IN CREATING A ''SPECIAL ECONOMIC ZONE'' IN THE SOVIET FAR EAST REGION, INCLUDING NAKHODKA, OFFICIALS OF THE SOUTH KOREAN HYUNDAI BUSINESS GROUP SAID TUESDAY.

GORBACHEV MADE THE REMARKS AT A MEETING WITH CHONG CHU YONG, AN HONORARY CHAIRMAN OF THE HYUNDAI BUSINESS GROUP, WHO IS CURRENTLY VISITING MOSCOW.

DURING THE 40-MINUTE MEETING, GORBACHEV ALSO CALLED FOR SOUTH KOREA'S HELP IN OBTAINING DAILY NECESSITIES AND CONSUMER GOODS, WHICH ARE NOW RUNNING OUT IN THE SOVIET UNION.

GORBACHEV SAID THAT HE WILL SEND HIS MESSAGE TO SOUTH KOREAN PRESIDENT ROH TAE WOO THROUGH VADIM A. MEDVEDEV, A MEMBER OF THE SOVIET PRESIDENTIAL COUNCIL, WHO IS SCHEDULED TO VISIT SOUTH KOREA ON NOVEMBER 16.

GORBACHEV ALSO SAID HE IS CONVINCED THAT THE ESTABLISHMENT OF DIPLOMATIC RELATIONS BETWEEN THE TWO NATIONS ON SEPTEMBER 30 WILL BE INSTRUMENTAL IN STABILIZING THE POLITICAL SITUATION IN EAST ASIA, INCLUDING NORTH KOREA.

TOKYO (NOV. 6) KYODO - SANWA BANK WILL OPEN A REPRESENTATIVE OFFICE IN LISBON ON THURSDAY, OFFICIALS SAID TUESDAY.

THE MOVE IS IN LINE WITH SANWA'S PLAN TO ENLARGE ITS BASE AHEAD OF THE SINGLE MARKET INTEGRATION OF THE EUROPEAN COMMUNITY IN 1992, THEY SAID.

THIS BRINGS THE NUMBER OF THE BANK'S OVERSEAS OUTLETS TO 51, INCLUDING BRANCHES, AGENCIES, AND REPRESENTATIVE OFFICES.

-30- 533

#90310k0053 11/06/1990 ~Japanese News Agency

TOKYO (NOV. 6) KYODO - FOUR MAJOR JAPANESE STEELMAKERS WILL EXPORT 80,000 TONS OF STEEL PIPES TO THE SOVIET UNION NEXT YEAR, OFFICIALS SAID TUESDAY.

NIPPON STEEL CORP., SUMITOMO METAL INDUSTRIES LTD., KAWASAKI STEEL CORP., AND NKK CORP. WILL EXPORT LARGE-DIAMETER STEEL PIPES FROM JANUARY TO JUNE 1991.

EXPORTS OF STEEL HAD BEEN TEMPORARILY STOPPED DUE TO PAYMENT DELAYS. THE CURRENT AGREEMENT FOLLOWS A DEAL MADE AT THE END OF OCTOBER FOR THE EXPORT OF 105,000 TONS OF SEAMLESS PIPES.

PRICES ARE BELIEVED TO HAVE BEEN INCREASED 20 PERCENT ABOVE THOSE OF THE PREVIOUS ROUND OF EXPORTS. PAYMENTS WILL BE GUARANTEED BY ISSUANCE OF A LETTER OF CREDIT.

OFFICIALS SAID THEY BELIEVE THE SOVIETS AGREED TO THE SUBSTANTIAL PRICE HIKE BECAUSE OF THE PRIORITY GIVEN TO DEVELOPING ENERGY RESOURCES. HIGH CRUDE OIL PRICES RESULTING FROM THE GULF CRISIS HAVE BENEFITED THE SOVIET UNION WITH AN INCREASED FLOW OF FOREIGN CURRENCY, THEY SAID.

-30- 1124

#90310k0054 11/06/1990 ~Japanese News Agency

TOKYO (NOV. 6) KYODO - NIPPON IDOU TSUSHIN CORP. (IDO) SAID TUESDAY IT HAS COMMISSIONED AMERICAN TELEPHONE AND TELEGRAPH CO. (AT AND T), NEC CORP., AND FUJITSU LTD. TO DEVELOP A DIGITAL MOBILE TELEPHONE.

TOKYO (NOV. 6) KYODO - CONSUMER CONFIDENCE SLIPPED 4.1 POINTS TO 45.3 IN JAPAN DURING THE JULY-SEPTEMBER QUARTER COMPARED WITH THE PREVIOUS QUARTER, ACCORDING TO A SURVEY RELEASED BY THE ECONOMIC PLANNING AGENCY (EPA) ON TUESDAY.

THE 4.1 POINT QUARTER-TO-QUARTER FALL FOR THE THIRD QUARTER OF 1990 FOLLOWED A 0.9 POINT RISE IN THE APRIL-JUNE QUARTER, THE QUARTERLY SURVEY SAID.

AN EPA OFFICIAL SAID THE DROP REFLECTS ANXIETIES ASSOCIATED WITH THE GULF CRISIS SUCH AS THE GROWING CONCERN OVER INFLATION TOGETHER WITH HIGH INTEREST RATES DAMPENING HOUSING LOANS.

THE POLL, CONDUCTED ON SEPTEMBER 15, COVERING 5,040 HOUSE HOLDS, USES A SET OF 20 QUESTIONS TO SAMPLE CONSUMER THINKING ON SUCH FACTORS AS INCOME GROWTH, INTEREST BURDENS, EMPLOYMENT, AND PURCHASING PATTERNS.

ON A YEAR-ON-YEAR BASIS, THE OVERALL CONFIDENCE INDEX FOR THE JULY-SEPTEMBER PERIOD FELL 1.7 POINTS TO 47.7.

PURCHASING OF 33 DURABLE GOODS INCREASED 3.1 POINTS IN JULY-SEPTEMBER QUARTER FROM THE PREVIOUS THREE MONTHS BUT IS EXPECTED TO SUFFER A 0.4 POINT DECLINE IN THE OCTOBER-DECEMBER QUARTER.

-30- 1256

#90310k0076 11/06/1990 ~Japanese News Agency

TOKYO (NOV. 6) KYODO - JAPAN'S MAJOR SHIPBUILDERS REPORTED STEADY GAINS TUESDAY IN THEIR SALES AND UNCONSOLIDATED PRETAX PROFITS DURING THE APRIL-SEPTEMBER PERIOD.

AMONG THE COUNTRY'S SIX LEADING HEAVY MACHINERY MAKERS, MITSUI ENGINEERING AND SHIPBUILDING CO. ALONE SUFFERED A 4.7 PERCENT LOSS IN PRETAX PROFIT DESPITE A 33.6 PERCENT RISE IN SALES.

BUT MITSUI OFFICIALS SAID THE COMPANY IS EXPECTED TO SHOW A PRETAX PROFIT FOR THE ENTIRE FISCAL YEAR.

SPOKESMEN FOR HEAVY MACHINERY MANUFACTURERS CITED ROBUST ORDERS IN THE INDUSTRIAL MACHINERY AS WELL AS SHIPBUILDING SECTORS FOR THE GOOD PROFIT FIGURES.

THE ONCE DEPRESSED SHIPBUILDING SECTOR HAS IMPROVED SIGNIFICANTLY DUE TO A RECOVERY IN ORDERS FOR VESSELS AND EFFORTS TO STREAMLINE THEIR OPERATIONS, THE SPOKESMEN SAID.

THE SIX BIGGEST HEAVY MACHINERY MANUFACTURERS, EXCEPT FOR HITACHI ZOSEN, PREDICT SUBSTANTIAL GAINS IN SALES AND PRETAX PROFIT FOR THE YEAR DUE TO CONTINUED ACTIVE CAPITAL INVESTMENT.

FOLLOWING ARE THE FIRST-HALF FINANCIAL RESULTS FOR THE SIX LARGEST SHIPBUILDERS IN TERMS OF BILLIONS OF YEN, WITH THE PERCENTAGE OF YEAR-ON-YEAR INCREASES OR DECLINES IN PARENTHESES.

	SALES	PRETAX PROFIT	NET PROFIT
MITSUBISHI HEAVY	1,030.4(1.9)	66.4(5.0)	35.4(13.6)
INDUSTRIES KAWASAKI HEAVY	355.1(3.7)	8.5(40.5)	6.0(23.9)
INDUSTRIES ISHIKAWAJIMA-HARIMA	302.5(6.6)	10.6(56.4)	7.2(15.3)
HEAVY INDUSTRIES SUMITOMO HEAVY	105.3(0.7)	1.2(24.1)	1.2(24.1)

INDUSTRIES MITSUI ENGINEERING	104.2(33.6)	2.7(-4.7)	7.5(341.0)
AND SHIPBUILDING HITACHI ZOSEN	104.0(24.4)	2.0(---)	2.0(---)

#90310k0088 11/06/1990 ~Japanese News Agency

OSAKA (NOV. 6) KYODO - NISSHO IWAI CORP., A MAJOR GENERAL TRADING HOUSE, SAID TUESDAY THE FIRM WILL PURCHASE ABOUT 53,000 HECTARES OF NATIONAL FOREST IN NEW ZEALAND JOINTLY WITH A MEDIUM-SCALE JAPANESE HOUSING MATERIAL MAKER, JUKEN SANGYO CO.

THE PURCHASE, TO BE CONDUCTED THROUGH A JOINT VENTURE COMPANY SET UP IN NEW ZEALAND BY THE TWO IN JUNE THIS YEAR, WILL MAKE THE JOINT CONCERN THE FOURTH-LARGEST OWNER OF NEW ZEALAND NATIONAL FOREST, COMPANY OFFICIALS SAID.

THE PURCHASE PRICE IS ESTIMATED AT ABOUT 126 MILLION NEW ZEALAND DOLLARS OR EQUIVALENT TO ABOUT 10 BILLION YEN.

THE JOINT VENTURE, JUKEN NISSHO, PLANS TO INVEST ABOUT 6.2 BILLION YEN TO BUILD TWO PROCESSING FACTORIES IN THE COUNTRY. JUKEN SANGYO, HEADQUARTERED IN HIROSHIMA PREFECTURE, IS KNOWN AS ONE OF JAPAN'S MAJOR PLYWOOD PROCESSORS.

JUKEN SANGYO WILL FINANCE 85 PERCENT OF THE TOTAL PROJECT AND NISSHO IWAI THE REMAINING 15 PERCENT.

THE OFFICIALS SAID THEY EXPECT THAT FROM 1993, THE TWO LUMBER MILLS WILL BEGIN PRODUCING 100,000 CUBIC METERS OF LAMINATED WOOD AND OTHER LUMBER PRODUCTS ANNUALLY.

THE LAMINATED LUMBER PRODUCTS ARE ALL TO BE SHIPPED TO JUNKEN'S JAPANESE FACTORIES FOR FURTHER PROCESSING TO MAKE HOUSING MATERIALS, THEY SAID.

#90310m0001 11/06/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (NOV. 6) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The Nikkei loses 420 points. ... The FTSE is up 12 points at midday. dollar is stronger against the yen, but is little changed against the mark. ... North Sea crude slips another 20 cents to $31.70. ... The NATIONAL ASSOCIATION OF REALTORS says home prices rose just 1.8% in the third-quarter over the same period a year ago, the smallest rise since the 1982 recession. ... October car and truck sales by the "Big Three" rose just 1.7% over a weak October 1989, but analysts had been looking for an even more lackluster figure. ... The UNITED AUTO WORKERS union bargaining council has approved a tentative three-year contract with CHRYSLER, clearing the way for a rank-and-file vote. ... STANDARD & POOR'S downgrades about $22 billion of CITICORP debt from AA-minus to A-plus. ... GENERAL CINEMA drops its bid to buy the rest of NEIMAN-MARCUS, but some say the deal is not yet dead.

WHAT'S AHEAD:

The LABOR DEPARTMENT is scheduled to release productivity and costs for the third quarter at 10 a.m. EDT. ... The POSTMASTER GENERAL ANTHONY FRANK will hold a briefing on postal contract negotiations and advance technology later today. ... The TREASURY DEPARTMENT auctions $12.5 billion in three-year notes this afternoon. ... BUSINESSLAND increases its target for staff reduction to 20%, up from the 10% it announced in September. ... A federal judge says MICHAEL MILKEN will be sentenced next week on his guilty plea to six felony charges.

FROM THE BULLS:

"This is not the end of the world, as some would have you believe," says STEFAN ABRAMS, chief investment strategist at KIDDER, PEABODY. "The stock market has come down a lot since the July peak. Stocks are very close to ... fair value." (WSJ, 11/6)

The current erosion of interest rates "almost guarantees that 1991 will be

good" for the market, says MICHAEL SCHONBERG of CHASE INVESTORS MANAGEMENT. He says the economic situation is looking better, since rates are already falling in anticipation of a move by the Fed. "Most of the weakness is behind us," says Schonberg. ("Investor's Daily", 11/6)

"The stock market has probably done its worst," says MICHAEL SHERMAN, chief strategist for SHEARSON LEHMAN HUTTON INC. (WSJ, 11/6)

FROM THE BEARS:

According to STEVEN EINHORN, chief strategist at GOLDMAN SACHS & CO., the outlook for stocks is still crummy. Investors, he says, should put most of their money in bonds, preferably intermediate-term government bonds. "Our caution came well before the Iraqi invasion," Einhorn says. "Even if Iraq is resolved quickly and favorably, all we would expect is a relief rally." (WSJ, 11/6)

"We feel that there is some downside - modest downside - in both stocks and bonds over the next few months," says RAYMOND WORSECK, a strategist at A.G. EDWARDS & SONS. He thinks the Dow industrials could drop to about 2200 or 2300 in the next few months. Long-term interest rates, he figures, could climb to 9.25% or 9.5% before a long slow decline back to around 8% sometime in 1991. The St. Louis based firm recommends a defensive blend of 40% stocks, 40% bonds and 20% cash. (WSJ, 11/6)

STOCK MARKET:

"What we're seeing is a continuation of the rally that began Oct. 11 at Dow 2365," says WALTER REVIS of HAMILTON INVESTMENTS. He feels "the downside risk in the market is limited," and predicts the market will trade between 2300 and 2600 until forming a low late this year or in early 1991. "The wild card is the Middle East," says Revis. ("Investor's Daily", 11/6)

"There's nothing that can be said about this stock market that hasn't already been said," says DAN MURPHY at C.J. LAWRENCE. "Everybody knows most of the real selling has been done for the time being and they're waiting either for a decent bottoming action or for the 'other shoe to fall,'" from today's elections, an outburst in the Mideast or from today's Treasury auction. ("The Washington Post", 11/6)

"The market, at the moment, is very enthusiastic about the fact that the economy is looking progressively weaker," says MARSHALL ACUFF of SMITH BARNEY. "I wouldn't be surprised to see the market up another hundred, two hundred points ... as long as ... the Fed comes along and does ease." Acuff currently lists IBM as his favorite stock. (FNN "Marketwrap", 11/5)

The stock market has "the groundwork for a tremendous 1991," according to DON HAYS of WHEAT FIRST BUTCHER & SINGER CAPITAL MARKETS. But he says that is all

contingent on the Fed. "Surely to goodness, we will have to have another cut" in rates to realize those gains, says Hays. ("Investor's Daily", 11/6)

"Very resilient," says MICHAEL METZ, chief market analyst for OPPENHEIMER & COMPANY, in describing the current stock market. "There's been no change in the fundamental background. It's dominated by fears of recession/depression and the possibility of financial catastrophe, but it looks like the market has largely discounted it. So many investors have so much cash that it's making both the stock and bond market go up. The trillion-dollar question is whether it's a short-term rally or a sustained rebound." (NYT, 11/6)

Stock investors are forgetting that a weak economy hurts earnings, says DENNIS JARRETT, chief market analyst at KIDDER PEABODY. "They perceive interest rates falling faster than corporate profits," he says, which he thinks is the opposite of what will happen. (WSJ, 11/6)

"Without the programs, the market just drifted," says DAN WILLIAMS at DILLON READ & CO. "Everyone will be watching [today's Treasury auction] pretty closely. That's their main concern." ("USA Today", 11/6)

Yesterday's gains were created by a barrage of program buying, and not by any fundamental changes, according to ARNIE WOLTER of DEAN WITTER REYNOLDS. "I think the burden of proof is on the market to show that it isn't just a bear market rally," says Wolter. ("Investor's Daily", 11/6)

GREG SMITH, PRUDENTIAL-BACHE's chief strategist, is cautious in this market. He recommends that investors keep about 40% of their money in stocks, 45% in bonds and 15% in cash. When was the last time Mr. Smith recommended more bonds than stocks? "Probably never," he says. But Smith figures that to spark a real rally in stocks, interest rates must decline causing bonds to rise before stocks do. (WSJ, 11/6)

"If the Treasury refunding [today] goes well, people will be extremely long the market at some very high levels and it could be very risky," says MICHAEL KRAUSS of LEHMAN BROTHERS. "It could be very risky for the downside. It's very rare that we see the market rally into a refunding and rally thereafter." (CNBC "Market Wrap- Up", 11/5)

STOCK TIPS:

BARRY ABRAMSON at PRUDENTIAL-BACHE says utility stocks "are very attractive right now and becoming even more attractive as the economy appears to get worse." His favorites are GENERAL PUBLIC UTILITIES, DOMINION RESOURCES, LG&E ENERGY, PACIFIC GAS & ELECTRIC and POTOMAC ELECTRIC. ("USA Today", 11/6)

ACCLAIM ENTERTAINMENT will continue to show outstanding growth, says BILL MATTHEWS at the "Cheap Investor." The company is the only U.S. company capitalizing on the Nintendo craze which didn't exist five years ago. ASTA

RESEARCH is a quality company, says Matthews: "A steal at $15 per share." (CNBC "World Business", 11/6)

Many analysts are looking more favorably than ever on some pollution control and environmental services companies given passage of the Clean Air Act last month. GLENN CUTLER at the SHIELD PROGRESSIVE ENVIRONMENTAL FUND favors WAHLCO ENVIRONMENTAL SYSTEMS and MIDWESCO FILTER RESOURCES. STEPHEN SCHWEICH at ALEX. BROWN picks AIR & WATER TECHNOLOGY and TRC COS. ROTAN MOSLE analyst ED CABRERA likes TEAM INC. ("USA Today", 11/6)

TRANSCANADA PIPELINES is "a good stock if it doesn't get the regulatory approvals it needs; if it does, it becomes a great stock," says DOUGLAS FLEGG, an analyst at MIDLAND WALWYN CAPITAL here. (WSJ, 11/6)

Recent rises in stock prices have squeezed short sellers, says CNBC's DAN DORFMAN. Here's his list of widely shorted stocks which have seen recent price gains: FREDDIE MAC, DISNEY, BANK OF NEW YORK, BANKAMERICA, GOLDEN WEST FINANCIAL, CONTINENTAL CORP., HOUSEHOLD INTERNATIONAL, BENEFICIAL, PRIMERICA and WELLS FARGO which Dorfman calls, "Every short's favorite short." (CNBC "World Business", 11/6)

"We believe that the services delivery side of health care presents some outstanding opportunities," says TODD RICHTER, industry analyst for DEAN WITTER. He likes HUMANA and PACIFICARE, a West Coast HMO. Medical insurance helps protect the health services sector from economic downturns, says Richter. (CNBC "World Business", 11/6)

-30- 9160

#90310m0002 11/06/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (NOV. 6) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The dollar's new low against the deutsche-mark "is a continuation of the view that interest rates are headed lower and that the economy is weak," says DAVID WILSON of GIRONZENTRALE NEW YORK. ("Investor's Daily", 11/6)

"There's really no reason anyone should be long the dollar," says GUY STANDING assistant vice president at CREDIT LYONNAIS in New York. (WSJ, 11/6)

"All the market factors are working against the dollar," says CHRISTIANNE MANDELL of SECURITY PACIFIC MERCHANT BANK. A weaker economy means "the return on real investment doesn't look that good," according to SALOMON BROTHERS analyst ANITA LAURIA. ("Investor's Daily", 11/6)

The dollar might be "getting close to a bottom," says KAREN KLUGE, corporate adviser at CREDIT SUISSE in New York, but there is "nothing to say it couldn't push a bit lower." (WSJ, 11/6)

"We could be in for a further selloff" in the dollar, says CHARLES SPENCE of FIRST INTERSTATE BANK. He believes the "trend is still down," but will reverse itself when "people start talking about parity" between the deutsche-mark and the greenback. ("Investor's Daily", 11/6)

The dollar will continue to head lower, says ALLEN SINAI, chief economist at THE BOSTON COMPANY ECONOMIC ADVISORS. Sinai says comparatively low short-term U.S. interest rates are one reason. "Also ... international investors have and still are allocating away from dollar denominated assets because of all our problems." Sinai says the weak dollar will help cushion the economic downturn by boosting exports. "Thank goodness for the falling dollar. It's like falling interest rates - it helps hold our economic activity up." He expects another quarter point cut in the discount rate by the middle of November. (CNBC "World Business", 11/6)

H. ERICH HEINEMANN, chief economist for LADENBURG, THALMANN & COMPANY, predicts that the fed funds rate will drop from 7 3/4 now to 5% to 6% by the first half of next year. He says, "Credit demand is so weak now that the Fed has to drain money out of the banks to keep rates from going down even more than has been the case. This 'tightening' is inadvertent, but is setting the stage for a much stronger drop in fed funds later on." (NYT, 11/6)

It is "just a matter of time before the Fed becomes more aggressive in permitting lower short-term rates," says MARSHALL ACUFF of SMITH BARNEY. "If one had a list of wishes, one would wish that the Fed would lower short-term rates again after the auction this week." (FNN "Marketwrap", 11/5)

"More and more investors are feeling that the economy has fallen into recession and that the Federal Reserve must ease credit more aggressively," says WILLIAM SULLIVAN, a senior vice president at DEAN WITTER REYNOLDS. "In that sort of environment, the place people want to put their money is in high-quality, highly liquid securities like Treasuries." (NYT, 11/6)

"We think bonds are getting more attractive as the economy eases," says MANNY KORMAN, director of research at DEAN WITTER REYNOLDS INC. He sees a "trading range" stock market with perhaps "a slight decline." (WSJ, 11/6)

"As long as real interest rates are higher abroad, investors will focus more on foreign bonds than domestic U.S. securities," says CARL NAPOLITANO, a market strategist at RC GOVERNMENT SECURITIES. "Basically, the issue is whether at these lofty levels speculators or investors can comfortably make the decision to absorb the kind of risk the Treasury is asking them to take with this much debt." (Reuters, 11/5)

"I think we are getting more into a deflation mode and that suggests to me something is about to change in the financial markets," says BILL WOLMAN, chief economist at "BusinessWeek" and "CNBC." "Up to this point, every time we get deflation news, both the stock market and the bond market go up. I think if this deflation continues, the bond market will continue to go up ... but stocks are going to whither. Stocks are going to need signs of a turn in the economy before you can trust any stock market rally. Right now, I still like bonds and I really distrust stocks very much until I can see signs of economic recovery, which I can't see yet." (CNBC "Market Wrap-Up", 11/5)

"When people wake up to the oversupply of [Treasury notes and bonds] the price will go down," says EMORY UNIVERSITY economics professor JEFFREY ROSENWEIG. "There's no real reason for [the Japanese] to want to buy them." ("Investor's Daily", 11/6)

"I think the auction ought to go fairly well assuming no major developments of a negative nature in the Middle East," says ROBERT CHANDROSS of LLOYDS BANK. "There is concern about foreign participation, but my sense is Japanese investors will participate for a respectable amount, at least as traders." (CNBC "Market Wrap- Up", 11/5)

THE ECONOMY:

"The economy is on the edge or actually in a free fall," says H. ERICH HEINEMANN, chief economist for LADENBURG, THALMANN & COMPANY. "Employment is down 700,000 since June, unemployment claims are skyrocketing, real income is down and personal savings are sharply lower." (NYT, 11/6)

"We do see a recession through the first half of next year," says WILLIAM HELMAN, co-chairman of the investment policy committee at SMITH BARNEY, HARRIS UPHAM & CO. "We are not anticipating a major deterioration beyond that, [but] there's always that uncertainty." (WSJ, 11/6)

"There is a divergence of opinion whether recession has started," says ROBERT KLEIN of CIC-UNION EUROPEENNE INTERNATIONAL. That argument notwithstanding, Klein says "we have something nasty out there in the U.S. economy." ("Investor's Daily", 11/6)

"Any English speaking country - Australia, New Zealand, Canada, the United Kingdom, the United States - all are either now in a recession or flirting with a recession," says DAVID GERMANY, international economist with MORGAN STANLEY. He says that Germany and Japan are in an earlier stage of the economic cycle and are still tightening credit in an effort to fight inflation. (FNN "A.M. Business", 11/6)

Despite recent rises in auto sales "conventional wisdom seems to be that sooner or later the barrage of bad news since early August is bound to take its toll on the automotive market," says ROBERT REWEY, vice president of sales

for FORD's North American automotive operations. (NYT, 11/6)

"What we've seen this year in our government's handling of the deficit has contributed to the declining consumer sentiment," says DOUGLAS LEE of COUNTY NATWEST USA. "Consumer confidence took a sharp drop in October, when the budget fiasco hit its peak." ("Investor's Daily", 11/6)

MICHAEL COSGROVE of ECONOCLAST says that changes in the world economy "have put us in a bind" by creating the credit crunch. He says "the Europeans are increasing their need for capital at the same time the U.S. also has a major need for capital." ("Investor's Daily", 11/6)

Assuming no war in the Middle East, NOEL CASEY, president of CASEY ENERGY GROUP, sees oil prices "work irregularly lower over the next several weeks ... sort of drifting down through January into February. At that point, I think we will see a sharper decline that will take us by the end of April down to around $25 a barrel. ... That kind of price will be sustained during the summer and as we get into the fall of 1991 ... I would think the Saudis and others would be agreeable to a slight increase, perhaps a dollar a barrel, at the end of December '91 and that is the kind of magnitude we would look for over the next several years. (CNBC "Market Wrap-Up", 11/5)

IN WASHINGTON:

"The fact that [SECRETARY OF STATE JAMES] BAKER is in Saudi Arabia and Mr. Bush is scheduled to go later on in the month implies that war is not imminent " says SHAHROKH NIKKHAH, of PRUDENTIAL-BACHE SECURITIES INC. Oil market analyst THOMAS BLAKESLEE of PEGASUS ECONOMETRIC GROUP adds, "The politicians aren't stirring the Middle East cauldron because they're campaigning." (NYT, 11/6)

ALLEN SINAI, chief economist for THE BOSTON CO. ECONOMIC ADVISERS, says that the budget agreement will "depress an already depressed and recession-bound economy." He estimates that the deal will shave 1/2% of GNP growth and may cost as many as 250,000 jobs. But Sinai looks for long-term gains. He says a lower deficit and debt will help lower interest rates and will allow resources to be better targeted. "No gain without pain," says Sinai. ("Nightly Business Report", 11/5)

#90310p3669 11/06/1990 ~PR Newswire

SALT LAKE CITY (NOV. 6) PR NEWSWIRE - Bonneville Pacific Corp. (NASDAQ: BPCO) today announced that the board of directors of Bonneville Pacific voted unanimously on Friday, Nov. 2, 1990, to activate the previously announced (Oct. 21, 1987) stock buy back program.

"Under that program, which authorized the company to repurchase 500,000 shares

" chairman and CEO Robert L. Wood stated, "Bonneville has exercised only 100,000 of that authorization. Therefore, Friday's board action allows the company to purchase up to 400,000 common shares still remaining under the agreement." The company is authorized to purchase these shares from time to time in the OTC or private transactions subject to market and other conditions.

Bonneville Pacific, is one of the nation's leading independent power producers and developers which recently concluded a transaction in which Portland General Corp. became its largest shareholder. That transaction resulted in the company receiving additional equity and subordinated debt of $30,000,000.

HARLEYSVILLE, Pa. (NOV. 6) PR NEWSWIRE - USLICO Corp. and Harleysville Group Inc. (NASDAQ: HGIC) and Harleysville Mutual Insurance Co. jointly announced today that they had terminated negotiations with respect to the acquisition by the Harleysville Companies of USLICO's subsidiary, Hawkeye-Security Insurance Co.

Negotiations for the acquisition of Harleysville Life Insurance Co. USLICO were also terminated.

The parties had announced the signing of a letter of intent in August 1990. However, they were unable to resolve a number of issues which arose during the negotiation of the definitive agreement.

Harleysville Group Inc. is a regional holding company for four property and casualty insurers whose marketing territory encompasses the entire East Coast. The companies include: Atlantic Insurance Company of Savannah, Harleysville Insurance Company of New Jersey, Huron Insurance Company and Worcester Insurance Co. Harleysville Group also manages the operations of Berkshire Mutual Insurance Group, the financial results of which are not consolidated

into Harleysville Group at the present time.

CONTACT: Randy Buckwalter, 215-256-5288, or Frederick H.L. Fung, 215-256-5025 both of Harleysville Group.

#90310p3692 11/06/1990 ~PR Newswire

NEW YORK (NOV. 6) PR NEWSWIRE - Robert Maxwell, chairman, announced that Berlitz International, Inc.'s (NYSE: BTZ) third quarter 1990 sales of services and products rose 20.6 percent to a record $64.1 million, compared to $53.2 million for the same period in 1989. Operating income for the quarter rose 25.1 percent to $6.4 million compared to $5.2 million in 1989.

Lesson volume increases in almost all countries, including an increase of over 14 percent in North America, continued to be offset by reduced volume in Brazil and a lower level of lessons for the German Resettlers program. Excluding Brazil, third quarter lesson volume increased 4.1 percent. Berlitz opened three new language centers during the quarter, two in Europe and one in Latin America.

For the nine months ended Sept. 30, sales were $188.0 million in 1990, up 17.9 percent from $159.4 million in 1989. For the nine months, operating income grew 13.4 percent to $19.8 million in 1990 from $17.4 million in 1989. Through third quarter, lesson volume increased 3.7 percent versus 1989. Excluding Brazil, the volume increase was 7.2 percent for the nine month period.

During September, Berlitz completed, for $1.2 million, the acquisition of Able Translations Ltd. of Baldock, England. Able provides translation, interpretation and related services to major commercial customers. This acquisition is part of Berlitz' long-term strategy of expanding worldwide translation operations, and Able provides production capability and market presence in the key European market of translations into and from the English language.

Net income for the quarter was $5.7 million as compared to $3.0 million in 1989. After providing for the preferred stock dividend of $3.0 million, third quarter net income available to common shareholders was $2.7 million and earnings per common share was $.14. In 1989, net income available to common shareholders for the same period was $3.0 million and earnings per common share was $.16. The increase in operating income during the quarter was offset by interest expense on long-term debt and increased tax provisions.

Net income for the nine months was $17.2 million as compared to $10.6 million in 1989. After providing for the preferred stock dividend, net income available to common shareholders was $8.3 million and earnings per common share was $.44 for the nine month period ended Sept. 30, 1990. In 1989, net

income available to common shareholders for the same period was $10.6 million and earnings per common share was $.56. The reduction in earnings per share is again due to increased interest expense and tax provisions, partially offset by increased operating income.

Berlitz is the premier language services firm providing instruction and translation services through 279 language centers in 25 countries throughout the world. The company also publishes Berlitz pocket travel guides, and foreign language phrase books and home-study materials.

NEW YORK (NOV. 6) PR NEWSWIRE - Telefonica de Espana, S.A. (NYSE: TEF), one of Spain's largest companies and the world's ninth largest telecommunications company, today reported record earnings and revenues for the nine months ending Sept. 30, 1990.

Cumulative results of Telefonica up to Sept. 30, 1990, reflect the consistent pace of investment developed by Telefonica with a capital expenditure figure in fixed assets of 449,272 million pesetas, 33.5 percent more than the already high figure for September 1989. As a result, gross lines in service (before cancellations) grew by 9.6 percent with a significant reduction in the waiting list of 22.3 percent compared with the same period in the previous fiscal year.

Operating revenue grew by 19 percent to 613,436 million pesetas for the first nine months of 1990.

Net income reached 56,488 million pesetas after providing for corporate income tax, representing an 18.5 percent rise over the previous year. Gross cash flow reached 282,964 million pesetas, a 13.6 percent increase over the same period in 1989. Earnings per share grew by 18 percent and cash flow per share increased by 13.3 percent.

Under U.S. Generally Accepted Accounting Principles (GAAP), net income was $1,298.3 million or equal to $4.20 per ADR (American Depository Receipts) for the nine months ending Sept. 30, 1990. This compares to $3.11 per ADR for the same period last year.

#90310p3694 11/06/1990 ~PR Newswire

SEATTLE (NOV. 6) PR NEWSWIRE - Immunex Corp. (NASDAQ: IMNX) today received

U.S. patent 4,968,607 covering technologies for making genetically engineered Interleukin-1 receptor (IL-1R), a protein which may have therapeutic value in the treatment of organ transplant rejection, graft versus host disease, rheumatoid arthritis and diabetes, the company said.

IL-1R interrupts the action of Interleukin-1 (IL-1), a family of cytokines (or proteins) which play an important role in the regulation of immune and inflammatory responses. IL-1 can also trigger undesirable immune responses which can damage certain body cells and tissues. For example, the presence of IL-1 in joints may result in production of enzymes which destroy joint tissue. IL-1 may also affect pancreatic cells and lead to inadequate insulin production and the development of diabetes. Immunex scientists Steven Dower, Carl March, John Sims and David Urdal, the inventors of the technologies described in the patent, altered the IL-1R gene to produce a soluble receptor molecule which binds to IL-1 and helps prevent its harmful action.

The IL-1R patent, which was granted today by the U.S. Patent and Trademark Office, covers recombinant DNA technologies for producing mammalian IL-1R, including DNA sequences encoding human IL-1R and methods of making recombinant IL-1R molecules.

"Immunex is clearly the dominant player in the development and use of cytokine receptors for the treatment of inflammatory disease," said Stephen Duzan, Immunex chairman and chief executive officer. "IL-1 receptor represents an unique and promising approach to controlling the root causes of excessive immune response."

Immunex has licensed IL-1R exclusively to Receptech Corp. (NASDAQ: RECP) for human therapeutic applications and clinical evaluation. Receptech was formed in 1989 to accelerate development, begun by Immunex, of certain soluble cytokine receptor products. Receptech will pay Immunex to conduct research and initial clinical development of IL-1R.

"This patent is an important milestone in our commercial development of soluble cytokine receptors as human therapeutics," said Scott Hallquist, Immunex senior vice president and general counsel.

Immunex is a leading biotechnology company focused on the research, development, manufacture and marketing of immunological therapeutic products.

FREMONT, CALIF. (NOV. 6) PR NEWSWIRE - Logitech is now shipping Modern Art, an electronic clip-art collection for the IBM PC and compatibles that offer

300 dpi images available in five volumes: People, Places & Things; Business & Professional; Holiday & Special Occasion; Sports, Recreation & Travel; and Newsletters, Symbols & Borders. Like other Logitech products, Modern Art is being sold through national and regional distributors, as well as major computer specialty and consumer electronics chains at a suggested retail price of $39 per volume.

Modern Art can be used in all popular desktop publishing, word processing, and graphics programs that accept one of the following graphics file formats: .TIF (compressed and uncompressed), .PCX, .IMG, .EPS, .MSP, and .BMP. The appropriate file format is selected during installation; however, additional installations using different file formats are possible. An image resolution of 300 dpi enables users to take advantage of the highest resolution possible on most printers. The package can also be used effectively on lower resolution- and dot matrix printers.

Modern Art is expected to benefit from two current market trends: Continuing solid growth in the graphics-based software industry and the increase in high-end word processing packages capable of importing graphics, such as Microsoft Word and WordPerfect. For example, BIS CAP International, an independent industry research firm, estimates that 1.8 million PC-based high-end word processing packages will be sold during 1990.

Headquartered in Fremont, and publicly traded in Switzerland, Logitech designs manufactures, and markets desktop tools -- a product category that includes pointing devices, hand-held scanners, and software applications.

Microsoft is a registered trademark of the Microsoft Corp. WordPerfect is a registered trademark of the WordPerfect Corp.

#90310p3698 11/06/1990 ~PR Newswire

HARRISBURG, PA. (NOV. 6) PR NEWSWIRE - A judge has ordered a Wilkes-Barre home-improvement contractor to pay nearly $29,000 in restitution and civil penalties following a hearing on suit filed by Attorney General Ernie Preate Jr.'s Bureau of Consumer Protection.

Preate identified the contractor as Thomas Trevethan, who works from his home at 47 Eagle Court, Wilkes-Barre.

The bureau in January filed a suit in Luzerne County Common Pleas Court charging that Trevethan took payments from consumers for various home-improvement projects but failed to complete the contracted work.

Work that was completed was done in a shoddy manner, the suit alleged. Three Luzerne County consumers who filed complaints with the bureau testified Thursday (Nov. 1) during a hearing in Luzerne County Court before Visiting Senior Judge Donald O'Malley.

In an order received by the bureau this week, Judge O'Malley directed Trevethan to pay a total of $25,959 in restitution to the three consumers and $3,000 in civil penalties to the state.

Deputy Attorney General J.P. McGowan, attorney-in-charge of the bureau's Scranton office, represented the Commonwealth at the hearing.

BURBANK, CA (NOV. 6) PR NEWSWIRE - CII Financial Inc., (AMEX: CII) continuing its strong growth trend for the year, achieved significantly higher net income in both its third quarter and nine months ended Sept. 30, 1990.

For the third quarter, net income climbed 134 percent to $1,758,000 from $750,000 in the like period one year ago. Primary and fully diluted earnings per share increased 28 percent to 32 cents from 25 cents a year ago, reflecting the more than 86 percent increase in weighted outstanding shares due to the company's initial public offering in March 1990. Primary weighted shares outstanding were 5,489,735 in the latest quarter, compared to 2,943,560 for the period a year ago.

Revenues for the third quarter advanced 61 percent to $22,926,000 from $14,220,000 in the same three months last year.

For the nine months, net income increased 139 percent to $4,319,000 from $1,805,000 in the same period last year. Primary earnings per share increased 26 percent to 88 cents, from 70 cents in the corresponding period a year ago, again reflecting the greater number of shares.

Revenues for the nine months rose 61 percent to $58,607,000 from $36,484,000 in the first nine months of 1989.

CII Financial Inc. is an insurance holding company, whose largest subsidiary is California Indemnity Insurance Co (CIIC). Through CIIC, the company is engaged in writing workers' compensation insurance in the state of California. CIIC, commenced business in 1988, services workers' compensation accounts of all size levels but concentrates on small- to medium-size companies with annual premiums of less than $50,000. Based in Burbank, CIIC serves Northern California through its Sacramento regional office. Policies are sold through

a network of approximately 350 independent insurance agents and brokers in the state of California.

#90310p3703 11/06/1990 ~PR Newswire

SAN DIEGO (NOV. 6) PR NEWSWIRE - The Immune Response Corp. (IRC) (NASDAQ: IMNR) today announced a net profit of $310,000, or $.03 per share, for the quarter ended Sept. 30, 1990, compared to a net loss of $1,048,000, or $.14 per share, recorded in the third quarter of 1989. Contract research revenue for the third quarter was $893,000 vs. $760,000 in the same period in 1989, and interest income increased to $685,000 from $171,000 in the prior year's third quarter.

For the nine months ended Sept. 30, 1990, contract research revenues were $3,195,000, compared to $2,381,000 for the same period last year. Net profit of $400,000, or $.04 per share, compares to a net loss of $2,999,000, or $.41 per share, during 1989.

As was the case in the second quarter, the operating profit reported for this quarter is expected to be temporary and resulted from higher investment income and the allocation to Rhone-Poulenc Rorer Inc. (RPR) (NYSE: RPR) of all $1,189,000 of expenses incurred in the quarter by the IRC/RPR joint venture in AIDS research.

During the quarter, the company announced the beginning of a Food and Drug Administration-approved nationwide Phase II/III clinical study using its HIV Immunotherapeutic.

The Immune Response Corp. is a biopharmaceutical company engaged in the development of proprietary products for the treatment of HIV infection, which leads to AIDS, and for the treatment of certain autoimmune diseases, specifically rheumatoid arthritis, multiple sclerosis and insulin-dependent diabetes.

FORT LEE, N.J. (NOV. 6) PR NEWSWIRE - A. L. Laboratories, Inc. (NYSE: BMD), today reported that for the third quarter ended Sept. 30, 1990, net income increased 30.5 percent to $3,651,000 compared with $2,798,000 in the prior year. Fully diluted per share earnings increased 24 percent to $0.31 versus $0.25 in the same quarter of 1989. Revenues for the third quarter increased to $70,125,000 from the $65,132,000 reported in 1989.

Net income for the nine months ended Sept. 30, 1990, increased 22.9 percent to $9,742,000 from $7,929,000 in the comparable period of the prior year. Fully diluted per share earnings increased 18.3 percent to $0.84 from $0.71 in the same 1989 period. Revenues for the first nine months of 1990 rose to $204,279,000 from the $202,133,000 reported in 1989.

Commenting on the results, I. Roy Cohen, president and chief executive officer stated, "Animal health revenue and operating income showed healthy increases for the third quarter and nine month periods. At the same time, pharmaceutical revenue and operating profit increased for the third quarter and nine months. NMC Laboratories, Inc., acquired in August 1990, added positively to revenues and operating income as expected. The gains in the pharmaceutical business were achieved despite FDA-delayed new product approvals, and at a time when, in order to meet our strict quality standards, several important Barre products have voluntarily been withheld from marketing by our own regulatory people pending supplemental ANDA approvals. Lack of availability of these products in total have resulted in a loss of anticipated sales.

"During the third quarter we continued our emphasis on gross profit improvement. This effort, coupled with our planned de-emphasis on lower gross profit products, resulted in significant gross margin percentage increases for the three- and nine-month periods."

A. L. Laboratories is a multinational manufacturer and marketer of specialized value-added branded pharmaceuticals and animal health micronutrients, with plant sites in Chicago Heights, Ill.; Niagara Falls and Glendale, N.Y.; Baltimore, Md.; Bellevue, Wash.; Copenhagen, Denmark; and Jakarta, Indonesia.

RICHMOND, VA. (NOV. 6) PR NEWSWIRE - Circuit City Stores, Inc. (NYSE: CC) today announced October sales of $173.0 million, which represents a 10 percent increase from October 1989 sales of $158.0 million and a 7 percent decrease in comparable store sales.

"We were disappointed by the October results, which primarily reflect consumer uncertainty about the economic environment," said Richard L. Sharp, Circuit City's president and chief executive officer.

"We continued our expansion program during the month with the opening of eight Superstores, including a six-store entry into St. Louis, Mo. Grand opening for this market began in mid- October and sales have significantly exceeded our expectations," Sharp said. In October, Circuit City also opened its twenty- sixth Superstore in the greater Los Angeles market and replaced a consumer electronics-only store with a Superstore in Washington, D.C.

Circuit City Stores, Inc. is the nation's largest specialty retailer of brand-name consumer electronics and major appliances. With headquarters in Richmond, Va., it operates 146 Superstores, 15 Circuit City stores and eight Impulse mall stores in the eastern, midwestern and western United States.

TAYLOR, MICH. (NOV. 6) PR NEWSWIRE - Net sales for Masco Corporation (NYSE: MAS) for the third quarter ended Sept. 30, 1990 were $807 million, a 2-percent increase from the 1989 third quarter. Increased sales of kitchen, bathroom and home furnishings products contributed to third-quarter results.

Net income for the third quarter declined 32 percent to $42.3 million from $62.4 million in the comparable 1989 quarter, with earnings per share declining 30 percent to $.28 from $.40. Earnings were negatively impacted by: a reduced level of consumer spending, lower equity earnings of affiliated companies and significant costs related to new product expansion and profit enhancement programs.

The company believes that near-term results will continue to be adversely affected by these factors as well as the effect on consumer spending due to the uncertainties related to the Middle East situation and the economic outlook in general. Longer term, the softening of the economy should result in lower interest rates which will significantly improve the prospects for many of our markets. The company believes that this improvement, when combined with the growth opportunities resulting from recent major investments

in the home furnishings industry, should provide a sound basis for well-above-average growth in the future.

Masco Corporation manufacturers building, home improvement and home furnishings products for the home and family.

MINNEAPOLIS (NOV. 6) PR NEWSWIRE - United HealthCare Corporation (NASDAQ: UNIH) today announced record revenues and earnings for the third quarter and nine months ended Sept. 30, 1990. Third Quarter Results

Revenues for the third quarter were $156.8 million, a 48.9 percent increase over the same period one year ago. Net earnings of $9.2 million were up 150 percent over earnings for the third quarter of 1989. Earnings per share were $0.31, compared with $0.16 for last year's third quarter. Nine Months

Revenues for the nine months ended Sept. 30 were $437.0 million, up 43.7 percent from the same period in 1989. Net earnings totalled $23.7 million, a 166.3 percent increase over net earnings for the first nine months of last year. Earnings per share were $0.85, compared with per-share earnings of $0.41 for the first nine months of 1989.

President and Chief Operating Officer William W. McGuire, M.D., said that United's revenues, earnings, and key indicators in the areas of enrollment, medical costs and SG&A show healthy growth and effective cost controls for the third quarter, with continuing strong performance:

-- Combined SG&A costs (total selling, general and administrative expenses for all of the company's owned and managed HMOs as a percent of their combined premium revenues) remained stable at 9.8 percent for the third quarter.

-- The company's health plan medical loss ratio (medical costs as a percent of premium revenues) decreased to 84.2 percent from 84.9 percent for the preceding quarter.

-- Enrollment in the company's HMOs rose 3.1 percent in the third quarter, to 1,194,600. "We're very pleased with this growth during what is traditionally a slow sales period," Dr. McGuire said.

-- The number of lives served by United's specialty companies grew 15.3 percent in the third quarter, to 5,734,000. Dr. McGuire said that additional contracts are now signed which will increase this total to at least 7,430,000 by Dec. 31, 1990.

-- Shareholders' equity stood at $137.2 million on Sept. 30, a 127.4 percent increase over Dec. 31, 1989.

United HealthCare Corporation is a national leader in health care cost management, serving both the providers and purchasers of health care since 1974.

The company's services include HMOs, PPOs, multiple option and point of service plans, pharmaceutical cost management, managed mental health and substance abuse services, utilization management, workers compensation/casualty services, specialized provider networks, employee assistance services, Medicare and managed care programs for the aged, health care evaluation services, and administrative services.

#90310p3715 11/06/1990 ~PR Newswire

CERRITOS, CALIF. (NOV. 6) PR NEWSWIRE - Cardis Corp. (OTC), in a presentation before the Automotive Warehouse Distributors Association annual conference in Las Vegas, said sales for the five months ended Sept. 30, 1990 were $34.7 million compared with $35.6 million for the comparable prior year.

Kenneth D. Walker, Cardis president and chief executive officer, also said net operating income for the five month period advanced to $94,200 from a loss of $1.3 million in the comparable prior year. Cardis reduced its net loss for the five months to $1.6 million from $1.8 million.

Walker stated that the net loss for the most recent period reflected approximately $2 million of interest expense compared with virtually no interest expense a year ago, when the company was operating under Chapter 11 bankruptcy protection. With Cardis' emergence from bankruptcy in December 1989, interest payments on the debt are now being charged to operations at contractual rates.

Speaking before suppliers, Walker said, "We are gratified with the significant headway we have made since Cardis re-emerged from bankruptcy, but we still have a long way to go. However, we are blessed with an experienced management team, dedicated operating personnel throughout the company and the continued support of our valued customers and suppliers."

Cardis Corp. currently operates nine warehouse distribution centers and 22 retail stores located throughout California.

LOS ANGELES (NOV. 6) PR NEWSWIRE - CBL Medical Inc. (NASDAQ: CBLM) announced today results for the third quarter ended Sept. 30, 1990.

Net income for the third quarter is $267,837, up 23 percent over the third quarter, 1989 net income of $217,214. Revenues for the third quarter 1990 are $1,600,308 compared with $1,532,147 for the third quarter 1989. Earnings per share, third quarter 1990 are $.18 on 1,529,604 shares while third quarter 1989 were $.18 on 1,200,000 shares.

In comparing nine months of operations, net income is $579,327, up 30 percent over the same period of the prior year's net income of $444,250. Revenues for the nine months are up 13 percent to $4,650,359 compared to $4,103,025. Earnings per share for the nine months of 1990 are $.36 based on 1,651,413 shares compared to $.37 on 1,200,000 for the prior year.

In comparing the third quarter 1990 to the second quarter 1990, net income increased by 107 percent on a three percent increase in revenues. Earnings per share for the third quarter 1990 are $.18 compared to $.07 for the second quarter 1990.

Robert B. Mishkin, chairman of the board and chief executive officer, stated: "The third quarter results demonstrate the company's ability to increase revenues without a corresponding increase in costs. In fact, we were able to reduce certain expenses allowing us to increase our profit margins.

"Although there are indications of a recession which may be affecting other industries, the company continues to experience an increase in patient referrals and revenues. Typically, occupational injury claims do not decrease during recessionary periods and indeed they often increase." Mishkin also stated, "Based on nine months of operations, the company continues to expect approximately $900,000 of net income for 1990."

CBL Medical Inc. operates medical centers specializing in forensic reporting and in the treatment of patients with employment related injuries.

#90310p3719 11/06/1990 ~PR Newswire

HOUSTON (NOV. 6) PR NEWSWIRE - Browning-Ferris Industries, Inc. (NYSE: BFI) today reported that earnings for the quarter and fiscal year ended Sept. 30, 1990, include special charges of $67,100,000 (an after-tax charge of 27 cents per share) related to the settlement of litigation and the provision of additional reserves principally related to market development projects.

Including these special charges, income from continuing operations for the fourth quarter of fiscal 1990, ended Sept. 30, 1990, was $32,711,000, or 21 cents per share (48 cents per share before special charges). These results compare with the restated operating results for the comparable prior year period, which reflect income from continuing operations of $77,222,000, or 51 cents per share. Revenues for the fourth quarter were $794 million as compared to $698 million for the fourth quarter of the prior fiscal year.

Since the impact of the company's decision to discontinue its hazardous waste operations was reflected in the second quarter's results, the net income and related earnings per share amounts for the fourth quarter of fiscal 1990 are the same as those reported from continuing operations. Net income in the fourth quarter of fiscal 1989 was $72,952,000, or 48 cents per share.

Income from continuing operations for the fiscal year ended Sept. 30, 1990, was $256,786,000 or $1.68 per share on revenues of $2,967 million. These results compare with the restated operating results for the fiscal year ended Sept. 30, 1989, which reflect income from continuing operations of $278,065,000, or $1.84 per share on revenues of $2,491 million. The net loss for the current fiscal year of $44,743,000, or 29 cents per share, includes the $295,000,000 charge for discontinued operations that was reflected in the results for the second quarter. These results compare with net income for the prior fiscal year of $262,555,000, or $1.74 per share.

The number of common and equivalent shares used to compute net income (loss) per share for fiscal 1990 was 153,246,000 versus 151,064,000 shares for fiscal 1989.

In addition to the special charges, several factors contributed to the decline in earnings in the fourth quarter, including weakening economic conditions in

certain major markets, and reduced volumes and higher operating costs at a number of the company's landfills. Other factors included higher fuel costs for nearly 10,000 vehicles and increased interest expense. The company anticipates that these factors will continue to bear upon the results of continuing operations during fiscal 1991.

The suits were filed on behalf of all commercial purchasers of containerized waste collection and disposal services of the two firms between January 1978 and June 1987, and sought to recover unspecified compensatory damages. While the company and the other defendant in the lawsuit, Waste Management, Inc., vigorously deny any liability or wrongdoing, to avoid the expenses and uncertainty of what would have been a protracted jury trial, they have each entered into proposed settlements aggregating a total of $50 million to settle the case. The proposed distribution of the settlement amounts, not yet approved by the court, would allocate Waste Management's settlement to approximately 13 areas in the country, and the company's settlement amount throughout the U.S. to discharge the claims of all members of the class whose claims are approved. In the company's judgment, because of the provisions of a joint defense agreement between the parties (which are usual in these types of cases), it is expected that the ultimate financial impact on each defendant of this settlement will be approximately the same.

Commenting on the proposed settlements, with the plan of distribution of the settlement fund still being subject to approval by the Court, Howard Hoover, Jr., General Counsel of BFI, said "The pending settlements are compromises of vigorously disputed claims and in no way are they to be taken as an admission of any wrongdoing on the part of BFI, or that liability would have been found against either defendant.

MINNEAPOLIS (NOV. 6) PR NEWSWIRE - Northwest Teleproductions, Inc. (NASDAQ: NWTL) reports sales of $4,094,840 and net earnings of $202,106 or $.12 per share for the second quarter ended Sept. 30, 1990. This compares with sales of $3,025,425 and net earnings of $311,005 or $.19 per share for the second quarter of the prior year.

Year-to-date sales for the six months ended Sept. 30, 1990, of $8,183,105 resulted in net earnings of $653,300 or $.40 per share. Comparative results for the same period of the prior year were sales of $5,697,781 and net earnings of $561,982 or $.34 per share.

Included in year-to-date earnings is $197,000 resulting from the adoption of the new method of accounting for income taxes as required by the Financial Accounting Standards Board.

Robert Mitchell, president, commented that second quarter results were adversely effected by a operating loss of the company's Chicago subsidiary which was acquired in January 1990. Combined operating results of the company's other operations have exceeded prior year results.

Northwest Teleproductions, Inc., is a full-service videotape and film production company with facilities in Minneapolis, Dallas, Kansas City, and Chicago.

LOWELL, MA (NOV. 6) PR NEWSWIRE - Wang Laboratories, Inc., (AMEX: WAN) and Banyan Systems Inc. today disclosed a strategic business agreement that makes Wang the first global reseller of Banyan's microcomputer networking products.

Under the terms of the agreement, Wang will market, sell, service, and support Banyan's VINES network operating systems products on a worldwide basis.

"Wang and Banyan have a matching philosophy for multivendor systems integration and adherence to industry standards," said Gerry Paul, vice

president of Systems and Communications at Wang.

"Wang recognizes the complexities of the local area network market and the benefits that Banyan's VINES products offers to users. The global reseller agreement will allow us to provide our customers with superior service and support for Banyan's products on a worldwide basis."

"This relationship has important implications for both Banyan and Wang," said James D'Arezzo, vice president of marketing at Banyan. "For Banyan, it will significantly enhance VINES penetration into the world market. Wang, in turn, will gain the ability to deliver worldwide the most technologically advanced corporate-wide PC networking solution available today."

Wang Laboratories Inc., headquartered in Lowell, Mass., is a leading worldwide supplier of computer-based information processing systems including data, text image, and voice processing, as well as telecommunications and networking products.

Banyan Systems, Inc., headquartered in Westboro, Mass., is the leader in corporate-wide PC networking. Its flagship product, VINES, is a standards-based distributed network operating system for local or global internetworking of personal computers, minicomputers, and mainframes.

VINES is recognized for its ability to make multivendor networks of any size easy to use and manage. Banyan products are marketed worldwide through a network of authorized value-added resellers (VARs) and country partners.

CONTACT: Linda Volpe Kincaid, (508) 967-6425 of Wang Laboratories Inc.; or Gary Wolfe or Jennifer Jester, both of Banyan Systems, Inc., (508) 898-1000.

CINCINNATI (NOV. 6) PR NEWSWIRE - Chiquita Brands International, Inc. (NYSE: CQB) today reported that fully diluted earnings per share rose to a record $2.17 for the nine months ended Sept. 30, 1990, up from $1.31 earned before a special gain in 1989. Fully diluted earnings per share for the third quarter of 1990 were $.05 compared to $.01 earned in 1989 before the special gain. Net sales for the nine months ended Sept. 30, 1990, rose to a record $3.2 billion from $2.8 billion for the same period last year. Net sales for the third quarter were $1.1 billion, compared to $900 million a year ago. Fully diluted earnings per share for the nine months and quarter ended Sept. 30, 1989, including a special gain of $.49 per share from the sale of the company's interest in FII-Fyffes, were $1.80 and $.50 per share.

The company attributed its improved operating results to a continuation of favorable pricing trends in its fresh food operations, particularly on the strength of sales and marketing of bananas in Europe. In commenting on the

nine month and quarterly results, Keith E. Lindner, president, indicated that the company exceeded its 1990 full year earnings objective in the first half of the year. Therefore, Chiquita has continued to increase its spending on programs to promote growth and enhance profitability for 1991 and beyond. These programs include product marketing and brand development, transportation fleet reoptimization and hedging against foreign exchange exposure.

Earnings for the quarter and nine months ended Sept. 30, 1989 include a special gain of $.49 per share on a fully diluted basis from the sale of the company's interest in FII-Fyffes.

Shareholders' equity and book value per share increased to $569 million and $14.00 at Sept. 30, 1990 from $471 million and $12.14 at Sept. 30, 1989.

SCHENECTADY, N.Y. (NOV. 6) PR NEWSWIRE - By developing a lamp that recycles its own previously wasted infrared energy, GE scientists have realized an old dream and achieved one of the greatest breakthroughs in incandescent-lamp efficiency since the days of Edison and Coolidge.

Working at the GE Research and Development Center in Schenectady, N.Y., and GE Lighting in Cleveland, GE scientists have pioneered the first truly practical way to coat a lamp with a selective "light filter" that lets through visible light while blocking invisible infrared (IR) light and reflecting it back onto the filament.

The reflected infrared radiation sharply lowers the amount of electrical current required to keep the filament hot enough to produce the light, resulting in energy cost savings of up to 60 percent over conventional incandescent lamps.

The technology has found its first commercial application in a new family of incandescent lamps manufactured by GE Lighting - Halogen IR (TM) PAR 38 lamps. The new lamp, available in spot and flood versions, has been in commercial production since January 1990.

A halogen lamp consists of two bulbs, one nested inside the other. The outer bulb is glass. The inner one, much smaller and made of quartz, contains a filament and an inert halogen gas. The latter counteracts evaporation of the filament at high temperatures, making possible hotter, and therefore more efficient, operation without sacrifice of lamp life. GE's IR coating is placed on the outer surface of the quartz bulb, which is precisely shaped to focus the reflected IR light onto the filament.

The result is that the new 60-watt Halogen-IR lamp can provide the same amount of useful light as a standard 90-watt halogen or a conventional 150-watt PAR (Parabolic Aluminum Reflector) floodlight. What's more, the new lamp offers 33 percent energy cost savings over a standard halogen lamp and 60 percent energy cost savings over conventional 150-watt floodlights.

SEATTLE (NOV. 6) PR NEWSWIRE - United Parcel Service (UPS) has ordered 25 additional 757 package freighters valued at approximately $1.7 billion including spares, Boeing Commercial Airplane Group confirmed today.

Fifteen of the orders were converted from options previously held by UPS, one of the largest jet cargo operators.

With this order, the UPS fleet of delivered, or on-order 757PFs, has grown to 55 airplanes. UPS also holds options on 41 additional 757PFs scheduled for delivery through 2001.

The 757PF is a windowless, dedicated freighter designed to accommodate 15 standard 88 x 125-inch (224 x 318 centimeter) cargo containers or pallets on the main deck. Its primary features include a large cargo door located on the left forward side of the fuselage and the ability to fly extended range routes, making it suitable for both domestic and international routes.

Based in Greenwich, Conn., UPS serves all 50 states and 180 countries and territories. The world's largest package delivery company, UPS delivered

approximately 2.8 billion packages and earned revenue of more than $12 billion in 1989.

Including this order, 34 customers have ordered a total of 713 757s, of which 59 are designed to carry main deck cargo.

BUFFALO, NY (NOV. 6) PR NEWSWIRE - Barrister Information Systems Corporation (AMEX: BIS) announced that it has received a contract from the law firm of Kitch, Saurbier, Drutchas, Wagner & Kenney, P.C. of Detroit.

The contract includes the purchase of Barrister's Advanced Law Firm Management System (ALFMS) and upgrading the firm's word processing software and hardware.

Barrister's ALFMS system consists of three modules: client management, general ledger and accounts payable. The ALFMS financial management system is based on an advanced relational data base technology, 32-bit multiprocessor architecture which allows rapid processing of law firm data. This system allows multiple users to perform concurrent data entry, validation, recording and reporting functions.

The ALFMS system will provide the firm with the information necessary to facilitate decision-making, to aid in strategic planning and handling the day to day accounting requirments with increased speed and efficiency. According to Dan Lissek, the firm's information systems manager, the upgrade was a necessary step for the management and planning requirements of the firm.

The firm is very growth oriented, and there has been a steady increase in the number of attorneys and support staff over the last two years. Kitch, Saurbier et al. has been a Barrister client since June of 1988, and has four offices in and around the city of Detroit.

Barrister's president, Henry P. Semmelhack, comments, "The receipt of this contract indicates that the momentum of ALFMS in the marketplace continues to build. We know that the market has been starved for a comprehensive, state-of-the-art solution like our product, and we are pleased to be the first to deliver that product to the legal industry."

DETROIT (NOV. 6) PR NEWSWIRE - The appointment of James E. Pryce as general director of labor relations on the General Motors Industrial Relations Staff was announced today by Richard F. O'Brien, vice president in charge of that staff.

Pryce succeeds John D. Butler, whose appointment as vice president of personnel for GM Europe was announced on Oct. 12, 1990.

A native of Detroit, Pryce, 53, joined GM in 1964 as a labor relations representative with the former GM Assembly Division plant in Fairfax, Kan. He became a labor relations administrator at the former Fisher Body Division headquarters in Warren, Mich., in 1968 before moving to the GM Industrial Relations Staff in 1972.

Since then he has served in a variety of labor relations positions before being named director of labor, economics, wage and international labor relations administration in 1984, the position he held until his most recent appointment.

Pryce holds a bachelor's degree in economics and a law degree, both from the University of Michigan.

DANBURY, CONN. (NOV. 6) PR NEWSWIRE - Construction of a new 300,000 tons-per-year ethylene glycol plant at Prentiss, Alberta, Canada, will get under way next year under terms of a joint venture agreement involving Union Carbide Chemicals and Plastics Company Inc. (UCC&P); Far Eastern Textile Ltd., Taiwan; Mitsui & Co. Ltd., Japan; and Oriental Union Chemical Corporation, Taiwan.

The plant -- to be built on the same site as Union Carbide's existing ethylene glycol plant in Alberta -- is scheduled for startup during the second half of 1994. It will boost total ethylene glycol capacity at Prentiss to 600,000 tons annually. Ethylene for the plant will be supplied by Dow Chemical Canada Inc. from a new unit to be located at Fort Saskatchewan, Alberta.

The joint venture will be known as Alberta & Orient Glycol Company Limited. Union Carbide will own 50 percent of the joint venture; the remaining 50 percent will be shared equally by the other three participants.

"This venture is an integral part of our strategy to maintain and further strengthen our leadership position in the ethylene glycol business worldwide," said A. W. Lutz, president of UCC&P's industrial chemicals division. Output from the new facility will go principally to serve fast-growing Far Eastern polyester markets, he explained.

With more than 2.6 billion pounds of ethylene oxide capacity already in place, UCC&P is the world's leading producer of ethylene oxide and ethylene glycol, vital petrochemical intermediates for a wide range of end use products including antifreeze, polyester fibers, film and bottle resins.

ATLANTA (NOV. 6) PR NEWSWIRE - Aaron Rents Inc. (NASDAQ: ARON), the nation's largest furniture rental and sales company, today announced that it has acquired two rent-to-own furniture stores in Atlanta and a rental store in St.

Louis as part of the company's expansion program. The company also announced the opening of a new Aaron Rent-To-Own store in Houston.

The two stores in Atlanta were acquired from American's Rent-To-Own and the store in St. Louis was acquired from Sunshine Furniture Rental Co. Inc., said R. Charles Loudermilk Sr., chairman and chief executive officer of Aaron Rents.

"The addition of these stores will make Aaron Rents the rental leader in these two major markets, consistent with our plan of concentrating efforts where we can increase market share," Loudermilk said.

"This brings to 24 the number of Aaron Rents stores now serving the growing rent-to-own niche market," Loudermilk said. "The growth of our Rent-To-Own business results from the combination of an innovative Aaron Rents marketing plan and the demand by consumers in the current economic environment."

The company's rent-to-own sales have gained strong impetus from a new "12 To Own" program permitting customers to rent with an option to buy furniture from Aaron Rents in only 12 months in contrast to the rental industry standard of 18 to 24 months.

The "12 To Own" program provides flexibility for the customer in a time of economic uncertainty, allowing a choice of keeping the furniture or turning it back in during the 12-month period.

Aaron Rents estimates that up to 40 percent of American consumers are potential rent-to-own customers. The company is developing a new television and direct mail marketing campaign for its "12 To Own" program.

Aaron Rents Inc., based in Atlanta, operates 163 stores in 50 metropolitan areas of 28 states for the sale and rental of residential and office furniture. The company produces furniture at five plants in Georgia and Florida.

KENT, WA (NOV. 6) PR NEWSWIRE - Flow International Corporation (NASDAQ: FLOW) announced today it has discontinued its efforts to locate a buyer for the company as a whole.

Lloyd Andrews, chairman of Flow's Merger & Acquisition Committee, stated "These efforts have not resulted in proposals that represent sufficient value for the company's shareholders." He added that the company will continue to seek strategic partners in key markets around the world, while focusing on the long-term growth of the company.

Dr. Y. H. Michael Pao, chairman, president and CEO of the company said, "Despite the weak economic conditions, we are optimistic about the long-term growth and profitability of the company. We have a strong management team in place. All of our divisions are now profitable, including HydroMilling Services and Flow Asia."

Furthermore, Pao said, "We plan to expand our waterjet systems business worldwide. In addition, we plan to enhance the productivity of our HydroMilling fleet this winter, and to increase the HydroMilling services business next year by 50 percent."

Flow International is the world's leader ultrahigh-pressure waterjets for industrial cutting and HydroMilling services.

#90310p3766 11/06/1990 ~PR Newswire

CLEARWATER, FL (NOV. 6) PR NEWSWIRE - Fortune Financial Group, Inc. (NASDAQ-NMS: FORF) today reported a net loss of $5.5 million for its fiscal year ended Sept. 30, 1990, compared with a net loss of $6.7 million in 1989. The loss per share was $1.27 in 1990 compared to $1.48 in 1989. For the fourth quarter, Fortune reported a net loss of $5.2 million or $1.18 per share, compared with a $5.1 million net loss or $1.12 per share in 1989.

The flagship company Fortune Savings Bank earned $4.3 million after taxes in 1990, before special provisions related to non-banking activities, compared to $437,000 in 1989.

In releasing year-end results, Chairman John R. Torell III stated: "The bank was profitable for the year but the non-bank activities were not. Therefore, we have determined that it is in the best interests of our stockholders to eliminate non-depository activities altogether and concentrate future business solely in the traditional banking arena. The result of these actions will be immediate, and both the holding company and the bank should be profitable going forward."

During the fourth quarter, the company recognized a $7.8 million provision for loan loss as a result of its loans to Golf Car Systems, Inc. As a result of this action, Fortune will not recognize Golf Car System's operating results in its financial statements in future periods. In addition to the fourth quarter provision, Fortune recognized $2.6 million in losses during the year as a result of Golf Car's operations.

Fortune's interest rate spread improved to 1.61 percent in 1990 from 1.27 percent in 1989 resulting in a significant increase in net interest income to $52.3 million in 1990 compared with $44 million in 1989.

This is due to the stable yield of Fortune's adjustable rate mortgage portfolio, while conservative deposit pricing and lower market rates helped reduce the cost of funds.

The spread for the quarter ended Sept. 30 increased to 1.82 percent from 1.30 percent for the same period in 1989 and 1.66 percent for the quarter ended June 30, 1990.

Total other income was $6.2 million during 1990, compared to $7.1 million in 1989. The reduction was due to a combination of factors, including decreases in the volume of loans and mortgage loan servicing sold, an increase in the gain on sale of fixed assets and a decrease in losses on securities transactions. General and administrative expenses were held under tight control, growing only 1.2 percent year over year.

Total classified assets decreased to $92.5 million from $116.2 million at June 30, 1990. Classified assets at Sept. 30, 1989 were $84 million. Torell added, "We have also made good progress in returning loans to an earning status, particularly in the last quarter."

The company's assets totaled $3 billion as of Sept. 30, 1990, down from $3.2 billion a year earlier. The reductions are in line with Fortune's strategic approach to constrain the growth of the balance sheet. Fortune Savings Bank continues to exceed all present capital requirements under federal regulations established last year.

Tangible, core and risk-based capital were 3.6 percent, 3.9 percent and 7.4 percent, respectively, at Sept. 30, compared to current requirements of 1.5 percent, 3 percent and 6.4 percent. The risk-based requirement increases to 7.2 percent on Jan. 1, 1991.

In October, Fortune also announced an agreement to swap its six branches on the East Coast of Florida, with $210 million in deposits, in exchange for 15 branches and $515 million in deposits in Pasco and Pinellas counties. There will be no loan or investment assets purchased.

Management stated at the time that the transaction would improve the efficiency and profitability of Fortune's core business; the excess deposits will be used to reduce borrowed funds so that Fortune's balance sheet will exhibit no growth as a result of the transaction. Consummation of the agreement is subject to regulatory approval.

The number of shares of Fortune Financial outstanding at the end of the year was 4,351,978 compared to 4,538,710 in 1989. The reduction was the direct

result of the recapture of shares held as collateral on a troubled loan. The common stock of Fortune Financial Group is traded on the NASDAQ National Market system under the symbol "FORF."

TROY, Mich. (NOV. 6) PR NEWSWIRE - OIS Optical Imaging Systems, Inc. (OTC: OVON) (OIS) filed today a Form 8-K with the Securities and Exchange Commission following an agreement with William Manning to convert $2,500,000 of his 10 percent convertible notes due April 1999 to 1,250,000 shares of Series A preferred stock.

As a result of the $2,500,000 increase in equity, OIS is able to comply with the NASD minimum Capital and Surplus requirement necessary for continued inclusion of OIS Common Stock on the NASDAQ system.

OIS develops flat panel electronic displays and electronic imaging and scanning systems. Currently, OIS is focusing its proprietary display technology on avionic and military applications in order to become a leading U.S.-based manufacturer of flat panel displays.

CHAPEL HILL, NC (NOV. 6) PR NEWSWIRE - Kenan Transport Company (NASDAQ: KTCO) today reported results for the third quarter of 1990.

Revenue for the third quarter of 1990 was $11,947,000, a $784,000 and 7 percent increase over the third quarter of 1989. Net income was $432,000, a decrease of $118,000 and 21 percent. Earnings per share were $.18 compared to $.23.

Revenue for the nine months ended September 30, 1990 was $35,598,000, a $1,430,000 and 4 percent increase over the same nine months in 1989. Net income was $1,233,000, a decrease of $534,000 and 30 percent. Earnings per share were $.52 compared to $.75.

Operating results for the quarter, as well as the first nine months, continued to be affected by adjustments to reserves for accidents and workers' compensation claims that reduced third quarter net income by $140,000. Increased worker's compensation costs are being driven by higher medical costs and larger compensation awards by the Workers Compensation Commissions in the states in which we operate. Action has been taken by management to focus additional personnel and attention on the key risk factors driving up claims costs. Because some of the factors that are driving up insurance and claims costs are outside of management's control, we are seeking higher freight rates from our customers.

Revenue grew in the third quarter as we added additional customers to our petroleum transportation operations. Fuel surcharges were implemented to compensate for rapidly rising diesel prices as a result of the Middle-East crisis.

	QUARTER ENDED SEPTEMBER 30	
	1990	1989
Revenue	$11,947,000	$11,163,000
Net Income	$ 432,000	$ 550,000
Earnings Per Share	$ .18	$ .23

	SIX MONTHS ENDED SEPTEMBER 30	
	1990	1989
Revenue	$35,598,000	$34,168,000
Net Income	$ 1,233,000	$ 1,767,000

#90310p3773 11/06/1990 ~PR Newswire

FORT WORTH, TX (NOV. 6) PR NEWSWIRE - Snyder Oil Corporation ("SOCO")(NYSE: SNY) announced today a series of ventures which will substantially increase the level of its exploration and development activities. The projects are designed to expand the company's production and add to its reserve base in light of higher energy prices.

Late last week, SOCO committed to purchase one-half of over 70,000 net undeveloped acres in Weld County, Colorado from Amoco Production Company. The purchase is being made simultaneously with the purchase of the other half of the acreage by HS resources, Inc., a privately held oil company in San Francisco. The acreage, all of which is held by production, is located in the area of SOCO's greatest concentration of operations and is highly prospective for conventional development of the Codell and Niobrara formations. Detailed engineering has not been completed on the property. However, SOCO believes the purchase will add a minimum of 300 locations to its inventory of development drilling sites. It is anticipated that a significant proportion of the associated reserves will be classified as proved undeveloped by SOCO's independent petroleum consultants at year-end. The purchase is expected to close in mid-November and drilling should be initiated in early 1991. Plans are currently being developed which would provide for drilling in excess of 100 vertical wells in the course of 1991. The acreage may also prove prospective for horizontal drilling.

Separately, SOCO indicated that it had formed two additional joint ventures to exploit horizontal drilling technology in the Niobrara Chalk formation of northern Colorado. A subsidiary of a large Australian company has purchased a 50 percent interest in SOCO's Lowry and Sanborn Projects and entered into agreements to pursue their evaluation. The projects encompass approximately 39,000 net acres. They will be operated by SOCO in much the same manner as the Pawnee Project, which was announced 60 days ago. Seismic work will commence shortly and drilling should be initiated in early 1991.

Finally, SOCO announced that drilling on its Willet 2H well, located in the Silo Field of Laramie County, Wyoming had been completed. The well reached a total depth of 11,111 feet, including approximately 3,700 feet of horizontal departure, a horizontal drilling record in the Niobrara. A 24-hour initial

potential test will be conducted in approximately two weeks after installation of pumping equipment. To date, swab testing has yielded production rates of 20-30 barrels of oil per hour.

SOCO is an independent oil company engaged in the acquisition, production, development and exploration of oil and gas properties and in natural gas processing and transportation.

ST. LOUIS (NOV. 6) PR NEWSWIRE - Charles F. Knight, chairman and chief executive officer of Emerson Electric Co. (NYSE: EMR), announced today that the company had achieved record sales, net earnings and earnings per share for the fourth quarter and fiscal year 1990. This was the 33rd consecutive year of record earnings and earnings per share for the company.

Emerson's earnings per share were $2.75 for fiscal 1990, an increase of 4.6 percent over earnings per share of $2.63 for fiscal 1989. Net earnings for fiscal 1990 were $613,182,000, an increase of 4.3 percent over net earnings of $588,031,000 for the prior year.

Emerson's net sales for fiscal 1990 were $7,573,356,000, an increase of 7.1 percent over net sales of $7,071,252,000 in fiscal 1989.

The company's earnings per share for the three-month period ended Sept. 30, 1990, were $0.69, an increase of 3.0 percent over earnings per share of $0.67 for the same quarter a year ago. Net earnings for the fourth quarter of fiscal 1990 were $154,593,000, an increase of 3.3 percent over net earnings of $149,640,000 for the fourth quarter of fiscal 1989.

Emerson's net sales for the three-month period ended Sept. 30, 1990, were $2,038,732,000, an increase of 15.7 percent over net sales of $1,762,598,000 for the same period a year ago.

HOUSTON (NOV. 6) PR NEWSWIRE - Adams Resources & Energy, Inc. (AMEX: AE) today announced third quarter 1990 unaudited net earnings to common shareholders of $304,000 or $.04 per common share. This compares to unaudited third quarter 1989 earnings of $389,000, which included a $179,000 gain on sale of real estate. Revenues for the current quarter were $29, 166,000 as compared to $23,581,000 in the prior year third quarter.

K.S. Adams Jr., president, indicated that recent increases in crude oil prices had a minimal impact on earnings as price improvements were offset by reduced margins in certain segments of the company's marketing and transportation operation. The company continues to participate in the development of a number of low risk natural gas prospects in Oklahoma. The fifth such well has now been successfully completed and a sixth well is currently in progress. The company generally holds a 20-35 percent working interest in each well drilled at a net cost to the company of approximately $100,000 to $175,000 per well. Typically, the company expects to earn a three to one undiscounted rate of return on its investment.

KINGWOOD, TEXAS (NOV. 6) PR NEWSWIRE - Enex Resources Corporation (NASDAQ:

ENEX), a company which acquires and manages producing oil and gas properties and markets oil and gas income programs, today reported financial results for the third quarter and nine months ended Sept. 30, 1990.

Net income for the third quarter was $142,497 or $.09 per share, on revenues of $998,339. This compares with a net loss of $572,945 or $.12 per share, on revenues of $2,188,121 for the same period of 1989. For the first nine months of 1990, net income, which included a $5,960,149 nonrecurring gain on the sale of property, was $5,897,396 or $2.25 per share. This compares with a net loss of $577,801 or $.12 per share for the first nine months of 1989.

Gerald B. Eckley, president of Enex said, "The third quarter per share earnings of $.09 reflect the first full quarter of operations since our stock repurchase. With no long-term debt, working capital of $5.7 million and a book value in excess of $11.7 million, we are in a strong financial position. With these positive earnings to complement our substantial cash position, we expect to further enhance the value of the company for our shareholders and limited partners."

DALLAS (NOV. 6) PR NEWSWIRE - The board of directors of Zale Corporation has elected Dennis S. Bookshester as president and chief executive officer effective Dec. 1, 1990, it was announced today by Irving R. Gerstein, chairman

of the board.

According to Gerstein, who has served in this capacity for nearly four years, while also serving as president and chief executive officer of Peoples Jewelers of Toronto, Canada, "I have served in this position knowing full well that at the right time this company would benefit significantly from full-time day-to-day on-site leadership." Gerstein said that now is the right time for this top management transition. "To date, substantial progress has been made in strengthening the company's profitability and achieving key financing, acquisition and operating goals. Most important," he said, "we have the immediate availability of a highly successful retailing executive like Dennis Bookshester, who brings outstanding leadership credentials and accomplishments to this position."

In 1984, Bookshester was elected corporate vice chairman of Carson Pirie Scott & Co. and chairman and chief executive officer of its retail division. He joined Carson, Pirie Scott & Co. as president and chief executive officer of the department store division in 1983.

He was named president in 1977 and chairman and chief executive officer in 1978 of Sibley, Lindsay and Curr, a division of Associated Dry Goods Corporation and within five years became president of that organization's Caldor, Inc. operation. Bookshester began his retailing career in 1961 when he joined Burdine's, a Federated Department Store, as a trainee. With that retail group, Bookshester advanced to the position of senior vice president, merchandising.

Bookshester is a graduate of the University of Alabama. Gerstein will continue as chairman of the board of Zale Corporation. He stated that he will work closely with Bookshester and will now "concentrate more fully on the global opportunities available to Zale Corporation."

PORTLAND, ORE. (NOV. 6) PR NEWSWIRE - Northwest Telecommunications Inc. of Spokane, Wash. today announced the purchase of Portland's Call U.S. Inc., the metropolitan area's largest locally based long distance telephone company with 9,000 customers and 24 employees.

NW Telco, a subsidiary of Spokane's Washington Water Power Co. (WWP) (NYSE: WWP) was founded in 1985. In addition to offices in Spokane and Boise, Idaho, Telco recently began moving into the Puget Sound market, with a new office and switching facility located in Seattle.

In announcing the sale, Paul Redmond, WWP board chairman and chief executive

officer, pledged to expand on "Call U.S.'s well-established record of quality customer service.

"Our intention is to extend our long distance telephone services throughout the Pacific Northwest by providing the kind of personalized customer service and high reliability we have demonstrated in regional energy services for more than a century," Redmond said. "The acquisition of Call U.S. will enhance the long-term value and quality of our telecommunications services, while allowing us to further improve our highly competitive pricing position."

Joseph R. Maio, president of NW Telco, said that Call U.S. customers "will continue to receive the outstanding services they have come to expect, provided by the same staff and the same Portland office. The services and resources Telco can add mean that any changes will be positive ones."

Maio indicated that the acquisition was part of a natural progression in the development of Northwest Telco.

Northwest Telco has 42 employees and provides worldwide long distance voice, data transmission, private line and special fax services to approximately 4,000 customers in Washington, Idaho, Oregon and Montana. Telco provides outbound long distance, incoming "800" services, telephone calling cards, international services, custom billing and a variety of special pricing plans.

WWP is an investor-owned electric and natural gas utility founded in 1889. Nearly 40 percent of WWP's 37,000 shareholders live in the Pacific Northwest. The Pentzer Corp., a wholly owned subsidiary of WWP, oversees its nonutility activities, including Northwest Telco. Pentzer acquired Telco in 1989 and is providing the resources to make it a major long distance carrier throughout the Northwest.

ARLINGTON, VA. (NOV. 6) PR NEWSWIRE - Gannett Co. (NYSE: GCI) today announced the formation of GANNETTWORK, a cross-media advertising program headed by Cathleen Black, executive vice president/marketing of Gannett and publisher of USA Today.

GANNETTWORK consists of a corporate sales team that will work directly with major advertisers and their agencies to custom design multimedia packages incorporating various Gannett and non-Gannett media parties.

"At a time when all advertisers are seeking to maximize the impact of their advertising and marketing investments, we believe that the various divisions of Gannett, working in concert with other marketing and media partners, offer

exciting possibilities and opportunities," Black said.

Lynne O'Shea, vice president/new business, Gannett Outdoor/central region sales, and David O'Brasky, vice president/sales development, USA Today, will direct GANNETTWORK, reporting to Black. Also on the sales team are representatives from other Gannett media divisions, including Gannett Broadcasting, Gannett's Newspaper division, USA Weekend, and Gannett New Business and Product Development.

Gannett is the nation's largest newspaper publisher with 82 dailies, including USA Today, which reaches nearly 6 million readers each day. Gannett also publishes USA Weekend, a newspaper magazine appearing in 324 newspapers every week. Gannett also operates the largest out-of- home advertising unit in North America, which includes Gannett Outdoor and Gannett Transit.

The company also owns 10 television stations and 15 radio stations and Gannett Direct Marketing Services.

MINNEAPOLIS (NOV. 6) PR NEWSWIRE - Piper Jaffray Incorporated (NASDAQ: PIPR), parent company of the investment firm of Piper, Jaffray & Hopwood Incorporated today reported record revenues for the fiscal year ended Sept. 28, 1990. Revenues of $203,768,000 were 4.4 percent ahead of fiscal 1989 revenues of $195,236,000. Net income for the fiscal year was $10,300,000, down 11.8 percent from the previous year's net income of $11,675,000. Net income per share for fiscal 1990 was $2.52 versus $2.92 in fiscal 1989, a 13.7 percent decline.

For the fourth fiscal quarter ended Sept. 28, 1990, revenues were $52,204,000, compared to $57,414,000 for the same quarter last year, a 9.1 percent decrease. Net income for the quarter was $1,955,000 versus $4,126,000 last year, a 52.6 percent drop. Net income per share was $0.47, down 54.4 percent from $1.03 for the same quarter in fiscal 1989.

Commission revenues remained strong throughout the year, showing weakness only since the Middle East crisis began in mid-August. Overall, retail and institutional commissions and trading profits were up 12 percent for the year, including an almost 40 percent increase in mutual fund revenues. Investment banking revenues were down 23 percent, in line with industry trends. Finally, asset management fees were up 37.5 percent, with Piper Capital Management (PCM) ending the year with $3.6 billion under management and Piper Trust Company completing its first full year of operations.

Piper, Jaffray & Hopwood Incorporated is a full-service investment firm with 64 retail sales offices in 16 Midwest, Mountain and Pacific Northwest states plus institutional sales offices in Minneapolis, New York, Seattle, Portland, Los Angeles, Denver, Boston and London. Founded in 1895, Piper, Jaffray & Hopwood Incorporated is a member of the New York Stock Exchange and other major stock, futures and options exchanges. Affiliates include Piper Capital Management Incorporated, an asset management company with $3.6 billion under management, and Piper Trust Company.

#90310p3803 11/06/1990 ~PR Newswire

STAMFORD, CONN. (NOV. 6) PR NEWSWIRE - Third quarter earnings of Cognitronics Corporation (AMEX: CGN), a leading manufacturer and supplier of voice processing equipment, rose to $324,000, or $.14 per share, compared to net income of $191,000, or $.08 per share, for the same period in 1989. Included in 1990 net income is an extraordinary credit of $95,000, or $.04 per share, and of $83,000, or $.03 per share, in 1989 for the utilization of tax operating loss carryforwards.

Revenues for the 1990 third quarter were $4,148,000 and $4,038,000 in 1989.

For the nine months ended Sept. 30, 1990, net income totaled $1,024,000, or $.45 per share, versus net income of $766,000, or $.34 per share, for the comparable period in 1989. Net income for the nine- month period includes an extraordinary credit of $345,000, or $.15 per share in 1990, and $274,000, or $.12 per share, in 1989.

Revenues for the nine months ended Sept. 30, 1990 were $12,995,000, up from $12,540,000 for the comparable period in 1989.

"Sales of voice processing products increased nine percent in the third quarter of 1990 over the same period of 1989, which were partially offset by lower sales of scanning products," said Matthew J. Flanigan, president and CEO. "The higher sales of voice processing products reflects the continued growing acceptance of the company's voice processing products by the domestic telephone industry, although at a lower incremental rate than the previous two quarters of 1990.

"Improved earnings in the current quarter are primarily attributable to higher gross margins of voice processing products reflecting production efficiencies and a change in the product sales mix."

Cognitronics Corporation is a leading manufacturer and supplier of voice processing equipment, including telephone announcement products and interactive voice response (IVR) systems, to telephone operating companies,

OEMs and commercial users. Cognitronics also manufactures optical scanning and image processing systems and precision machined parts.

VALDESE, NC (NOV. 6) PR NEWSWIRE - ALBA-WALDENSIAN, INC. (AMEX: AWS), a diversified knitwear producer, announced net earnings of $854,937 on sales of $11,169,736 for the third quarter ending September 30, 1990. This compares to net earnings of $678,574 on sales of $12,114,133 in the same quarter a year ago.

"Third quarter sales were below the same period in 1989 due to economic conditions as well as the elimination of certain unprofitable product lines," said William F. Karnbach, President & CEO. "As pointed out in my last report, our year to date bottom line figures include a $293,000 bad debt write-off resulting from the Ames Corporation Chapter 11 proceedings. For this reason we are even more pleased with the Company's performance.

"In the third quarter of 1990, we finalized an agreement with Kayser-Roth, Inc. to market ladies panties under the No-Nonsense(R) brand name. This agreement will be important for our future growth in that we now have one of the best-known consumer product names in the U.S.

"We are pleased with the results of all of our divisions thus far, including an excellent performance by our new Alba Direct division. We are optimistic concerning our earnings for the full year," said Mr. Karnbach.

ALBA-WALDENSIAN, INC. manufactures women's and men's hosiery, women's intimate apparel, and medical specialty products. The Company presently employs approximately 1,000 employees in five locations in Valdese, NC and in Chilhowie, VA.

NEW YORK (NOV. 6) PR NEWSWIRE - Pan American World Airways today reported that scheduled traffic last month increased 1.9 percent compared with the same month a year ago, from 2.364 billion revenue passenger miles to 2.408 billion.

Pan Am said load factor increased 1.4 points, from 61.7 percent in October last year to 63.1 percent this year, with available seat miles down 0.4 percent, from 3.832 billion to 3.817 billion.

Traffic statistics include Pan American World Airways' operations only, and do not include the Pan Am Shuttle or Pan Am Express flights.

Atlantic RPMs were down 3.7 percent, ASMs were up 0.6 percent and load factor declined 1.2 points, from 66.6 percent, to 65.4 percent.

Latin American RPMs were up 25.3 percent, ASMs were up 8.3 percent and load factor increased 8.8 points, from 56.0 percent to 64.8 percent.

In U.S. domestic markets, RPMs were down 0.6 percent, ASMs were down 3.4 percent and load factor was up 1.6 points, from 61.7 percent to 63.1 percent.

Scheduled freight ton miles were down 14.1 percent, from 64.4 million to 55.3 million.

YEAR TO DATE For the first ten months of the year, scheduled passenger traffic was up 8.9 percent, from 24.376 billion RPMs to 26.545 billion, with ASMs up 5.6 percent, from 37.874 billion to 39.993 billion and load factor, at 66.4 percent, up 2.0 points from 64.4 percent last year.

Scheduled freight ton miles were down 0.7 percent, from 609.0 million to 604.5 million.

#90310p3817 11/06/1990 ~PR Newswire

HICKSVILLE, N.Y. (NOV. 6) PR NEWSWIRE - In the first quarter of fiscal 1991, new product sales for Metro Tel Corp. (NASDAQ: MTRO) continued to offset soft

sales of older test instruments. However, the increase in new product sales, unable to shake the restraints of an industry-wide poor business climate, could only minimally bring the quarter's revenues beyond last year's level.

For the first quarter ended Sept. 30, 1990. Metro Tel Corp. reported sales of $1,154,477 and a loss of $24,442 or $.02 per share. This compared with sales of $1,153,640 and net earnings of $1,693 or $.00 per share for the same period last year.

V.J. Indelicato, Metro Tel president, attributed the first quarter loss to the fact that the flat sales could not carry certain new expenses that had arisen in the period. First, the quarter carried a larger selling expense burden from the establishment of two additional direct factory sales offices. He explained that the newest appointees, a regional sales manager for the Far West and one for the Northeast, represented completion of the company's plan to establish direct factory representation in each of the major telephone regions in the U.S.

Added new expenses in the first quarter of fiscal 1991 also arose with increased legal activity from a patent infringement suit Metro Tel has instituted against AT&T and from an accounting change started at the beginning of the new fiscal year.

#90310p3818 11/06/1990 ~PR Newswire

PITTSBURGH (NOV. 6) PR NEWSWIRE - Equitable Resources Inc. (NYSE: EQT) reported consolidated net income for the 12 months ended Sept. 30, 1990, of $49.3 million, or $2.35 per share, compared with a restated $50.3 million, or $2.41 per share, for the 12 months ended Sept. 30, 1989.

The 1990 period includes $1.4 million of income from settlements approved by the FERC for the recovery of higher NGPA prices on natural gas production that had been denied the company between 1978 and 1983. The 1989 period includes $3.1 million of income from settlement of a rate increase which had been reserved in prior periods. A comparison of operating results excluding these settlements shows an increase of about $0.7 million in 1990 which is attributed to higher oil prices and production.

Net income for the nine months ended Sept. 30, 1990, was $29.3 million, or $1.40 per share, compared with a restated $30.9 million, or $1.48 per share, for the nine months ended Sept. 30, 1989. Operating results, excluding the NGPA pricing settlements in 1990 and $3.6 million from the rate settlement in 1989, increased $0.6 million in 1990 as the result of higher oil prices and production.

Net loss for the quarter ended Sept. 30, 1990, was $1.7 million, or $.08 per share, compared with a restated loss of $2.4 million, or $.11 per share for the 1989 quarter. The improvement in 1990 is attributed primarily to the NGPA pricing settlements.

#90310p3819 11/06/1990 ~PR Newswire

ENGLEWOOD, COLO. (NOV. 6) PR NEWSWIRE - Marquest Medical Products Inc. (NASDAQ: MMPI) today reported net income of $278,000 or 7 cents per share on revenues of $19,555,000 for its fiscal second quarter ended Sept. 29, 1990. This compares to net income of $697,000 or 17 cents per share on revenues of $16,741,000. Revenues exceeded the prior period by 17 percent and represents all-time high for second quarter revenues for the company.

For the six months just ended, net income totalled $1,201,000 or 28 cents per share on revenues of $39,621,000 compared to net income of $1,434,000, or 35 cents per share on revenues of $34,681,000 for the like period last year. The six-month period last year reflected no gain or loss on foreign currency, while this year there is a currency loss of $1,043,000 for the six months, $797,000 of which occurred during the second quarter ended Sept. 29. Operating income for six months has increased from $2,993,000 last fiscal year to $3,195,000 this year, an increase of 7 percent.

Earnings for both the second quarter and year-to-date have been adversely affected by the decline of the dollar against the Swiss Franc and other European currencies. This loss on the company's books has occurred despite a continuous hedging effort on the company's part that netted over $1,200,000 in cash settlements on the sale of option contracts during this fiscal year. The company has controlled some of this problem by repurchasing 26 percent of the debt out of the Swiss market.

Earnings were also impacted during the second quarter by approximately $400,000 of start-up costs associated with a new Maquiladora in Nogales, Sonora, Mexico. While these costs will continue into part of the third quarter, it is anticipated that they will benefit the fourth quarter and fiscal 1992 substantially.

Despite the problems incurred during the second quarter, the company still estimates that its earnings for fiscal year 1991 will be in excess of 80 cents per share, unless there is a continuing downward spriral of the dollar against the Swiss Franc.

Marquest Medical Products is a leading innovator and manufacturer of specialty respiratory and anesthesia disposable products. It also provides home

healthcare rentals and services to the general public as part of the $3 billion alternate care market. The company is a technological leader with proprietary healthcare products that are time saving and cost effective.

NEW YORK (NOV. 6) PR NEWSWIRE - American Express Information Services Corporation (ISC) today named Harold L. Krell senior vice president and general manager of the Physician Services Division (PSD), a unit of the company's Health Systems Group.

PSD provides billing services to hospital-based physicians, primarily emergency departments.

"We are delighted to have Harold on board," said Larry Ferguson, president of Health Systems Group. "He brings more than 15 years of health care systems management expertise to his new role."

Krell, 46, joins PSD from LifeCard International, Inc. where he had been vice president and chief operating officer since 1986. Prior to this he had been president of his own start-up company, Micromed, Inc., a post marketing surveillance company which he founded in 1983. In 1986, the company was sold.

Krell began his health care systems career in 1973 with Shared Medical Systems as a senior systems analyst where he designed the first outpatient system and first physician systems for the company.

He then was named Philadelphia regional sales manager and was quickly elevated to the position of national sales manager for the Physician's Service business. Soon after he was appointed general manager.

In 1982, Krell joined Health Learning Systems, Inc. as general manager, developing physician and patient education programs underwritten by grants from major pharmaceutical companies.

Krell holds a bachelor of science in accounting from the University of Nevada, Las Vegas. He lives in the Philadelphia area with his wife and child.

American Express ISC is a leading provider of high-quality information processing and communications services to a wide range of industries. It is a wholly owned subsidiary of American Express Company. Health Systems Group, headquartered in Charlotte, N.C., provides hospital information systems to more than 700 hospitals in the United States and Puerto Rico. It is a business unit of ISC.

#90310p3829 11/06/1990 ~PR Newswire

NORCROSS, GA. (NOV. 6) PR NEWSWIRE - Colorocs Corporation (NASDAQ: CLRX), a designer and distributor of plain-paper, full-color copiers and printers, today announced that revenues for the quarter ended Sept. 30, 1990, were $5 million, compared to $4.1 million in the third quarter a year ago.

Net loss for the 1990 third quarter was $2.8 million, or $.24 per common share outstanding. Net income in the 1989 third quarter was $7 million, or $.48 per common share. This income resulted from the gain on sale of Savin Corporation securities during the quarter.

For the nine months ended Sept. 30, 1990, revenues were $32.5 million, compared to $4.8 million for the same period a year ago. Net loss for the nine-month period in 1990 was $760,000, or $.08 per common share. For the same period in the previous year the company reported net income of $7.3 million, or $.52 per common share.

Third quarter 1990 revenues were affected by several factors. First, third-quarter shipments would have been greater if Colorocs' customers or Colorocs had been able to secure additional letters of credit as originally anticipated.

Second, Colorocs delayed shipments to one private label customer while negotiating a payment schedule for machines delivered to this customer in the second quarter of 1990. Third, Sharp had a two-week plant vacation at the

end of August, causing a delay in shipments from Sharp the last of September.

Charles Muench, president of Colorocs, said, "As we build our own distribution system, we sacrifice some near-term earnings due to the cost associated with the start-up of branches.

However, we believe this strategy will enable the company to capture a larger share of the worldwide market for plain paper full-color copiers and printers."

Colorocs now has branch operations to sell and service Colorocs brand machines in 13 major U.S. cities, two Canadian cities and six Australian locations. In addition, the company is now distributing copiers in Taiwan, Singapore, Thailand, and Hong Kong through joint venture called Colorocs Asia.

AUSTIN, TX (NOV. 6) PR NEWSWIRE - Execucom Systems Corp., a leader in EIS (executive information systems), announced today that it was chosen as part of a team headed by EDS (Electronic Data Systems) to provide multi-user computer systems and services to the Army, Navy, and Defense Logistics Agency. Execucom's graphics software is one component of a bundled package of products to be available to the three customers.

"The long-term revenue of the contract for Execucom is estimated to be more than $10 million," said Gary R. Anderson, president and chief operating officer of Execucom. "We are delighted to be part of the team chosen for this highly competitive contract and look forward to working with EDS on such a large project."

EDS signed the contract with the U.S. Army Information Systems Selection and Acquisition Agency. The SMC (Small Multi-User Computer) contract runs for eight years in one-year increments with a value that could reach more than $700 million. Estimates are that up to 20,000 multi-user systems will be procured by the three customers.

The graphics software is an integrated feature of Executive Edge, Execucom's EIS software. The software addresses the entire spectrum of graphics, from ad-hoc analyses to boardroom quality presentations.

Execucom, a subsidiary of MPSI Systems Inc., develops and markets EIS and business productivity software and services. Based in Austin, Texas, Execucom is a recognized market leader in executive information systems software. The company's products and services are used by more than 250,000 business professionals in 1,900 installations around the world.

NASHVILLE, TENN (NOV. 6) PR NEWSWIRE - Ford Motor Credit Company confirmed today that it will open a national headquarters for a new automotive finance company in Nashville by early 1991.

The new company, which will be a subsidiary of Ford Credit, will provide wholesale, retail, lease and other financing programs to non-Ford dealers and their retail customers. It will be operated separately from Ford Credit's North American financing unit, which will continue to give its full attention to serving the financing needs of Ford, Lincoln-Mercury, Ford Truck and Ford New Holland dealers and non-Ford dealers affiliated with them through ownership.

The company expects to have about 100 people in Nashville by the end of 1991, with employment expected to grow significantly in future years.

George Watts, former head of Ford Credit's Canadian Operations, will be president of the new company. A name for the company will be announced at a later date.

#90310p3834 11/06/1990 ~PR Newswire

DEARBORN, MICH (NOV. 6) PR NEWSWIRE - Ford Motor Credit Company has signed a definitive agreement to acquire the common stock, most of the field organization and certain dealer floorplan receivables of Marine Midland Automotive Financial Corporation (MMAFC).

Marine Midland Banks, Inc., the parent company of MMAFC, will retain the majority of MMAFC's current portfolio of automotive receivables and will continue to manage that portfolio from its Buffalo, N.Y.-based headquarters. Other terms of the agreement were not disclosed.

The acquisition will serve as the nucleus of a new non-Ford automotive financing business to be based in Nashville, Tenn., and will be completely separate from Ford Credit's traditional Ford-focused business. The new business will operate initially under the MMAFC name, but a new name will be announced shortly.

MMAFC has had private-label financing relationships with Mazda and Jaguar. Ford Credit and Mazda have reached an agreement that will enable the new venture to offer wholesale, retail, lease and other financial services to Mazda dealers and their customers on a private- label basis. The new venture will have similar arrangements with Jaguar. The company also will offer these services to other non-Ford dealers and their retail customers.

The new non-Ford financing business will operate separately from Ford Credit's North American Automotive Financing Operations, which will continue to give full attention to serving Ford, Lincoln-Mercury, Ford Truck, Ford New Holland and affiliated dealers. Under this arrangement, both entities will deliver maximum financing support to their dealer and retail customers.

Ford Credit and Marine Midland expect to complete the transaction by the end of December.

#90310p3836 11/06/1990 ~PR Newswire

DETROIT (NOV. 6) PR NEWSWIRE - While voters across the country recognize the first Tuesday in November as "Election Day," at Ford Division, it's being hailed as "Escort Success Day." Escort sales in October topped the 30,000-per-month mark -- a 25-percent improvement over the same period a year ago.

"This is a significant milestone and further proof of the continuing momentum building for this world-class product," said Thomas J. Wagner, Ford Motor Company (NYSE: F) vice president and Ford Division general manager. "If we wanted to view this milestone in political terms, we could say that October was a landslide month for the Escort."

The October increase is especially significant, Wagner pointed out, because overall sales in the subcompact segment were off 8 percent from 1989 levels.

When the Escort was originally introduced in the fall of 1980, it took 18 months to record sales of 30,000 units or more in a one-month period. A decade later, the redesigned Escort hit the same milestone in only six months. Escort sales in October totaled 30,842.

"For the past decade, Escort has been the world's best-selling car and we're delighted to see the enthusiasm continuing for this new product," Wagner said. "We see the all-new Escort as representative of a new era at Ford in terms of quality, manufacturing and design. This car represents an entirely new way of doing business."

A recent Ford survey of 1991 Escort buyers indicates that customer satisfaction levels for the new models are as high or higher than any other all-new car line introduced by Ford in the past 10 years, including the award-winning 1989 Thunderbird and 1986 Taurus.

The all-new 1991 Ford Escort, introduced to the public last April, is attracting upscale small-car buyers to Ford dealerships, buyers who may traditionally have been attracted to imported small cars.

"The buyer demographics tell us we are reaching exactly the market we're aiming for with this new product," Wagner said. "Our customers tell us they're especially pleased with the car's exterior styling, value, power and handling."

The new Escorts feature a fresh, contemporary design with a lower cowl and belt that provide more glass area and improved visibility compared with their predecessors. Other new features include flip-out quarter windows on two-door hatchback models; a remote-control outside mirror and an "A" pillar-mounted antenna.

RALEIGH, N.C. (NOV. 6) PR NEWSWIRE - Exide Electronics Group, Inc. (NASDAQ: XUPS), the world's largest dedicated manufacturer of uninterruptible power supply (UPS) systems, today announced record revenues for the fiscal year and fourth quarter ended September 30, 1990.

For fiscal year 1990, revenues were $172.4 million, up 13 percent from the $152.4 million in 1989. Net income for the year totaled $5.0 million, or $0.96 per share, a 9 percent decrease from $5.5 million, or $1.30 per share in 1989.

For the fourth quarter of 1990, revenues were $51.8 million, an increase of 11 percent from the $46.9 million for the same quarter of 1989, and a 19 percent increase over the third quarter ended July 1, 1990. Net income decreased 4 percent to $3.0 million from $3.1 million in the fourth quarter of 1989, and rose 190 percent from $1.0 million in the third quarter of 1990.

Earnings per share for the fourth quarter were $0.54, compared to $0.72, for the same period last year, and $0.19 in the third quarter of 1990. Weighted average shares outstanding in the quarter were 5,448,000 shares compared to 4,233,000 for the 1989 period and 5,472,000 for the third quarter of 1990. For the year, weighted average shares outstanding increased 25 percent to 5,209,000 up from 4,181,000 shares for fiscal 1989. The share increases for the year and the quarter reflect the completion of the Company's initial public offering of common stock in December 1989.

"Record revenues during the fourth quarter continue to reflect an increasing demand for our comprehensive family of UPS products," said James A. Risher, President and Chief Executive Officer of Exide Electronics Group, Inc. "We were especially gratified by the outstanding performance of our new office and departmental products, including the Powerware(R) Personal Series and the Powerware(R) Plus Series. Sales of these products are exceeding our expectations.

"Although our fourth quarter earnings were slightly below last year, we are pleased that we exceeded analyst expectations for the quarter and the year. In addition, if adjusted for the $2.0 million of non-operating legal and financing costs related to litigation incurred during the year, Exide Electronics would have generated a record earnings performance. Fundamentally we are pleased with the new products introduced during the year, the rapid growth in international markets, and the successful start-up of our new manufacturing facility; combined, these accomplishments made fiscal 1990 a very good year for Exide Electronics."

Exide Electronics designs, manufactures, markets and services a broad line of power performance and protection products, which protect computer and other

sensitive electronic systems against electrical power loss and distortions. The Company's products are used in diverse applications, including large computer facilities, mainframe and minicomputer systems, communications systems, medical applications and distributed computing environments.

DEARBORN, Mich. (NOV. 6) PR NEWSWIRE - George E. Watts Jr. has been named president of a new automotive financing company being formed by Ford Motor Company (NYSE: F) to serve non-Ford dealers and their customers.

The appointment was made simultaneously with the announcement that Ford Credit will acquire certain people and assets of Marine Midland Automotive Financial Corporation (MMAFC), the automotive financing operations of Marine Midland Banks, Inc. The new company will be based in Nashville, Tenn.

Watts, who has been head of Ford Motor Credit Company's Canadian Operations, joined Ford Credit in 1962 in the company's Birmingham, Ala., branch. From 1970 through 1976, he held managerial assignments in Ford Credit branches in Birmingham, Chattanooga, Louisville, Houston and Dallas. He later held area and regional management assignments in various markets throughout the United States before being named vice president-Canadian Operations in March 1988.

A Montgomery, Ala., native, Watts attended Auburn University where he studied business administration, and the University of Alabama Center in Montgomery where he studied economics and history.

ATLANTA (NOV. 6) PR NEWSWIRE - Effective immediately, Lufthansa German Airlines has introduced a Super Apex Winter Fare of $484 roundtrip on its new non-stop flights from Charlotte, N.C., to Frankfurt, Germany.

The fare represents a savings of $171 off the next lowest available ticket price. It is designed to encourage more people to fly on the new route during the winter season when traffic is traditionally slower.

"Our introductory fares were so popular this summer, we decided to create a winter version," said Hans Schreiber, Lufthansa sales manager for the Carolinas. "This special fare will enable more people to consider a trip to

Europe during the ski and holiday season."

Lufthansa's Charlotte to Frankfurt service, which began Aug. 1, offers non-stop flights on Wednesday, Friday and Sunday each week. The $484 Super Apex Fare is good for Wednesday departures, with a five-day minimum/21-day maximum stay. Weekend departures (Friday/Sunday) are available for $534 roundtrip.

Tickets must be purchased at least seven days in advance and no later than Dec. 7. They are valid for travel from Nov. 6 through Dec. 13 and from Dec. 25 through March 15, 1991.

Fares are subject to government approval. Some restrictions apply. Travelers should contact Lufthansa reservations at 800-645-3880 or their travel agent for details.

MANKATO, MINN. (NOV. 6) PR NEWSWIRE - Winland Electronics, Inc. reported a revision to its third quarter and nine-month results as earlier reported on Oct. 24, 1990. Sales for the three months ended Sept. 30, 1990, were $1,046,291 compared to $432,873 for the same period last year. For the nine months ended Sept. 30, 1990, sales were $2,665,481 compared to $2,086,373 during the comparable period in 1989.

As corrected, the company had a net loss of $16,449, or $(.008) per share for the three months ended Sept. 30, 1990, compared to a net loss of $212,804 or $(.18) per share last year. For the nine-month period ended Sept. 30, 1990, Winland incurred a net loss of $36,093, or $(.018) compared to a net loss of $208,886, or $(.17) per share last year.

Management stated that the revision of last month's third quarter and nine month operations report was necessary to correct an error in inventory.

Mankato, Minn.-based Winland Electronics, Inc. designs, manufactures and markets electronic and electro-mechanical products and assemblies and retail gift products. The company's common stock is traded over- the-counter in Minneapolis/St. Paul.

#90310p3851 11/06/1990 ~PR Newswire

WHITE PLAINS, N.Y. (NOV. 6) PR NEWSWIRE - IBM today announced the availability of FRx: The Financial Reporting Extender, a powerful software program that offers customers advanced financial reporting capabilities previously unavailable on personal computers.

FRx is the twentieth module in The Platinum Series, IBM's highly- regarded line of accounting and management information system (MIS) software. The program, which works in conjunction with Platinum General Ledger, is designed to simplify the creation of financial reports for organizations of all sizes and complexities.

"FRx offers features never before seen in a desktop accounting product," said Fernand Sarrat, vice president, IBM Desktop Software. "It reinforces The Platinum Series' position as a powerful accounting solution for local area networks."

Traditionally, financial reporting with computer software required a direct link with an organization's chart of accounts, the data that is at the heart of most accounting systems. To generate reports on a division or unit of an organization, users had to create chart-of- account codes -- character strings representing several structural layers of a company -- that were often so long that only mini- or mainframe-based systems could be used.

But financial reports generated with FRx do not require direct links to the chart of accounts. By eliminating the need for lengthy account codes when creating reports, accounting function previously available to customers only on larger systems is now available to customers using a personal computer or local area network (LAN).

Additional details of an organization can be accessed by customers with FRx's reporting tree, which is used by simply indicating the parent reporting unit of each subsidiary unit. To reflect changes in the reporting structure of a company, a user needs only to make the appropriate changes to the reporting tree. Such changes might take as little as a few minutes, compared with hundreds of personnel hours if a medium-sized business had to recode its chart of accounts.

With pull-down menus, extensive on-line help features and a spreadsheet-like user interface, FRx is easy to use. Users can generate row formats and reporting trees automatically, based upon existing charts of accounts previously created in Platinum General Ledger. FRx also includes features designed to make it easy for customers to create auditing reports.

#90310p3852 11/06/1990 ~PR Newswire

KANSAS CITY, MO (NOV. 6) PR NEWSWIRE - Kansas City Power & Light Co. (NYSE: KLT) today reported third quarter earnings per average common share of $1.64, compared with $1.49 for the like period a year ago, an increase of 10.1 percent. The increase in earnings reflects higher kilowatt-hour (kwh) sales attributable primarily to warmer weather late in the quarter.

Earnings per average common share for the 12 months ended Sept. 30, 1990, were $3.34 compared with $2.81 for the like period a year ago. The increase in 12 month earnings reflects the impact of warmer weather in the second and third quarters of 1990 and increases in load growth.

KCPL also announced that its board of directors declared a quarterly dividend of 67 cents per share on its common stock, payable Dec. 20, 1990, to stockholders of record on Nov. 29, 1990. That action continues KCPL's indicated annual level of dividends at $2.68 per share. In addition, the board of directors declared regular dividends on the preferred stock, payable March 1, 1991, to shareholders of record on Feb. 7, 1991.

KCPL reported that third quarter operating revenues increased 7.5 percent to $237.5 million from $220.9 million in the prior year. For the 12 months ended Sept. 30, 1990, revenues increased 5.7 percent to $761.5 million from $720.5 million for the like period a year ago.

Kilowatt-hour sales increased 9.2 percent in the third quarter due primarily to warmer weather. Kwh sales increased 5.9 percent for the 12 month period, reflecting increased usage due to warmer weather in both the second and third quarters of 1990 and increases in load growth.

Third quarter 1990 net income increased to $52.4 million from $47.7 million a year ago. For the 12 months ended Sept. 30, 1990, net income increased 17.6 percent to $109.8 million compared with $93.4 million in the prior period.

Kansas City Power & Light provides electric service to about 410,000 customers in a 4,700 square-mile area in eastern Kansas and western Missouri, including metropolitan Kansas City.

SANTA MONICA, CALIF. (NOV. 6) PR NEWSWIRE - James A. McIntyre, chairman and chief executive officer, announced that Fremont General Corp.'s earnings for the first nine months of 1990 were $20,335,000 or $2.47/share, sharply higher that the $8,060,000 or $.99/share reported for the same prior year period. Further, total revenues for the respective periods were $462,408,000 vs.

$339,390,000, up approximately $123 million.

Net income for the third quarter ended Sept. 30, 1990, was $6,664,000 or $.81/share compared to $8,890,000 or $1.09/share for the same period in 1989. McIntyre stated that, "1989 third quarter income benefitted from a $1.4 million gain from the sale of securities." The corporation's 1990 third quarter revenue was $152,897,000 vs. $127,996,000 for the comparable prior period, up approximately $25,000,000.

In closing, McIntyre stated, "The company has achieved consistent profitable earnings for the first three quarters of 1990. We are pleased with this performance and continue to be committed to maximizing shareholder value."

MADISON HEIGHTS, MICH. (NOV. 6) PR NEWSWIRE - Code-Alarm, Inc. (NASDAQ: CODL) leading manufacturer of auto alarm and home security systems, announced today sales and earnings for the third quarter ended Sept. 30, 1990. Net income fell from $615,000 to $193,000, while net sales rose to $11.97 million from $9.93 million comparing the third quarters of 1990 and 1989.

Code-Alarm President and CEO Rand Mueller said, "Our TESSCO Group in Georgetown, Texas, experienced a rather abrupt slowdown in electronic manufacturing and defense work, resulting in a pre-tax loss of $314,000 for the quarter."

However, as compared to the same period of 1989, Code-Alarm's basic auto and home security businesses continued to grow during the quarter. Including the recent Anes acquisition, security sales rose 42 percent to $9.5 million while private-label sales to the Big Three were up a more modest 11 percent despite relatively weak new car sales.

CODE-ALARM, INC.

Comparative Statement of Earnings

	Third Quarter		Nine Months	
	1990	1989	1990	1989
Consolidated net sales	$11,969,000	$9,929,000	$33,747,000	$23,945,000
Net income (after tax)	193,000	615,000	1,416,000	1,417,000
Net income per share	$.07	$.30	$.55	$.68

PORTLAND, Ore. (NOV. 6) PR NEWSWIRE - Oregon Steel Mills Inc. (NYSE: OS) announced today that Napa Pipe Corp., its wholly owned subsidiary, received the go ahead to start pipe production on the previously announced orders for the Kern River and Mojave pipeline projects.

The Kern River Pipeline Project order is for 251,000 tons of 36-inch gas transmission line pipe from Kern River Gas Transmission Co. Kern River is a joint venture of The Williams Cos. Inc. and Tenneco Inc. The pipe will be used for the pipeline segment from the origination point in southwest Wyoming to a point near Barstow, Calif. The initial pipe deliveries are expected to begin immediately.

The Mojave Pipeline Project order is for 38,000 tons of 30-inch gas transmission line pipe from Mojave Pipeline Operating Co. Mojave is a joint venture of Enron Corp. and El Paso Natural Gas Co. Shipment of product to the pipeline site in Southern California will begin in the first quarter of 1991.

Oregon Steel is a producer of steel plate and large-diameter steel pipe with facilities in Portland, Ore., and Fontana and Napa, Calif.

WARREN, NJ (NOV. 6) PR NEWSWIRE - As part of a continuing series of loss prevention guides, Chubb Group of Insurance Companies is now making available a new loss prevention booklet titled "Managing Terrorism Risks."

Written by Mike Ackerman, managing director of The Ackerman Group, Inc., an independent international security consulting firm, the booklet details strategies for dealing with terrorism threats and prudently responding to travel and political risks.

"In today's global marketplace, protecting employees and corporate assets is the responsibility of operating managers throughout any corporation," said Ralph E. Jones III, national manager of Chubb's executive protection department. "Well-managed corporations should take reasonable steps to protect their employees and their investments from extortion and other acts of terrorism."

Sections of the booklet detail the steps individuals and corporate crisis management teams can take to minimize the threat of terrorism, such as guidelines on safe air travel, including making travel plans, packing, and

what to do if hijacked; the personal risks involved in travel to hostile or unstable countries; what to do if abducted; and managing a kidnapping, personal injury extortion or product-contamination extortion.

"Terrorism and political instability will remain facts of life for companies operating abroad," said Ackerman. "Corporations will have to respond by carefully analyzing risks, developing programs to protect personnel and planning for emergencies such as kidnappings."

For a free copy of "Managing Terrorism Risks," contact the local Chubb agent or broker, the local Chubb office, or write to Dave Richards, Executive Protection Department, Chubb Group of Insurance Companies, 15 Mountain View Road, Warren, N.J., 07059.

The Ackerman Group is one of the world's premier consulting organizations in the field of corporate-related terrorism. It provides risk forecasting, security training, security design and investigative services to about 75 of America's top 100 multinational companies, as well as to companies in Europe and Japan.

Member companies of Chubb Group of Insurance Companies, a leading provider of kidnap/ransom and extortion insurance, provide commercial and personal insurance through independent agents and brokers in over 100 countries.

Chubb Group member companies are managed by Chubb & Son Inc., a wholly owned subsidiary of The Chubb Corporation (NYSE: CB) which is ranked by Fortune as the 42nd largest diversified financial organization in the United States.

#90310p3860 11/06/1990 ~PR Newswire

MT. PROSPECT, ILL (NOV. 6) PR NEWSWIRE - Zenith Data Systems (ZDS), a Groupe Bull company, today introduced three new personal computers (PCs) and lowered the suggested retail prices of its SupersPort 286e and SupersPort SX laptop PCs by $300 and $500, respectively. ZDS' three new products, which will be demonstrated at COMDEX next week, are the SlimsPort 286 laptop PC, the Z-486/25E personal workstation and the Z-386 SX/20 desktop PC.

As ZDS' smallest 80286-based laptop PC ever, the SlimsPort 286 narrows the gap between full-featured portable computers and notebook systems.

By incorporating smaller and more power-efficient components, such as the hard-disk and video elements, the SlimsPort 286 weighs about nine pounds, which is more than six pounds -- or 40 percent -- lighter than ZDS' popular 286-based SupersPort laptop PC.

The SlimsPort 286 Model 20, which measures 2.58 inches high by 12.4 inches deep by 11 inches wide, has a suggested retail price of $3,699 and is now shipping throughout ZDS' worldwide channels.

The Z-486/25E, which is based on Intel's 25-MHz i486 processor and features an Extended Industry Standard Architecture bus, brings workstation-level performance into a small desktop system.

ZDS includes a Microsoft Mouse and pre-installs Microsoft Windows 3.0, Asymetrix ToolBook 1.0 and MS-DOS 4.01 on the hard disk drive of the Z-486/25E.

For general-purpose business computing, the company also introduced a new 20-MHz 386SX-based desktop PC, the Z-386 SX/20.

ZDS reduced the prices of its full-featured 80C286-based SupersPort 286e portable PCs with VGA video. The Model 20 with a 20MB hard drive is now $3,399, down from $3,699.

Reader inquiries, 800-553-0331. Trademarks: -- i486 is a trademark of Intel Corp. -- Microsoft Windows 3.0, MS-DOS and Microsoft Mouse are trademarks of Microsoft Corp. -- Asymetrix ToolBook is a trademark of Asymetrix Corp.

ST. LOUIS (NOV. 6) PR NEWSWIRE - The May Department Stores Company (NYSE: MA) today announced that on Nov. 3, 1990, it distributed to May shareowners of record on Oct. 15, 1990, 16,046,900 shares of common stock of Venture Stores, Inc. This distribution completed May's previously announced disposition of

Venture, May's wholly-owned discount retail subsidiary.

For those May shareowners who were entitled to fractional shares of Venture common stock, Boatmen's Trust Company, the distribution agent for the spin-off distributed cash with respect to fractional shares on the basis of $6.6993 per share (the net price after selling commissions at which the distribution agent sold the aggregate Venture common stock fractional shares on behalf of all May shareowners entitled to fractional shares).

May has received tax opinions of counsel and of its independent public accountants that May shareowners will not recognize gain or loss by reason of the spin-off (except for cash received for fractional shares, if any). May has also been advised that the aggregate basis of the May common stock and of the Venture common stock (including fractional share interests, if any) received by a May shareowner upon the spin-off will be the same as the May shareowner's aggregate basis in May common stock before the spin-off and will be allocated in proportion to the fair market value of each. For purposes of this allocation, and based on the averages of the high and low prices, on Friday, Nov. 2, 1990, and on Monday, Nov. 5, 1990, of May common stock and of Venture common stock, the May common stock constitutes 97.64 percent of the aggregate basis and the Venture common stock constitutes 2.36 percent of the aggregate basis.

KANSAS CITY, MO (NOV. 6) PR NEWSWIRE - Kansas City Power & Light Company (NYSE: KLT) today reaffirmed its commitment to its all cash, fully financed tender offer for all outstanding common and preferred shares of Kansas Gas and Electric Company (NYSE: KGE).

Drue Jennings, president and chief executive officer of Kansas City Power & Light, said, "Our offer remains open and frankly we see no urgency to change our position right now. First, we have unanswered questions from Kansas Gas and Electric. Second, nothing is known about the facts underpinning The Kansas Power and Light Company's offer."

Jennings continued, "We remain firm in the commitments we have made to Kansas Gas and Electric's shareholders, customers, employees and communities. Our applications with the Kansas Corporation Commission, the Missouri Public Service Commission and the Federal Energy Regulatory Commission continue to progress in a timely fashion and we will continue to take all steps necessary to receive final approval for a merger with Kansas Gas and Electric. We await The Kansas Power and Light Company's filings with these same regulatory and governmental commissions."

On July 23, 1990, Kansas City Power & Light commenced an all cash, fully financed tender offer for all outstanding common and preferred shares of Kansas Gas and Electric.

The offer price of $27 per share for the common stock, approximately $857 million in the aggregate, represents a 37 percent premium over the market price of Kansas Gas and Electric common stock on July 20, 1990, the last trading day prior to the commencement of Kansas City Power & Light's offer. The tender offer is scheduled to expire on Nov. 30, 1990 at 7 p.m., New York City Time, unless the offer is further extended.

PARSIPPANY, NJ (NOV. 6) PR NEWSWIRE - General Public Utilities Corp. (NYSE: GPU) today announced that the presiding administrative law hudge has accepted a stipulation between GPU's New Jersey subsidiary, Jersey Central Power & Light Co. (JCP&L); the staff of the Board of Public Utilities of the state of New Jersey; and the New Jersey Public Advocate's Division of Rate Counsel settling JCP&L's base rate increase application pending before the BPU.

The settlement has been forwarded to the BPU for its approval. The stipulation provides for an increase in base rates of about $95.5 million annually or an

overall increase in revenues of approximately 6.1 percent.

Upon approval, JCP&L also would begin collecting approximately $22 million of additional revenues which were approved by the BPU during the company's last energy adjustment clause proceeding, the recovery of which was deferred until the completion of this case. The additional revenues are to provide for the capacity costs associated with non- utility generation under contract with the company.

The stipulation also provides for funding decommissioning of the company's nuclear generating stations predicated upon both the Nuclear Regulatory Commission guidelines for the decommissioning of nuclear power plants and the cost of removing non-radiological materials from the sites. In addition, JCP&L would contribute $30 million to a decommissioning trust. Half of this amount would not be reflected in customer charges.

GREENSBORO, NC (NOV. 6) PR NEWSWIRE - Oakwood Homes Corporation (NYSE: OH) today reported sales, total revenues and earnings for the fourth quarter of fiscal 1990 and for the year ended Sept. 30, 1990.

Sales for the fourth quarter were a record $32,043,000, compared with $23,078,000, for the same quarter of last year, an increase of 39 percent. Total revenues for the fourth quarter were a record $40,552,000, compared with $31,457,000, for the same quarter of last year, an increase of 29 percent. Net income for the quarter was $1,879,000, compared with last year's $1,319,000, an increase of 42 percent. Net earnings per share were 36 cents on a primary basis and 33 cents on a fully diluted basis, compared with last year's 25 cents on both a primary and fully diluted basis. Last year's fourth quarter included a gain, net of taxes, of approximately $1,100,000, or 21 cents per share, related to the sale of one of the company's manufactured housing communities.

Fiscal year sales were a record $106,955,000, compared with $76,532,000, for

the comparable period last year, an increase of 40 percent. Fiscal year total revenues were a record $137,194,000, compared with $106,355,000, for the comparable period last year, an increase of 29 percent. Net income for fiscal 1990 was $5,485,000, compared with $2,836,000, for the same period last year, an increase of 93 percent. Net earnings per share were $1.05 on a primary basis and $1.03 on a fully diluted basis, compared with 54 cents per share on both a primary and fully diluted basis for the comparable period last year.

Nicholas J. St. George, Oakwood's president and chief executive officer, said: "We are extremely pleased with these record results -- they clearly demonstrate a continuation of our recovery trend."

Oakwood Homes Corporation and its subsidiaries are engaged primarily in the production and sale of manufactured housing in North and South Carolina, Virginia, West Virginia, Tennessee, Georgia, Delaware, Kentucky and Ohio.

CHARLOTTE, NC (NOV. 6) PR NEWSWIRE - NCNB's Trust Group investment performance continues to rank high among money managers nationally, with one fund ranking in the top 2 percent of equity money managers for five years ending Sept. 30.

NCNB's Consolidated Equity Fund achieved that ranking in numbers recently released by CDA Investment Technologies, Inc., an independent investment performance measurement service based in Rockville, Md.

This $231 million fund outperformed the Standard & Poor's Composite Index by 570 basis points during the last year, through both up and down markets. The most recent year ranking is consistent with the outstanding long-term record.

"The fund portfolio focuses on large capitalization issues which possess strong quantitative and qualitative characteristics," said Ed Riley, director of Equity Investments for NCNB. "The intent is to own 'in favor' issues which have superior growth characteristics when compared to other stocks with similar risk profiles," Riley added.

Also showing superior performance was NCNB's Employee Benefit Mortgage-Backed Securities Fund. The $134 million fund has ranked number one in the CDA universe for the last one-, two- and three- year periods.

CDA ranks funds managed by more than 1,500 banks, insurance companies, investment advisers and mutual funds across the United States.

NCNB Trust oversees $68 billion in client assets. Its clients include individual trust accounts, corporate retirement plans, foundations, endowments and public entities.

NCNB Corporation (NYSE: NCB) is a $69 billion bank holding company with full-service banks in 7 states.

BINGHAMTON, NY (NOV. 6) PR NEWSWIRE - The Connecticut Resource Recovery Authority (CRRA) announced that Resource Recycling Technologies, Inc. (AMEX: RRT) of Binghamton, N.Y., through its subsidiary, RRT Empire Returns Corp., was selected as the preferred vendor to design, install and operate a material recycling facility for Hartford, Conn. and surrounding communities. The board of directors of the CRRA has authorized its staff to finalize a contract with RRT Empire.

The proposed $2.1 million modification and equipping of an existing CRRA building will allow the processing for resale of up to 200 tons of commingled bottles, cans and plastics per day. The facility will be located in Hartford and is currently scheduled to begin operations in the fourth quarter of 1991.

RRT is a leading integrated recycling company. It currently operates five material recycling facilities (MRFs), two plastics facilities and is constructing two additional MRFs.

CONTACT: Brian Feeley of Resource Recycling Technologies, Inc., (607) 729-9331.

TULSA, OKLA. (NOV. 6) PR NEWSWIRE - Kern River Gas Transmission Company has received key regulatory approval of its contracts with natural gas shippers, who have made final commitments to ship sufficient volumes to underwrite construction of the Wyoming-to-California pipeline system.

As a result, Kern River has directed steel mills to begin making plate and rolling pipe under previously negotiated contracts. On-site deliveries will begin in December to coincide with the start of construction.

"These are truly significant developments, not only for Kern River, but for our Rocky Mountain and Canadian suppliers and the California marketplace," Vernon T. Jones, president of The Williams Companies, Inc. (NYSE: WMB), and Robert C. Thomas, chairman and chief executive officer of Tenneco Gas, said in a joint statement. The project is a joint venture of Williams and Tenneco Inc. (NYSE: TGT).

Last week, the Federal Energy Regulatory Commission approved Kern River's contracts with shippers. Kern River announced today final re-confirmation of shipper volumes in excess of the 500 million cubic feet per day (MMcfd) necessary to underwrite the project.

Contractual commitments with shippers on the remaining firm volumes of the 700 MMcfd initial capacity of the system are expected to be completed shortly.

Bids for construction have been received and support the project's economics. Construction contracts for the initial two spreads, one in southern Utah and the other in Nevada, will be let later this month.

Construction of the northern half of the system will be in the summer and fall of next year. Gas is expected to flow on Jan. 1, 1992.

Williams is a Tulsa-based corporation that operates a nationwide digital telecommunications network and more than 25,000 miles of pipelines, which transport natural gas and petroleum products.

Tenneco is a Houston-based, diversified company with major business interests in natural gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals and minerals.

WASHINGTON (NOV. 6) PR NEWSWIRE - The Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) issued the following debenture pricing:

DEBENTURE PRICING

Date of Offering:	Nov. 7, 1990	
Price:	99.875 pct.	98.8281 pct.
Issue Date:	Nov. 13, 1990	
Term:	5 years	30 years
Callable on or after:	11/10/93	11/10/95
Interest Rate:	8.40 pct.	9.50 pct.
Yield:	8.431 pct.	9.62 pct.
Amount (millions):	$400	$450
Maturity Date:	11/10/95	11/10/20
Date of First Interest Payment (then semi-annually):	5/10/91	5/10/91

The debentures of Nov. 10, 1995, and the debentures of Nov. 10, 2020, are redeemable on or after Nov. 10, 1993, and Nov. 10, 1995, respectively, in whole or in part at the option of the corporation at any time (and from time

to time).

The redemption price of the debentures of Nov. 10, 1995, will be 100 percent of the principal amount redeemed plus accrued interest thereon to the date of redemption. The redemption price of the debentures of Nov. 10, 2020, initially will be 106.662 percent of the principal amount redeemed plus accrued interest on the principal amount redeemed.

The redemption price of the debentures of Nov. 10, 2020, will decrease annually on each Nov. 10, commencing Nov. 10, 1996, through Nov. 10, 2015, as will be set forth in the Supplement to the Guide to Debt Securities information statement relating to those debentures.

The amount payable for any redemptions on or after Nov. 10, 2015, and at maturity will be equal to 100 percent of the then outstanding principal balance, plus accrued interest.

The net proceeds of this offering will be used to redeem in part the $300,000,000 of Series SM-1990-A 10.90 percent debentures and the $1,000,000,000 of Series SM-1990-L 7.00 percent debentures that mature Nov. 12 1990.

Debentures will be issued in book-entry form only. The minimum purchase is $10,000 and multiples of $5,000 thereafter. The offering is being made through Fannie Mae's Senior Vice President - Finance and Treasurer, Gary L. Perlin, and Vice President and Assistant Treasurer, Linda K. Knight, 3900 Wisconsin Avenue, N.W., Washington, D.C. 20016, assisted by a nationwide selling group of recognized securities dealers.

MADRID, (NOV. 6) PR NEWSWIRE - ENDESA (NYSE: ELE) announced today that it has entered into an agreement, together with other major European utilities, to incorporate a new company which will be responsible for electric generation and transmission in the former East German territory. West German utilities will control 85 percent of the company's capital, while ENDESA will have an equity interest of between 3.5 percent and 4 percent, being the second largest non-German shareholder after ELECTRICITE DE FRANCE. Other European participants will be TRACTEBEL and SPE, of Belgium, and L'OUEST SUISSE, of Switzerland.

ENDESA's share in the new company's initial investment, pending final evaluation, is estimated at less than 1 percent of ENDESA's net utility plant, with a similar amount of additional investment to be made in 1991 and 1992.

ENDESA chairman, Feliciano Fuster, has stated that the three objectives of the new company will be: the creation of an institutional framework for the operation of existing non-nuclear generation and transmission facilities, the refurbishing of existing installed capacity and transmission equipment, and the construction of non-nuclear generating plants and transmission lines.

NORWALK, CONN. (NOV. 6) PR NEWSWIRE - Trans-Lux Corporation (AMEX: TLX) today reported earnings of $.03 per share for the third quarter and $.08 for the nine months ended Sept. 30, 1990 as compared to $.06 and $.22 respectively for the prior year.

Gross revenues for the third quarter of 1990 were $5.1 million and for the nine months $14.9 million vs. $6.0 million and $15.6 million respectively for the 1989 periods.

Commenting on the results, Richard Brandt, chairman of the board, said: "The third quarter showed relatively flat results compared to the first two quarters of 1990. We currently face an unfavorable economic environment, which has particularly impacted our largest market for LED information displays, the securities and banking industries. By means of tightened expense controls and movement into new markets, we have been able to manage the downside. The entertainment division continues to run slightly ahead of last year and our financial position remains strong."

Trans-Lux Corporation has two operating divisions, the communications division designs, leases, sells and services large-scale LED information displays, credit terminals, facsimile equipment and teleprinters. The entertainment division operates a chain of theaters in the southwest and other theatrical properties.

ELMIRA, NY (NOV. 6) PR NEWSWIRE - Artistic Greetings Incorporated (NASDAQ: ARTG) today announced its board of directors authorized the repurchase of up to 200,000 common shares, or approximately five (5) percent of the shares outstanding.

The company also said it expects to report record sales for the current quarter ending Dec. 31, 1990.

The company reported sales in the fourth quarter last year of $7,588,000. The company said the current quarter sales could exceed $12,500,000 based on its current incoming order trend.

Stuart Komer, president and chairman, said the share buyback follows the recently completed buyback of 275,000 shares initiated in 1987. Purchases will be made from time to time in the open market or through private transactions, Komer stated.

Artistic currently has approximately 3,700,000 shares outstanding, which include 1,500,000 owned by greeting card giant, American Greetings (NASDAQ: AGREA) of Cleveland.

#90310p3905 11/06/1990 ~PR Newswire

WASHINGTON (NOV. 6) PR NEWSWIRE - Flight attendants employed by WestAir (United Express), represented by the Association of Flight Attendants (AFA), today ratified a first-time contract with the company by confidential mail ballot. The contract was ratified by 93 percent of those voting.

On average, flight attendant pay rates will increase 29.9 percent on Dec. 1, 1990, and will rise another 3 percent in June 1992. Over the life of the three year agreement, flight attendants will receive wage and longevity increases in excess of 64 percent in all brackets. The magnitude of the increases reflect the fact that WestAir flight attendants' wages, which had not been adjusted since 1987, have been among the lowest in the regional airline industry for several years, according to AFA. The pay scale was lengthened from two to seven years. Other pay provisions include: trip guarantee (pay protection for trip cancellation), minimum daily guarantee for

reserve flight attendants, 100 percent deadhead pay, premium pay if drafted to fly on a day off and per diem for each trip hour.

Other significant improvements were made in sick leave provisions, maternity leave and scheduling protections. The contract also includes seniority protection, a furlough procedure with recall rights and a voluntary furlough provision in the event of a reduction of workforce.

Scope and successorship language and merger protection were negotiated by AFA. AFA was also successful in obtaining agency shop and dues check off provisions.

Negotiations between the WestAir flight attendants and management began on Jan. 9, 1989. The agreement was reached on Sept. 28 after almost 21 months of negotiations. The flight attendants voted to be represented by AFA in May 1988.

WestAir employs 200 flight attendants and has its headquarters in Fresno, Calif., with additional flight attendant bases located in Los Angeles, San Francisco and Sacramento, Calif., and at Washington-Dulles (currently operated as Atlantic Coast Airlines). The contract will cover an additional 14 flight attendants from NPA, Inc. when the merger of that operation with WestAir is completed. Atlantic Coast and NPA, also United Express carriers, are both subsidiaries of WestAir Holding, Inc. (AMEX: WAH).

"The WestAir flight attendants are long overdue for the pay improvements and work rules contained in this contract," said Susan Bianchi-Sand, AFA national president. "They can be proud that their wages, which were once among the lowest in the regional airline industry, are now among the highest."

The Association of Flight Attendants, AFL-CIO, represents 30,000 flight attendants on 18 airlines and is the largest flight attendant union in the world.

DONALDSONVILLE, La. (NOV. 6) PR NEWSWIRE - Melamine Chemicals, Inc., (NASDAQ: MTWO), today announced the declaration of a quarterly dividend and the adoption of a share purchase rights plan.

James W. Crook, chairman, stated that the board of directors declared a quarterly dividend of 6 cents per common share payable on Nov. 30, 1990 to record holders as of Nov. 19, 1990.

The board of directors also adopted a share purchase rights plan pursuant to which it declared a dividend distribution of one preferred share purchase right on each outstanding share of Melamine Chemicals common stock.

Crook stated: "The rights plan, which is similar to plans adopted by hundreds of other companies, is designed to discourage any abusive tactics to gain control of Melamine Chemicals, Inc. without paying all stockholders a control premium and to assure that all of Melamine Chemicals' stockholders receive fair and equal treatment in the event of a takeover bid."

The rights will be exercisable if a person or group acquires 10 percent or more of Melamine Chemicals' common stock or announces a tender offer the consummation of which would result in ownership by such a person or group of 10 percent or more of the common stock. The terms of the rights plan provide that the current holdings of the company's major stockholders, Ashland Chemical, Inc. (a wholly owned subsidiary of Ashland Oil, Inc.) and First Mississippi Corporation, each of which owns approximately 23 percent of Melamine's common stock, will not trigger the provisions of the plan.

If the rights are triggered, each right will entitle its holder (other that such person or members of such group) to purchase, at the right's then-current exercise price, a number of Melamine Chemicals' common shares having a market value of twice such price.

Melamine Chemicals, Inc. is engaged in the production and marketing of melamine, a specialty chemical having numerous industrial and commercial applications. The company is actively engaged in the development of new melamine process and applications technology. The company is one of only two producers of melamine in North America and one of the five largest producers worldwide.

NILES, OHIO (NOV. 6) PR NEWSWIRE - RMI Titanium Co. (NYSE: RTI) announced today that it has decided to delay the construction of its previously announced titanium tetrachloride ("TiCl4") facility in Ashtabula, Ohio.

Instead, RMI is in the process of negotiating a multi-year TiCl4 supply arrangement with its current supplier.

The board of directors has authorized this action in recognition of current uncertain economic conditions in titanium and sponge markets as well as to ensure that RMI will be able to fund the development costs of projected new businesses. RMI intends to intensify its efforts to develop new products

directed at nonaerospace titanium markets.

RMI, headquartered in Niles, Ohio, is a leading manufacturer of titanium sponge, mill products and powder. The company's products are used principally in military and commercial aircraft and engines, chemical processing equipment mesh for bridge and deck repair, pulp and paper production facilities and medical implants.

RMI became a public corporation on April 20, 1990, with common stock trading on the New York Stock Exchange under the symbol "RTI." There are 14,981,400 shares of common stock outstanding.

MILWAUKEE (NOV. 6) PR NEWSWIRE - Harley-Davidson, Inc. (NYSE: HDI) announced today that its board of directors has authorized the repurchase of up to one million shares, or approximately 5.6 percent, of Harley-Davidson, Inc. outstanding common stock. The repurchases are authorized to be made from time to time depending on market conditions.

Richard F. Teerlink, president and chief executive officer of Harley Davidson, Inc., stated that the company's board believes the current price of Harley-Davidson stock does not reflect the true value of the company.

Teerlink also announced that Harley-Davidson has continued its program of repurchasing its 7-1/4 percent convertible debentures. Through the end of October the company had repurchased $18.4 million of its 7-1/4 percent notes and will continue this program as market conditions permit, he said.

Harley-Davidson, Inc., the only American motorcycle manufacturer, produces heavyweight motorcycles and a complete line of motorcycle parts and accessories. Its Holiday Rambler subsidiary is a leading manufacturer of premium recreational vehicles, specialized commercial vehicles and a diverse range of related products. Harley-Davidson, Inc. is also a manufacturing contractor for a variety of industries, including the U.S. Department of Defense.

PARSIPPANY, NJ (NOV. 6) PR NEWSWIRE - Standley H. Hoch, chairman, president and chief executive officer of General Public Utilities Corp. (NYSE: GPU), announced today that Susan S. Schepman has been named vice president of communications for the corporation.

Schepman will join GPU on Dec. 1, 1990, and will formally assume her duties on Jan. 1, 1991. She is currently senior vice president at Fleishman-Hillard Inc. a St. Louis-based public relations firm. Schepman will replace William L. Gifford, who retires on Dec. 31, 1990, after ten years of service.

"Susan not only has a broad range of experience in the communications field, but she has also become familiar with GPU during the past 18 months while serving as a consultant through her position at Fleishman-Hillard," Hoch said. "She will be a strong addition to our corporate staff."

Schepman has more than 16 years of experience in the financial communications and corporate public relations fields, working with clients in the electrical utility industry as well as with several Fortune 100 companies. Prior to joining Fleishman-Hillard in 1984, Schepman was vice president of communications for two leading Missouri financial institutions.

GPU, headquartered in Parsippany, provides approximately 39 billion kilowatt-hours of electricity for approximately 1.9 million customers through three operating companies - Jersey Central Power & Light Co., Metropolitan Edison Co. and Pennsylvania Electric Co. It serves approximately half the land area of Pennsylvania and New Jersey.

#90310p3927 11/06/1990 ~PR Newswire

CINCINNATI (NOV. 6) PR NEWSWIRE - Cincinnati Milacron Inc. (NYSE: CMZ) today, after declaring its regular quarterly dividend of 18 cents per share on common stock, reported third quarter 1990 sales of $234 million, up from sales of $228 million in the third quarter of 1989. Third quarter earnings from continuing operations were $2.1 million, or 8 cents per share, down from $4.2 million, or 17 cents per share last year. Net earnings in the quarter were $1.6 million, or 6 cents per share, compared to $2.5 million, or 10 cents per share, in the year-ago quarter. Net earnings in both quarters included losses from discontinued operations.

New Orders; Backlog
New orders of $248 million were at good levels, off only slightly from $252 million in the third quarter of 1989 and up sharply over $164 million in the second quarter of the current year. With orders exceeding shipments, the backlog rose to $330 million, up from $315 million at the end of the previous quarter.

New business for aerospace equipment was very strong and included significant orders from the Boeing Company and General Electric Company.

"New orders would be even stronger if it weren't for the soft U.S. economy and concern over the crisis in the Middle East," said Daniel J. Meyer, president and chief executive officer.

"These same factors also held back earnings," Meyer said. "In particular, softness in the market for injection molding machines sharply curtailed profits in this business, and low levels of demand and delays in certain shipments led to losses in our factories for coordinate measuring equipment and precision grinding machines."

Discontinued Businesses
As previously announced, Milacron has signed a letter of intent to sell its industrial robot business to ABB Robotics Inc. This divestiture is part of Milacron's overall strategy to concentrate on areas of long-term growth within its core businesses. The transaction should be completed in the near future and is not expected to have a material effect on the company's earnings.

Milacron also announced its intention to phase out machine tool manufacturing operations in its plant in Vlaardingen, Holland. This facility will continue to produce metalworking fluids for the European market. The action is contingent on obtaining the consents required under Dutch law. Provision for this action was made in a prior year; however, an additional charge may be necessary, depending on the outcome of future events. The sales and earnings of the machine tool operations in the Vlaardingen plant have not had a significant effect on the company's consolidated financial results in recent years.

MILWAUKEE (NOV. 6) PR NEWSWIRE - A. O. Smith (AMEX: SMC) President and Chief Executive Officer Robert J. O'Toole announced today that Bill W. Wilcock, chairman of the corporation's Automotive Products Company since 1987, has decided to relinquish his duties with the company to pursue other interests.

O'Toole, in commenting on Wilcock's leaving, credited him with contributing to significant change and innovation in the Automotive Company's management and organizational processes in the rapidly changing environment of the late '80s. He acknowledged Wilcock's contributions to the Automotive Products Company in implementing strategic planning at all levels of the organization, promoting employee development programs, stressing process improvement in the area of technology, quality and administration, and laying the groundwork for greater business unit focus on customer service and responsiveness.

O'Toole also announced that he will assume the leadership of the Automotive Products Company while continuing to serve as the Milwaukee-based corporation's president and CEO. He said that under a restructured organization, there will be greater integration of certain staff functions of the Automotive Products Company and the corporation's headquarters.

A. O. Smith, with its subsidiaries and affiliates, is a diversified manufacturer headquartered in Milwaukee. Its product lines include auto and truck structural components, fractional horsepower and hermetic electric motors, residential and commercial water heating systems, fiberglass reinforced piping systems, inorganic protective industrial coatings, agricultural feed storage systems, agricultural financing, industrial/municipal water and bulk storage systems.

NEW YORK (NOV. 6) PR NEWSWIRE - Responding to inquiries from stockholders of National Intergroup, Inc. (NYSE: NII), the Centaur Partners Group announced today that the recent filing of a shelf registration statement covering Centaur shares held in margin accounts was merely to enable Centaur to sell an unlimited number of registered shares at a future date if and when it may determine to do so. However, Centaur stated that it has no present intention of selling any of its NII shares. In fact, Centaur stated that it recently has been an active buyer of NII stock - as indicated by its Oct. 17 13D filing in which Centaur disclosed an increase in its NII holdings by 1 percent to more than 17.5 percent of the outstanding shares.

DETROIT (NOV. 6) PR NEWSWIRE - Richard E. Lowrie Jr. has been promoted to chairman and chief executive officer, and Stephen D. Marr has been promoted to president and chief operating officer at John V. Carr & Son, Inc. Marr will replace Richard A. Hazel who announced he will retire as president Dec. 31, 1990.

Carr, a subsidiary of Manufacturers National Bank of Detroit, is a Detroit-based customs broker and freight forwarding firm with 41 offices in 15 states and Canada.

Lowrie, a 21-year veteran of Carr and a licensed U.S. customs broker, most recently was an executive vice president at Carr. He is past president and director of Northern Border Brokers Association, director of the National Customs Brokers & Forwarders Association, and a member of the Windsor Transportation Club, Detroit Transportation Club, Canadian Pulp and Paper Association, Propane Gas Association of Canada, and Detroit Athletic Club.

Marr joined Carr in 1970 and was an executive vice president prior to his promotion to president. He is a licensed U.S. customs broker and he holds a bachelor of arts degree from Northwood Institute. Marr is a member of the Economic Club of Detroit.

PONTIAC, MICH. (NOV. 6) PR NEWSWIRE - Perry Drug Stores, Inc. (NYSE: PDS) today announced several major developments, including aggressive cost-cutting measures, to position the company for future earnings growth. The actions include:

-- A major administrative cost reduction and operational restructuring program which will result in fiscal 1991 savings of approximately $5 million, and will reduce administrative staff by 10 percent.

-- The sale of the Health Care Division's unprofitable wholesale medical and surgical supply business which had annual revenues of about $7 million.

-- Election of, after careful study, a change in its method of accounting for store inventories from the retail method to a specific item cost method which more accurately reflects inventory value by eliminating the averaging and estimation inherent in the retail method.

The new inventory accounting method, while not mandatory, will help Perry in the long term, by more accurately determining margins on sales. As a result of the accounting change, Perry will record a one-time non- operating charge for the fiscal year ended Oct. 31.

The company also announced that sales for the fourth quarter ended Oct. 31 were negatively impacted by the deterioration of the economy and uncertainty over the Persian Gulf crisis which has reduced consumer spending. Because sales were below plan, Perry projects an operating loss for the fourth quarter. However, Perry expects to report an operating profit for the 1990 fiscal year.

Perry, a New York Stock Exchange company headquartered in Pontiac, operates 207 drugstores in Michigan and 21 in the Chicago area.

PORTLAND, OR (NOV. 6) PR NEWSWIRE - Richard A. Martens has been named chairman and chief executive officer of Security Pacific Bank Oregon, the bank announced today. The appointment will be effective Nov. 16, subject to formal

board approval, said Stanley D. Savage, president Security Pacific Bancorporation Northwest.

Martens will report to Savage, who in addition to his previous role as chairman of the Oregon bank, also serves as president of Security Pacific's Washington bank and the bank's Northwest holding company. Joseph H. Johnson, who has been president of Security Pacific Bank Oregon since its acquisition in April 1987, will continue in that position.

"Our first priority in Oregon was to return the bank to profitability, and we've done that," said Savage. "Now, we want to move Security Pacific to the next level, which is increasing our presence in the market. "Residing in Portland, Rich Martens, working with Joe Johnson and the rest of his management team, can help us do just that," he added.

Martens previously was executive vice president in charge of the Retail Lending Group of Security Pacific National Bank in Los Angeles where he had responsibility for credit administration, business lending, consumer lending and an auto finance subsidiary.

In addition, Martens played a key role in each of the bank's five acquisitions during the last three years, including management of the recent $4 billion deposit Gibralter Savings and Loan acqusition from the Resolution Trust Corp.

Martens joined Security Pacific in April 1988 as senior vice president in charge of Credit Administration for the Retail Bank. He subsequently formed the Consumer Lending and Business lending divisions. He was appointed to executive vice president in 1989.

Martens was formerly with Wells Fargo Bank from 1985 to 1988 where he served as a division administrator for the bank's Southern California retail branches. He was responsible for the integration of approximately 150 branches of Crocker Bank during its 1986 acquisition by Wells Fargo. He subsequently formed the Business Banking Division, which focused on serving the banking needs of small businesses through the retail branch system.

Prior to his time as Wells Fargo, Martens spent 12 years at Union Bank where he served as a commercial lending officer, senior credit officer and four years as regional vice president. Martens served nearly five years as a Naval officer before starting his banking career.

NEW YORK (NOV. 6) PR NEWSWIRE - A strategic reorganization of

Prudential-Bache Capital Funding's domestic investment bank was announced today by George L. Ball, chairman and chief executive officer of Prudential-Bache Securities Inc.

Prudential-Bache Capital Funding is the investment and merchant banking, institutional and capital markets arm of Prudential-Bache Securities.

As part of the reorganization, James T. Gahan, president of Prudential-Bache Capital Funding, will oversee a five-member management team consisting of:

Alan Altschuler, executive vice president of Prudential-Bache and head of the firm's merchant bank;

Randall L-W. Caudill, managing director, head of mergers and acquisitions;

Henry S. Miller, managing director, head of the private financing and restructuring/reorganizing areas;

Alexander C. Schwartz, Jr., managing director, in charge of new business development; and

Paul V. Scura, managing director, responsible for the firm's investment banking activities with financial institutions.

James F. Crowley, who until recently served as president of investment and merchant banking, has resigned that position and will be assuming a new role as senior advisor to the investment bank. Gahan noted Crowley's significant contributions to Prudential-Bache and stated, "We look forward to Jim's continued association with the firm."

The repositioning will result in reductions in the professional and support staff of the domestic investment bank. The merchant banking, capital markets and institutional activities of Prudential-Bache Capital Funding will not be affected by these changes.

Prudential-Bache Securities Inc. is a worldwide investment banking and brokerage firm. Headquartered at One Seaport Plaza, New York City, the firm has over 340 offices in the United States and overseas. Prudential-Bache Securities is a subsidiary of The Prudential Insurance Company of America.

NEW ORLEANS (NOV. 6) PR NEWSWIRE - Amoco Production Company and Japex Gulf Producing Corp., today announced a joint venture to increase oil and gas

production in the Gulf of Mexico.

The joint venture will pursue seven exploitation prospects on five producing blocks in the western and central Gulf of Mexico. Oil and gas that is produced will be processed through existing production facilities operated by Amoco Production Company's offshore business unit in New Orleans.

This is the second joint venture between Amoco and Japex. The first, initiated in 1987, involved three offshore Gulf of Mexico tracts and one prospect onshore Louisiana.

"This joint venture allows us to accelerate our drilling on growth- oriented properties in the Gulf of Mexico," said Peter Jordan, Amoco's vice president in New Orleans. "It makes good business sense for Amoco and Japex to search for resources close to producing fields and existing infrastructure."

Japex Gulf Producing Corp.'s President Minoru Ito said: "Along with the existing successful joint venture, which is being jointly developed by Amoco and Japex, we are sure that this joint venture will also result in additional successes. We are very pleased that through such projects we can contribute in adding to the reserves of the nation." The prospects are located in federal waters offshore Louisiana and Texas in water depths of less than 300 feet. Objective target depths for the wells range from 11,000 feet to 18,000 feet. Drilling will begin this month and should be completed by year-end 1991.

Financial terms of the joint agreement were not disclosed. Japex Gulf Producing Corp., a Delaware corporation, was formed by Japan Petroleum Exploration Co., Ltd., which has headquarters in Tokyo. Japan National Oil Corporation, a government agency, is to be the other shareholder. Amoco Production Company is the worldwide exploration and production subsidiary of Amoco Corporation (NYSE: AN)

LANSING, MICH. (NOV. 6) PR NEWSWIRE - Oldsmobile Division of General Motors has won the NHRA Manufacturer's Cup for the seventh consecutive year.

The Manufacturer's Cup was presented to Oldsmobile following the NHRA Winston Finals in Pomona, Calif., the season finale of the 19-event National Hot Rod Association championship drag-racing series. Oldsmobile Pro Stock drivers also won the Car Craft Pro Stock Cup, and three Team Oldsmobile racers -- John Force, Pat Austin and Blaine Johnson -- claimed 1990 NHRA championships.

NHRA founder and chairman of the board, Wally Parks, presented the Cup to

Oldsmobile Motorsports Manager Dennis Weglarz. "The NHRA Manufacturer's Championship is really a group award," said Weglarz. "It belongs not only to the people in Lansing who produce Oldsmobiles, but also to Oldsmobile's outstanding racers and their sponsors."

The Manufacturer's Cup is awarded annually to the automaker whose current model (1990) cars score the most points in the NHRA's three production-based categories (Pro Stock, Super Stock, and Stock). Oldsmobile won the Cup by a 26,000-point margin over runner-up Chevrolet.

Oldsmobile also captured the Car Craft Pro Stock Cup for the second consecutive year.

BALTIMORE (NOV. 6) PR NEWSWIRE - PharmaKinetics Laboratories Inc. (NASDAQ-NMS: PKLB) announced today a major reorganization to transform the company and its U.S. operations to meet the near-term challenges of improving liquidity and business development.

As part of this reorganization, V. Brewster Jones, currently president of PKLB's U.S. operations, has been promoted to chief executive officer and appointed a director. He replaces Steven A. Woodman, who has resigned his position as president, CEO and a director to assume a business development role for the company. Other reductions of overhead and general expenses, including reduction of administrative personnel, have been made in order to reduce cash requirements and to focus the company's resources on technical operations. Additionally, Mark B. Perkal, Ph.D., has resigned his position as executive vice president, chief scientific officer and a director to pursue other interests. He will be providing consulting services to PharmaKinetics at the request of the company. His day-to-day duties within the company have

been assumed by Lawrence J. Lesko, Ph.D., vice president in charge of analytical services, now also serving as chief scientific officer for the U.S. operations.

In recognition of':)e increasing importance of International Bio Research (IBR), the German1/20rubsidiary of PKLB, Christopher J. Holloway, Ph.D., managing director of IBR, was appointed a director of PKLB. IBR rehrLMYwts aproximately 55 percent of current revenue, having grown from $5 million to $8 million in revenue in the fiscal year ended June 30, 1990.

Commenting on this announcement, Jones noted that the contribution of Dr. Perkal has been especially instrumental in the development of PKLB. Jones added that this reorganization was an important step toward restructuring PKLB's U.S. operations and fos"continued growth of the North American and European operations.

PharmaKinetics Laboratories, Inc. is a leading drug development company providing services to pharmaceutical and biotechnology firms seeking new drug approvals in the United States and Europe.

#90310p3975 11/06/1990 ~PR Newswire

WILSON, NC (NOV. 6) PR NEWSWIRE - Standard Commercial Corporation (NYSE: STW) today reported sales for its second quarter ended September 30, 1990 of $260.5 million compared to $201.6 million for the same quarter of 1989, an increase of 29.2 percent. Net income of $3.6 million or $0.44 per share was recorded for the 1990 quarter compared with a loss of $5.5 million or $0.67 per share for the same quarter a year earlier.

Sales for the 1990 six months were $453.6 million, up from $399.0 million in the 1989 first half, an increase of 13.7 percent. Tobacco sales represented 63.1 percent of total sales, wool sales represented 35.9 percent and sales by other businesses made up the balance. Net income for the period was $3.8 million or $0.46 per share compared to a net loss of $6.3 million or $0.76 per share in 1989.

Tobacco sales for the first six months of 1990 were up 41 percent, from $202.8 million to $286.1 million, over the first half of 1989 and margins were better. The world market for tobacco is bullish and most stockpiles have been drawn down or depleted. The outlook for the remainder of fiscal 1991 is excellent, particularly in the international business, and sales are expected to exceed those of the previous fiscal year.

Wool sales at $162.7 million, including $10.6 million by companies acquired as

of April 1, 1990, were 13.8 percent down on the six months figure for 1989 and are expected to be well down for the fiscal year as a whole. However, there was a substantial improvement in wool margins in 1990, compared to 1989 which were adversely affected by an overall long stock position in a falling market.

Because of the seasonal nature of the Company's businesses, results for interim periods are not necessarily indicative of results for the full year.

#90310p3977 11/06/1990 ~PR Newswire

MINNEAPOLIS (NOV. 6) PR NEWSWIRE - Ciprico Inc. (NASDAQ: CPCI) today announced fourth quarter and annual results for the fiscal year ended Sept. 30 1990. For the fiscal year, sales totaled $9.9 million, compared to $11.0 million for 1989. The net loss was $324,000, or 16 cents per share, versus a loss of $15,000, or 1 cent per share, for 1989.

Fourth quarter sales totaled $2.6 million, compared to $2.9 million in 1989. The net loss was $69,000, or 3 cents per share, compared to a loss of $171,000 or 9 cents per share, for the prior year period.

Robert H. Kill, president and chief executive officer, said, "While our performance is not yet satisfactory, we are seeing some strong signs of improvement. For the second consecutive quarter our revenues increased and our margins improved. We view this as renewed confidence in our core controller business as well as continued acceptance of our SCSI product offering. The margins reflect our commitment to incorporating a quality process into every aspect of our business."

Commenting on 1990 results, Kill continued, "The past year was a challenge for us. Our revenues did not adequately reflect our accomplishments. Our goal was to ship two new products late in the fiscal year. I am happy to report that we delivered the first revenue shipments of the RF 6600 and RF 5500 in the fourth quarter."

Looking ahead to 1991, Kill said, "We continue to invest in R&D and marketing to introduce our new array and PC products. Both products will play a significant role in contributing to revenues and, more importantly, will take Ciprico into new, larger markets in the coming year. Our backlog coming out of fiscal 1990 is up substantially over last year. We are encouraged by this increase and attribute it to the strength in the adapter business as well as the enthusiasm met by our new products."

Ciprico is a leading designer, manufacturer and marketer of intelligent controllers and adapters for disk and tape storage drives. The company's common stock trades on the NASDAQ national market system under the symbol CPCI.

CHICAGO (NOV. 6) PR NEWSWIRE - Warehouse Club, Inc. (NASDAQ: WCLB) announced today that it has entered into a non-binding letter of intent with The Great Atlantic and Pacific Tea Company (NYSE: GAP) pursuant to which A&P will purchase approximately 7.3 million shares of newly issued Warehouse Club common stock for approximately $10.95 million ($1.50 per share).

In the event that this transaction is consummated, A&P would hold approximately 50.8 percent of Warehouse Club's issued and outstanding common stock. Consummation of the proposed transaction is contingent upon preparation of a mutually acceptable definitive agreement, A&P's completion of a due diligence review of Warehouse Club's business, with results satisfactory to A&P, and the satisfaction of certain other customary conditions, including the expiration of governmental waiting periods.

The transaction must also be approved by the stockholders of Warehouse Club. However, stockholders who collectively have voting power over approximately 65 percent of the shares of Warehouse Club's presently issued and outstanding common stock (including Warehouse Club's majority stockholder) have indicated to Warehouse Club that it is their present intention to vote such shares in favor of the proposed transaction.

#90310p3987 11/06/1990 ~PR Newswire

MIAMI (NOV. 6) PR NEWSWIRE - The Deltona Corporation (NYSE: DLT) today reported a net loss of $4,889,000, or $0.86 per share, on revenues of $1,880,000 for the third quarter of 1990 compared to a net loss of $604,000, or $.11 per share, on revenues of $15,114,000 for the third quarter of 1989. The prior year's results were impacted by an extraordinary item of $227,000, representing the reduction of income taxes arising from the carryforward of prior years' operating losses.

Included in 1990 third quarter results was a profit of approximately $243,000 from the $1.7 million sale of the company's country club at its Citrus Springs community. However, during the third quarter, Deltona continued to experience an increase in delinquent contracts receivable, resulting from the negative publicity caused by the indictment and bankruptcy of a major Florida developer as well as current worldwide economic uncertainties. As a result of the increase in delinquent contracts receivable, Deltona recorded an additional provision to its allowance for uncollectible sales of approximately $5,500,000 impacting net income by approximately $3,549,000. Deltona is taking all available actions to collect the delinquencies; however, it is unknown at this time whether the company will be successful. If this trend continues, Deltona may be required to record additional provisions in the future.

For the first nine months of 1990, Deltona reported a net loss of $11,315,000 on revenues of $20,271,000 compared to the prior year's net income of $1,167,000 on revenues of $49,632,000. The loss applicable to common stock was $11,315,000, or $2.00 per share, in 1990 compared to a loss of $148,000, or $.03 per share, in 1989. Included in the nine month results are losses of approximately $600,000 in 1990 and $1,500,000 in 1989 resulting from sales of contracts receivable. Included in the prior year's results was $1,315,000 in cumulative dividends on preferred stock. The prior year's results benefited from the inclusion of income from Deltona's utility operations, net of taxes, of $932,000, or $.16 per share, and an extraordinary item of $439,000, representing the reduction of income taxes arising from the carryforward of prior years' operating losses.

Revenues for the third quarter and nine months of 1990 have declined 88 percent and 59 percent, respectively, from 1989 levels for the same periods. This decline is primarily due to depressed retail land sales, arising from the negative publicity surrounding the previously mentioned indictment and bankruptcy of a major Florida developer and worldwide economic uncertainties. It is unknown, at this time, if and when sales will recover, particularly in light of the current national and international economic and political situation.

Deltona is the developer of nine planned communities, extending from the Florida Panhandle to the State's Gulf Coast, and encompassing approximately 100,000 acres.

#90310p3995 11/06/1990 ~PR Newswire

CRYSTAL LAKE, IL (NOV. 6) PR NEWSWIRE - Sun Electric Corp. (NYSE: SE) announced today that earnings from continuing operations and earnings for its third quarter ended Sept. 30, 1990, were significantly ahead of comparable earnings for the same quarter last year.

Sales from continuing operations for the third quarter ended Sept. 30, 1990, were $57,820,000 compared to $41,029,000 for the quarter ended Sept. 30, 1989. Earnings for the 1990 third quarter from continuing operations before extraordinary tax credit were $1,185,000 or $.13 per share, compared to a 1989 third quarter loss from continuing operations of $3,544,000, or a loss of $.44 per share. The 1989 third quarter loss included charges of $2,632,000 or $.33 per share, associated with a restructuring of the company's U.S. operations.

During the third quarter of 1990, the company sold the assets of Suntronic Systems, the company's point-of-sale equipment division which marketed service station management systems for retail petroleum and convenience store operations. The company's 1990 third quarter net earnings include losses of $1,288,000, or $.14 per share, consisting principally of the loss on the sale of Suntronic Systems' assets.

After the effects of the losses associated with its aforementioned discontinued operation and the effects of an extraordinary tax charge of $13,000, the company reported a 1990 third quarter net loss of $116,000 or a loss of $.01 per share, compared to a 1989 third quarter net loss of $3,532,000 or a loss of $.44 per share.

For the nine months ended Sept. 30, 1990, the company reported sales from continuing operations of $181,789,000, compared to $131,239,000 for the comparable 1989 period. Earnings from continuing operations before extraordinary tax credit for the nine months ended Sept. 30, 1990, were $6,884,000 or $.80 per share, compared to a loss from continuing operations of $5,430,000, or a loss of $.71 per share, for the comparable 1989 period. Net earnings for the nine months ended Sept. 30, 1990, include the nine-month operating loss and the loss on the sale of the company's discontinued operation in an aggregate amount of $1,568,000 or a loss of $.18 per share. The net loss for the 1989 nine-month period included operating losses of $253,000 or $.04 per share, from the discontinued operation and the aforementioned restructuring charges of $2,632,000.

During the nine months ended Sept. 30, 1990, after the effects of a $1,209,000 extraordinary tax credit for utilization of net operating losses, net earnings were $6,525,000 or $.77 per share, compared to a nine-month 1989 net loss of $5,683,000, or a loss of $.75 per share.

Sun Electic Corp. is primarily engaged in the design, manufacture, marketing and service of diagnostic, test and service equipment for the motor vehicle industry and motor vehicle manufacturers in more than 100 countries.

#90310p3997 11/06/1990 ~PR Newswire

SOUTH BURLINGTON, VT (NOV. 6) PR NEWSWIRE - Green Mountain Power Corporation (NYSE: GMP) announced Tuesday its operating results for the third quarter of 1990 and for the first nine months of the year.

Earnings per share of common stock in the third quarter of 1990 were 47 cents compared to 52 cents in the third quarter of 1989. For the nine months ending Sept. 30, 1990 and 1989, earnings per share were $1.66 and $1.92, respectively.

Edwin M. Norse, GMP's vice president, chief financial officer and treasurer, said: "The decrease in earnings resulted principally from increased power supply costs, increased administrative and general costs associated with employee pensions and benefits and regulatory proceedings and higher interest charges. In 1990, the company had increased capacity requirements and higher levels of borrowings to cover construction, plant improvements and conservation programs. The company anticipates taking advantage of favorable developments in its power supply arrangements during the rest of 1990, which will have a positive impact on the company's earnings for the year.

"The company continues to experience retail customer growth, despite a slowdown in the New England economy. The number of retail customers served at Sept. 30, 1990 was 1.8 percent greater than at Sept. 30, 1989. This growth, together with a retail rate increase that took effect in January 1990, produced an 8.0 percent increase in total operating revenues in the third quarter of 1990 compared to the same period a year ago," Norse said.

In April 1990, the company filed a retail rate increase request to cover higher costs associated with generating and buying electricity, maintaining electric generating plants and planning and implementing conservation programs. The new rates, as approved, would become effective early in 1991.

Wholesale sales declined in 1990 due to a number of factors, including the commencement of commercial operation of the Seabrook nuclear plant this spring which softened the wholesale power market in New England. In addition, the

company's increased capacity requirements to meet higher retail demand made less power available for resale, Norse reported.

ORLANDO, FLA. (NOV. 6) PR NEWSWIRE - The following was issued today by Harcourt Brace Jovanovich (NYSE: HBJ):

We are disappointed that Standard & Poor's Corporation has downgraded our bond ratings. As S&P noted, however, overall profit growth has resumed. HJB is making adequate capital investments to produce a competitive elementary reading program in 1992. As the company announced last week, HBJ has retained an investment advisor, Smith Barney, Harris Upham & Co., Incorporated to explore alternatives for dealing with the company's highly leveraged financial position.

#90310p4006 11/06/1990 ~PR Newswire

CALGARY, ALBERTA (NOV. 6) PR NEWSWIRE - Gerald J. Maier, president and chief executive officer has welcomed the National Energy Board (NEB) decision to continue rolled-in tolling methododolgy on TransCanada PipeLines' $2.6-billion major facilities expansion.

''The decision represents a major step toward completion of the prolonged regulatory review of an energy project which will provide major economic and environmental benefits to Canada and North America,'' Maier said today.

''The board has reaffirmed TransCanada's position that rolled-in tolls represent the fairest and most-efficient way to treat the costs of major expansions on our pipeline system.''

It is of particular significance that the board found that it is the aggregate demand of all shippers which creates the need for additional pipeline capacity Mr Maier noted.

''Although a few of our customers at both ends of the pipeline sought an alternative, I want to assure them of our continuing commitment to provide the highest-quality services to our customers. There are no losers in this decision. We are dedicated to run our system in the most cost-effective, efficient fashion possible, with respect to both capital and operating

expenditures,'' he said.

''With this decision, we can now get beyond the tolling issue to concentrate on the benefits to Canada of $2.6 billion in pipeline construction which will create some 3,800 construction jobs during the next two years.

''Natural gas producers and producing provinces in western Canada will benefit in the nineties, from an infusion of $800 million per year in gas revenues as the result of this expansion.

''Once again, it is demonstrated that the expansion of facilities to permit effective and economic use of our abundant natural resources is of benefit to all of Canada,'' Maier said.

The major facilities expansion faces one more stage of review by the NEB, which will now hold hearings to scrutinize technical and detailed aspects of the engineering and construction plan. The expansion successfully passed an environmental assessment review process by the NEB earlier this year.

TransCanada's plans call for 1 600 kilometres of pipeline looping and the installation of 240 megawatts of additional compression on its interprovincial natural gas pipeline from Alberta to Quebec. The work should be completed in time for a targeted 832 million cubic feet per day of new service capacity in the contract year beginning Nov. 1, 1992.

Meanwhile, TransCanada is optimistic that the Iroquois project in the northeast United States will soon receive a pipeline certificate from the Federal Energy Regulatory Commission. The Iroquois pipeline will deliver up to 575 million cubic feet of natural gas per day into New York and Connecticut. It is expected to displace 100,000 barrels per day of foreign oil imports to the U.S., and eliminate the emission of 75,000 tons of sulphur from the burning of fuel oil.

The company also expects an early decision from the NEB on a partial facilities application to allow it to build a portion of its major facilities expansion. TransCanada has asked the board for approval to construct 395 km of pipeline, mostly in Ontario, during the winter and summer of 1991. This $600-million program is a portion of the major facilities project.

MINNEAPOLIS (NOV. 6) PR NEWSWIRE - ULTIMAP International Corporation (NASDAQ: UMAP) today announced that the Hennepin County Board has agreed to negotiate an extension of ULTIMAP's performance of the previously agreed Software Purchase Agreement. ULTIMAP expects that the extension will be for a period

of 30 to 60 days contingent upon its payment to the county of $150,000 and upon the further payments representing interest on the unpaid balance of the purchase price and an allowance for fees and expenses incurred by the County. ULTIMAP will also agree to grant the County a security interest in its software, copyrights and trademarks.

The extension agreement will be presented to the Hennepin County Board for approval on Nov. 13, 1990.

ULTIMAP International Corporation stock is traded nationally over-the-counter under the NASDAQ symbol "UMAP."

#90310p4014 11/06/1990 ~PR Newswire

TORONTO (NOV. 6) PR NEWSWIRE - LAC Minerals Ltd. (NYSE: LAC) today reported operating and financial results for the third quarter and the first nine months of 1990. The results reflect the consolidation of Bond International Gold, Inc. (BIG) and are stated in U.S. dollars.

Revenues increased to $114.9 million for the quarter and $344.8 million for the nine month period compared to $39.7 million and $118.5 million for the same period last year.

Earnings for the third quarter of 1990 were $7.2 million or six cents per share compared to $9.7 million or 10 cents per share for the corresponding period in 1989. For the nine months ended Sept. 30, 1990, earnings were $12.0 million or 10 cents per share. For the same period in 1989, earnings were $29.0 million or 30 cents per share. Earnings in the third quarter have improved significantly compared to the first two quarters of 1990. This improvement can be largely attributed to LAC's Canadian operations which have been performing well with increased gold production and lower average production costs.

Earnings from operations in the third quarter and the first nine months of 1990 increased to $13.2 million and $26.8 million respectively compared too $3.6 million and $7.3 million for the same periods last year.

Other income declined in the first nine months of 1990 to $6.4 million from $37.9 million a year earlier. The decline was a result of reduced financial income, higher interest expense and the non- reoccurrence of certain other income items realized in the first nine months of 1989. In addition, the company continued to experience an unrealized loss on foreign exchange due to the impact of a stronger Canadian dollar on the company's U.S. cash balances.

Also offsetting the increase in operating earnings in the first nine months of

1990 was a higher effective income and mining tax rate when compared to the same period in 1989. The effective rates are influenced predominately by taxable income in Canada and Chile which cannot be offset by losses in the United States. However, the effective rate has decreased to 66 per cent for the nine month period compared to 81 per cent in the first half of 1990.

Cash flow from operations for the first nine months of 1990 was up significantly to $109.0 million compared with $38.4 million a year earlier.

Total gold production for the third quarter of 1990 was 268,801 ounces of which LAC's share was 206,863 ounces compared to 82,007 ounces for the same period in 1989. A total of 761,239 ounces of gold was produced in the first nine months of 1990 with LAC's share being 575,752 ounces compared to 246,602 ounces a year earlier.

LAC Minerals Ltd. is an international gold mining company with operating gold mines in Canada, Chile and the United States.

WICHITA, KAN. (NOV. 6) PR NEWSWIRE - COMCOA Inc. (NASDAQ: CCOA) today reported that revenues for its third quarter, a 12 week period ended Oct. 7, 1990, increased 13.6 percent to $12,158,262 and resulted in net earnings of $661,714 or 13 cents per share. For the corresponding period in the prior year, revenues and net earnings were $10,703,633 and $552,542, respectively. The per share computations resulted in net earnings of 11 cents per share in the prior year.

Revenues for the 36 weeks of the current fiscal year were $37,010,351 versus $31,231,630 for the like period in the preceding year. The current year-to-date net earnings were $2,819,707, or 57 cents per share. The net earnings in the prior year were $1,606,495, which is 31 cents per share.

COMCOA is a franchisee of Rent-A-Center of America Inc. and currently owns and operates 75 Rent-A-Center stores in Florida, Georgia, Alabama and Mississippi.

ST. PAUL, MINN. (NOV. 6) PR NEWSWIRE - Ballistic Recovery Systems, Inc. (NASDAQ: BRSI) announced today that its board of directors has elected Joseph R. Little as the company's chief executive officer. Little, who has been general manager at the Paranetics Division, has also served as interim CEO

since July 1990. Little was also elected to the board of directors to fill a board vacancy created by the recent resignation of Dr. John Cesnik.

The company also announced that it elected Marte J. Sheeran, chief financial officer, to serve in the additional capacity of chief operating officer. The board's action is intended to increase the company's efficiency by merging all administrative and operational functions under Sheeran's direction, and relocating those activities to the company's Southern California Paranetics facility.

Additionally, the board confirmed a plan to sell the company's Fleming Field facility in order to realize its equity in the building. The board noted that, with the exception of Marte Sheeran, South St. Paul employees currently engaged in manufacturing and technical capacities will remain in the Twin Cities.

Joe Little stated, "I'm delighted with the board's decision, because it confirms the direction and continuity of key plans for the future. Operational achievements attained during the last year play a major role in the way we address the company's goals. While these improvements in efficiency and the added capital from the sale of the building do not guarantee enough funds to complete the GARD development and FAA certification process, they are the first step in that direction."

Marte Sheeran added, "This functional realignment will further enhance recent improvements in overall efficiency. It will, at the same time, accelerate our ability to implement future plans."

Ballistic Recovery Systems, Inc. designs and manufactures parachutes for defense systems applications and ballistically deployed parachute systems for recreational aircraft.

#90310p4027 11/06/1990 ~PR Newswire

OAKHURST, CA (NOV. 6) PR NEWSWIRE - Sierra On-Line (NASDAQ: SIER) announced today that net income after taxes for the quarter ended Sept. 30, 1990, totalled $999,000, or $0.27 per share. By comparison, net income after taxes for the quarter ended Sept. 30, 1989, was $927,000, or $0.25 per share.

During the first six months of Sierra's fiscal year beginning April 1, 1990, net income after taxes totaled $1,683,000, or $0.46 per share. For comparison purposes, net income was $1,561,000, or $0.43 per share for the same period of the prior year.

Total revenues for Sierra were $7,072,000 for the quarter ending Sept. 30, 1990, and $7,430,000 for the comparable quarter of the prior year. For the first six months of Sierra's 1991 fiscal year, revenues were $12,354,000, compared to $11,521,000 for the same six months of the prior year.

Total revenues for the six months ending Sept. 30, 1990, increased by 7 percent, although they decreased by 5 percent in the second quarter. Revenue from product shipments during the second quarter decreased due to product development delays. Among the factors which improved Sierra's gross margin during the quarter were increased hint line and royalty income, higher average sales prices, and decreases in royalties and product costs. Inventory and capitalized software development costs increased significantly during the quarter. Sierra expects substantial decreases in both these accounts as delayed products are released in the quarter ending Dec. 31.

Ken Williams, Sierra's president and chief executive officer, said, "During the quarter, Sierra's stock price declined significantly, as did others in the software industry. Sierra believes its stock is undervalued and has established a stock repurchase program. We are now shipping most of our Christmas products. In September we released 'Thexder II,' 'Oil's Well' and 'Stellar 7.' In October we released 'Jones in the Fast Lane.' Both 'King's Quest V' and 'Quest for Glory II' will ship in November. Even with the general concern for a slowing economy, which could impact the Christmas season, Sierra has not yet experienced any decrease in consumer interest. Additionally, Sierra is excited about its European operation, which was established in the third quarter."

Sierra develops and publishes premium-priced entertainment software products for the high-end of the consumer market.

VAN NUYS, Calif. (NOV. 6) PR NEWSWIRE - Albert J. Berger, currently vice chairman and chief operating officer of Pinkerton Security and Investigation Services (NASDAQ: PKTN), was appointed president in addition to his other duties, the board of directors announced today.

Berger, 54, will continue to report to Pinkerton Chairman and Chief Executive Officer Thomas W. Wathen.

Berger served for 15 years as a director of CPP Security, and remained on the board when CPP merged with Pinkerton in 1988, assisting over the next two years in the consolidation of the two companies and completing financing arrangements.

Last January, Berger was name vice chairman of Pinkerton Security and Investigation Services.

Pinkerton's board also named a new director -- J. Kevin Murphy, former president and chief executive officer of Purolator Courier Corp., the courier and armored cars company.

Murphy, who joined Purolator's predecessor in 1957, was the corporation's chief operating officer from 1961 to 1967. From 1967 to 1976, he served as Purolator's president and chief executive officer.

A graduate of Colgate University (bachelor's degree) and Fordham University Law School, Murphy also served as president and chief operating officer of Trailways Inc. from 1977 to 1979.

Since 1985, he has been chairman and president of Topeka-based 655 Associates Inc., a company involved in crisis management and corporate turnaround activities.

Pinkerton is one of the largest security and investigation companies in the United States with 208 offices in 40 states and two foreign countries and more than 40,000 employees. The company is based in Van Nuys.

#90310p4036 11/06/1990 ~PR Newswire
DENVER (NOV. 6) PR NEWSWIRE - Bond International Gold, Inc. (NYSE: BIG; TSE: BG) today reported operating results for the third quarter and nine month period ended Sept. 30, 1990.

Revenues increased to $73.0 million for the quarter and $214.8 million for the nine month period, compared to $54.4 million and $161.0 million for the corresponding periods last year. The company reported a net loss of $5.6 million or 10 cents per share for the quarter ended Sept. 30, 1990, compared to a net loss of $2.0 million or 3 cents per share for the same period in 1989. For the first nine months of 1990, losses totalled $18.3 million or 32 cents per share compared to a loss of $87.0 million or $1.51 per share for the same period in 1989. The 1989 results included a $74.3 million loss during the second quarter from the company's investment in Gold Mines of Kalgoorlie Limited and a $13 million writedown of the Colosseum Mine and other mining assets.

The 1990 results were affected by unrealized foreign exchange losses of $5.0 million for the third quarter and $10.4 million for the nine months. These compare to a loss of $2.8 million and a gain of $1.9 million, respectively, for the same periods in 1989.

Total gold production for the third quarter was 159,126 ounces compared to 116,544 ounces for the same period in 1989. Production for the nine months was 472,907 ounces in 1990 compared to 341,163 ounces in 1989. The increases in 1990 reflect the additional production from the Bullfrog Mine, which began operation late in 1989.

The average cash costs of production, including by-product credits, for both the quarter and nine month period ended Sept. 30, 1990, were $238 per ounce of gold, compared to $223 and $195 per ounce for like periods in 1989. Average cash costs have increased in 1990 because the company's U.S. operations, which are relatively higher cost than its El Indio Mine in Chile, now contribute a larger percentage of its gold production.

Bond International Gold, Inc. operates five gold mines in the United States, Canada and Chile, and conducts an active exploration program in North and South America.

#90310p4050 11/06/1990 ~PR Newswire

JEFFERSON, La. (NOV. 6) PR NEWSWIRE - Al Copeland Enterprises Inc. announced that it has retained The First Boston Corp. to work on a restructuring plan for the company with respect to the indebtedness incurred by the company in connection with its acquisition of Church's Fried Chicken Inc. The company intends to promptly present a restructuring plan to its bank lender, Canadian Imperial Bank of Commerce ($249 million of senior debt) and its bridge lender, Merrill Lynch & Co. Inc. ($142 million of subordinated debt).

The company also announced that extensions granted by Merrill Lynch with respect to a $3.3 million interest payment due Sept. 28, 1990, and by CIBC with respect to a $4.2 million term loan payment due Sept. 21, 1990 have expired, and the company is in default under both loan documents. Under the terms of the loan documents, each of the lenders has the right to accelerate the indebtedness thereunder; however, neither lender has exercised that right.

The company believes that on an operational level its business will continue to generate positive cash flow and has had, and will continue to have sufficient cash flow to pay its trade creditors, but that the debt service required on the acquisition indebtedness cannot be sustained on a long-term basis without a restructuring. "This is the best time to implement a plan of restructuring," said Bucky Kilbourne, chief financial officer. "The sales and restaurant operations are doing very well. Our debt structure has to be changed so that the company will be well capitalized for the future." The company's decisions to seek extensions and not to make payments on its loans

are intended to insure that sufficient working capital is available while the company restructures that indebtedness.

The restructuring plan under development by the company and First Boston is intended to modify the company's capital structure to a level supportable by the company's operations on a long-term basis. The company may not have an alternative but to seek protection under Chapter 11 of the U.S. Bankruptcy Code, if either lender should choose to accelerate its indebtedness or if the company is unable to develop a restructuring plan satisfactory to its lenders. Management believes, based on its discussions with its lenders, that it can reach an agreement with them.

The company reported total revenues for the third quarter of 1990 ended Sept. 9, 1990 of $108 million, compared to $115 million for the third quarter of 1989. The company operated an average of 852 restaurants for the third quarter of 1990, compared to 965 restaurants during the third quarter of 1989. For the year to date period of 1990, revenues totaled $330 million, compared to $266.4 million for the comparable period of 1989. Net cash provided by operating activities was $3.6 million for the third quarter of 1990, compared to net cash used by operating activities of $18.7 million in the third quarter of 1989. For the year to date period of 1990 net cash provided by operations and income tax refunds was $11.7 million, compared with cash used by operations of $9.1 million for the comparable period of 1989.

The company made $12.3 million and $37.5 million in cash interest payments during the third quarter and year to date periods of 1990, respectively, substantially all of which are related to the financing obtained for the acquisition of Church's Fried Chicken Inc. Interest paid during the third quarter of 1989 and year to date period of 1989 totaled $20 million and $25.7 million, respectively. Debt principal repayments during the third quarter and year to date periods of 1990 totaled $7 million and $21 million, respectively. Due primarily to the interest payments for such acquisition financing, the company reported a net loss of $5.2 million in the third quarter of 1990 and year to date net loss in 1990 of $11.4 million. "It has been anticipated that as a result of the Church's Fried Chicken acquisition, the company would experience losses over the first several years," Kilbourne said.

SEATTLE (NOV. 6) PR NEWSWIRE - Nov. 5 marked the beginning of what is expected to become a successful and mutually rewarding working relationship between Red Star of the United Kingdom and Airborne Express (NYSE: ABF) of the United States, the companies announced today.

The agreement will mean all of Red Star's outbound U.K. shipments destined for the United States will be handled by Airborne Express's award-winning integrated system, replacing a system that comprised Trans-Atlantic scheduled flights and local distribution in the United States by a network of agents.

In exchange, Red Star, a subsidiary of British Rail, will provide Airborne Express with access to its exclusive United Kingdom linehaul capability, utilizing an integrated regional network of seven-day-a-week, high-frequency, high-speed trains, and an extensive fleet of pick-up collection and delivery vehicles.

The comprehensive grid of rail routes, covering the whole of Britain -- including England, Scotland, Wales and Northern Ireland -- makes Red Star the only UK parcels operator not to use the usual hub-and-spoke system. The company, which has offered customers express service since 1968, recorded revenues last year of 75 million pounds.

Airborne Express was also recently selected as the Outstanding Integrated Cargo System for domestic and international air express and freight shipping by the International Cargo Forum, which honors top performers in the cargo industry every two years.

HOUSTON (NOV. 6) PR NEWSWIRE - Southern Mineral Corporation (NASDAQ-NMS: SMIN) reported today record net income for a nine month period. Compared to net income of $910,000, or $.23 per share, for the nine months ended Sept. 30, 1989, net income for the current nine months vaulted to a record of $5,977,000 or $1.49 per share. Spurred by a $9.4 million gain from the second quarter sale of its interests in the Trimble Field, revenues rose from $2,431,000 last year to $11,715,000 this year. Also as a result of this sale, the provision for income taxes was up from $442,000 last year to $3,510,000 this year.

Compared to net income of $250,000, or $.06 per share, for the quarter ended Sept. 30, 1989, the company posted a $6,000 loss for the current quarter. The slight loss resulted mainly from a $351,000 increase in exploration expenses this quarter over the same period last year.

Southern Mineral Corporation is primarily an exploration company with production in the states of Alabama, Arkansas, Mississippi, Texas, and Wyoming.

KISHINEV (NOV 6) MOLDOVA-PRES-TASS - A TREND FOR STABILIZATION HAS EMERGED IN MOLDAVIA.

THE MOLDAVIAN PARLIAMENT'S CONCILIATION COMMISSION, LED BY MOLDAVIAN COMMUNIST PARTY LEADER PETR LUCHINSKY, MET A GAGAUZ CONCILIATION COMMISSION IN THE CITY OF KOMRAT IN SOUTHERN MOLDAVIA TODAY.

THE GAGAUZ PARLIAMENT, DECLARED ILLEGAL BY THE MOLDAVIAN PARLIAMENT, FORMED THE CONCILIATION COMMISSION FOR TALKS WITH MOLDAVIAN AUTHORITIES.

LYUDMILA SKALNAYA, CHAIRMAN OF THE REPUBLICAN WOMEN'S COUNCIL, ISSUED AN APPEAL TO MOLDAVIAN WOMEN. "WE MUST DO OUR BEST TO END ETHNIC CONFRONTATION," SHE SAID.

"WE WOMEN HAVE LOST THREE SONS, AND SIX CHILDREN WERE LEFT WITHOUT FATHERS IN NONSENSICAL CLASHES IN THE AREA OF DUBOSSARY. WE SHOULD LEARN FROM THIS BITTER LESSON, HEED THE VOICE OF REASON AND PREVENT NEW BLOODSHED.

SKALNAYA CALLED ON WOMEN WHO WENT ON A HUNGER STRIKE IN DUBOSSARY TO END THIS ACTION, SINCE IT LEADS TO FURTHER CONFRONTATION UNDER THE PRESENT CONDITIONS.

THE SITUATION REMAINS TENSE ON THE DNIESTER'S LEFT BANK, WHERE A DNIESTER REPUBLIC WAS PROCLAIMED ON SEPTEMBER 2, WHICH WAS RULED UNCONSTITUTIONAL BY THE MOLDAVIAN PARLIAMENT.

IN DEFIANCE OF THE MOLDAVIAN PARLIAMENT RESOLUTION, WORKERS' SELF-DEFENCE DETACHMENTS HAVE NOT DISBANDED AND A MORATORIUM ON THE NOVEMBER 25 ELECTIONS TO UNCONSTITUTIONAL POWER BODIES HAS NOT BEEN SET THERE.

SPEAKING OVER TIRASPOL RADIO, IGOR SMIRNOV, CHAIRMAN OF THE PROVISIONAL SUPREME COUNCIL OF THE DNIESTER REPUBLIC, POINTED OUT THAT "IT IS NOT A QUESTION OF VIOLATING MOLDAVIA'S BORDERS. IT IS A QUESTION OF THE POLITICAL AND ECONOMIC INDEPENDENCE OF THE REGION".

HE URGED RESIDENTS OF TIRASPOL AND OTHER POPULATED AREAS ON THE DNIESTER'S LEFT BANK TO DEFEND THE REPUBLIC TO THE END AND TO PREVENT MOLDAVIAN INTERIOR-MINISTRY TROOPS FROM ARRIVING IN THESE AREAS UNDER ANY CIRCUMSTANCES. "WE MUST UPHOLD OUR RIGHTS," SMIRNOV EMPHASISED.

KISHINEV'S POLICY, HE SAID, "IS AIMED AT CHANGING SOCIALISM ITSELF AS A SOCIO-POLITICAL FORMATION. SUCH A POLICY SHOULD NOT BE ALLOWED IN THE DNIESTER AREA".

A MEETING BETWEEN RUSSIAN LAWMAKERS AND COUNCILLORS FROM TIRASPOL BEGAN HERE TODAY. THE MEETING IS ALSO BEING ATTENDED BY MOLDAVIAN FIRST DEPUTY PRIME MINISTER KONSTANTIN OBOROK AND CHAIRMAN OF THE MOLDAVIAN PARLIAMENTARY COMMISSION ON ETHNIC RELATIONS ALEXANDER ARSENI.

MEMBERS OF THE RUSSIAN PARLIAMENT, WHO CAME TO MOLDAVIA AT THE INVITATION OF THE RUSSIAN-SPEAKING POPULATION IN THE DNIESTER LEFT-BANK AREA, WILL ALSO VISIT INDUSTRIAL ENTERPRISES AND ORGANISATIONS.

LEADER OF THE DELEGATION SERGEI KRASAVCHENKO STRESSED THAT THE AIM OF THE MISSION IS TO FIND OUT IF "THE DEMANDS PUT FORTH BY CITIZENS LIVING IN THE DNIESTER LEFT-BANK AREA ARE JUST".

ACCORDING TO KRASAVCHENKO, "UNDER ARTICLE EIGHT OF THE TREATY OF COOPERATION SIGNED BY THE RUSSIAN FEDERATION AND MOLDAVIA, THE SIDES SHOULD MONITOR THE OBSERVANCE OF RIGHTS AND INTERESTS OF NATIONAL MINORITIES IN THE REPUBLICS".

"OUR FINDINGS WILL HELP FORM A CLEAR-CUT POSITION FOR THE RUSSIAN PARLIAMENT CONCERNING EVENTS IN MOLDAVIA," HE NOTED.

THE SESSION WAS ALSO ATTENDED BY LEADERS OF THE PROVISIONAL SUPREME COUNCIL OF THE DNIESTER REPUBLIC.

KISHINEV (NOV. 6) TASS - IN CONTRAST TO MANY PREVIOUS YEARS, INHABITANTS OF KISHINEV FEEL NO ELATION WHATSOEVER ON THE EVE OF THE NATIONAL HOLIDAY, ANNIVERSARY OF THE OCTOBER 1917 REVOLUTION.

SEEKING TO EASE TENSION, CITY AUTHORITIES CANCELLED THE TRADITIONAL MILITARY PARADE, CIVIL MARCH AND OTHER RALLIES AND MASS ACTIONS FOR AND AGAINST THE OCTOBER REVOLUTION. THE CITY COUNCIL PROMISED TO DO ALL IN ITS POWER TO LET

PEOPLE RELAX.

BUT THE TRAGIC EVENTS IN DUBOSSARY AND CONTINUING INTER- ETHNIC STRIFE DO NOT LET PEOPLE FORGET LIFE'S HARDSHIPS.

INDUSTRIAL ENTERPRISES ARE SUFFERING FROM SHORTAGES OF RAW MATERIALS AND PARTS AND IDLE MOST OF THE TIME, BECAUSE MANY ROADS ARE BLOCKADED AND THOUSANDS OF PEOPLE DO NOT REPORT FOR WORK DAILY, BEING ENGAGED IN "VOLUNTARY FORCES".

SHOP SHELVES, THAT WERE HALF EMPTY FOR SOME TIME ARE NOW COMPLETELY BARE. BUTTER, EGGS AND SOME OTHER PRODUCTS ARE NOW RATIONED, BUT THIS DOES NOT HELP MUCH AND MARKET PRICES ARE SKY- ROCKETING.

ANXIETY CAN BE SEEN IN MANY EYES WHEN PEOPLE COME TO THE CITY PARK, A KIND OF COMMUNITY CENTRE WHERE PEOPLE TRADE AND DISCUSS NEWS. TODAY, THE DEBATES GREW PARTICULARLY HEATED WHEN DISCUSSING THE DECISION BY THE MOLDOVAN PARLIAMENT TO RENOUNCE THE USE OF FORCE IN SETTLING INTER-ETHNIC CONFLICTS. SOME PEOPLE CALL THIS DECISION WISE, OTHERS VIEW IT AS A PLOY BY SUPPORTERS OF MOSCOW.

CENTRAL TELEVISION AND THE NATIONAL PRESS ARE SHARPLY CRITICISED FOR PARTIALITY IN COVERING EVENTS IN MOLDOVA. PEOPLE ARE ARDENT IN THEIR PRAISE OF POET GRIGORY VIERU WHO REBUKED REPUBLICAN INTERIOR MINISTER ION KOSTAS FOR MAKING THE INSIDE STORY PUBLIC WHEN HE TOLD THE PARLIAMENT ABOUT PRIME MINISTER MIRCHA DRUK'S CATEGORICAL ORDER TO USE FORCE IN DUBOSSARY.

NEARLY ALL INHABITANTS OF DUBOSSARY ATTENDED A MOURNING RALLY HERE TODAY. PRESENT AT THE FUNERAL IN VICTORY SQUARE OF THE THREE PEOPLE KILLED DURING THE NOVEMBER 2 CRACKDOWN WERE DELEGATES FROM ALL LEFT BANK DNIESTER CITIES, DISTRICTS AND VILLAGES, THE CITY OF BENDERY, DISTRICTS POPULATED BY GAGAUZ PEOPLE AS WELL AS FROM SOME UKRAINIAN AND RUSSIAN CITIES. THE THREE PEOPLE WERE BURIED NEXT TO THE COMMON GRAVE OF SOLDIERS WHO LOST THEIR LIVES WHEN THE CITY WAS BEING LIBERATED FROM NAZIS DURING WORLD WAR II. MANY THOUSANDS OF PEOPLE PASSED THROUGH THE YOUNG PIONEER PALACE TO PAY THEIR LAST RESPECTS TO THE VICTIMS OF THE CRACKDOWN.

A GROUP OF WOMEN IN DUBOSSARY CONTINUE THEIR POLITICAL HUNGER STRIKE BEGUN ON FRIDAY. THEY HAVE SAID THEY WILL NOT GIVE UP UNTIL THE REPUBLICAN GOVERNMENT WITH MIRCHA DRUK AT THE HEAD RESIGNS AND THOSE TO BLAME FOR THE TRAGEDY IN DUBOSSARY ARE PUNISHED.

MOSCOW (NOV 6) TASS - SOME 1,680 SOVIET CITIZENS WERE EVACUATED FROM IRAQ IN OCTOBER, SOVIET DEPUTY PRIME MINISTER IGOR BELOUSOV SAID TODAY.

IN A TELEVISED INTERVIEW, HE NOTED THAT EVACUATION WAS HELD IN FULL ACCORDANCE WITH THE SCHEDULE AGREED DURING TALKS WITH THE IRAQI LEADERSHIP.

DURING THE LAST VISIT TO IRAQ BY SOVIET PRESIDENTIAL ENVOY YEVGENY PRIMAKOV, THE SIDES AGREED ON THE FUTURE EVACUATION OF SOVIET CITIZENS FROM IRAQ, BELOUSOV SAID. HE SAID THEY AGREED THAT 1,000 SOVIET SPECIALISTS WILL LEAVE IRAQ BY AEROFLOT FLIGHTS IN NOVEMBER.

BELOUSOV NOTED THAT THE FIGURE WILL INCLUDE NOT ONLY THOSE WHO ASKED TO RETURN HOME BEFORE THEIR CONTRACTS EXPIRE, BUT THOSE WORKING ON A NUMBER OF OBJECTS WHERE THE FIELD OF OPERATIONS HAS BEEN REDUCED. BELOUSOV RECALLED THAT U.N. SECURITY COUNCIL SANCTIONS ENVISAGE AN EMBARGO ON THE DELIVERY OF SPARE PARTS AND MATERIALS, NOTING THAT THE SOVIET UNION INTENDS TO OBSERVE THE PROVISIONS.

#90310u0092 11/06/1990 ~United Press International

CAPE CANAVERAL, Fla. (NOV. 6) UPI - NASA managers are considering the possibility of launching the shuttle Columbia at the end of the month, just two weeks or so after Atlantis's planned launch around Nov. 16 on a secret military mission.

An internal space agency rule requires three weeks between shuttle flights to make sure data from one mission can be studied before launching the next. But Forrest McCartney, director of the Kennedy Space Center, said Monday that agency managers were studying ways to reduce the requirement.

''We'd like very much to fly (Columbia), get it down and get it home before Christmas,'' he said. ''But we're not going to waive any of the looking, what we look at'' between missions.

On another front, McCartney said the discovery of about 1 gram of cocaine in a shuttle processing hangar Friday did not indicate that there was a problem with widespread drug use at the sprawling shuttleport.

He also said there there is no evidence drugs were involved in any of a number of embarrassing mishaps and accidents at the spaceport earlier this year.

''It's been suggested perhaps that could have been involved in some of the incidents we've had,'' McCartney said. ''We have not found that and in analyzing each one of those instances, we have not found a common thread that would cause you to think that.

''I don't see any evidence whatsoever that links drugs to the incidents or accidents that we've had,'' McCartney said.

In the meantime, engineers at launch pads 39A and 39B are pressing on with plans to launch the shuttle Atlantis around Nov. 16 and its sistership, Columbia, just two weeks later around Nov. 30.

Atlantis had been scheduled for takeoff Friday night, but problems with the ship's secret spy satellite payload forced Air Force mission managers to order a delay. While McCartney would not discuss the progress of work to repair the payload, he said the spaceplane should be ready for launch next week.

''The 16th, give or take a day or so, is the best guess now. That's a reasonable planning time,'' he said. ''I'm not speaking for the Department of Defense. But if you were to ask me what's a good planning date now ..., I think the middle of the month is reasonable to assume.''

Assuming Atlantis blasts off around Nov. 16, Columbia should be ready for flight by the end of the month if NASA managers agree to waive the three-week rule.

As for drug use at the space center, a small packet of cocaine containing about 1 gram of the drug - about 0.04 ounces - was discovered Friday morning in Orbiter Processing Facility No. 1 where the space shuttle Discovery is being serviced after a mission last month.

McCartney said an alert individual spotted the drug under a desk in the OPF and called security personnel.

It was ''a very small amount,'' McCartney said, and ''it was very clear that it belonged to perhaps an individual rather than some ... big operation. I think when we get down to it, what we'll find is that unfortunately, some individual has a habit.''

''We have 20,000 people working here,'' he said. ''Drugs are a problem for society today (and) we are very sensitive to that problem. This has every appearance to be, unfortunately, someone has a drug problem. That's regrettable.

He said security personnel would continue an investigation into the cocaine seized Friday ''to try to determine who was involved in it. Hopefully we'll be able to find the individual who was involved and offer some assistance.''

#90310u0101 11/06/1990 ~United Press International

NEW YORK (NOV. 6) UPI - Things have suddenly turned sour at home for the New York Rangers.

The Rangers stormed to an 11-3 record to open the season, winning their first eight games at Madison Square Garden. But they lost for the third straight time and for the second consecutive game at home Monday night when Boston's Bob Sweeney scored his second goal of the season at 3:30 of overtime to give the Boston Bruins a 3-2 victory over the Rangers.

The Bruins, who snapped a five-game road losing streak, trailed 2-1 late in the third period before Cam Neely tied the score with 14 seconds remaining to force the five-minute overtime in the NHL's only scheduled game.

''We kept plugging away at it,'' said Boston Coach Mike Milbury. ''We got lucky in overtime because they really dominated the overtime for the most part but we took advantage of the one scoring opportunity we did get.''

With the Bruins attacking in the extra session, Sweeney took the puck behind the New York net and left it for Neely. Sweeney received a return pass from Neely to the right side of New York goalie John Vanbiesbrouck and his 15-foot shot found the net.

''That's a really big win for us especially the way the New York Rangers have been playing,'' said Neely. ''It's a great confidence builder which means more than the two points.''

Boston goalie Andy Moog, who limited the Rangers to two first-period goals, was brilliant in overtime and a bit lucky. He repelled hard shots by Ray Sheppard and Brian Leetch and got a break when Bernie Nicholls' blast hit the post and caromed out. Moog stopped 27 shots.

Nicholls was disappointed the way the Rangers played after grabbing a 2-0 lead in the first period.

''We played on our heels in the third period,'' said Nicholls, ''and it was a mistake. We were worried about them on our home ice instead of them being worried about us.''

Trailing 2-1, the Bruins pulled Moog in the final minute of regulation for a sixth skater. The Bruins quickly controlled the puck and Neely, parked in front knocked in a Craig Janney pass for his eighth goal of the year at 19:46.

''We were desperate in the last minute,'' Neely said. ''The Rangers were too cautious.''

The Rangers led 2-0 after the first period on goals by John Ogrodnick and Mike Gartner.

Leetch grabbed a loose puck at the point and sent a perfect centering pass to Ogrodnick, who wristed in his ninth goal of the season at 5:18. It was Ogrodnick's fifth goal in his last four games.

Aggressive forechecking by Darren Turcotte and Jan Erixon set up Gartner's ninth of the year less than two minutes later. Turcotte picked up the puck behind the Boston net, skated in front and backhanded a shot that was gloved by Moog. As Moog attempted to smother the puck for a whistle, Gartner poked it free and into the net at 7:08.

''We've lost three in a row and we could have won all three,'' said New York Coach Roger Neilson. ''I don't understand this, the ice was chippy and that makes it easier to defend a lead. And we didn't do that.''

Bob Carpenter trimmed New York's lead to 2-1 at 14:22 of the second period on a feed from John Carter. Carter, carrying the puck into the Rangers' zone, faked a slapshot before passing to a cutting Carpenter, who beat Vanbiesbrouck for his fourth goal of the season.

(NOV. 6) UPI - New York Mayor David Dinkins calls the killing of Meir Kahane an ''international tragedy that shocks us all.'' The ultra right-wing rabbi was shot to death Monday night in a midtown Manhattan hotel. Police are holding a suspect in Kahane's shooting. The suspect and at least two other people were wounded in the incident.

Americans will head to the polls Tuesday in elections involving the entire House, one-third of the Senate and 36 governorships. One Republican strategist says a possible anti-incumbent backlash would hurt the G-O-P more than Democrats because- in his words- ''we also have Bush.''

President Bush took White House business with him while campaigning for the Republican gubernatorial nominee in Texas. Bush topped off a day of work for Clayton Williams by signing the nation's deficit-reduction agreement into law. The package of tax hikes and spending cuts evolved during lengthy negotiations between administration and congressional leaders.

Japanese media reports Tuesday say Iraq will release an unspecified number of Japanese hostages in response to an appeal by former Japanese Prime Minister Yasuhiro Nakasone. The reports say Iraqi officials told Nakasone that elderly and ailing hostages will be freed shortly.

China is looking at improving its troubled relations with the United States. China's foreign minister has left Beijing for a four-nation Middle East tour with stops in Egypt, Jordan, Saudi Arabia and Iraq. The minister will meet Secretary of State Baker on his first stop in Egypt.

European Community ministers will resume world trade talks Tuesday morning in Brussels. Italy's minister warned the talks are in danger of collapse unless the ministers adopt a plan to cut farm subsidies. However, a quick agreement was NOwhere in sight after eight hours of talks Monday.

#90310u0135 11/06/1990 ~United Press International

INDIANAPOLIS (NOV. 6) UPI - Safety Dave Duerson scored his first touchdown in eight NFL seasons and the league's top pass defense produced the points that subdued stubborn Indianapolis.

Duerson, a native of nearby Muncie, returned a fumble 31 yards for a touchdown in the fourth quarter Monday night, lifting the undefeated New York Giants past Indianapolis 24-7.

Linebacker Pepper Johnson ran through a block by Kevin Call and smashed Colts quarterback Jeff George to the turf, forcing the fumble Duerson ran into the end zone for the final points with 13:23 to play.

''All I had to do was pick up the ball after Pepper did most of the work,'' Duerson said. ''In the back of your mind, you're wondering when you're going to get one. Tonight was the night.''

The triumph made the Giants and two-time defending Super Bowl champion San Francisco the first pair of NFL teams with 8-0 starts since Chicago and Detroit in 1934. The Giants, off to the best start in their 66-year history, matched a 62-year-old team record of 11 straight regular season victories.

Duerson sealed the Colts' fate after they had struggled to remain in the game following a woeful first half.

''We felt we were in the ball game until the big turnover,'' Colts Coach Ron Meyer said. ''We felt we had a chance to get something going until that.''

Johnson scuffled with Call at halftime, but beat him when it mattered most to slam George to the turf.

''He rolled left and all I needed to do is slow him down for a second and it worked,'' Johnson said. ''When I saw Duerson scoop it up and head for the end zone, it felt good.''

George, the No. 1 pick in this year's NFL draft, made his first start in five weeks after being sidelined by an abdominal strain. He replaced Jack Trudeau, lost for the season with torn knee ligaments last week. George completed 23 of 37 for 160 yards but lost the key fumble.

''I had no idea he was coming,'' George said of Johnson. ''I was getting ready

to throw and he got me. It was a good defensive play.''

With Vice President Dan Quayle watching from a luxury suite, Ottis Anderson rushed for 55 yards on 14 carries and scored on second-quarter runs of 2 and 3 yards. The 12-year veteran moved into a tie for eighth on the all-time rushing touchdown list with 76.

Phil Simms, the NFL's top-rated passer completed 7 of 8 for 100 yards in the first quarter and New York scored the first three times it had the football.

''We played a real good first half,'' New York Coach Bill Parcells said. ''I can't say too much for the second half. I'm just happy to get out of the first half of the season.''

Simms, who turned 35 Saturday, threw for 172 yards on the night, completing 17 of 21 passes. Simms suffered his first interception in 150 passes since opening day when Mike Prior caught a deflected toss in the second quarter.

''We did some good things and seemed to be in control,'' Simms said. ''When we have a chance to put a team away, though, we don't. We seem to do this each week. One of these times, we're not going to be able to do it and it's going to hurt us.''

Indianapolis (2-6) managed only 45 yards total offense in the first half, gaining only one first down and advancing no farther upfield than its own 39. The Colts rank last in NFL rushing yards, possession time and first downs.

''We had a tough time getting our offense in gear,'' Meyer said. ''This is an onward and upward building process for Jeff and our entire offensive unit. No question we have to do better. It was a tough night for our team.''

The Colts drove 80 yards following the second-half kickoff, scoring on Albert Bentley's 1-yard dive 7:18 into the third quarter. George threw a 17-yard pass to Bill Brooks on fourth-down and 7 to give the Colts a first-down at the New York 20-yard line. Three plays later, Lawrence Taylor was whistled for a personal foul after slapping George's helmet, giving the Colts a first down at the Giants 6.

Anderson's 3-yard run 3:26 before halftime gave the Giants and 17-0 lead at the break. His 2-yard touchdown run came two plays into the second quarter. New York moved 74 yards in 12 plays on the opening drive, scoring on Matt Bahr's 23-yard field goal.

(NOV. 6) UPI - About 40 demonstrators maintained a vigil outside New York's Bellevue Hospital, where Meir Kahane died Monday night after being shot at a hotel. The crowd said prayers for the ultra right- wing rabbi and chanted ''May Israel live as One Nation'' in Hebrew. The man suspected of shooting the U-S-born founder of the Jewish Defense League suffered a gunshot wound to his chin. Police say two other people- including a bystander and a man who tried to stop the suspected gunman- were injured in the incident.

President Bush will vote in his adopted hometown of Houston Tuesday before returning to Washington... where he'll await the results of nearly 500

congressional and gubernatorial races. But Bush may be looking at a mid-term defeat, with all indications showing Democrats will win a vast majority of the seats. Bush has spent the week campaigning for Republican candidates.

Democrats are hoping Election Day will bring them one or two more seats in the Senate, where they already hold a 55-45 edge over Republicans. However, G-O-P analysts speculate Republicans may get through the day without losing any ground in the Senate. But the situation appears more volatile in the House. Democrats say they hope to pick up eight seats... but Republicans say it is possible they'll lose as many as 15 spots. Some disgruntled G-O-P insiders blame President Bush's declining popularity for hurting their chances. Said one Republican strategist- ''The anti-incumbent thing is real.''

The Soviet Union has good and bad news on its grain situation. The government on Monday announced a record 1990 grain harvest of 240- Million tons. But the bumper crop is NOT doing the Soviets much good, with the Kremlin unable to convince farmers to sell their goods for worthless rubles. The official government newspaper explains that goods are increasinly being exchanged for other goods without using money, making the ruble worthless.

Analysts say Wall Street is NO longer reacting to- in the words of one- ''every little rumor.'' World oil prices fell Monday on news of falling demand and rising output by OPEC, with the rumor-sated crude market focusing on supply-demand fundamentals instead of possible war in the Middle East. Economists say prices may slip further, depending what the American Petroleum Institute reports in its weekly inventories suvey late Tuesday.

#90310u0206 11/06/1990 ~United Press International

HOUSTON (NOV. 6) UPI - President Bush has signed the nation's deficit-cutting agreement, a package of tax hikes and spending cuts that evolved from a long and excruciating struggle between Congress and the White House.

Bush signed the five-year package at 9:20 p.m. Monday after a day of campaigning in Texas for Republican gubernatorial candidate Clayton Williams.

After signing the deficit agreement, Bush inked the fiscal-year appropriations bills that cover federal spending.

The compromise deficit-cutting legislation, passed by Congress on Oct. 27, was forged by House and Senate leaders and administration officials in three weeks of frantic and often bitter bargaining after the House, on Oct. 4, rejected an earlier agreement.

The final package calls for about $490 billion in deficit reduction through 1995, including a $40 billion rollback during the 1991 fiscal year that started on Oct. 1.

Included in the plan are initiatives to raise some $137 billion in new tax revenues.

Among these provisions are:

-An increase of the top income tax rate to 31 percent from 28 percent.

-A phase-out of high-income personal tax exemptions and limitation on deductions.

-An increase in the maximum income subject to Medicare tax.

-A series of new excise taxes on such items as gasoline, tobacco, alcohol and luxury items.

The plan also included a cut of nearly $43 billion in Medicare, the health insurance program for the elderly, with savings coming from reductions in patient payments and increases in beneficiary contributions.

In a statement, Bush said: ''This act is the result of long, hard work by the administration and the Congress. No one got everything he or she wanted, but the end product is a compromise that merits enactment.''

Bush alienated many members of the conservative wing of the Republican Party by renouncing the anti-tax promise that served as the foundation of his 1988 presidential campaign, with many GOP candidates actively distancing themselves from the president's support of the budget compromise.

The process began last January when Bush submitted his budget to Congress.

No movement on the issue prompted Bush and congressional leaders to call a budget summit, a process that dragged on through the summer and early fall and produced the proposal that was soundly rejected in the House.

The entire fiscal mess led to an anti-incumbency sentiment throughout the United States and taxed Bush's popularity, with a recent poll revealing the lowest approval rating of his presidency, at 48 percent.

Since Congress finalized the deal, Bush has sought to portray Democrats as solely responsible for the tax elements of the package, saying government spending cuts favored by the administration were held hostage to tax hikes favored by congressional Democrats.

A regular theme on the campaign trail was Bush's contention that if there were more Republicans in Congress there never would have been a budget stalemate and political hardship.

However, White House spokesman Marlin Fitzwater said that he did not believe the election-eve signing would have ''any impact'' on Tuesday's vote and said ''it's a deficit-cutting bill the country needs ... got to do the country's business.''

In fact, Bush was greeted on the campaign trail Monday by a number of demonstrators holding signs that read: ''No More Taxes,'' a reminder of his broken ''Read My Lips: No New Taxes'' pledge that was a cornerstone of his 1988 presidential campaign.

During the budget debacle, Bush signed several stopgap measures to continue the federal spending during the budget talks. The government shut down Oct. 6-8 after the House rejected the first compromise plan.

The current stop-gap measure was to expire at midnight Monday.

The biggest revenue-generating tax item is the provision raising the cap of wages taxable for Medicare to $125,000, a move pegged to bring in $26.9 billion over five years.

Increasing the federal gasoline tax by a nickel per gallon is expected to generate $25.4 billion through 1995.

There will be a phased-in 8-cents increase in tax per pack of cigarettes, a 16-cents per six-pack increase in tax on beer and other tax hikes for wine and hard liquor, as well as taxes on luxury items such as expensive furs, cars, boats and jewelry.

(NOV. 6) UPI - Police in New York have in custody a man who shot and killed right- wing Rabbi Meir Kahane, the founder and leader of the Jewish Defense League. He was shot and at least three other people, including the gunman, were wounded Monday night in and around a Midtown Manhattan hotel.

Secretary of State Baker is scheduled to meet Tuesday with Egyptian President Hosni Mubarak. Baker met yesterday with the exiled emir of Kuwait to discuss the military option to get Iraq's invasion forces out of Kuwait.

China's foreign minister is on his way to Cairo to meet with Secretary of State Baker. He said the meeting with Baker on the Persian Gulf crisis will also help improve China's troubled relations with the United States.

The Environmental Protection Agency has imposed sweeping new requirements on cities and industry to develop programs for reducing contaminated run-off from streets, landfills, factories, and construction sites.

NASA managers are considering the possibility of launching the shuttle Columbia at the end of the month, about two weeks after the planned launch of Atlantis around November 16th on a secret military mission.

The Soviet Union has announced a record grain harvest, but at the same time, admits that it cannot pry the goods from the farmers for worthless rubles. The Soviet government newspaper says the state has been able to buy only one quarter of the record crop.

On Friday, Germans will celebrate the one-year anniversary of the opening of the Berlin Wall, a move that led to unification of the east and west. The day will be marked by the unveiling of a memorial to the 77 people shot dead while

trying to cross the wall.

#90310u0250 11/06/1990 ~United Press International

COTABATO, Philippines (NOV. 6) UPI - Militant students heckled President Corazon Aquino during a speech Tuesday inaugurating a Moslem autonomous region aimed a bringing peace to the strife-torn southern island of Mindanao.

Soldiers forcibly broke up and arrested 17 youths belonging to the Bangsa Moro Students League who had linked arms and chanted anti- autonomy slogans in front of Aquino just after she began speaking in an open-air complex.

Aquino flew to Cotabato City, 550 miles south of Manila, to inaugurate the autonomous region created under a law she signed in August. The region is composed of four Moslem-dominated provinces in the southern Philippines.

The president paused and tried several times to resume with her speech but her voice was drowned out by chants of ''God is Great,'' ''We don't want this kind of autonomy'' and ''Don't be fooled by this government.''

Witnesses said the interruption went on for about two minutes. Civilian-clad and uniformed presidential guards moved in and pushed the students out of the complex where soldiers broke them up and hauled them to the police station in a truck.

Several students suffered bruises and had their clothes torn during the scuffle, witnesses said. Police said they would be charged with ''tumultuous disturbance'' and ''disturbance of public affairs.''

Last month, leftist students jeered at the president while she spoke during the launching of a multimillion-dollar industrial estate outside Manila. Recent results of private surveys show Aquino's popularity was on the downtrend.

Witnesses said the students had positioned themselves at the front row of the audience, estimated by police at 5,000 people including government officials and diplomats from Moslem countries.

In her speech, Aquino said she hoped the inauguration of the region would settle a war for Moslem independence in Mindanao, the nation's second largest island where more than 50,000 people have been killed in the insurgency since the 1970s.

Autonomous region officials shall have jurisdiction over government agencies in the area except for national defense, taxation, foreign affairs, postal services, monetary policy and citizenship, among others.

The region shall receive a yearly assistance of an equivalent of $22 million over the next five years from the Manila government.

The Moslem students, however, said they wanted autonomy under a 1976 agreement signed by first lady Imelda Marcos in Tripoli, Libya, granting automatic self-rule to 13 provinces and nine cities in Mindanao. They also want Moslem separatist guerrillas to be included in the autonomous government.

BONN (NOV. 6) UPI - Two days after Boris Becker broke off a match with Stefan Edberg of Sweden, it was still not clear how serious the German star's leg injury was, German newspapers said Tuesday.

Becker had to give up in the final of the $2 million tournament in Paris Sunday against Edberg, his main rival and the No. 1-ranked player in the world because of intense pain in his left thigh.

The papers said Hans-Wilhelm Mueller-Wohlfahrth, a Munich-based medical specialist consulted by Becker, believed Becker's injury was a hardening of the muscle in his left thigh rather than a rupture as was thought first.

Mueller-Wohlfarth, who is also the team-doctor of Germany's soccer champion Bayern Munich, said he would meet with Becker again on Wednesday.

The Bonn-based newspaper General-Anzeiger said it was doubtful Becker would be able to take part in next week's ATP Masters tournament in Franfurt.

(NOV. 6) UPI - Around the world... around the clock... the latest news from U-P-I.

New York police are investigating last night's fatal shooting of ultra right-wing Rabbi Meir Kahane at a hotel in midtown Manhattan. At least three other people, including the gunman, were wounded in the incident in and outside the hotel. The suspect is in police custody after undergoing surgery.

The Justice Department in investigating charges of voter intimidation by the Republican Party in North Carolina. The F-B-I has been ordered to look into Democratic claims that the G-O-P sent intimidating postcards to largely Democratic districts in the state where Republican Senator Jesse Helms faces a tough re-election battle.

President Bush signed the new tax-raising, deficit-cutting budget in Texas last night after a hard day of campaigning for the state's gubernatorial

nominee. Bush will cast his ballot in his adopted homestate tomorrow morning before heading back to Washington to await the results from around the nation.

Secretary of State Baker will meet today with Egyptian President Hosni Mubarak as he continues his discussions of the Persian Gulf crisis with Arab leaders. Cairo Radio says Baker was expected to raise a possible timetable to oust Iraq from Kuwait. But Mubarak says he wants to stick with an embargo.

The Supreme Court heard arguments yesterday on Michigan's life term without parole for some first-time drug offenders. A lawyer opposing the law said it has not reduced the drug trade. But a Michigan prosecutor said the stiff sentence is a needed weapon in the war on drugs.

A State Department employee fired yesterday reportedly had ties with Soviet spies. Leaks from investigators say Felix Bloch was in contact with a Soviet agent in Paris and Vienna and he was photographed handing over a briefcase to the agent. Secretary of State Baker says Bloch was fired for security reasons.

The space agency is considering bending a rule requiring three weeks between shuttle flights. Atlantis is expected to be launched around November 16th on a secret military mission. NASA managers are considering launching Columbia within two weeks of that to allow Columbia to end its mission well before Christmas.

A former Newport Beach stockbroker pleaded guilty yesterday in Los Angeles to charges that he used information in an UNreleased magazine column to buy stocks that brought him about 66-thousand dollars. John Petit paid a former publishing worker for the advance information published in Business Week.

#90310u0287 11/06/1990 ~United Press International

CAIRO, Egypt (NOV. 6) UPI - A former interior minister has called on Egypt to expel Palestinians and prohibit PLO chairman Yasser Arafat from entering the country, an Egyptian opposition newspaper reported Tuesday.

The Al Ahrar said former Interior Minister Zaki Badr made the call during a meeting of the Arab affairs, foreign and national security committee of Egypt's upper Parliament.

''Such a decision must be made because those (the Palestinians) are working with the aim of destroying stability in Egypt,'' Al Ahrar quoted Badr as saying during the meeting.

Badr, who was removed by President Hosni Mubarak last year for his sharp criticisms, is a member of the Consultative Council, or upper Parliament.

Egyptian newspapers accused pro-Iraqi Palestinians of being behind the slaying

of Egypt's Speaker of Parliament Rifaat El Mahgoub last month, but police later discovered that Egyptian Moslem extremists had been responsible for his Oct. 12 assassination.

Hundreds of Moslem extremists have been taken into custody since the assassination of Mahgoub, the No. 2 man in the Egyptian government after Mubarak.

#90310u0369 11/06/1990 ~United Press International

GENEVA (NOV. 6) UPI - British Prime Minister Margaret Thatcher told King Hussein of Jordan Tuesday that military action must be one option to resolving the gulf crisis, British diplomats said after a meeting between the two leaders.

Thatcher and Hussein met for 50 minutes before addressing a U.N. conference on countering the greenhouse effect of global climate warming.

The British sources told reporters that Hussein at the meeting repeated his previous appeals for a peaceful solution in the gulf by means of ''dialogue,'' and would continue his efforts to secure the release of hostages.

Thatcher for her part said that although everyone wants a peaceful outcome ''the military option cannot be ruled out'' to force Iraqi withdrawal from Kuwait, the sources said.

The prime minister, they said, also expressed her ''concern'' about the number of politicians and other people going to Baghdad to seek the release of foreigners held in Iraq.

Thatcher did not specifically cite the latest such trip to Iraq by former German Chancellor Willy Brandt, the sources said.

#90310u0396 11/06/1990 ~United Press International

(NOV. 6) UPI - Snow and chilly temperatures stretched from the Rocky Mountains through the Great Plains Tuesday while high winds whipped through western New York state and Maine, where gale warnings were in effect.

In the Plains, several inches of snow fell in Iowa and Nebraska while cold temperatures extended in Illinois with clouds and some rain.

The real nasty weather occurred to the west though with winter storm warnings and advisories posted for much of central and southern Wyoming and parts of Colorado as temperatures plummeted and winds increased.

In Lander, Wyo., 7 inches of snow was on the ground by 2 a.m., pushing the total to 11 inches, while winds in the southern half of the state reached 30 mph, causing snow to blow and drift and sending wind chill factors down to minus 20 degrees.

Snow, heavy in some areas, was falling in central and northeast Colorado and Denver was expecting up to 6 inches of snow that also was blowing and drifting due to high winds.

Strong winds peaking at 69 mph swept through upstate New York, causing flooding and erosion on the shores of Lake Erie. Trees were reported down in the region.

A small craft advisory was upgraded to a gale warning from Eastport, Maine, to the Merrimack River in Massachusetts as winds topped 40 mph and seas averaged 4 to 8 feet.

A winter weather advisory was in effect for northern Maine as a storm system moving up the St. Lawrence River Valley brought a mixture of snow, sleet and rain to the state. Another storm forming over the Atlantic was expected to bring more snow to the state, with total accumulations between 2 and 5 inches.

#90310u0416 11/06/1990 ~United Press International

JOHANNESBURG, South Africa (NOV. 6) UPI - The African National Congress sent a top official Tuesday to the western township of Bekkersdal to try to stop fighting between black political factions that has killed 25 people in six days.

ANC veteran Wilton Mkwayi and a team of assistants ''will plead for peace among the residents ... the police have not been able to end this, '' an ANC spokesman said.

The bloody clashes broke out last Thursday among youths arguing over whether to boycott exams at the end of the school year.

Groups have since fought sporadically with axes, knives, clubs and gasoline bombs, police spokesman Capt. Eugene Opperman said, noting scores of families have fled their homes to avoid the violence.

Opperman said police had arrested eight people and confiscated two AK-47 assault rifles and other weapons. But he conceded, ''We're not really finding it easy to stop this fighting.''

He said the figure of 25 dead could climb ''as we are finding bodies in isolated spots.'' Police estimate about 10 people have been injured.

Followers of the militantly black-consciousness Azanian People's Organization clashed with ANC supporters who had been urging students to boycott the exams, police said.

The tension in Bekkersdal reflects the national rivalry between the two movements.

AZAPO primarily accuses the more popular ANC of going soft on its struggle against white minority rule by holding preliminary power- sharing talks with the government.

#90310u0543 11/06/1990 ~United Press International

ISLAMABAD, Pakistan, (NOV. 6) UPI - Nawaz Sharif, the head of the army-backed alliance that defeated Benazir Bhutto in last month's elections, was sworn in as prime minister Tuesday.

President Ghulam Ishaq Khan, who sacked Bhutto's government in August,

administered the oath of office to Sharif at a ceremony in the presidential palace.

The National Assembly earlier Tuesday elected Sharif as prime minister. He received 153 votes in the 217-member assembly with 39 going to the only other candidate, Afzal Khan, an ally of Bhutto.

Sharif's election in the assembly became a formality after he received the nomination last week of his Islamic Democratic Alliance, a right-wing coalition of parties opposed to Bhutto that scored a convincing victory over the ex-prime minister's Pakistan People's Party in the Oct. 24 elections.

Sharif, in a brief speech following his election, offered a ''hand of cooperation'' to Bhutto.

''We will extend the same honor to the opposition members as we would to those on our own benches,'' he said.

Bhutto, in a hard-hitting speech to the assembly, repeated allegations the IDA had rigged the elections, but offered her support to the new administration ''if they stand by the people.'' She also issued a veiled appeal to the IDA government to reject military interference.

''I welcome the new administration in the hope that it will ... strive to increase the democratic space available to civilian, representative institutions and not be deterred by the fact that others before them have fallen in pursuing this goal,'' she said.

Pakistan has been under military rule for more than half of its 43- year history.

Sharif, 42, is a wealthy self-made industrialist, unlike most other senior Pakistani politicians, who come from feudal landowning families. He was formerly chief minister of Punjab, Pakistan's most populous province, from where he engaged in acrimonious disputes with Bhutto's administration in Islamabad.

He becomes Pakistan's first Punjabi prime minister. The office has traditionally been held by natives of Sind because of the southern province's ethnic sensitivities.

But analysts say he won the nomination over Sindi caretaker prime minister Ghulam Mustafa Jatoi because of his prominent role in the defeat of Bhutto's Pakistan People's Party in last month's elections.

The PPP won elections in November 1988, the first democratic voting in Pakistan in 11 years.

But Ishaq Khan dismissed Bhutto's 20-month-old administration on Aug. 6, accusing it of corruption and nepotism and of failing to control law and order. Many believe the president's action was inspired by the army, which had been in conflict with the Bhutto government.

Bhutto, 37, now leader of the opposition, and members of her administration are facing charges of misuse of power in Special Disqualificiation Courts set up by Ishaq Khan. If found guilty, they could be barred from politics for seven years.

In her speech to the assembly Tuesday, Bhutto charged the courts were established to ''discredit and tarnish the representative leaders who selflessly served this nation.''

Bhutto's husband, businessman Asif Ali Zardari, was also arrested last month on charges of kidnapping and extortion. He was temporarily released from jail in the southern port of Karachi to take the assembly seat he won in the elections.

#90310u0573 11/06/1990 ~United Press International

(NOV. 6) UPI - Rabbi Meir Kahane, the outspoken founder of the Jewish Defense League, was shot and killed last night in a Manhattan hotel. Kahane was shot in the head and chest and died in a hospital. His attacker wounded two other men as he fled. A suspect, Lel Sayyid Nosair, was shot in the chin and underwent surgery. Police said he is of Middle Eastern ancestry and apparently acted alone. Kahane was born in Brooklyn. The militant Zionist was elected to Israel's parliament in 1984, but his views were so radical he was NOT permitted to run for re- election.

The Justice Department is sending election observers to five states to watch today's voting. Assistant Attorney General John Dunne, head of the Civil Rights Division, says the moniters will record activities during voting hours and then watch the counting of ballots. 212 observers are being sent to seven counties in North Carolina, South Carolina, Arizona, New Mexico and Utah.

President Bush has signed into law the deficit-cutting package that increases taxes and cuts spending. Bush signed it last night, just hours before a temporary spending bill expired. White House spokesman Marlin Fitzwater says he does NOT believe the election-eve signing will have any impact on the vote. But the fiscal crisis has led to sentiment against office holders involved in the process. Bush's own popularity fell to 48 percent, the lowest since he became president.

Oil prices tumbled yesterday following an interview with the Saudi oil minister, who said his nation has increased daily production by three Million barrels since Iraq's invasion of Kuwait. The New York price for West Texas

Intermediate oil fell two dollars a barrel, to about 32 dollars. Home heating oil and UNleaded gasoline also fell sharply.

The Soviet Union says the grain harvest this year was a record 240- Million tons. But the government canNOT get farmers to sell it for rubles which are NOT worth much. The Soviet newspaper Izvestia says the state has been able to buy only about one-quarter of the grain. Izvestia says farmers do NOT fear the penalties for NON-delivery. It also says collectivized farmers want to hold on to the grain because they fear feed grain prices may increase.

Pakistan's National Assembly has elected Nawaz Sharif as the new prime minister. The only other candidate was Afzal Khan, who was associated with ousted Prime Minister Benazir Bhutto . Sharif was assured the election last week when he was nominated by the Islamic Democratic Alliance, a right-wing coalition of parties opposing Bhutto.

The Environmental Protection Agency has issued regulations to minimize pollutants that may end up in rivers and lakes. Discharge permits will be required for storm water sewers that collect runoff water from street drains. This water picks up grease, toxic metals and pesticides which are not removed in sewage treatment and are ultimately dumped into rivers and lakes.

Massachusetts' highest court has upheld Charles Stuart's lawyer who refused to testify about a meeting with Stuart, even though the client is now dead. Stuart is the man who blamed a black robber when his pregnant wife was killed. Stuart committed suicide after learning he had become the chief suspect. The Supreme Judicial Court ruled that the lawyer-client privilege lasts even after the client is dead.

#90310u0636 11/06/1990 ~United Press International

(NOV. 6) UPI - Stock prices on the Tokyo Stock Exchange fell sharply Tuesday in thin, aimless trading as investors continued to await market-making news.

The blue chip Nikkei Average of 225 selected shares, which added 190.34 points Monday, lost 419.58 points - or 1.7 percent - to 23, 965.75.

The broader-based Tokyo Stock Exchange Price Index of all major shares, which gained 14.85 points Monday, slipped 19.61 points to 1, 781.62.

Declines overpowered advances 755 to 187, while 151 issues remained unchanged.

Trading continued light as an estimated 280 million shares changed hands, compared with 214 million Monday.

Elsewhere in Asia, a late slide on the Hong Kong Stock Exchange erased minor gains posted earlier as stocks closed slightly lower in light trading.

The benchmark Hang Seng Index, which slipped 11.68 points Monday, eased 0.53 points to 2,966.71.

Among the narrower indexes, financials shed 8.27 points, industrials added 1.68, utilities gained 7.77 and properties fell 4.39 points.

Volume continued to be thin as an estimated 741 million shares changed hands, compared with 709.8 million Monday.

In Singapore, stocks eased slightly in light trading on the Singapore Stock Exchange in line with the fall in Tokyo and absence of fresh factors to stimulate buying.

The Straits Times Industrial Index, which added 1.82 points Monday, fell 12.58 points to 1,120.34. The broader-based All Singapore Index fell 1.97 points to 313.18.

Volume amounted to around an estimated 31.4 million shares, compared with 29.4 million shares changing hands Monday.

Elsewhere around the region, in Bangkok, stock prices closed lower in light trading on the Thailand Stock Exchange.

In Manila, a late rally in blue chip stocks helped boost prices on the Manila exchange.

In Taipei, stocks closed lower on the Taiwan Exchange.

In Australia, stocks closed higher in light trading on the Sydney sharemarket.

#90310u0688 11/06/1990 ~United Press International
BONN, Germany (NOV. 6) UPI - German inflation jumped 3.3 percent in October compared with the same month a year ago, while more than two million people were registered as unemployed, official reports said Tuesday.

The Federal Statistics Office said in a report inflation only rose 2.5 percent without taking into consideration oil and gasoline prices.

But it added that the price increases in the two commodities - attributed to the Gulf crisis - pushed up inflation in October to 3.3 percent from October 1989.

In September, inflation rose 3.0 percent compared with the year-ago month and in August 2.8 percent compared with August 1989.

In another report, the Federal Labor Office said the total number of jobless people in Germany was 2,225,233 in October.

Unemployment continued to drop in west Germany by 186,200 to 1,687, 434 or a 6.5 percent jobless rate in October from the previous month, the report said.

The levels marked the first time the number of jobless in western Germany fell

below the 1.7-million level in nine years.

Chancellor Helmut Kohl said in a statement released after the data was published that the employment market is in ''excellent shape'' and that 28.8 million jobs was a ''record mark.''

But in the former East Germany, which unified with West Germany Oct. 3, unemployment soared 21 percent over the previous month - or 92,900 people - to 537,800 for a jobless rate of 6.1 percent, the report said.

The number of short-time workers, who work shorter hours for lower wages, was reported at 1.77 million people, the report said.

''(In eastern Germany), the latest job data signals that we are in the midst of a difficult transition phase from the socialist command economy to the free market system,'' Kohl said.

When the free market system was introduced in East Germany July 1 as part of economic union and in advance of German unification, western imports flooded the East German market, pushing East German companies to the edge of bankruptcy.

Many of the 8,000 former state-controlled companies were forced to make drastic cuts in work force, impose short-time work or close down.

#90310u0690 11/06/1990 ~United Press International

CAIRO (NOV. 6) UPI - An opponent of Iraqi President Saddam Hussein was quoted Tuesday as saying that the Iraqi leader is using the U.N.-imposed trade embargo to starve people in areas of the country hostile to his regime.

''Once the embargo was announced, Saddam issued his decision to starve the areas where the majority of the population opposes him,'' Mohammed Haidari, member of consultive council of the Islamic Revolution in Iraq told the Saudi Asharq Al-Awsat newspaper.

Observers say the sanctions, imposed by the United Nations in an effort to force Iraqi troops out of Kuwait, have seriously effected the Iraqi people but have had no impact on Saddam's policy decisions.

Haidari, who was interviewed in Damascus, said he believed Saddam's policy ''will lead to a very high pressure toward a real uprising in the ranks of the Iraqi people.''

He said groups opposing the regime of Saddam were attempting to topple him and form a new government in Baghdad.

''We are trying to destroy the security infrastructure, particulary the ones the regime is depending on,'' Haidari said.

#90310u0715 11/06/1990 ~United Press International

ATLANTA (NOV. 6) UPI - Anyone who has bought a plane ticket since 1987 could be party to a class-action suit alleging major airlines used a computerized fare system to fix prices.

Plaintiffs are suing USAir, Northwest, Delta, Continental, United, TWA and American airlines, alleging they used a Washington-based computer clearinghouse, Airline Tariff Publishing Co., to signal fare changes, agree on price increases and threaten fare cuts. ATP also is named as a defendant in the suit.

The defendants deny the allegations and likely will oppose the class- action certification, said Delta attorney Edward B. Krugman.

If U.S. District Judge Marvin H. Shoob certifies the suit as a class action, every person who has bought a plane ticket since 1987 could technically be a plaintiff and potentially benefit from the decision, said W. Pitts Carr, the Atlanta attorney who filed the first suit in July. Shoob likely will not decide on the class-action issue until early next year.

''In 1988, 150 million tickets were sold so that would give you a rough idea of the possible magnitude of this case,'' Carr said. ''There are literally tens of millions of people or companies who are potential class members.''

A panel of federal judges placed 31 separate suits in Shoob's court Friday after deciding Atlanta was easily accessible to the most parties.

''Delta denies totally the allegations ... concerning our participation in any conspiracy to fix prices,'' Krugman said.

The suit alleges the network allows airlines to respond to price changes before fares are even offered to the public. Sometimes, an airline signals its displeasure in matching a low fare by publishing it on the computer with a coded prefix, the suit says.

The suit asks for undetermined damages that would be tripled under federal antitrust laws.

ATP collects fare data from 270 foreign and domestic carriers, and transmits it to consumers, including 36,000 travel agencies, said Terrence B. Adamson, one of its Atlanta attorneys. The company handles about 160,000 fare changes a day.

Adamson said the computer network simply makes fares more competitive. However the lawsuit's claims are similar to allegations that federal antitrust attorneys have been investigating, and Shoob has ordered that the airlines produce copies of documents turned over to the Department of Justice and not destroy other documents.

JOHANNESBURG, SOUTH AFRICA (NOV. 6) UPI - South African church leaders representing 85 denominations across the political spectrum met for a second day Tuesday in a difficult bid to bury their differences and reach a common approach to the country's political reform process.

The gathering at a resort hotel in the northeastern town of Rustenberg is the first such undertaking since a conference in 1960, when a short-lived unity pact was drafted among church leaders in response to the police killings in Sharpeville Township.

Among the delegates are leaders of the white Dutch Reformed Church, which sanctioned a biblical underpinning to apartheid, the strongly anti-apartheid South African Council of Churches, and pentacostal and fundamentalist churches.

The five-day National Conference of Churches was opened Monday by Anglican Archbishop Desmond Tutu, who appealed for unity and reconciliation but insisted those responsible for apartheid must accept guilt.

''We come here not to engage in recrimination,'' said the 1984 Nobel Peace Prize laureate. ''If there is to be reconciliation, we must be christ's instruments of peace.''

''In this land we are bound together by common humanity by having only one God. The only way we will ever be able to survive, to be free, to be human, is together, black and white.''

SACC president Khoza Mgogo called Monday for a joint strategy on the redistribution of wealth as part of the country's racial reform agenda, spurred by President Frederik De Klerk's reform program unveiled earlier this year to eliminate all apartheid laws.

''The land must be returned to the people,'' he said. ''The land cannot be owned by the few and worked by the many. The land is the future for the people and without it, the majority of the people will be lost.''

He said the conference should establish a framework in which churches could address the issue of wealth redistribution in general.

''This entails all social means such as housing, education, health, wages,

leisure facilities, pension and ecology,'' he said, noting a commitment to wealth redistribution would ''recharge the process of reconciliation in our country.''

(NOV. 6) UPI - Rabbi Meir Kahane, the militant Jewish leader, was shot and killed last night in New York. The killings of two Arabs in the Israeli-occupied West Bank are blamed on Jewish revenge. Villagers say a gunman drove by, shot the two and drove off. Kahane's followers warned of revenge, while moderate Israelis called for restraint.

British Prime Minister Margaret Thatcher says protecting the environment is a bigger challenge than meeting the threat of tyrants. At a world climate conference in Geneva, Thatcher said Britain supports efforts to reverse the emissions of carbon dioxide causing the greenhouse effect of global warming.

Secretary of State Baker flew to Cairo today for talks on the gulf crisis with Egyptian President Hosni Mubarak. Baker is consulting with Arab leaders about the possibility of using military force to get Iraq out of Kuwait. Mubarak has said he prefers sanctions to military strikes.

Sources close to the investigation of a former diplomat in the U-S Embassy in Vienna say he was in contact with a Soviet agent in Paris and in Vienna. They say the diplomat handed over a briefcase to the Soviet agent. The diplomat, Felix Bloch, was fired yesterday after an investigation and hearing.

A new book says the U-S government had secret contacts with the Palestine Liberation Organization in the 1980's, even though such talks were illegal then. In 1988, Secretary of State Shultz agreed to make Sweden an intermediary. The contacts finally led to the P-L-O's renunciation of terrorism.

A court clerk says sentencing for former junk-bond king Michael Milken is expected next week. He pleaded guilty to six counts of securities fraud and faces a maximum prison term of 28 years. A two-week hearing was held in federal court in New York to learn if he committed other crimes.

Democrats charge dirty politics in North Carolina. They say Republicans sent postcards with inaccurate information to discourage Democrats from voting in today's U-S Senate election. They also say the Republicans plan to challenge voters whose postcards were returned by the Post Office. The Justice Department is investigating.

The government proposes that makers of drugs tell doctors about side effects that may harm older people. Health Secretary Louis Sullivan says the loss of kidney functions with age may make drugs more potent. A spokesman for a

manufacturers' association was favorable to the proposed regulations.

The government is making specific diet suggestions in its new edition of Dietary Guidelines. The Health and Human Services Department guide recommends that fats be limited to 30 percent of caloric intake. People should eat a variety of foods, including fiber, and use salt, sugar and alcoholic beverages in moderation.

The government has reprimanded Marinelife Oceanarium in Gulfport, Mississippi, for letting Miss Teen U-S-A contestants swim with dolphins. The National Oceanic and Atmospheric Administration sent a letter saying Marinelife's permit does NOT allow humans to swim with captive dolphins.

EAST LANSING, MI (NOV. 6) UPI - Michigan State University quarterback Dan Enos was arrested for disorderly conduct and spent a night in jail after being accused of urinating in public, police said.

Enos, 22, who led the Spartans to a 45-20 victory over Indiana on Saturday, was arrested about 1 a.m. Sunday on Grand River Avenue, the city's main street said Capt. Richard Murray of the East Lansing Police Department.

Clarence Underwood, assistant athletic director at MSU, said Enos has denied any wrongdoing. MSU football coach George Perles had no comment Monday on the arrest.

MSU President John DiBiaggio said the university will not take action unless the quarterback is proven guilty.

''The student is claiming he didn't do anything wrong, that it was mistaken identity, and he has witnesses to that fact,'' DiBiaggio said. ''He claims he's innocent and they mistook him for someone he was with for doing something and arrested him.''

Enos was with several friends, none of them team members, when he was arrested. Police said he was held in the city jail eight hours because he apparently had been drinking.

Enos is to appear in court within 10 days. He is the fourth Spartan football player to have problems with the police in the past two years.

#90310u0772 11/06/1990 ~United Press International

MANILA, PHILIPPINES (NOV. 6) UPI - Communist guerrillas have kidnapped an American Protestant missionary in the northern Philippines, the military said

Tuesday.

A military report said Harvey Brown Duane of Seattle, Wash., was driving a jeep along a highway in Aparri, Cagayan, 260 miles north of Manila, on Oct. 24 when he was stopped and taken hostage at a checkpoint set up by the guerrillas.

There has been no ransom demand and there was no explanation for the abduction nearly two weeks after it happened.

U.S. embassy spokesman Stanley Schrager said he had heard of the kidnapping and had no details.

Schrager said there were no indications the kidnapping was related to the third round of talks on the future of key U.S. military facilities scheduled to begin Thursday in Manila.

On June 13, communist New Peoples Army guerrillas also kidnapped American Peace Corps volunteer Timothy Swanson in central Negros island but released him unharmed after 50 days.

The military report said guerrillas of the NPA had just ambushed two army teams and were fleeing from government reinforcements when they chanced upon Duane, a former U.S. Marine.

The rebels had been manning a checkpoint along the highway at the height of a general strike for higher wages which they had been supporting.

They set fire to a passenger bus and seven cargo trucks in support of the strike. Two hours later, the report said, the guerrillas ambushed a jeepload of soldiers and an army team sent to reinforce the beleaguered troops.

This forced the rebels to split up into three groups. The report said one group encountered Duane's jeep and took him hostage at gunpoint.

U.S. officials have restricted travel for 40,000 American servicemen and their dependents stationed at Clark Air Base and Sibic Bay Naval complex, both north of Manila, fearing rebel attacks during the bases talks.

On the eve of the first round of talks in May, guerrillas gunned down two visiting servicemen outside Clark. The rebels also bombed a transmission tower of the Voice of America one day before the second round of talks began in September.

The 19,000-member NPA, fighting the Manila government for 21 years, has vowed to assassinate Americans to dramatize demands for the removal of the bases.

In addition to Clark and Subic, the Philippines hosts six other smaller facilities under a 47-year-old bases agreement expiring in 1991.

WASHINGTON (NOV. 6) UPI - Non-farm business productivity increased 1.6 percent in the third quarter after edging up a revised 0.3 percent in the second quarter, the Labor Department reported Tuesday.

Unit labor costs rose 2.8 percent in July, August and September after increasing a revised 4.7 percent in April, May and June, according to the department's Bureau of Labor Statistics.

A gauge of inflation tied to the data advanced 3 percent in the third quarter after jumping a revised 4.8 percent in the second quarter of the year, the government also reported.

The total increase in non-farm productivity - defined as the output per hour of workers - was the largest since the third quarter of 1988, when it jumped 2.8 percent, a government spokesman said.

Output increased 1.5 percent in the third quarter after a revised uptick of 1.2 percent in the second quarter, while hours worked fell 0.1 percent after inching up a revised 0.9 percent in the previous three months.

''Quarterly output gains have been fairly steady during 1990, while hours have slowed,'' the Labor Department said. ''The third-quarter drop in hours was the first since the second quarter of 1986 when hours fell 0.8 percent.''

Hourly compensation increased 4.5 percent in the third quarter, but was down 1.8 percent, when inflation was taken into account, the department said.

''During the second quarter, the comparable changes were 5 percent and 1.2 percent, respectively,'' the report said. ''The third-quarter decline in real hourly compensation was the seventh in the past eight quarters.''

Factory productivity, meanwhile, gained 5.6 percent in the third quarter after climbing a revised 3.1 percent in the second quarter, as the makers of ''big ticket'' durable goods increased output and slashed hours.

The figures in the Labor Department report are adjusted for critical seasonal

factors.

#90310u0818 11/06/1990 ~United Press International

HOUSTON (NOV. 6) UPI - President Bush and his wife Barbara cast their ballots at a Houston retirement community center, ending the president's six-day campaign swing on behalf of Republican candidates he says he needs in the Democratic Congress.

The president voted shortly before 9 a.m. and immediately headed for the airport to fly back to Washington where he will await the election returns at the White House.

The first lady gave a thumbs-up sign when she dropped her ballot in the box. The president declined to answer reporters when asked to predict the outcome of the election, saying only, ''I don't want them to get me for loitering, so I'm going.''

White House chief of staff John Sununu reiterated to reporters that Tuesday's election will not be a referendum on the Bush presidency, but insisted that despite Bush's recent drop in the polls, the president helped GOP candidates in recent days by helping energize the campaign.

Bush's broken 1988 ''no new taxes'' campaign pledge - and his handling of the tax-raising, deficit-cutting budget battle with Congress - was a key issue of Election 1990.

Bush's polls plunged and so did the GOP's chances of making gains in the House and the Senate, where Democrats currently hold margins of 258- 175, and 55-45 respectively.

Bush signed the new spending package late Monday in the dark of night. It calls for $492 billion in tax hikes and spending cuts over the next five years.

The president said in a brief statement, ''No one got everything he or she wanted, but the end product is a compromise that merits enactment.''

Democrats hope they would pick up perhaps two seats in the Senate, while the GOP theorized it might be able to hold even.

In the House, both sides say Democrats are likely to pickup 8 to 15 seats.

The president has said repeatedly in recent weeks that he would have been able

to obtain a better budget deal if he had more Republicans in Congress to combat what he described as ''tax-and-spend Democrats.''

Wrapping up a six-day campaign swing for fellow Republicans, Bush told a rally in Tyler, Texas, Monday, ''I've listened to some of the campaign rhetoric coming out of the other side and it's sad.''

''It is pessimistic. It is downbeat. It is tired. And it's liberal,'' the president said.

''We are the party with a vision for the future, the party with new ideas. And if America wants to change, I think we need a Republican Congress. And I wish we could get it now - tomorrow - and then watch what we can do.''

Republican Clayton Williams is in a nip and tuck race with Democrat Ann Richards, a longtime Bush nemisis.

The president has appeared at Williams' side in church, at a Republican phone banks and, Monday, at GOP rallies in Tyler, Waco and Houston.

He wound up the 1990 political season trying to exact revenge on Richards, the shrill-voiced Texas state treasurer who held him up to public ridicule at the 1988 Democratic Convention.

''Where's George? Right here! Right here in Waco, Texas, supporting ... Clayton Williams,'' Bush told a GOP rally of several hundred people in Richards' hometown in central Texas.

The White House insists that the election will not be a referendum on the Bush presidency.

Maybe not. But it will go a long way toward setting the political landscape for 1992, when Bush will be up for reelection.

-30- 3608

#90310u0830 11/06/1990 ~United Press International

(NOV. 6) UPI - Supporters of Rabbi Meir Kahane say his death last night could lead to acts of revenge against Arabs in Israel and the United States. Kahane, the founder of the Jewish Defense League, was shot to death at a Manhattan hotel after he made a speech. The man alleged to have shot Kahane wounded two more people before he was shot on the street. He underwent surgery for a bullet wound in the chin. Police said the gunman was of Middle Eastern ancestry. An overflow crowd is expected to line the wide boulevards in the heavily Jewish sections of Brooklyn for Kahane's funeral this afternoon. .

Irv Rubin of Los Angeles, Kahane's successor as leader of the J-D-L, threatened retaliation in the death. Police in Israel stepped up patrols today

to prevent attacks on Arabs. Palestinian sources say two Arab residents of a remote West Bank village were killed today by a gunman driving a car with Israeli license plates.

Democrats hope to score big gains and Republicans hope for minimal losses in today elections. At stake in today's balloting is the entire House, one-third of the Senate and 36 governorships. The central question appears to be whether public anger with elected officials will translate into voter reaction against incumbents. Voter turnout was projected to be extremely poor, possibly the lowest since World War two.

Many voters in northern Michigan needed a shovel to get to the polls today. A winter storm that blew in from the west dumped as much as one foot of snow across the northern Lower Peninsula and eastern Upper Peninsula. Snow and chilly temperatures stretched from the Rocky Mountains through the Great Plains today. Winter weather advisories are in effect for much of central and southern Wyoming, parts of Colorado, and in northern Maine.

Saudi Arabia's royal family today sent mixed signals about a possible military strike against Iraq. Following a meeting with Secretary of State Baker, Saudi Arabian foreign minister Prince Saud al-Faisal told reporters that a peaceful settlement is ''in the hands of the Iraqis.'' After meeting with the prince in Jeddah, Baker flew to Cairo to meet with Egyptian President Hosni Mubarak.

British Prime Minister Margaret Thatcher told King Hussein of Jordan today that military action must be one option to resolve the Gulf crisis. British sources say Hussein repeated his previous appeals for a peaceful solution in the Gulf by means of ''dialogue.'' Thatcher and Hussein met for 50 minutes in Geneva before addressing a U-N conference on countering the greenhouse effect of global climate warming.

In Pakistan today, Nawaz Sharif, the head of the army-backed alliance that defeated Benazir Bhutto in last month's elections, was sworn in as prime minister. In a brief speech following his election, Sharif offered a ''hand of co-operation'' to Bhutto. The National Assembly earlier today elected Sharif as prime minister.

#90310u0874 11/06/1990 ~United Press International

CAIRO, EGYPT (NOV. 6) UPI - Saudi Arabia's royal family sent mixed signals Tuesday about a possible military strike against Iraq following a meeting with Secretary of State James Baker.

Baker is touring the region reportedly to drum up support among Arab leaders for a military option to end the 3-month-old standoff.

He flew Tuesday from Jeddah, Saudi Arabia, to Cairo, where he met with President Hosni Mubarak, a strong supporter of U.S. policy in the Gulf who has nevertheless indicated he prefers sanctions to military strikes.

Baker canceled a scheduled news conference after his talks with Mubarak, fueling speculation that the Egyptian president was not happy with the command structure in Saudi Arabia, where some 20,000 Egyptian troops are on the front line.

But a spokeswoman for Baker dismissed the speculation and described the talks as excellent. She added that the two men ''did discuss the command structure'' of the multinational force in Saudi Arabia but gave no details.

She also told reporters at Cairo airport that Baker discussed with Mubarak how to strengthen sanctions against Iraq as well as political and military options

still open and available in the battle against Iraq.

Prince Saud al-Faisal, Saudi Arabia's foreign minister, told reporters in Jeddah as Baker's departed that a peaceful settlement was ''in the hands of the Iraqis.''

The royal family has indicated in past statements that it was not eager to have the kingdom used as a launching pad to oust Iraqi President Saddam Hussein.

But Faisal had a more ambiguous message Tuesday.

''We reiterate, what we always said is that we are against the aggression that has happened in Kuwait,'' he said. ''We are one with the international community in standing against this aggression and with the United Nation's resolutions to see this aggression is ended.

''Within that reference, we would like a peaceful settlement, but that option is in the hands of the Iraqis.''

The prince also said U.S. forces in Saudi Arabia were under a joint command with kingdom officials, indicating the kingdom would not allow a strike from its territory without its permission.

The bulk of the 210,000 U.S. soldiers deployed to the Gulf following Iraq's Aug. 2 invasion of Kuwait are in Saudi Arabia, and the Saudi role in the military venture has been a touchy subject in the past.

Faisal denied that during Monday's meeting with Baker, King Fahd was called to discuss a time-table for military action against Iraq.

''We were not here to discuss military options, we were here to discuss how we can jointly contribute to the implementation of the United Nation resolutions '' he said.

Baker spent less than a day in Cairo and held talks at Cairo international airport with Chinese Foreign Minister Qian Qichen, who is in the Egyptian capital on his own tour of the region.

Baker's spokeswoman gave few details of Baker's talks with the Chinese official, but said both men held ''excellent discussions.''

It was not immediately clear if China would support military action against Iraq, although the spokeswoman quoted Qichen, whose country is a permanent member of the U.N. Security Council, as saying that Beijing would obey all Security Council resolutions.

The spokeswoman said Baker and his Chinese counterpart discussed a wide range

of subjects including ''economic, political and military issues.''

The talks between the two were believed by some observers to be evidence of China's growing role in the Gulf crisis.

Baghdad recently announced it would release all foreigners held hostage in Iraq and Kuwait if five countries, including China, promised to renounce any military option in the Gulf.

Qian was asked in Beijing before his departure early Tuesday if he believed the Gulf crisis could strengthen ties between Beijing and Washington, but he sidestepped the question. The two countries have had chilly relations since China cracked down on a student-led pro-democracy movement in the summer of 1989.

Baker's trip to Saudi Arabia Monday was his second in as many days. On Sunday he flew from the island state of Bahrain to a site near the Iraqi-Saudi border to meet with U.S. troops from the 1st Cavalry Division.

#90310u0888 11/06/1990 ~United Press International

MOSCOW (NOV. 6) UPI - President Mikhail Gorbachev will fly to Bonn Friday to sign a new accord between the Soviet Union and recently unified Germany, the president's spokesman said Tuesday.

Press Secretary Vitaly Ignatenko said that Gorbachev would go to Germany after speaking Wednesday at the Revolution Day military parade on Red Square and holding talks with Secretary of State James Baker on Thursday.

Gorbachev's trip to Germany has long been planned, but Ignatenko's announcement was the first disclosure of its date.

''Mikhail Gorbachev's first visit to a united Germany in a few days signifies the beginning of a new era in Soviet-German relations,'' the official Tass news agency said.

Ignatenko said that Gorbachev will travel to Germany at the invitation of Chancellor Helmut Kohl, whose own visit to the Soviet Union in July removed the last obstacles to German reunification.

Gorbachev, who less than a year ago dismissed German unification as impractical and unacceptable, is expected while in Bonn to sign a treaty outlining the new relations between the Soviet Union and the single German nation formed last month.

After signing the agreement, Kohl will take Gorbachev to his birthplace in Oggersheim in southwestern Germany, Ignatenko said. The two leaders went to

Gorbachev's birthplace near the southern Russian city of Stavropol during Kohl's summer visit.

Gorbachev's acceptance of German membership in NATO cleared the way for the divided country to re-establish the unity it lost after World War II. Kohl has pledged to provide Moscow with massive economic aid in return for its blessing of unification.

''There is no doubt that the U.S.S.R. will overcome its present difficulties and, because of its huge consumer market and energy reserves and raw materials remain one of united Germany's most desirable trading partners,'' Tass said.

''The strengthening of partnership bewteen these two European countries is fully in keeping with the tendency toward overcoming the split in Europe and building the foundation of a common European home,'' it said.

Ignatenko said that Gorbachev would speak Wednesday at the Red Square parade celebrating the 1917 Bolshevik Revolution, a task reserved in recent years for senior military officials.

Gorbachev will meet with Baker on Thursday in talks expected to focus on the gulf crisis and possible military action to counter Iraq's annexation of Kuwait.

OSHKOSH, WI (NOV. 6) UPI - A woman who claims to have as many as 22 personalities was expected to take the stand Tuesday in the trial of the man accused of sexually assaulting her.

In opening statements in Winnebago County Circuit Court Monday, District Attorney Joseph Paulus told the jury that old Mark Peterson, 29, of Oshkosh knew the woman was mentally ill when he had coffee with her and sexually attacked her in an Oshkosh park last June.

Paulus says the woman's neighbor told Peterson, ''She's vulnerable, don't take advantage of her.''

Peterson is accused of raping one of the woman's personalities - a lively 20-year old named Jennifer who likes music and dancing. The woman was expected to testify Tuesday.

Peterson told police he wanted to have sex with her because ''his wife wasn't giving him any sex,'' Paulus said. ''The reason he chose Jennifer was because she was innocent, she was old-fashioned and she turned him on.''

Defense attorney Edward Salzsieder compared Peterson to former President Richard Nixon, saying, ''We all felt President Nixon did not know about Watergate and didn't order it. Perhaps Mr. Peterson was immoral and stupid but that doesn't come in the scope of the criminal law.''

Inam Haque, the woman's psychiatrist, told the jury the victim suffers from a

mental disease and is not capable of judging her actions. Haque says the woman was traumatized when she saw her father crushed under a jack while he was working on his car.

CENTRAL SAUDI ARABIA (NOV. 6) UPI - If the U.S. Air Force has long-haul truckers, pilots like Maj. Dieter Remus and his flight crew most nearly fit the bill.

Remus, in real life a 40-year-old air traffic controller from Grand Island, N.Y., ferries people and cargo back and forth across the Saudi Arabian desert in a C-130 Hercules transport plane as part of Operation Desert Shield.

''We haul trash,'' said Sgt. Richard Runell, the flight deck technical chief on Remus' airplane. ''That's what we do. We take things anywhere, any place. It's not all trash, of course, but that's what they call it.

Runell's job on the flight deck is to make sure the instruments keep running, but everything was in proper repair on this flight so he sipped coffee from a throwaway cup while Remus, the co-pilot and the navigator listened to ground control chatter and the flight engineer monitored instrument readings.

''When we get busy ... then it takes this many people to get things done upstairs here,'' said Runell, of New Baltimore, Mich.

Runell said he was proud of the plane, which can haul 42,000 pounds of cargo or up to 92 combat troops. Both he and the plane, which sports a painting of the state of Michigan on the tail, hail from the Detroit area while the flight crew is from near Niagara, N.Y.

''It's a workhorse,'' Runell said of the Hercules. ''It takes a lot of punishment and it gives us a lot of mileage.''

Although willing to follow the plane wherever it goes, Runell, who served in Southeast Asia during the Vietnam War, said he wasn't excited about the prospect of combat and was hoping for a peaceful settlement of the gulf crisis.

''I'm not into this war thing,'' he said. ''Some of these young guys, they want to see action, but most of us don't.''

Airman 1st Class Reed Mohilewsky, a cargo loader in the rear of the plane, also was looking forward to returning home.

Mohilewsky, 19, of Belmont, N.Y., was halfway through his first semester at Buffalo State College when his unit was called up to go to Saudi Arabia.

''I went in and explained my situation to them and they were real sympathetic '' he said. The college agreed to apply 100 percent of the money he'd paid to his next semester's tuition.

He also left behind a girlfriend.

''She was upset at first, but she knew I was in the Air Force,'' said Mohilewsky, who was in Panama shortly after the 1989 U.S. invasion. ''You have to expect this sort of thing.''

''I was worried about coming over here, but I'd been in this kind of situation before,'' he added. ''I've seen a lot, especially for 19.''

The flight over the Saudi Arabian desert is mostly monotonous. The noise of the plane's engines is too loud for productive conversation so soldiers traveling in the cargo hold plug their ears and loose themselves in thought or sleep.

Down below the desert is barren and the wind whips the sand up into the atmosphere to form a thick haze. One soldier watched the terrain through a porthole and then shrugged. ''Well, time to get bored,'' he said, settling back into his seat.

But for Runell on the flight deck, the monotony is fine.

''For me,'' he said, ''the best flights are the boring ones.''

#90310u0966 11/06/1990 ~United Press International

(NOV. 6) UPI - Police in Israel stepped up patrols today to prevent attacks on Arabs following the killing in New York of militant right-wing politician Rabbi Meir Kahane. The Jewish Defense League founder was shot to death at a Manhattan hotel. New York police identified the assailant as a 34- year-old New Jersey man who approached Kahane following a speech and pulled a revolver. Kahane's body is to be flown to Israel tonight following a funeral in Brooklyn this afternoon.

President Bush heads back to Washington today after casting his ballot in his adopted hometown of Houston this Election Day. Bush has said repeatedly that he could do a better job if he had more Republicans in Congress. But he appears certain to soon be confronted by more Democrats. They are hoping to pick up perhaps two seats in the Senate, while the G-O-P may hold even. In the House, both sides say Democrats are likely to pickup eight to 15 seats.

Reports from Tokyo indicate former Prime Minister Yasuhior Nakasone's appeal to Iraq has apparently worked and the Baghdad government will release 70 of the Japanese citizens it now uses as a human shield against the rest of the

world. This word follows three days of meetings between Nakasone and his delegation of Liberal Democratic politicians and high Iraqi officials. Japan reports that 139 Japanese are held as shields and another 174 are trapped elsewhere in Ifraq.

There are indications that NASA may bend one of its own rules, ever so slightly, and get the shuttle Columbia into space by the end of the month. That would be some two weeks after the November 16th launch now set for the shuttle Atlantis. NASA rules normally say there should be a three-week period between shuttle launches but Kennedy Space Center Director Forrest McCartney says the agency is looking at ways to trim that time requirement.

In the Philippines, the military said today that communist guerrillas have kidnapped an American Protestant missionary in the northern part of the country. Harvey Brown Duane of Seattle, Washington, was driving a jeep along a highway about 260 miles north of Manila on October 24th when he was stopped and taken hostage at a checkpoint set up by the guerrillas. There's been NO ransom demand and NO explanation for the abduction nearly two weeks after it happened.

There's plenty of evidence that winter is doing its own brand of voting on this election day. Residents of Lander, Wyoming, count seven more inches of snow on the ground, pushing their total to 11 inches. Snow is also reported in Iowa and Nebraska. And all of this is moving east toward the East Coast where a winter weather advisory is in effect for northern Maine.

HOUSTON (NOV. 6) UPI - A parade of wreckers has hauled away more than 20 United Parcel Service trucks and vans to satisfy a former employee's multimillion-dollar judgment against the giant shipping company.

And lawyers for Gerry D. Dickens said the seizures of equipment have only begun. "They have refused to pay the judgment, so we are now in the process ... of trying to seize trucks, airplanes and other items until we collect $6.4 million worth of their assets," attorney Michael Pohl said Monday. Dickens won the judgment from United Parcel Service Inc. after suing for discrimination in 1986.

Harris County, Texas, Precinct 1 constables also seized two airplanes, but they were released after it was discovered the aircraft were owned by a separate corporation, United Parcel Service Co. Inc.

A spokesman for the Greenwich., Conn.-based package delivery company, Bob Kenney, said UPS tried to post a bond Friday pending an appeal, but the district court failed to act on it. "We're continuing to operate without the vehicles, but we would like to have them back, naturally," Kenney said.

WASHINGTON (NOV. 6) UPI - The nation's 12 largest airlines improved their on-time service during September and received their fewest number of complaints about mishandled baggage, the Department of Transportation said Tuesday.

But, the department said, the overall number of complaints from passengers rose slightly in September to 769 from 734 the month before. Still, the figure represents a 30 percent improvement from the 1,109 complaints lodged in the year-earlier period.

The department said the airlines reported 84.3 percent of their flights arrived on time during the month, an improvement from 78.5 percent in August. These statistics, however, do not include flights delayed by mechanical problems.

Reports of mishandled baggage averaged 5.63 for every 1,000 passengers, down from 6.71 per 1,000 in August.

#90310u1038 11/06/1990 ~United Press International
HOUSTON (NOV. 6) UPI - Continental Airlines has pulled the Honolulu-Tokyo leg of its Houston-Tokyo flight off the auction block, just days after announcing

the route was among the assets that might be sold.

Hollis Harris, Continental's new chairman and chief executive officer, had told business leaders Thursday that Continental was considering selling its Pacific-region assets including its joint venture with Air Micronesia that serves islands in the South Pacific.

The Honolulu-Tokyo segment of the flight originating in Houston would be part of that package, he had said.

But on Monday, Continental spokesman Art Kent said the airline's executives have re-examined the package and decided with Air Micronesia executives to take that route out of any potential deal.

Continental and other U.S. airlines have been struggling with unbudgeted costs stemming from spiraling fuel prices since the Persian Gulf crisis began in August.

Continental, faced with monthly fuel bills that have soared $70 million since July, had considered filing for bankruptcy protection but instead opted to sell off assets and undertake whatever measures necessary to remain in business.

Harris said Friday Continental is reviewing a number of assets for possible sale, including its Chelsea Catering subsidiary and some European routes. The company also is considering selling and leasing back aircraft on order.

#90310u1039 11/06/1990 ~United Press International

NEW YORK (NOV. 6) UPI - The Allied Printing Trades Council met Tuesday to plan a media campaign to convince readers and advertisers to boycott the Daily News while federal mediators reopened contract talks at the struck tabloid.

The council announced Monday it had received a pledge of $2 million from members of the New York City Central Labor Council, representing 500 unions and union locals.

Council President George McDonald said most of the money would be used for a radio and television campaign against the tabloid.

The News published as usual on the 12th day of the strike but the Tuesday editions contained fewer advertisement than on any day since the strike began.

The News itself took a full-page ad offering a $5,000 reward to anyone providing information leading to the arrest and conviction of any persons for vandalism, property damage or theft of Daily News property or theats to Daily news personnel or vendors of the paper.

The paper was scarce in midtown Manhattan and was being given away by the News at several busy locations in the city.

''We are giving them out as samples for people who might want to read them,'' said Lisa Robinson, a News spokeswoman.

As the strike of nine unions at the News went into its 11th day, Federal Mediator Ken Kowalski scheduled meetings this week with negotiators for the News and striking pressmen, electricians, machinists, and editorial workers. He had held meetings with the drivers' union last week.

''The drivers and management will meet again next week and then the paper handlers,'' Kowalski said. ''Negotiations will continue with all the different groups. We're keeping the lines open.''

Asked if he expected a settlement to come out of these negotiations, Kowalski replied, ''I don't want to comment on that.''

Labor negotiations at the financially strapped tabloid, the nation's largest, had been going on for 10 months before the unions struck Oct. 25. Management claims the main issues on the table are featherbedding, overstaffing and other labor abuses that is costing the paper $70 million a year.

McDonald said the $2 million ''war chest'' was tangible evidence of the commitment of the whole labor movement in the city and the state to the cause of the unions at the News.

''They know the News has not treated its workers fairly,'' McDonald said.

He identified the contributors as the unions for transport workers, Local 1199 of the Hospital and Health Care Workers, Teamsters, United Federation of Teachers, Communications Workers of America, United Auto Workers, and Bartenders, Waiters and Waitresses unions.

McDonald said members of the unions will have $1 deducted from their weekly paycheck to help fund the strike.

#90310u1062 11/06/1990 ~United Press International

WASHINGTON (NOV. 6) UPI - The Supreme Court Tuesday issued its first full opinion of the 1990-91 term, limiting the options available for recovering damages under general maritime law.

In a case that grew out of the 1984 stabbing death of a crew member aboard a ship docked in Vancouver, Wash., the court ruled that while family members of a dead sailor can sue for wrongful death, under general maritime law the grounds for such a suit are restricted.

The court said damages cannot be awarded to a parent for loss of society - the loss of a son or daughter' love and affection - in a general maritime wrongful death action, and that the same body of law does not permit the family of a dead sailor to receive his future earnings.

The court, in an 8-0 opinion, affirmed the judgment of the 5th U.S. Circuit Court of Appeals. The ninth justice, David Souter, was not a member of the court Oct. 3 when the case was argued and so took no part in the vote.

The case involved the July 18, 1984, death of Ludwick Torregano, stabbed 62 times by fellow crew member Clifford Melrose aboard the ship Archon.

The high court's decision clears up a discrepancy in lower courts over whether general maritime law permitted a survival action for the future wage loss of a dead sailor.

The 5th U.S. Circuit Court of Appeals had agreed that Apex Marine Corp., operator of the ship, was negligent and awarded Miles, Torregano's mother, $7,800 for loss of support and services and Torregano's estate $140,000 for his pain and suffering. Those awards were not affected by Tuesday's ruling. Torregano's parents were seeking additional compensation.

Justice Sandra Day O'Connor, writing for the court, said the decision is in keeping with the changing nature of maritime law.

''We no longer live in an era when seamen and their loved ones must look primarily to the courts as a source of substantive legal protection from injury and death,'' she wrote. ''Congress and the states have legislated extensively in these areas.''

''Maritime tort law is now dominated by federal statute, and we are not free to expand remedies at will simply because it might work to the benefit of seamen and those dependent upon them,'' O'Connor wrote. ''Congress has placed limits on recovery in survival actions that we cannot exceed.''

Mercedel W. Miles, et al., vs. Apex Marine Corp., et al

#90310u1097 11/06/1990 ~United Press International

LONDON (NOV. 6) UPI - Stock prices closed higher Tuesday in thin trading on the London International Stock Exchange as expectations of a cut in interest rates and lower oil prices boosted enthusiasm.

The Financial Times 100-stock index, which gained 19.4 points Monday, gained 19.7 points to 2,069.8. The narrower top 30 industrial average added 17.8 points to 1,598.9.

Volume amounted to around 386 million shares compared with 306 million shares changing hands on Monday.

Analysts noting the overall lack of buying interest said many professional investors remained sidelined ahead of Thursday's semiannual economic address by Chancellor of the Exchequer John Major on the state of Britain's economy.

The statement will center on the government's spending program for the coming fiscal year, and traditionally contains forecasts on such economic indicators as gross domestic product, inflation and the current account.

Market watchers said a forecast by oil industry analysts projecting lower oil prices for 1991 helped to boost trading morale.

Also, pressure continued to grow on British monetary authorities to implement

a cut in interest rates before Christmas to spur the economy into action and stave off a recession, analysts said.

Pearson fell 22 cents to $11.60 after Credit Lyonnais downgraded the communications and trading conglomerate.

Rechem gained 30 cents to $5.56 after the hazardous waste disposal company reported satisfactory pre-tax profits for the year.

J. Sainsbury, the retail group, added 4 cents to $5.89 amid speculation that its interim earnings report, due out later in the week, is expected to show sound sales.

Elsewhere, stock prices on the Frankfurt Stock Exchange closed lower in what market analysts described as technical trading.

The German Stock Index fell 16.71 points to 1,398.24.

#90310u1116 11/06/1990 ~United Press International

DETROIT (NOV. 6) UPI - The United Auto Workers' Chrysler National Bargaining Council approved the tentative three-year agreement it reached with the No. 3 domestic automaker last week.

Only three votes were cast against the pact at Monday's meeting of members of the council, which is comprised of local leaders at Chrysler Corp. plants.

Now that the council has approved the agreement, the union expects voting by Chrysler's 67,000 hourly workers to be completed within two weeks.

''This is the best contract we've ever negotiated,'' said Maurice Mitchell, a committeeman at UAW Local 1264 at the suburban Sterling stamping plant.

''If anybody doesn't support this, we're going to take him to the EAP (Employee Assistance Programs) rep and get him a saliva test,'' Mitchell told the Detroit Free Press in Tuesday's editions.

The centerpiece of the agreement is a $705 million commitment by Chrysler to maintain workers' income, even if sales slump and plants close.

The pact also increases wages and pensions, maintains existing health coverage provides stiffer penalties on excessive overtime, provides three annual Christmas bonuses of $600 each, and expands the union's input into Chrysler's decisions on where it will manufacture products.

The agreement allows Chrysler to boost production at its St. Louis minivan plant by 50,000 units annually beginning in July. Under current plans, three

shifts of workers will be assigned to a 35-hour work week but will receive 40 hours' pay. In two out of every three weeks, each crew could also be required to work a nine-hour shift on Saturday.

UAW President Owen Bieber referred to the 35-hour work week as ''a plum we were very happy to pluck off the tree,'' and said the union may pursue this goal in other negotiations.

Minivan workers voted against scheduling changes last November, in part because it would have reduced their overtime income. But in the new plans, overtime will be paid, for example, on the ninth and 10th hours of a scheduled 10-hour workday.

With the changes, minivan workers are likely to accept their new schedules, Bob Clipper, a committeeman at UAW Local 110 at the plant, told the newspaper.

#90310u1120 11/06/1990 ~United Press International

JERUSALEM (NOV. 6) UPI - Two elderly West Bank Arabs were shot and killed Tuesday in an apparent revenge attack by an Israeli settler following the assassination in New York of ultra right-wing Rabbi Meir Kahane.

Police stepped up patrols in Israel and put members of Kahane's Kach movement under surveillance to prevent further violence.

While expressing disagreement with Kahane's extreme anti-Arab views, Israeli leaders across the political spectrum denounced the Monday night killing in New York and called on Israelis to show restraint.

Members of the extremist Kach movement, founded by the American-born Kahane who advocated the expulsion of Arabs from Israel and the occupied territories, angrily warned of revenge attacks.

''There is no doubt there will be acts of vengeance. It seems to me there have been a few. ... I have no doubt the Arabs will deserve it because it is after all Arab arrogance,'' said Tiran Pollak, Kach director.

New York police said a suspect, El Sayyid Nosair, 34, of New Jersey, was arrested after Kahane, a former member of the Israeli Parliament, was shot during a speaking engagement. Nosair's nationality was not immediately known.

Several hours after the assassination, two Arab residents of the remote West Bank village of Lubban ash Sharqiyah were killed by a gunman driving a car with Israeli license plates, Palestinian sources said.

Villagers said an Israeli settler known to residents drove up to the village shortly before 6 a.m. and opened fire, killing Mohammed Hatib, 65, who was riding a donkey to his fields, the sources said. The gunman drove a bit further and fired again, hitting Mariam Hassan, 60, before he fled, they said.

"I saw him. He killed an old man," a villager identified as 22-year-old Jamal told Army Radio. ''The car came slowly. He killed the woman, our neighbor.''

The army put the area under curfew to search for suspects and declared the nearby city of Nablus a closed military zone. Police were investigating the killings, but authorities said the motive had not been established or no suspects detained.

Villagers said they believed the attack was carried out to avenge the death of Kahane.

Prime Minister Yitzhak Shamir's spokesman Avi Pazner said even those people who did not agree with Kahane's extremist views were shocked by his death.

''This is not something that will help peace and coexistence between Israel and the Arabs,'' Pazner said. ''We have to do our utmost now to show restraint

and responsibility so that there is no further outbreak of violence.''

Police warned Palestinian leaders and Arab members of the Knesset to be cautious and put well-known Kach activists under surveillance, Army Radio reported. Jerusalem, frequently the site of anti-Arab violence, was quiet Tuesday.

Kahane's funeral was to be held Wednesday in Jerusalem under tight security. Army Radio reported that Kach sources said disturbances might erupt after the funeral.

The Foreign Ministry described the killing as ''a deplorable act of murder'' and said the assassination of an Israeli politician ''is unprecedented on U.S. soil or anywhere else.''

Following its tradition of mourning deceased members, the Israeli Parliament, the Knesset, observed a minute of silence in remembrance of Kahane. Several left-wing and Labor members did not attend.

In a statement, Kach activists blamed much of the Israeli establishment for the 58-year-old rabbi's death.

''The murder that was carried out (Monday) is in fact a death sentence passed against Rabbi Kahane by the Knesset, the High Court and the media. His blood is on them,'' it said.

After four years in the Knesset, Kahane was barred from politics in 1988 by a special law outlawing racist parties. The High Court later upheld the ban. The Israeli media limited its coverage of Kahane because of his extreme views.

Since the 1988 general elections, Kach lost some of its support to another ultra right-wing party, Moledet, which won two seats in the Parliament on a platform of expelling Arabs.

Radwan Abu Ayyash, head of the Arab Journalists Association, said Kahane had been consumed by the fire that he had started, Israel Radio reported.

The spokesman for the Arab Local Councils in Israel, Mohammed Zeidan, condemned the killing.

''The Israeli Arabs regret the shedding of each drop of Jewish and Arab blood, but peace will not prevail in the area unless a Palestinian state is established alongside Israel,'' Zeidan said.

In April, the extremist leader went on trial on charges of sedition for calling Arabs ''a cancer spreading in our midst'' at a rally protesting an attack on Israelis. The trial was continued and no date for resumption set, a Justice Ministry spokeswoman said.

#90310u1128 11/06/1990 ~United Press International
NEW YORK (NOV. 6) UPI - New York City won a crucial battle Tuesday in its bid to remain the nation's financial capital, as the chairmen of four key commodities exchanges recommended the markets stay in Manhattan.

The chairmen of the Coffee, Sugar & Cocoa Exchange, the Commodity Exchange Inc., the New York Cotton Exchange and the New York Mercantile Exchange said they would recommend moving to a new office tower to be built two blocks north of the World Trade Center, not far from the heart of Manhattan's financial district, over a competing site across the Hudson River in New Jersey.

''We have voted to unanimously recommend to our industry the site at Greenwich and Murray streets, adjacent to the World Trade Center and the World Financial Center in lower Manhattan, as the new home for the commodities exchanges,'' the chairmen said.

The exchanges had long been considering moving out of their cramped World Trade Center offices and trading floor, which can longer match the markets' rapid growth.

''The four exchanges handled 74 million contracts last year, and we expect the constantly growing volume to reach 200 million contracts by the year 2000,'' said spokesman John Burke. ''The new building will have 43 stories, and the exchanges should be able to move in by 1994.''

The exchanges' relocation would affect 12,000 jobs currently based in New York City.

The other site under consideration was Jersey City's Harborside Financial Center.

''We met with the exchanges several weeks ago. It was not a situation where we were going to create a bidding war for either state,'' said Emma Byrne, spokeswoman for New Jersey Gov. James Florio. ''The governor and I understand we had an opportunity to talk about why New Jersey is attractive for business.''

Byrne added that Florio's office has not been formally notified of the decision.

The recommendation, made after what the chairmen described as ''lengthy analysis, review and discussion,'' was based on ''the needs and desires of our membership'' as well as time and money factors, they said.

New York City has been actively lobbying to keep the four exchanges -

including the Mercantile Exchange, the world's largest energy market - on Wall Street, where the depressed securities industry and the demise of Drexel Burnham Lambert and smaller firms have resulted in thousands of jobs being lost.

''The cooperation of the public sector was a critical factor,'' the chairmen said. ''Tax benefits and other forms of public support made available to us by New York City and New York state constitute a major commitment to a public-private partnership that will benefit the city and the region economically.''

Burke said the new 43-story, 1.2 million-square-foot building, which will be developed by Tishman Speyer Properties Inc., will include a 55, 000-square-foot trading floor - more than twice the size of the current floor at the four exchanges. The developer and the exchanges will each own 50 percent of the property.

The total area, including the trading floor and the related offices, will cover 225,000 square feet and be built at an estimated cost of $225 million, part of which will come from the public sector, Burke said.

''The trading floor's computer architecture will be designed by Space Management Programs, the leading company in the field, which already designed the computing systems for the Chicago Board of Trade,'' he said.

The boards of the four exchanges are to vote on the recommendation Nov. 29, and member firms are to vote on ratifying the decision sometime in December.

''If the boards and the members of the exchanges concur, our industry will have a new and dramatically improved facility within the exchanges' present financial capabilities,'' they said. ''Should the chairmen's recommendation not be approved, the exchanges will remain at the World Trade Center.''

Directors and members are expected to almost certainly support the move because the exchanges cannot further expand in their present location.

#90310u1166 11/06/1990 ~United Press International

NEW DELHI, INDIA (NOV. 6) UPI - A dissident leader from Prime Minister V.P. Singh's Janata Dal party received the backing of former prime minister Rajiv Gandhi Tuesday in his bid to form a new government.

Gandhi's Congress (I) Party at a late night meeting decided it would support the dissident leader Chandra Shekhar in his efforts to form a government, said V.N. Gadgil, a spokesman of the party.

''We have agreed to work together,'' Gandhi told reporters earlier at the conclusion of a meeting with Shekhar.

Shekhar, soon after his successful meeting with Gandhi, met with President R. Venkataraman and staked his claim to form the new government.

The Indian president said he would consider the request only after the lower house of Parliament on Wednesday decides the fate Singh's government.

Singh was to test his majority in the house. Many political analysts expect the embattled prime minister to fail in the attempt and step down from office.

Shekhar and former Deputy Prime Minister Devi Lal, both senior leaders in the Janata Dal, openly split with Singh on Monday, claiming they have enough supporters in the party to form a fresh government with the backing of the Congress (I) Party.

Party officials have said they would support a Janata Dal government headed by someone other than Singh.

The Janata Dal factions are more or less equally divided, but some political observers believe Shekhar might soon attract more followers.

To strengthen his support, Shekhar called on all of the smaller political parties represented in the lower house of Parliament to back him in his efforts to form a government.

''The numbers game is far from finished,'' said an editorial in Tuesday's Times of India newspaper. ''From all accounts the ranks of the Chandra Shekhar-led faction could swell over the next day or two. The movement away from the Janata Dal could accelerate further once the prime minister loses the vote of confidence in Parliament on November 7.''

The editorial said that Singh's expected defeat on Wedensday and the exit of his five-party National Front coalition government are a ''foregone conclusion.''

If the government falls, President R. Venkataraman, rather than call for early elections, may ask Gandhi to form a government, since the Congress (I) has the largest number of members in Parliament, the Times said. Gandhi has indicated he is not interested in taking the job at this time, although the option has not been entirely ruled out.

The crisis facing Singh's 11-month-old administration was sparked Oct. 23 when the right-wing Hindu Bharatiya Janata Party (BJP) withdrew its crucial support from his coalition government.

The BJP made the decision hours after its president, L.K. Advani, was arrested for failing to heed a government warning to halt a controversial campaign to relocate a 460-year-old Moslem mosque and begin construction of a temple to honor an important Hindu god.

Support of the BJP was necessary for the survival of the coalition government, although the party is not a member of the coalition.

Despite Advani's arrest, Hindu radicals pressed ahead with their plan to begin construction of the temple in the northern Uttar Pradesh state town of Ayodhya about 345 miles southeast of New Delhi.

Violence between police and Hindu devotees resulted in Ayodhya and in other parts of India, leaving more than 170 people dead.

Hindu radicals claim that the mosque that occupies the Ayodhya site was built by the Moghul emperor Babbar after he destroyed a temple marking the birthplace of Lord Rama, one of the most important gods in the vast Hindu pantheon.

Moslem leaders refute the claim and contend that no temple ever existed at the disputed place.

The Ayodhya dispute has been smoldering since February 1986, when a court agreed to allow Hindus to worship in the mosque. The move led to widespread communal riots in northern India.

#90310u1203 11/06/1990 ~United Press International

WASHINGTON (NOV. 6) UPI Before the vote counting even began Tuesday, the White House was braced for defeat and hoped to make the best of it.

''I expect we will claim victory no matter what happens,'' cracked press secretary Marlin Fitzwater.

Chief of staff John Sununu insisted that the races for more than 500 congressional and gubernatorial races, most of which were virtually conceded to Democrats, did not constitute a referendum on the Bush presidency.

But the outcome was certain to go a long way toward setting the political landscape for 1992, when Bush will be up for re-election.

Asked if Bush, his polls falling, had helped or hurt Republican candidates, Sununu chuckled and said, ''Yes ... helped.''

The chief of staff then pack pedaled away from reporters aboard Air Force One, and declined to respond further. Bush has been accused of undermining the GOP by breaking his ''no new taxes'' 1988 campaign pledge.

He privately signed the new tax-raising, revenue-cutting budget late Monday - in the dark of night.

The president and first lady cast their ballots in their adopted hometown of Houston Tuesday, and then returned to Washington to await the results.

As Bush waited in line at the voting station, he waved off a shouted question from a reporter on whether he would offer an Election Day prediction.

''Good way to go to jail,'' Bush said, presumably referring to the ban on politicking at voting stations.

Mrs. Bush, turning to reporters, said to the president, ''They're trying to get you arrested.''

A year ago, with Bush's approval rating nearly 80 percent and the economy seemingly strong, the administration boldly viewed Tuesday's election as a chance to gain seats in the Democrat-controlled Congress.

But with Bush's polls down to about 50 percent and the economy nearing a recession, Election Day shaped up as a big day for Democrats.

And Sununu was defensive.

''He (Bush) is not on the ballot so the coattail question is not appropriate '' he said. ''What there is, is the motivation factor.''

Bush spent the final week of the campaign trying to make a difference. He went on a cross-country political tour for fellow Republicans from Massachusetts to California.

''You can't make a winning campaign out of a campaign that couldn't win anyway '' said Sununu, adding that state races are decided on local issues, not by presidential politics. ''But what you can do is help in these marginal races by energizing the campaign to get out the vote.''

On Monday, while addressing a GOP rally in Tyler, Texas, Bush sounded off about Democrats and expressed his future hopes.

''I've listened to some of the campaign rhetoric coming out of the other side and it's sad.''

''It is pessimistic. It is downbeat. It is tired. And it's liberal,'' the

president said.

''We are the party with a vision for the future, the party with new ideas. And if America wants to change, I think we need a Republican Congress. And I wish we could get it now - tomorrow - and then watch what we can do.''

-30- 3292

#90310u1230 11/06/1990 ~United Press International

(NOV. 6) UPI - Secretary of State Baker is headed to Egypt as the next stop in a Mideast tour as he discusses possible use of the military option to end the three-month-old stalemate against Iraq. Baker was in Saudi Arabia yesterday where members of that country's royal family gave mixed signals about chances for a military operation. The royal family has, in the past, indicated it doesN'T want Saudi Arabia used as a launching pad to get Iraq out of Kuwait.

Questions are being raised about whether oil dependent Japan has made its own secret deal with oil-rich Iraq to win release of some of the Japanese citizens used as human shields by the Baghdad government. This follows word that Iraq will free 70 of its Japanese hostages following an appeal by former Japanese Prime Minister Yasuhiro Nakasone. He met with Iraqi leader Saddam Hussein on Sunday. Japan's Kyodo News Service reports the 70 are to be freed tomorrow.

New York City police are holding a 34-year-old man of Middle East background in last night's assassination of militant Israeli Rabbi Meir Kahane in a midtown Manhattan hotel. Little is known of the suspect other than he lives in Jersey City, New Jersey. Kahane, founder of the Jewish Defense League, was gunned down after delivering a speech. The suspect was shot and wounded by a Postal Officer.

A telephone caller to United Press International in New York City later said the Kahane slaying was in revenge for the death of 24 Arabs in the Temple Mount incident in October.

President Bush has ended a six-day campaign tour ahead of today's elections and is now headed back to Washington aboard Air Force One. That leaves all of the choices to voters as they head to the polls. White House chief of staff John Sununu talked with reporters about the day's events and says the election should NOT be viewed as a referendum on the Bush presidency. Democrats are NOT certain that is the case and they will be waiting to count the ballots once the polls close.

Anyone who bought an airline ticket since 1987 may be included in a class action lawsuit against major airlines if a federal judge decides that the class action label is the correct one to use. The case involves charges that the major airlines fixed prices through use of a computerized fare system, charges the airlines deny. The Atlanta attorney who filed the first suit back

in July, W. Pitts Carr, says 150- Million airline tickets were sold in 1988 alone.

#90310u1238 11/06/1990 ~United Press International

OVERLAND PARK, KS (NOV. 6) UPI - Yellow Freight System Inc. said Tuesday it would cut its fuel surcharge to 2.6 percent from 2.9 percent, effective Nov. 12, because of a recent drop in fuel costs.

The cut in the surcharge would equal 10 percent, the company said.

''The company's action to reduce its surcharge comes in response to a slight, but steady decline in fuel costs over the past two weeks,'' said Yellow Freight President and Chief Executive Officer George E. Powell III.

Yellow Freight's surcharge is based on the increased cost of fuel since July.

Powell said Yellow Freight would continue to monitor fuel costs and would make further adjustments depending upon the price of fuel.

Yellow Freight, a trucking company, serves all 50 states, Puerto Rico and six Canadian provinces.

#90310u1248 11/06/1990 ~United Press International

DUMFRIES, SCOTLAND (NOV. 6) UPI - A state-of-the-art security system that Pan Am launched in a blaze of publicity in 1986 was still not fully in place more than two years later when a bomb was smuggled aboard Flight 103, killing 270 people, a security expert said Tuesday.

Security chief Jim Berwick told an accident inquiry that sophisticated X-ray machines for detecting plastic explosives had not been installed at Heathrow or Frankfurt airports when the Boeing 747 exploded over the Scottish town of Lockerbie on Dec. 21, 1988.

The new security program named ''Alert'' was launched in June 1986 and hailed in publicity material as ''one of the most far-reaching in our industry.''

A ''message to air travelers'' claimed passengers, employees, airport staff and baggage would be screened ''with unrelenting thoroughness.''

It also stated that it would be operated by highly trained security experts and would use some of the most sophisticated screening devices in the world.

Berwick said these were ''fairly bold claims,'' and that the system had not been completely installed in the two airports through which the bomb may have

been smuggled.

''I know they were trying to order (the X-ray equipment) for Frankfurt in particular,'' he said. ''But there were difficulties not only on the part of the manufacturers but in getting the U.S. manufactured equipment into place.''

-30- 1594

#90310u1261 11/06/1990 ~United Press International

WASHINGTON (NOV. 6) UPI - A drug used commonly to reduce the risk of recurrences in about half of breast cancer patients may also help the other half, as well as people with other types of cancer, researchers reported Tuesday.

A new study found the drug, tamoxifen, apparently reduces levels of a protein that promotes the growth of cancer cells, indicating the drug may work by a previously unrecognized pathway and therefore be more useful than had beenthought.

The findings support preliminary indications the widely used drug may benefit more women than routinely receive it, and indicate studies should be done to investigate such value.

About 150,000 American women develop breast cancer each year and about 44,300 die from the disease, making it the second leading cause of cancer death.

About half of the women have a form of the cancer called estrogen- receptor positive, meaning the cancer cells are stimulated to grow by the hormone estrogen.

After undergoing surgery and chemotherapy, such estrogen-receptor positive women usually receive tamoxifen to reduce the risk of suffering a recurrence, which tend to be deadly. Tamoxifen blocks estrogen's action.

The remaining half of women usually do not receive tamoxifen because it was believed to offer little benefit because their cancer cells are not stimulated by estogen.

Some studies, however, had suggested such women might benefit from the drug, raising questions about exactly how tamoxifen works.

In the new study, published in the Journal of the National Cancer Institute, researchers measured the amount of a substance called insulin-like growth factor-1, or IGF-1, in the blood of 69 breast cancer patients who either received tamoxifen or a phony substitute.

Dr. Michael Pollak and his colleagues found the women who received tamoxifen had a significant reduction in blood levels of IGF-1, which can stimulate the

growth of all cancer cells.

''Everybody used to think it (tamoxifen) works by blocking estrogen receptors on the tumor cells. And indeed it may. But we have found that it's also doing something else. It's lowering the level of this growth factor,'' Pollak said.

Pollak said he believed the drug worked by blocking estrogen's action on the pituitary gland, which produces a substances called growth hormone, which in turn causes the liver to produce IGF-1.

''The question we're left with is: 'To what extent are all the benefits due to this newly discovered property of the drug?''' said Pollak, an assistant professor of oncology and medicine at McGill University in Montreal.

In an editorial accompanying the study, V. Craig Jordan of the University of Wisconsin Clinical Cancer Center in Madison said the findings ''open up exciting future possibilities'' for tamoxifen.

The newly discovered effect of tamoxifen ''provides sufficient evidence to require an evaluation of the need for tamoxifen maintenance in all women with a diagnosis of breast cancer,'' he said.

But in addition, researchers should study whether the drug and similar agents may help other types of cancer patients since IGF-1 can promote the growth of a variety of tumors, he said.

-30- 3413
#90310u1287 11/06/1990 ~United Press International
MOSCOW (NOV. 6) UPI - Double agent George Blake, who escaped from a London jail to his KGB handlers in the Soviet Union in 1966, said Tuesday: ''I would take the same path again.''

''I remain true to my ideals,'' Blake told the Communist Party newspaper Pravda at a time when the Soviet nation is abandoning those Communist precepts.

It was the first time that Blake, now 65, told Soviet readers of his transition from British intelligence officer to KGB agent, although he appeared on television two years ago, ending more than two decades of silence.

The master spy who chose Communism was trotted out on Pravda's pages on the eve of the Revolution Day holiday, which Russian democrats want converted into a day of mourning.

''If I had to live my life over again, I would chose the same path,'' Blake said. ''I desperately needed espionage work in my life. Time itself summoned me to serve socialist ideals.''

A photograph of Blake appeared on Pravda's front page, showing a balding, bearded man in a light-colored blazer and shirt open at the neck and looking self-assured and content with a broad smile. A smaller photo on an inside page shows him as a young sailor in the British Royal Navy.

The son of a Dutch mother and Anglo-Egyptian father, Blake won his spurs as a Dutch resistance fighter in World War II, served in the British navy and became a British diplomat after obtaining British citizenship in 1948.

Blake said he decided to become a Soviet spy while interned for 17 months as a British diplomat in a prison camp during the Korean War.

Concealing his conversion, Blake went back to working for British intelligence and in 1953 was sent to Berlin, where he exposed the entire British spy network, sending some 40 agents to death or captivity.

Blake told Pravda that his greatest exploit was tipping the Soviets to the existence of the Berlin tunnel in the 1950s, revealing the greatest espionage coup of the CIA.

Blake's cloak-and-dagger career came to a halt in 1961 when he was convicted as a Soviet spy in a 15-minute trial in London's Old Bailey court and sentenced to 42 years in prison.

The double agent only mentioned once his sensational escape from Wormwoods Scrubs Prison, saying he broke his wrist when he was scampering down a rope ladder.

Long believed to have been brainwashed by his North Korean captors, Blake spoke matter of factly of how he was given ''Das Kapital'' and other works by Karl Marx to read in captivity.

''I kept thinking more and more what I should do further,'' he said. ''I came to the conclusion: not to hinder in all ways the building of a new society in Soviet Russia and in other countries.

''That was clear - but how. I decided to get in touch with KGB officers. And I told them about my desire to work for the Soviet Union.

''From the very first meetings, I announced I did not want any privileges, any bonuses, any payments, or help in returning early. They agreed.''

Blake did not mention his Russian family, but he is known to have married a translator, Ida, and has a son, Misha, now 19.

In his 1988 television interview, Blake said he at first found it hard to adjust in the Soviet Union, had no friends and could not speak Russian well.

A Middle East specialist for the British, Blake said he still concentrates on that area in his work for a Soviet think tank, the Institute of World Economy and Internatioanl Relations.

Blake is the last of a diminishing band of British turncoats who found refuge and lived out their lives in their adopted land, including Kim Philby, Guy Burgess and Donald Maclean.

Blake frequently saw Philby, the famed ''Third Man'' in the most successful Soviet spy ring of all time, and socialized with MacLean, who was given a job in a Soviet research center.

In his last years, Philby also appeared on television. Finally after his death the KGB celebrated his life in a movie jointly made with the British, while Russians beset by daily shortages scratched their heads and wondered what had compelled him to leave the West.

#90310u1291 11/06/1990 ~United Press International

DETROIT (NOV. 6) UPI - A federal jury has awarded $7.5 million to a West Bloomfield, Mich., couple after determining that a poorly designed seat belt in their Toyota left the husband partially paralyzed after a 1988 crash.

Mindy Geller, a spokeswoman for Toyota's U.S. headquarters in Torrance, Calif. said Tuesday the Japanese carmaker was planning to appeal the verdict, reached Monday after six hours of deliberation following a 2 1/2-week trial.

''We were surprised,'' Geller said. ''We believe the evidence clearly showed the seatbelt... actually saved his life and performed precisely as it was designed. It is ironic that under these circumstances such a verdict was awarded.''

But jury foreman Robert Gura said the jury felt the seatbelt in the 1986-model Toyota 4Runner sport utility truck was ''defective by design.

''It doesn't provide the protection the federal law says it should,'' said Gura, a supervisor at Chrysler Corp.'s stamping plant in Warren, Mich..

Toyota's Geller could not immediately say if Toyota has since revised its seat belt design.

The lawsuit was filed by Cliff Sadlier, 58, who was partially paralyzed after he blacked out and struck a tree with his Toyota 4Runner Feb. 9, 1988.

Sadlier's attorneys claim Toyota had failed to install devices that prevent excess slack in the seat belts during an accident. Most American cars have that device.

Sadlier, who claims to be confined to a wheelchair most of the time, was in fact pronounced dead on arrival at St. Joseph Hospital in Pontiac, Mich., but survived the accident, his attorneys said. He is now able to walk a little with the aid of braces and crutches.

Sadlier, forced to close his auto transmission shop after the accident, claimed he was traveling 25 mph at the time of the crash, although Toyota's attorneys said he was going 40 mph.

Out of the total $7.5 million, the jury awarded $1.5 million to Sadlier's wife for partial loss of companionship.

#90310u1307 11/06/1990 ~United Press International

ROME (NOV. 6) UPI - Hungary became the first East European country to join a West European political organization Tuesday when it signed a treaty making it a member of the Council of Europe.

The ceremony took place at a meeting of foreign ministers of the Council of Europe, which is the oldest of the European organizations established after World War II. Its action raised the number of members of the Council from 23 to 24.

''This is a historic event for Hungary and for the Council of Europe, '' Hungarian Foreign Minister Geza Jezensky said.

Catherine Lalumiere, French secretary-general of the Council of Europe said: ''It is a capital stage in overcoming the divisions of Europe established at Yalta.''

In welcoming Hungary into the organization, the Council took its first concrete step toward fulfilling its ambition to become the main seat of the ''European House'', bringing under its roof all the countries of Western and Eastern Europe.

Poland was scheduled to join the Council after its elections, with Czechoslovakia following in early 1991,

''I am sure that, as with Hungary, the entry of the other East European countries can help them to consolidate their internal changes in a democratic sense,'' Jezensky said.

The Council of Europe, a consultative umbrella organization for European political coordination, is currently concentrating mainly on support for human rights.

After signing the membership treaty, the Hungarian foreign minister signed the Council's statute and the European Human Rights Convention. He also signed 13 other Council Conventions.

Foreign and Justice Ministers of the Council discussed the role of the Human Rights Convention Monday in the first day of the two-day ministerial meetings.

Prospects for the forthcoming summit meeting of the Conference on European Security and Cooperation (CSCE) to be held in Paris Nov. 19-21 dominated most of the foreign ministers' meeting Tuesday.

The ministers also confirmed their full support for U.N. resolutions on the Persian Gulf crisis and their solidarity with the European stand against the violation of human rights in Iraq and Kuwait.

#90310u1308 11/06/1990 ~United Press International

JOHANNESBURG, South Africa (NOV. 6) UPI - Law and Order Minister Adriaan Vlok imposed a curfew on a strife-torn black township Tuesday in a bid to quell fighting between political factions that has killed 25 people in six days.

Vlok said in a statement the 9 p.m. to 4 a.m. curfew, which also gives police wide powers of search and arrest, was aimed at the ''hooligans and criminal elements who prey on the law-abiding citizens'' of Bekkersdal, west of Johannesburg.

The African National Congress sent veteran official Wilton Mkwayi to Bekkersdal Tuesday to help end the battles, sparked last Thursday by gangs of youths arguing over whether to boycott end-of-year school examinations.

Mkwayi and a team of assistants were sent to ''plead for peace among the residents... the police have not been able to end this,'' an ANC spokesman said.

But the movement said later the effects of the delegation's visit ''will only be felt in the coming days.''

Groups have been fighting sporadically with axes, knives, clubs and gasoline bombs, police spokesman Capt. Eugene Opperman said, noting scores of families have fled their homes to avoid the violence.

He said police had arrested eight people and confiscated two AK-47 assault rifles and other weapons. But he conceded, ''We're not really finding it easy to stop this fighting.''

He said the figure of 25 dead could climb ''as we are finding bodies in isolated spots.'' Police estimate about 10 people have been injured.

Followers of the militantly black-consciousness Azanian People's Organization clashed with ANC supporters who had been urging students to boycott the exams, police said.

The tension in Bekkersdal reflects the national rivalry between the two movements.

AZAPO primarily accuses the more popular ANC of going soft on its struggle against white minority rule by holding preliminary power- sharing talks with the government.

(NOV. 6) UPI - British diplomats in Geneva report that Prime Minister Thatcher has told Jordan's King Hussein that the military option is still wide open when it comes to settling the Persian Gulf crisis. The two are in Switzerland attending a U-N conference on the environment.

Secretary of State Baker has left Cairo after meeting with Egyptian President Hosni Mubarak. Aides say the two discussed the command structure of the multi-national force now in Saudi Arabia. Egypt has 20-thousand crack troops on the front line along with other nations standing up against Iraq.

Defense Minister Moshe Arens says Israel will respond, in his words, ''without hesitation'', if it is attacked by Iraq. And he promises a quick response to any pro-Iraqi activity in the occupied territories. His comments came in an interview with a Paris newspaper that was published today.

Israeli leaders across the political spectrum are denouncing the killing of ultra right-wing Rabbi Meir Kahane in New York last night and they calling on Israelis to show restraint. Two elderly West Bank Arabs were shot and killed today in an apparent revenge attack by an Israeli settler following Kahane's assassination. Police have stepped up patrols in Israel and put members of Kahane's political movement under surveillance to prevent further violence.

In its first full opinion of the 1990-91 term, the Supreme Court today limited the options available for recovering damages under general maritime law. The decision clears up a discrepancy in lower courts over whether general maritime law permits a survival action for the future wage loss of a dead sailor. The ruling came in a case that grew out of the 1984 stabbing death of a crew member aboard a ship docked in Vancouver, Washington.

Wreckers hauled away more than 20 United Parcel Service trucks and vans to satisfy a former employee's multi-Million-dollar judgment against the giant shipping company. And lawyers for Gerry Dickens say that's just the beginning. Attorney Michael Pohl says the seizure of trucks, airplanes and other items

will continue until six-point-four- Million dollars worth of assets have been collected. Dickens won the judgment from U-P-S after suing for discrimination in 1986.

A Wisconsin woman who claims to have as many as 22 personalities is expected to testify today against the man accused of sexually assaulting her. Mark Peterson is accused of raping one of the woman's personalities... a lively 20-year-old named Jennifer who likes music and dancing. Prosecutors charged in opening statements yesterday in Winnebago County Circuit Court that Peterson knew the woman was mentally ill when he had coffee with her and sexually attacked her in an Oshkosh park last June.

WASHINGTON (NOV. 6) UPI - Yields declined on 3-year T-notes Tuesday to an average of 7.78 percent at the start of the government's quarterly refunding, the lowest since 7.77 percent Nov. 9, 1989, the Treasury Department said.

The department said it auctioned $12.6 billion of the 7 3/4 percent interest rate notes at an average of $99.921. At the last auction Aug. 7, the average yield was 8.10 percent.

The United States is offering a record $34.25 billion in notes and bonds in the three-day refunding to pay off securities reaching maturity and raise a total of about $10.725 billion in new cash.

The Treasury Department anticipates a record borrowing need of $97.7 billion during the current quarter to pay for government operations, including the massive bailout of the savings and loan industry.

Demand appeared strong for the 3-year notes offered Tuesday. The government received nearly $47 billion in tenders for the securities.

Of the $12.6 billion in bids accepted, $1.7 billion of the notes were awarded at the average price to Federal Reserve Banks ''as agents for foreign and international monetary authorities,'' the Treasury Department said.

The refunding continues Wednesday with an offering of $11 billion in 10-year notes. On Thursday, the government will also offer $10.75 billion in 29 3/4-year bonds and $12 billion in a 161-day cash management bill.

The minimum denomination on the 3-year notes is $5,000. The minimum denomination on the 10-year note and 29 3/4-year bonds is $1,000. The minimum purchase for the cash management bills is $10,000.

At a news conference last week, the department said it anticipated a net market borrowing need of between $47 billion and $52 billion in the first

quarter of next year.

INDIANAPOLIS (NOV. 6) UPI - Bindley Western Drug Co. said Tuesday it has reached an agreement to become the primary supplier to the pharmacies in Winn-Dixie Combo Stores.

The agreement with Winn-Dixie Stores Inc., of Jacksonville, Fla., effective last Thursday, covers 79 stores located in eight states. Bindley Western divisions located in Indianapolis, Atlanta, Charlotte, N.C., Orlando, Fla. and Dallas will provide the service.

Bindley Western Drug is a division of Bindley Western Industries Inc., one of the largest drug wholesalers in the United States with sales of about $2 billion, officers said.

The company serves customers in 39 states through distribution centers in Atlanta, Brockton, Mass., Charlotte, N.C., Dallas, Houston, Indianapolis, North Hollywood, Calif., Orlando, Fla., Phoenix, Ariz., and Stamford, Conn.

#90310u1381 11/06/1990 ~United Press International
NEW YORK (NOV. 6) UPI - Prudential-Bache Securities Inc., in the latest sign of retrenchment on Wall Street, is laying off at least two-thirds of its investment bankers, a source close to the company said Tuesday.

In addition to the dismissals of about 120 of its 180 investment bankers, James F. Crowley has resigned as head of investment banking at the firm, the source said. A replacement for Crowley has yet to be named.

A spokesman for Prudential-Bache, a subsidiary of Newark, N.J.-based Prudential Insurance Co. of America, declined to confirm or deny the reports. Crowley was unavailable for comment.

Prudential-Bache had spent more than $100 million over the past four years in an effort to build up its investment banking business. The company had been primarily a retail brokerage firm serving small investors.

According to a story in the Wall Street Journal Tuesday, Prudential- Bache Chairman George Ball sent a memo to employees Oct. 22 warning the firm needed to cut 1991 costs by $100 million. Prudential-Bache posted a loss of $51 million last year.

In the memo, Ball singled out the investment banking department, stating, ''we need to scale it to a size where it'll be profitable in 1991,'' the Journal

reported.

The newspaper also said Prudential-Bache will be trimming other departments in the next few months in an effort to shore up its financial strength and focus on its core business of selling stocks to individual investors.

The cutbacks are expected to include risk arbitrage, an area in which the firm plans to invest less capital.

In the first nine months of this year, Prudential-Bache ranked 42nd on Wall Street in the total value of completed deals such as mergers, spinoffs and stock repurchases, the Journal said. The firm is ranked in the top 20 in terms of the number of completed deals.

#90310u1391 11/06/1990 ~United Press International

ANKARA, Turkey (NOV. 6) UPI - U.S. Secretary of State James Baker arrived in Ankara late Tuesday on the fourth leg of his seven-day tour to discuss the Persian Gulf crisis with leaders in the region.

The secretary of state, whose plane landed at Ankara's Esenboga airport about 7:30 p.m. was welcomed by Foreign Minister Ahmet Kurtgebe Alptemocin. He made no statement to waiting journalists before being driven to the city.

Baker will hold talks Wednesday with Alptemocin and Prime Minister Yildirim Akbulut before meeting President Turgut Ozal. Officials said the meeting with the president could last more than 90 minutes.

A Foreign Ministry official said that although Ankara's official stance is that it does not wish to get embroiled in an all-out war with Iraq, public opinion in Turkey has undergone a dramatic change since Baker's last visit at the beginning of the gulf crisis.

Baker flew to Turkey from Egypt where made no statements to reporters. A spokeswoman denied Egyptian reports that Baker argued with Egyptian President Hosni Mubarak about a timetable for using military force against Iraq.

Baker arrived in Cairo earlier Tuesday from Jeddah, Saudi Arabia, where he discussed a wide range of issues with Saudi leaders including a possible military strike against Iraq and the command structure of the 17-nation U.S.-led multi-national force in the event of war.

Official statements after Baker's talks in the Arab kingdom, where Cairo officials say 20,000 Egyptian troops are stationed on the front line ahead of U.S. and other Western troops, did not mention a time- table for a military strike against Baghdad.

But Baker's decision to cancel a scheduled news conference after his talks with Mubarak fueled speculation that he had rowed with the Egyptian leader, who has been a staunch supporter of U.S. policies in the Gulf but prefers to exhaust all options including sanctions before contemplating any military option.

''There was absolutely no row between President Mubarak and Secretary Baker,'' Baker spokeswoman Kim Hoggard told reporters at Cairo airport.

''The President had to go to a meeting and Baker thought it wasn't appropriate to hold a press conference on his own on the president's territory.''

Baker spent less than a day in Cairo and held talks at Cairo international airport with Chinese Foreign Minister Qian Qichen, who is in the Egyptian capital on his own tour of the region.

Hoggard gave few details of Baker's talks with the Chinese official, but said both men held ''excellent discussions.''

It was not immediately clear if China would support military action against Iraq, although Qichen, whose country is a permanent member of the U.N. Security Council, said Beijing would obey all Security Council resolutions.

Asked if China would support a military strike against Iraq, Qichen peaceful means should be exhausted before war was contemplated.

''No country wants war ... we're trying to exhaust all peaceful options ... Secretary Baker (told me) the use of other (non-peaceful) means should not be ruled out, and it is our position that as long as there is hope for peace, we should strive for a peaceful settlement,'' Qichen told reporters.

Asked what he would tell Saddam Hussein when he visits Baghdad, the Chinese foreign minister said he had no desire to discuss any proposal with Iraq.

''I haven't brought any proposal ... I don't want to discuss any proposal ... my mission is to explore a possible peaceful settlement, so I will not deal with any specific proposal,'' he said.

Some observers saw the Sino-American talks as evidence of China's growing role in the gulf crisis.

Baghdad recently announced it would release all foreigners held hostage in Iraq and Kuwait if five countries, including China, promised to renounce any military option in the gulf.

Qian was asked in Beijing before his departure early Tuesday if he believed the Gulf crisis could strengthen ties between Beijing and Washington, but he sidestepped the question. The two countries have had chilly relations since

China cracked down on a student-led pro-democracy movement in the summer of 1989.

Saudi Arabia's royal family sent mixed signals about a possible military strike against Iraq Tuesday following a meeting in the Saudi Red Sea port and summer resort of Jeddah with Baker, who is reportedly touring the region to drum up support among Arab leaders for a military option to end the 3-month-old standoff.

Prince Saud al-Faisal, Saudi Arabia's foreign minister, told reporters in Jeddah as Baker departed that a peaceful settlement was ''in the hands of the Iraqis.''

The royal family has indicated in past statements that it was not eager to have the kingdom used as a launching pad to oust Iraqi President Saddam Hussein.

But Faisal had a more ambiguous message Tuesday.

''We reiterate, what we always said is that we are against the aggression that has happened in Kuwait,'' he said. ''We are one with the international community in standing against this aggression and with the United Nation's resolutions to see this aggression is ended.

''Within that reference, we would like a peaceful settlement, but that option is in the hands of the Iraqis.''

#90310u1405 11/06/1990 ~United Press International

CHICAGO (NOV. 6) UPI - Grain and soybean futures were mixed at the close Tuesday on the Chicago Board of Trade.

Corn and soybeans were at or near session lows following a day of choppy trading.

Crop estimates from Sparks Commodities were slightly bearish for soybeans and slightly bullish for soybeans. Private analyst Conrad Leslie was scheduled to release his November estimates later in the day.

The November crop report from the Agriculture Department is scheduled for Thursday.

Soybeans were at their lowest levels in several weeks. Gains made in an early rally were soon wiped out by professional selling, although losses were limited by commercial buying at the lows.

Corn was moderately lower on the lack of buyers and the weakness in the soy complex.

Wheat rallied on light selling interest and the sale of around 400, 000 tons to Morocco and the Philippines.

Basis levels were steady to firm.

At the close, corn was off 1/2 to 1 1/2, soybeans down 6 3/4 to up 3/4, wheat up 1 1/4 to 2 and oats off 1/4 to 1.

#90310u1429 11/06/1990 ~United Press International

NEW YORK (NOV. 6) UPI - George Steinbrenner, supposedly banished from all pertinent dealings with the New York Yankees, wants to participate in free-agent signings. The baseball commissioner's office says no thank you.

According to a report in Tuesday's New York Newsday, Steinbrenner said there is a clause in Commissioner Fay Vincent's decision removing him as the team's general partner allowing him to request permission to deal ''in matters of a

material and extraordinary nature.

''Certainly, when you're going to spend millions of dollars on a free agent, it's material and it's extraordinary,'' he told the newspaper. ''So I wrote a nice letter and asked for permission to be involved. No. 1, it's my money. No. 2, it's extraordinary. And No. 3, nobody's had more experience than I have with free agents. I've made all the right choices and I've made all the mistakes.''

Newsday reported that Vincent turned down his petition. Vincent is in Japan and Richard Levin, a spokesman for the commissioner's office, said Steinbrenner was aware of the restraints mandated by Vincent's decision when he signed it.

In another matter, an authority in court reporting says changes allegedly made in sworn testimony given by Steinbrenner and other Yankee officials during Vincent's investigation of Spira were ''totally improper.

Raymond DeSimone, a former president of the 30,000-member National Court Reporters Association, said in an affidavit ''in all my years as a shorthand reporter, I have never seen such an outrageous example of misconduct by a shorthand reporter.''

Steinbrenner filed papers in U.S. District Court, Southern District, last month, charging Esquire Reporting Company Inc. and its reporter, Philip Rizzuti, with allegedly ''illegally and secretly'' tampering with sworn testimony that he and other team officials provided during Vincent's investigation of the Spira case.

Lawyers for the company have called the charges irrelevant and stylistic in nature, and asked a federal court justice to dismiss the case on grounds their clients were representatives of Vincent's office.

Under Steinbrenner's July 30 agreement with Vincent, he is prohibited from suing the Commissioner or any of his representatives in the investigation.

(NOV 6) UPI - Major airlines are planning to raise fares on foreign routes at a time when international travel represents a bright spot for the industry, but airline spokesmen say the hikes should not dampen growth in their overseas markets.

''There is no way of knowing, for sure, what kind of impact there will be. (But) demand on these international routes has been very, very strong, so we would not expect any major impact,'' said Tim Smith, a spokesman for American Airlines in Fort Worth, Texas.

The fare increases, agreed upon this week in Geneva by airlines meeting under the auspices of the International Air Transport Association, range from 2 percent to 9 percent on routes linking the United States with Asia, Latin America, Africa and the Middle East.

The airlines have yet to agree on fare increases for routes linking the United States with Europe.

The hikes, effective Dec. 10 if approved by the U.S. and foreign governments, would represent the second such round of fare increases since the Persian Gulf crisis began in August, triggering a steep rise in jet fuel prices.

Airlines have raised domestic fares three times since August, for a total increase of about 15 percent, in an effort to recoup those costs.

Nevertheless, higher fuel prices have dimmed the outlook for the industry in general, driving down third-quarter profits at some carriers, like American, while triggering losses at others, such as USAir.

Smith said the impact of those fare hikes on domestic travel was unclear, because they coincided with the traditional post-summer decline in traffic and a general softening of the U.S. economy.

American's domestic traffic, while improved in September, generally has been flat for the year, Smith said.

''The flatness that we have seen for the year shows up on the domestic side,'' he said. ''Much of the growth is being driven by international demand.''

The same is true at United Airlines of Chicago, said spokesman Joe Hopkins.

''International (traffic) has been booming, particularly in the Pacific,'' where traffic is up 32.2 percent for the year, Hopkins said. By comparison, United's domestic traffic is up only 1.3 percent for the year, he said.

Hopkins declined to speculate on what impact, if any, the higher fares would have have on United's Pacific traffic.

But Elizabeth Hlinko of New York-based Pan American World Airways said holiday traffic and business travel should keep demand firm in the wake of the price hikes.

''International travel in general is our strong point. Especially in South America, we have noticed an increase, and we have adjusted our schedule to reflect that. We are certainly looking at Latin America as a very strong point that continues to grow,'' she said.

The fare increases agreed upon by the airlines include a hike of 7 percent on routes from the United States to South America, and 6 percent on the return.

Ticket prices for Pacific routes would rise 8 percent, except to Japan, where a previous agreement provided for a pending 7 percent increase, Hopkins said.

Prices for travel between the United States and Israel would rise 9 percent, as will travel from the United States to Saudi Arabia. However, travel from the Middle East kingdom, where about 250,000 U.S. troops are stationed, to the United States will rise only 2 percent, Hlinko said.

Fares from the United States to India, Pakistan and Kenya would rise 9 percent. Fares from India and Pakistan to the United States would rise 7 percent, while the return trip from Kenya would cost 6 percent more.

''These fare increases are of course fuel-related,'' Hlinko said. ''Generally, the traveling public is aware of the reason for the fare increase (and) I think people are understanding.''

ST. LOUIS (NOV. 6) UPI - Interco Inc., under a heavy debt load and facing ''balance sheet problems,'' said it has amended a preliminary registration filed with the Securities and Exchange Commission in connection with a restructuring of the company's outstanding debt and preferred stock.

The amendment, announced Monday, reflects a previously announced agreement in principle between Interco and steering committees for the company's lenders and holders of its notes and debentures.

As part of the restructuring, Interco would issue up to about $802 million aggregate principal of a new issue of 8.72 percent senior subordinated debentures due in the year 2000, about 98 million shares of Interco common stock, warrants to purchase 75 million shares of the stock at $2 a share and warrants to purchase 25 million shares at $4 a share. After the restructuring, Interco would have about 100 million common shares outstanding.

The restructuring plan also calls for amending Interco's existing bank credit agreement to extend the dates at which about $800 million principal in outstanding debt would be amortized. The bank credit agreement would provide working capital and letter of credit facilities, as well as term loans.

Interco also has said it would solicit acceptance of a prepackaged Chapter 11 reorganization plan if the restructuring cannot be accomplished otherwise.

''The restructuring will address Interco's balance sheet problems,'' said

Chairman Richard B. Loynd.

Specifically, the restructuring is designed to ''enhance the long- term stability of Interco'' and to ''permit us to capitalize on the inherent strength of the core companies, including well-established dealer networks, high brand recognition and efficient manufacturing operations.''

Interco is a major manufacturer of furniture and a manufacturer and retailer of footwear through core companies Broyhill Industries Inc., Lane Co., Converse Inc. and Florsheim Shoe Co.

#90310u1539 11/06/1990 ~United Press International

BOSTON (NOV. 6) UPI - Despite the threat of war in the Middle East, a large study of American soldiers found the U.S. Army can be a ''lifesaving environment,'' researchers said Tuesday.

The study found the overall death rates in 1986 for 781,000 Army personnel were only one-half those of a comparable civilian population, said Joseph Rothberg, a mathematician at Walter Reed Institute of Research in Washington.

The benefits of Army life were especially pronounced for black male soldiers, who had only about one-third of the mortality rate of comparable civilians, Rothberg and colleagues reported in the Journal of the American Medical Association.

Part of the mortality differences between soldiers and civilians undoubtedly has to do with the fact that recruits have to be healthy enough to pass medical exams to get into the Army, Rothberg said.

In addition ''these people in the Army all had jobs, they had access to free medical services, they had housing and they lived in an environment with strict regulations against substance abuse,'' Rothberg said. They also ''live in a social structure which says you resolve arguments without taking a gun and wasting somebody,'' he added.

Rothberg noted that the death rates are for the ''peacetime Army'' of 1986 when there was nothing comparable to the current military deployment in the Middle East. He acknowleged that if war breaks out, the Army mortality rate could change considerably. But ''hopefully, we'll be able to resolve this without killing each other,'' he said.

The study concluded that even people who consider the Army lifestyle too great an infringement on individual freedoms can use the example to determine what changes might be made in civilian society - such as substance abuse control and firearm regulations - to bring about similar reductions in death rates.

For black male soldiers, the homicide rate was only 9 percent that of black male civilians of the same age range while the black soldiers' death rate due to disease was only 18 percent of the comparable civilian rate, the study found.

The study included all members of the Army, who ranged in age from 17 to the mandatory 65 retirement age.

For white males, the overall death rate for soldiers was 64 percent that of comparable civilians and the homicide rate for soldiers was 32 percent of the civilian rate.

''The dramatically lower rate of homicide death among male soldiers and the large apparent protective effect of the Army with regard to black male soldiers may reflect the effects of a psychosocial environment'' in the Army that makes it easier to control behavior, the study said.

More research into the proportion of homicides in the Army compared to civilian life ''may reveal more details regarding ways the Army is a lifesaving environment,'' the study said.

However, the study also found that for the 10 percent or so of soldiers who are women, the Army can be a dangerous place.

While the overall death rate for women soldiers was 78 percent that of women civilians, the rate for white women soldiers was 39 percent higher than for white female civilians, the study said.

Among white women soldiers, the rate of death due to disease was 50 percent lower than for comparable civilians, but deaths from other causes were more than twice as high for the soldiers as the civilians.

For black women, the rate of death from disease among the soldiers was only 17 percent that of civilians. The death rate for other causes was 77 percent as high for soldiers as for civilians.

The fact that women soldiers overall died at a higher rate than women civilians from causes other than disease is primarily related to accidents, Rothberg said. The study said this ''is consistent with the idea that women, even in contemporary American culture, are not as likely to be exposed to dangerous heavy equipment'' in civilian life than in the military.

#90310u1564 11/06/1990 ~United Press International
NEW YORK (NOV. 6) UPI - Meir Kahane, the fiery rabbi who advocated driving all the Arabs out of Israel, was assassinated in a Manhattan hotel by a gunman police identified Tuesday as of Egyptian descent.

The alleged assassin, El-Sayyid Nosair, 34, was shot and captured shortly after the bearded rabbi was gunned down in front of horrified members of a Zionist conference. He was taken to Bellevue Hospital and place under guard.

The New York City Department of General Services said Nosair was employed by the city servicing boilers and air conditioners.

Police said it was unclear whether Nosair is a U.S. citizen, but said he is of ''of Egyptian descent.'' Nosair was listed by the city as having a Brooklyn address.

An anonymous caller to United Press International in New York said, ''The Kahane killing was in revenge for the death of 24 Palestinians in Israel. This

is just the beginning for the Zionists that speak out.''

Kahane, 58, a Brooklyn native who founded the militant Jewish Defense League and started Israel's extremist Kach movement, was shot to death Monday night during the Zionist conference at the New York Marriott East Side Hotel.

Kahane was shot once in the head and once in the chest at 9:05 p.m. and was taken to Bellevue Hospital where he died less than an hour later.

His funeral was arranged for 2:30 p.m., Tuesday, at Young Israel of Ocean Parkway in Brooklyn, where throngs began to gather in the early afternoon.

Later, a procession was scheduled to take Kahane's body to Kennedy International Airport for a flight to Israel.

In Israel, hours after the killing, two elderly West Bank Arabs were shot and killed in an apparent revenge attack by a Jewish settler.

Kahane was shot during a question and answer session folowing his speech, when, ''an individual who had been present throughout the entire speech approached Kahane and pulled a revolver,'' said New York Chief of Detectives Joseph Borrelli.

The assailant then ran from the conference room, shooting Kahane supporter Irving Franklin, 73, in the right leg as he tried to stop him.

The gunmen fled to the street, commandeered a cab and then jumped out a few blocks later. As he ran up the street he was confronted by Postal Police Officer Carlos Acosta.

He shot twice at Acosta, with one bullet being deflected by Acosta's bulletproof vest and the other striking him in the arm. The officer returned fire, hitting Nosair in the chin.

Nosair was taken to Bellevue Hospital, where he underwent surgery and was listed in serious but stable condition Tuesday morning, said hospital spokeswoman Karen Crowe. He was expected to remain hospitalized for about five days under heavy police guard, she said.

Franklin was in stable condition but not ready for immediate release, she said. Acosta was expected to be discharged later Tuesday.

Nosair is charged with murder, two counts of attempted murder and possession of an illegal weapon. A senior prosecutor, Assistant Manhattan District Attorney William Greenbaum of the Major Offense- Career Criminal Unit, was assigned to the case.

Nosair had held his $30,000 job as a city maintenance man since April 1988,

said department spokesman John Beckman. He listed ''Karen Nosair'' at a Brooklyn telephone number as the person to contact in case of emergency, but a woman who answered that number declined comment.

While right-wing Jews immediately called for revenge for the killing, Israeli leaders across the political spectrum urged restraint.

Police in Israel stepped up patrols to prevent reprisals against Arabs. In the past following Arab attacks on Jews, activists from Kahane's Kach Party frequently have been involved in anti-Arab reprisals.

Irv Rubin of Los Angeles, Kahane's successor as leader of the JDL, threatened retaliation in the death.

''We're not going to sit by and let a dirty, filthy Arab assassin assassinate Jewish people,'' Rubin said. ''The fact that they can cut down Rabbi Kahane in his prime is a foreboding to all Jewish people that there are dark days ahead.''

Kahane founded the JDL in the United States. The organization's allying cry, ''Never Again,'' refers to the 6 million Jews who perished in the Nazi holocaust.

The Brooklyn-born Kahane emigrated to Israel and in 1984 was elected to the Knesset, Israel's Parliament, on a promise to drive Arabs from Israel and the occupied West Bank. He also vowed to outlaw marriages between Jews and non-Jews in Israel.

Because of his radically anti-Arab views Kahane was not permitted to run for a second term in the Israeli Parliament.

#90310u1584 11/06/1990 ~United Press International

WASHINGTON (NOV. 6) UPI - A senior State Department official said Tuesday

that Iraq is ''the most sealed off nation in the history of the world'' and the economic sanctions are beginning to bite, but military action may still be required.

Jock Covey, deputy assistant secretary of state for Near East affairs, told a conference on non-governmental officials that Iraq is losing $2 billion a month in canceled oil sales and only about 10 percent of its former imports are getting through the internal economic sanctions.

''Iraq is more sealed off than any nation in history,'' said Covey, adding that Iraq leader Saddam Hussein ''may have begun to recognize that he's in a box.'' But Covey said it is still necessary to make it unmistakable that Iraq must withdraw from Kuwait.

Delegates at the conference of non-governmental organizations expressed unease over the prospect that U.S. forces might become involved in a large-scale military conflict without the consent of the American public. One delegate in the questioning compared the current atmosphere to 1965, a pivotal year for the deepening U.S. involvement in the war in Southeast Asia.

Another noted the agreement reached between Secretary of State James Baker and King Fahd of Saudi Arabia on the possible use of military force against Iraq. The delegate said that a decision that would not take into account other members of the United Nations would destroy the coalition of support that the United States has so carefully built up in the Gulf crisis.

''We're dealing with a different kind of psychology here,'' Covey responded. ''We must make it absolutely clear to Saddam Hussein that there's no way out of this box he is in. The military option has to be real, not just a piece of scenery on an MGM lot.''

Other questions at the conference expressed anxiety over one of the stated U.S. goals: guaranteeing the future stability of the Persian Gulf which, one delegate suggested, meant the physical removal of Saddam from power by means of military force.

''We will require some assurance that this won't happen again as soon as our forces vacate the area,'' Covey said.

The exact shape of that assurance, he said, ''is hard to predict at this point.'' The intention, he said, ''is to change the behavior of a major force in that area.''

Iraq, with some 1 million men under arms, is the largest military force in the Middle East and the fourth largest military organization in the world, after the Soviet Union, the United States and China.

But, he said, ''Nothing can ever again be the same in the Gulf area.''

That change includes, he said, decisions on the part of countries such as Saudi Arabia and Kuwait to invite in outside forces. These forces, in some form or another, will be a constant in the future equations of political stability in the region.

#90310u1605 11/06/1990 ~United Press International

MIAMI (NOV. 6) UPI - School bus schedules were thrown into disarray Tuesday when drivers honored an election day boycott called by black religious leaders in protest of the Dade County School Board's choice of a superintendent.

School officials said at least 70 percent of the county's 300 bus drivers did not report for work, forcing administrators to assign priority to younger children and to make many high school students find their own way to school.

''We kind of knew this was going to happen, we didn't realize it was going to be this significant,'' said school transportation chief Bill Stiernan. ''We had estimated that 50 or 60 percent of the drivers would not show up, not the 70 percent that happened this morning.''

Several students and teachers also adhered to the boycott, staged because the school board passed over Tee S. Greer, a black man with more than 30 years experience in the school system, in replacing former school superintendent Paul Bell, who died of a heart attack last month.

As Bell's successor, the board chose Octavio Visiedo, a Cuban who has been in the department about seven years.

In protest, black leaders asked people to stay home from work, keep their children out of school and to vote. They also asked people to vote against board members who did not want Greer as their superintendent. Blacks were said to be turning out at the polls in record numbers.

''Miami is the Selma, Ala., of the '90s and the South Africa of the United States,'' said Rev. Richard Dunn, a boycott organizer. ''This is an issue of racism and the time has come to face it.''

Organizers dismissed concerns that keeping students out of school could send them the wrong message about their education. They said the kids were getting

a valuable civics lesson.

''The lesson our children received today was more powerful than they would receive in any curriculum in any school,'' said the Rev. Victor Curry. ''In fact, by picking Mr. Visiedo over Dr. Greer the school board showed their own students more injustice than anyone else.''

At a noon rally attended by more than 3,000 people at the school administration building, black leaders called for Visiedo's resignation on grounds his appointment was unjust.

Four caskets were placed on the podium to represent the deaths of civil rights human rights, equality and justice and speakers said it was time to bring them back to life.

Earlier in the day some black churches became classrooms where children were taught about the civil rights movement.

Some of the children were among more than 1,700 students, or 70 percent of the student body, who stayed away from predominantly black Edison High School.

''For so long we've been sitting back and accepting things and we've allowed other things to happen that we don't agree with,'' said 12th grader Flai Livingston. ''And now this is they way that we come together as a unified body.''

At Edison Elementary School, also mostly black, about 60 percent of the 927 students showed up and 15 of the 75 teachers stayed home, officials said.

Blacks were harboring resentment with city politics this year even before the passing over of Greer for the school system's top job.

Miami also was the scene of several violent racial upheavals in the '70s and '80s involving police shootings of black men.

The black community is staging an economic boycott called when politicians refused to recognize or meet with Nelson Mandela during his June visit to Miami because he supported Fidel Castro. The Cuban president was among several people who supported the anti-apartheid leader during his imprisonment in South Africa.

''While Miami was not involved much in the movement in the '60s we are certainly sparking the movement of the '90s,'' Curry said.

-30- 4013

PALMER, AK (NOV. 6) UPI - An earthquake measuring 6.7 on the Richter Scale shook a relatively uninhabited area of Alaska's Aleutian Island chain Tuesday morning, officials said.

Paul Whitmore of the Tsunami Warning Center said the quake hit at 11:14 a.m. Alaska Standard Time. The epicenter was about 140 miles northwest of Atu, about 2,000 miles west of Anchorage.

Whitmore said a Coast Guard base and an Air Force Base are located in the vicinity of the quake, but no injuries or damage was reported.

The Tsunami Warning Center is named for the sometimes destructive ocean waves that can result from quakes.

SAN SALVADOR, EL SALVADOR (NOV. 6) UPI - The military arrested several organizers of a public transport strike Tuesday after rebels in the capital fired on army personnel from passing cars, union and armed forces officials said.

A spokesman for the Association of Salvadoran Bus Owners said members of the National Guard arrested three of the group's leaders early Tuesday as the men were organizing the bus strike.

''The worst thing is that they are being labeled as guerrillas,'' the spokesman said.

The arrests came after rebels of the Farabundo Marti National Liberation Front conducted a series of drive-by assaults on military personnel stationed in the capital late Monday.

The armed forces said one soldier and two civilians were killed. But rebels told local radio stations they had wounded 11 soldiers.

Carlos Mendoza, of the Salvadoran Red Cross, said two civilians died in crossfire. ''The two young men were apparently passing in a bus when the shooting started,'' he said.

Union leaders have complained in recent weeks that the government is carrying out a campaign of repression by labeling anyone who protests the deteriorating

economic situation as an ally of rebels who have fought a decade of civil war against successive U.S.-backed governments.

Last week, bus operators, gasoline station owners and workers for several government agencies called temporary work stoppages. The bus owners, striking for the second time in two weeks, are demanding increased operating subsidies or a fare increase.

LOS ANGELES (NOV. 6) UPI - Two of major players in this year's California air-fare war - American Airlines and USAir - have started cutting service in a move reflecting the problems of discounting, analysts said Tuesday.

"The service reductions are not surprising," said Lee Howard of Airline Economics, a trade consulting firm in Washington D.C. "With four or five airlines hacking away at one another, something was going to have to give."

American, of Dallas, recently eliminated service between San Francisco and John Wayne Airport in Orange County. However, it also recently opened a $21 million hub in San Jose, 45 miles south of San Francisco, and is operating 70 flights daily from there.

American spokeswoman Lise Olson said the carrier is not planning any significant service cutbacks. "California remains of critical importance to American," she said.

Washington D.C.-based USAir, which had been the market leader in California, has disclosed that it will reduce its daily intrastate California from 131 to 115 as of January 8, most of them on a Burbank-San Francisco shuttle. "It's not as if we're abandoning the California market," said spokeswoman Patricia Goldman.

Howard said that American and USAir are not likely to pull out of California at any time soon, but may eventually leave large parts of the market to the other major carriers in the state - United and Delta. "California is a very dense market, but you probably can't go on forever with that many carriers," Howard said.

Forecasts released by United this week show a sharp decline in daily departures from San Francisco by American and USAir between August 1988 and projected departures next month. For American, the figure will fall to 33 from 65, while USAir's will fall to 72 from 84.

Chicago-based United's daily San Francisco departures will reach 162 next month, up from 139 in August 1988, spokesman Joe Hopkins said. United also said American's projected daily California departures for next month will be 268, off from 331 in August 1988, while USAir's will be 325, off from 407. United's figure will be 413, up from 294 in August 1988.

The fare war along the routes between the San Francisco Bay Area and the Los

Angeles Basin erupted 18 months ago after several years of virtually no discounting. Regional carriers PSA, Western and AirCal were merged in 1986 and 1987 with USAir, Delta and American, respectively, and one-way fares often reached more than $150 for the one-hour 400-mile trip.

But discounter Southwest Airlines began cutting prices in the spring of 1989 by offering $29 one-way fares between Oakland and the suburb of Ontario, 40 miles east of Los Angeles. That prompted a round of fare-cutting, but prices that drifted upward again over last winter.

Southwest then sparked more discounting earlier this year when it added a $29 fare between Oakland and Burbank. American, United and USAir expanded service and began offering deep discounts; Delta, based in Atlanta, started up a shuttle service last June between San Francisco and Los Angeles.

"We feel we're doing quite well," said Vince Durocher, a spokesman for Delta. "To be honest, business is tight, but it's been encouraging to see the month-to-month gains on our San Francisco-Los Angeles flights." "We knew this was a tough market going in, but we're committed to staying in it," Durocher said.

All this has also meant a big increase in the number of north-south flights and claims of superior service by the carriers. United, which has a hub in San Francisco, began a half-hour shuttle earlier this year between San Francisco and Los Angeles and currently offers 54 flights daily between the two cities. Delta, with a hub and sleekly-designed passenger terminal in Los Angeles, has began an hourly San Francisco-Los Angeles shuttle last June.

An estimated 2.2 million passengers used the north-south route last year, making it only the sixth-largest in the nation - but the largest that does not include New York. Boston-New York was the most heavily traveled route, with 3.2 million passengers. Analysts have said that airlines have been willing to sacrifice low profits in California in return for a strong consumer recognition in the market.

"If you want to have a West Coast presence, San Francisco and Los Angeles are the keys," said Edmund Greenslet, an airlines consultant at ESG Aviation Services in Jacksonville, Fla.

Additionally, California is becoming more important for feeding the growing Far Eastern market, Greenslet said. Delta is building up its trans-Pacific service through some newly awarded routes, he noted.

"If you're going to make the maximum use of California, you need an international presence," Greenslet said. "That gives United and Delta a leg up on American and USAir." Delta's Durocher said that the carrier is planning to beef up international service in February, with new routes from Los Angeles to Tokyo and Nagoya.

#90310u1681 11/06/1990 ~United Press International
LOS ANGELES (NOV. 6) UPI - A federal judge has absolved Rock Hudson's insurance company of any liability in a $14.5-million judgment awarded by a jury to the late actor's lover, a lawyer said Tuesday.

U.S. District Court Judge A. Wallace Tashima, in issuing his ruling Monday, found that, because Hudson never told Marc Christian that he had AIDS, the actor's insurance coverage does not apply.

As a result, Aetna Casualty & Surety Co. will have to pay no part of the award.

Aetna also will not be responsible for the legal costs of the ongoing appeal of the February 1989 verdict against Hudson's estate, Aetna attorney Michael Leahy said.

In his ruling, Tashima said the insurance company was not liable for Hudson's behavior because the actor ''willfully'' engaged in ''high risk'' sex with Christian.

''Hudson was aware that he had AIDS and intentionally misrepresented his condition to Christian,'' Tashima said in his ruling.

''Assuming these facts to be true, a reasonable person in Hudson's position must have 'expected' that Christian would suffer either bodily injury or emotional distress as a result of Hudson's action,'' Tashima said.

Christian sued Hudson's estate after the actor's AIDS-related death in October 1985, claiming the actor lied to him by never telling him he had AIDS.

Hudson's $300,000 policy with Aetna provided for coverage for injuries related to slips and falls, assault and battery claims and even the transmission of disease such as herpes, providing that neither party knew of the possibility of infection beforehand, Leahy said.

''In essence, what the court said was that Hudson's actions were so extreme as to violate public policy and, by doing that, he forfeited his coverage rights '' Leahy said.

Leahy said the ruling, apparently the first of its kind, could have an impact on the lifestyle of people with AIDS nationwide.

''If you have a communicable disease, and you lie about it, you're going to pay for it yourself,'' Leahy said.

Attorneys for Hudson's estate had argued that the policy should pay for the

judgment because Hudson had no intention of injuring Christian.

The estate also is demanding that the judgment be paid by another of Hudson's insurers, the Chubb Group, with which the actor had a $2.1 million policy.

#90310u1702 11/06/1990 ~United Press International

NEW YORK (NOV. 6) UPI - The dollar recovered a bit in New York trading Tuesday from the steep dive it took the day before, with some dealers pointing to buying of the currency for the U.S. Treasury's quarterly refunding auctions.

Other traders said the rebound was technical, driven by profit-taking on ''short'' positions established before or during the dollar's decline Monday to a new postwar record closing low against the German mark.

Another possible factor was the assassination of Meir Kahane, a U.S.- born Israeli rabbi with strong anti-Arab views, in a New York hotel late Monday - a killing some believed could exacerbate the Persian Gulf situation.

Jack Griffin, an assistant vice president with Banque Indosuez, pointed to a ''technical move, because of the big selloff we've had.'' Players bought dollars to lock in profits made by selling the dollar short earlier, he said.

In late New York trading, the dollar was quoted at 1.4930 German marks, up from 1.4850 marks Monday, and 128.15 Japanese yen, up from 126.50.

Vicki Alicea, an assistant vice president with Manufacturers Hanover Bank in New York, said Japanese institutions ''were in buying dollars'' - apparently to take part in the Treasury's quarterly refunding auctions.

The Treasury sold $12.6 billion of 7 3/4 percent three-year notes Tuesday in the first round of a $34.25 billion quarterly refunding auction seen as a test of foreign interest in U.S. government securities.

The refunding's opening round went well, but analysts said sales later in the week of 10- and 30-year bonds were more critical.

Griffin didn't think the dollar's rise would last. ''People were content to take their profits, more than anything else, but it's definitely not a shift in direction,'' he said. ''I think we'll see a lower dollar from here.''

Other New York dollar rates: 1.2540 Swiss francs, up from 1.2500; 5.0080 French francs, up from 4.9810; and 1,121.50 Italian lire, up from 1,115.

The pound fell back to $1.9660 from $1.9735.

In Europe, the dollar closed lower in quiet trading on worries about the

outcome of U.S. election results and about possible cuts in American interest rates.

The dollar ''seems to have established a bottom, but it's still fundamentally weak over the fears of the interest rate coming down,'' said Tim Simpson, a currency dealer at Midland Bank.

In London, the pound firmed to close at $1.9750 against $1.9675 Monday. The dollar declined in Frankfurt, to 1.4858 German marks vs. 1.4942 Monday, and Zurich, to 1.2480 Swiss francs against 1.2615.

The U.S. unit also fell in Paris, Brussels and Milan to, respectively: 4.9990 French francs vs. 5.0135, 30.67 Belgian francs vs. 30.74, and 1,118.55 Italian lire vs. 1,122.

Earlier in Tokyo, the dollar initially fell against the yen but rebounded on orders to cover short positions and rumors of imminent hostilities in the Gulf to close at 127.20 yen vs. 127.35 yen.

In Zurich, gold closed higher at $379.50 an ounce vs. $377. In London, gold closed at $380 an ounce vs. Monday's $376.75.

Silver closed higher in Zurich at $4.20 an ounce from $4.15. Silver was also higher in London, at $4.23 an ounce vs. $4.18.

Republic National Bank in New York closed cash gold at $386.50 an ounce, up from $379.25 Monday. The New York Commodity Exchange settled contract gold at $386.60 an ounce, up from $379.50.

Republic closed cash silver at $4.26 an ounce, up from $4.225. Comex silver closed at $4.257 an ounce, up from $4.227.

#90310u1717 11/06/1990 ~United Press International

MOSCOW (NOV. 6) UPI - The Soviet Union, beset by an economic crisis, ethnic conflict and other grave problems, prepared Tuesday for the Revolution Day holiday that has become a test of legitimacy for Communist rule.

The Communist Party, resisting calls to scrap formal celebration of the 1917 Bolshevik Revolution, was to stage the annual Nov. 7 military parade at Moscow's famed Red Square, but festivities were canceled or curtailed in more than half the country's 15 republics.

''The Soviet Union is preparing for the traditional celebrations to mark the anniversary of the Great Socialist Revolution against a backdrop of crippling food shortages, near economic collapse and civil strife,'' the official Tass news agency said.

In a traditional ceremony on the eve of the national holiday, President Mikhail Gorbachev received the Moscow-based ambassadors of foreign countries at the Grand Kremlin Palace's St. George Hall.

The revolution in which Communists ended five centuries of czarist rule, Gorbachev told the envoys, ''radically changed the destinies of tens, hundreds of millions of our compatriots for several generations and had an immense effect on the course of world development in the 20th century.''

''Its goals - justice, equality and peace - feed the policy of perestroika and the revolutionary renewal of our society,'' he said.

But radicals in Moscow planned several anti-government rallies in defiance of a Soviet Parliament ban on protest demonstrations, activists in Leningrad declared a ''day of mourning'' and democratic forces in other cities vowed to resist or ignore official recognition of Communist rule.

In some areas, such as the secession-seeking Baltic republics, the tables were turned as Soviet military commanders ignored decisions by nationalist-controlled parliaments ''canceling'' the Revolution Day parades and went ahead with their plans to celebrate the holiday.

Military officials showed more sensitivity toward public sentiment in the restive Transcaucasian region, moving the annual parade in the Georgian capital of Tbilisi to a garrison and canceling its altogether in the Azerbaijani capital of Baku.

The local legislature in the third Transcaucasian republic, Armenia, also canceled its military display.

Defense Minister Dmitri Yazov said last month the Soviet government would not force the sort of confrontation that disrupted Nov. 7 festivities in at least four republics last year, and that parades should be held at less conspicious sites in areas with strong public opposition.

In the Ukrainian capital of Kiev, about 1,000 students marched under a sea of flags to Victory Square, settled in for the night and said they would lie down in front of tanks Wednesday morning to prevent the military parade scheduled at the site.

Nationalists running the city government in Lvov, regional center of the radical western Ukraine, declared Nov. 7 a normal working day and said it would be henceforth replaced as a holiday by Nov. 1, the day in 1918 when the Ukraine gained brief independence.

''This is a day of mourning for the Ukraine,'' said Vladimir Krasnotyev, a 41-year-old welder in Kiev. ''We lost our independence. Our freedom was

trampled on.''

The Moldavian Parliament canceled the military parade in Kishinev and banned alternative demonstrations in recognition of last week's ethnic clashes between Russians and Moldavians in which seven people were said to have died.

Tass, in defiant acknowledgement of the radical forces that now run republics and cities across the country, said: ''Celebrations will most likely be held in all republics in the union, no matter what their present authorities think of the events that took place 73 years ago.''

Radical deputies in Moscow were to hold a ''procession of the cross,'' a Russian Orthodox ceremony normally held on Easter, through the capital and ending at the home of Andrei Sakharov, the late physicist, human rights champion and legislator.

Russian Orthodox priest Gleb Yakunin, who was to lead the religious march, said it would be staged in the name of ''the innocent victims through all the years of the party apparatus' reign.''

NEW YORK (NOV. 6) UPI - The New York City Partnership met Tuesday with senior Morgan Stanley & Co. executives to ask the financial firm to keep its headquarters in New York.

"Morgan Stanley is considering signing an option for more than 1.3 million square feet of headquarters space in Stamford, Conn.," the organization of business and civil leaders said after the session. "Should Morgan Stanley exercise this option, the company should relocate all or most of its 4,100 employees out of the city."

Morgan Stanley said that, although plans to relocate to new premises were being studied, no decision has been made and a final determination is nowhere near being made.

"Basically, our major lease expires in 1998 and, in preparation for that, we are studying all the parameters involved," said a Morgan Stanley spokeswoman. "We have no plans to leave before our lease expires in 1998."

Among the people attending the meeting were businessman David Rockefeller, Cardinal John O'Connor, former Secretary of State Cyrus Vance and Mayor David Dinkins.

"We believe a decision by Morgan Stanley to relocate all or many of its 4,100 employees out of the city would have a serious negative impact on Morgan

Stanley's competitive position," the partnership said.

"Such a relocation might encourage other firms to more seriously consider this option, producing a 'ripple effect' which would have negative impact on all sectors of the business community during this period of economic uncertainty."

The partnership said that if Morgan Stanley were to move out of New York, this would create a negative precedent because it would be the first major securities firm to leave the city. Morgan Stanley's offices are on Sixth Avenue in midtown Manhattan. The partnership's meeting with Morgan Stanley executives came as New York City won a crucial battle in its bid to remain the nation's financial capital.

The chairmen of the Coffee, Sugar & Cocoa Exchange, the Commodity Exchange Inc., the New York Cotton Exchange and the New York Mercantile Exchange announced they would recommend moving to a new office tower to be built two blocks north of the World Trade Center, not far from the heart of Manhattan's financial district, instead of a competing site across the Hudson River in New Jersey.

"Today's decision by the four exchanges to remain in New York reaffirms our preeminence as the commercial and financial capital of the world," Dinkins said following the announcement.

#90310u1798 11/06/1990 ~United Press International

WASHINGTON (NOV. 6) UPI - Attorney General Dick Thornburgh said Monday the Justice Department's record of prosecuting more than 500 major S&L scofflaws in the past two years ''speaks for itself,'' but a review of the cases turned up some relatively small-time offenders.

Thornburgh said that since Oct. 1, 1988, the Justice Department has obtained 328 indictments charging 519 defendants with financial institution fraud. Of those indicted, Thornburgh said 355 have been convicted and 206 have been given prison sentences, while 102 are awaiting sentencing.

The defendants caused an estimated loss to the thrifts of $3.5 billion, and those convicted have been hit with $4.5 million in fines have been ordered to pay $211 million in restitution.

Estimates of the cost to taxpayers of the S&L crisis range from $150 billion to $500 billion.

Thornburgh said the new figures show his department is committed to identifying and prosecuting those responsible for looting America's S& L's.

''Our 96 percent conviction rate in major savings and loan fraud cases speaks for itself,'' he said. ''By utilizing the full scope of our enforcement tools ... the Justice Department can continue its pursuit of white-collar crime in the nation's thrift industry.''

But a United Press International examination of the cases included in the Justice Department's list of ''major'' prosecutions shows that it includes several relatively small-time offenders.

The Justice Department's list also includes some prosecutions of borrowers and bank tellers, hardly the ''kingpins'' often portrayed as the villians in the biggest financial catastrophe since the Great Depression. In addition, a few of the prosecutions do not appear to meet the department's own requirements for a major financial institution fraud.

For example, the Justice Department labeled as ''major'' the prosecution of Renato F. Duarte, 27, a financial service representative at Citicorp savings in Chicago. He was indicted April 26 of embezzling $119,000 through the use of unauthorized automatic teller cards, although the estimated loss was put at only $3,000.

And then there's Edgar A. Vales, a 59-year-old construction contractor. He was indicted Aug. 10 for lying about outstanding obligations to qualify for a $43,000 loan from Liberty Federal of New Port Richey, Fla.

Or how about Sherilane Sears, a 29-year-old branch manager at First Federal Savings Bank in Indianopolis, Ind. She also used ATM machines to withdraw $27,000 from dormant customer accounts. Indicted on Aug. 16, 1989, she was

sentenced to five years probation and ordered to pay $7, 500 in restitution.

Also on the Justice Department list is Leonard Villines, 39, a secretary-treasurer at Madisonville Building & Loan Association, Madisonville, Ky. He was indicted April 19 for using a $15,000 certificate of deposit as loan collateral twice. The amount of fraud alleged was $13,500.

''There seems to be a little bit of an overstatement there,'' said one Senate banking official familiar with the Justice Department's list. ''They may have padded the numbers.''

Justice Department spokesman Doug Tillett said even if a few of the cases appear not to be major, the department's overall record is a good one.

''It's possible that some of these lower players were included with the bigger cases,'' Tillet said. ''I'm not saying we're error-proof.''

But, he said, the list of prosecutions represent real cases and real convictions. ''Nobody's making this stuff up.''

Early on in the S&L scandal some in Congress accused the Justice Department of being slow to respond, and the department found itself without comprehensive information to refute the charges. A Justice Department official conceded the department had to scramble to come up with the figures on prosecutions to answer congressional critics.

Tillett said questions about a relatively few cases on the prosecution list amounts to ''a tempest in a teapot.''

Speaking Monday to a Washington meeting of 172 prosecutors and investigators, Thornburgh also announced an increase in the department's budget for collaring S&L cheats.

''With the additional $160 million in funding provided by the Congress, the department will be able to add even more investigators and prosecutors to our ranks,'' Thornburgh said.

''Our task is to ensure that those who have cheated our financial institutions and left the American taxpayer holding the bag not escape their just punishment.''

#90310u1832 11/06/1990 ~United Press International

WASHINGTON (NOV. 6) UPI - Partly in response to congressional charges of foot-dragging in the S&L debacle, the Justice Department compiled a 189 page report listing the ''major'' savings and loan prosectutions since Oct. 1, 1988.

While the report does name some top executives who made off with tens of millions of dollars, it also lists some relatively small-time offenses.

In addition, some on the list appear not to meet the department's own criteria

for ''major'' cases. The department defines major cases as falling into one of three categories: The amount of fraud or loss was $100,000 or more; the scheme involved several borrowers from the same institution; or the offender was an officer, director, owner or shareholder of the S&L.

Here are some of the smaller fry:

-Edgar A. Vales, 59, a construction contractor, was indicted Aug. 10 for lying about outstanding obligations to qualify for a $43,000 loan from Liberty Federal of New Port Richey, Fla.

-Peyton Johnson, 48, a salesman, was indicted Aug. 28 for falsifying a loan application. He was charged with inflating the value of two rental properties and filing a fake credit report. Although the amount of fraud alleged against four thrifts was $456,600, the actual amount depositors lost was only $53,279.

-Jon V. Karas, 46, was indicted Feb. 8, 1989, of faking loan applications to borrow $100,000 from S&Ls in Chicago. He was ordered to make $90,000 in restitution.

-Renato F. Duarte, 27, a financial service representative at Citicorp savings in Chicago, was indicted April 26, 1990, of embezzling $119,000 through the use of unauthorized automatic teller cards. The estimated loss, however, was put at only $3,000.

-Sherilane Sears, 29, a branch manager at First Federal Savings Bank in Indianopolis, Ind., also used ATM machines to withdraw $27,000 from dormant customer accounts. She was indicted Aug. 16, 1989, and was sentenced to five years probation and ordered to pay $7,500.

-Michael Robert Snyder, 36, vice president of Sioux Valley Savings and Loan, Cherokee, Iowa, was indicted July 13, 1989, and pleaded guilty to accepting a $7,160 mortgage insurance check. He cooperated with prosecutors, who won a conviction against the thrift's president, Jack Lee Odom, in a fee-skimming scheme that alledgedly cost the thrift $1.1 million.

-Leonard Villines, 39, a secretary-treasurer at Madisonville Building & Loan Association, Madisonville, Ky., was indicted April 19 for using a $15,000 certificate of deposit as loan collateral twice. The amount of fraud: $13,500.

-David H. Stewart, 40, a real estate developer, was indicted Jan. 25, 1990, for attempting to get $1.6 million in loans from 13 institutions in Louisiana. The amount of loss, however, was $52,000. He was sentenced to 10 years in prison.

-Sharon Newbill, 54, vice president of First City Federal Savings and Loan, was indicted Nov. 22, 1988, for embezzling $19,000 from the Lucedale, Miss., thrift and was sentenced to three years probation.

-Rebecca Luker, 50, a real estate agent, was indicted Nov. 16, 1989, for falsifying a loan application involving New Mexico Federal Savings and Loan of Albuquerque, N.M. Although the amount of fraud was alleged to be $120,000, the actual amount of loss was determined to be $10,000. She was sentenced to four years probation.

-Vladimir Kushner, 38, a meat and poultry wholesaler, was indicted Dec. 20, 1989, for forging checks of a neighbor. The alleged fraud totaled $112,000 against American Savings Bank and Bowerey Bank for Savings, both of New York City, but the actual loss was put at $12,000.

-Robert McMillan, branch manager at First Federal Savings and Loan of Pittsburgh, was indicted Sept. 27, 1989, for using creating a fictitious account. The loss was put at $46,000.

-Laura Stawinski, 32, accounting supervisor at Spring Hill Savings and Loan of Pittsburgh, was indicted May 23 for skimming $91,475 from customer accounts, although she returned the money before she was indicted. She received three years probation.

-Robert Candee, 38, an entrepreneur, was indicted Jan. 19, 1989, for writing $470,000 in checks on closed accounts. The estimated loss was $72,000. He was sentenced to a year in prison and three years probation.

-James Holbrook, a director of Summit Savings Association of Dallas, was indicted July 5 for taking $37,000 out of a customer's account to make a payment on a corporate jet leased by Summit's owner.

-James Meriwether, 43, and James Semrad, 42, were indicted Aug. 1, 1989, for a scheme to defraud Republic Savings and Loan Associaton of Milwaukee, Wis., of $28,000 each. The total estimated loss to Republic was $25,000. Semrad was given six months in prison, and Meriwether received six months probation.

#90310u1842 11/06/1990 ~United Press International

(NOV. 6) UPI - World oil prices rebounded sharply Tuesday in what appeared to be a market correction of the prior day's plunge, which had been triggered by news of higher output from Saudi Arabia and declining world demand.

''It was more or less a correction to Monday's market,'' when the U.S. benchmark West Texas Intermediate fell $2.04 to $31.96 a barrel, said Ernie Stamper, vice president of Ashland Oil Inc., Ashland, Ky.

On the New York Mercantile Exchange, WTI for December delivery rose 67 cents to end Tuesday's trading at $32.63 a barrel.

''The fundamentals of high Saudi production and a renewed recitation of lower demand were generally known last week,'' Stamper said. ''They really were not new.''

Traders Tuesday were ''reassessing'' Monday's sharp drop in that light, he said.

In an interview in Sunday's New York Times, Saudi Oil Minister Hisham Nazer was reported as saying daily Saudi production was now running at 8.2 million barrels and was expected to rise to 8.5 million by early next year, almost 3 million barrels higher than the 5.6 million-barrel- a-day output prior to Iraq's Aug. 2 invasion of Kuwait.

There also were reports Monday of declining world demand that echoed a Friday report issued by the International Energy Agency, set up by large industrialized nations to monitor global oil production and consumption.

The IEA estimated world daily oil consumption in the current fourth quarter would drop 800,000 barrels from previous forecasts because of both the rise in prices since the Kuwait invasion and slowing world economies.

Tom Bentz said Tuesday's rebound ''was more technical than anything else.'' Many traders buy or sell on ''gaps'' between previous highs and lows and the prices covered in a particular day's trading.

Usually, these gaps are filled during a trading day, Bentz said, and when they aren't the market often views these unfilled gaps as support or resistance levels.

The failure Tuesday to fill a gap at around $31.60 lent support to the market, Bentz said. ''We then rolled up and looked at $33 a barrel and couldn't get through that,'' the trader said.

Stamper said he couldn't detect any ''perceptible impact'' on the market from Arab-Israeli tensions that might flow from Monday night's assassination in New York of Rabbi Meir Kahane, a militant anti-Arab and founder of the Jewish Defense League.

On the Merc, home heating oil for December delivery gained 1.92 cents on the day to 86.38 cents a gallon after having lost 2.96 cents Monday. December unleaded gasoline edged up 0.21 cent to 87.75 cents a gallon. It fell 1.67 cents Monday.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent climbed 60 cents to $33.20 a barrel.

The United Arab Emirates' Dubai Light - the key OPEC crude from the Middle East shipped mainly to the Far East - also gained 60 cents, to $27.80 a barrel.

Conoco Inc., the Houston subsidiary of Du Pont, and Marathon Oil Co., the Findlay, Ohio, unit of USX Corp., both raised the posted price they will pay for crude at the wellhead by 50 cents a barrel to $31.50 a barrel for WTI.

WASHINGTON (NOV. 6) UPI - In Georgia, Sen. Sam Nunn, a Democrat, spent nearly $1.2 million in a re-election campaign featuring no opponent.

Not surprisingly, Nunn won re-election to a fourth term Tuesday.

Nunn's apparent strategy of spending freely to ward off potential future challengers also was employed by Sen. John Warner, R-Va., who spent $1 million and Sen. David Pryor, D-Ark., who spent $536,000.

In fact, the 1990 elections may be remembered not only for a handful of tough Senate and gubernatorial contests, but the extraordinary number of safe incumbents who spent millions of dollars in non-competitive races.

While only 11 senators faced serious challenges among the 33 Senate seats up for grabs Tuesday, incumbents outspent challengers by a 3-to-1 ratio, according to the most recent Federal Election Commission data.

The FEC figures, reported Tuesday by Common Cause, a citizens lobbying group, showed that Senate incumbents spent $107.7 million from from January 1985 through Oct. 17, while challengers spent $36.1 million.

In the House, the disparity was even wider. While only about a dozen House incumbents faced serious challenges, the 406 lawmakers seeking re- election spent $112.8 million since January 1989. The 331 challengers spent $24.3 million, FEC figures showed.

The huge gap was fueled by the increasing amount of money that incumbents are raising and the decreasing amount that challengers are able to collect.

During this election cycle, House incumbents have raised an average $17,400, or 5 percent more than in 1988, while challengers received $7, 200 or 8 percent less than in 1988, the Common Cause report said.

In the Senate, incumbents raised an average $211,500 more than in 1988, or 5 percent, while challengers raised an average $105,700 less in the same year, or 7 percent.

Incumbents facing only token opposition, such as Sen. Phil Gramm, R- Texas, raised an enormous amount of money during this election cycle.

Gramm collected $15.3 million, more than any Senate contestant, in a race against Democratic challenger Hugh Parmer, who managed to raise only $1.6 million.

In the House, Rep. Robert Dornan, R-Calif., spent $1.2 million, more than any of his colleagues. His opponent raised and spent less than $5, 000.

Meanwhile, political action committee contributions continue to account for a large percentage of total receipts.

House candidates collected $86.8 million of their total $207.6 million from PACs, while Senate candidates collected $39.8 million of their total $183 million from PACs.

In the House, 32 candidates received more than $350,000 each from PACs, while 34 Senate candidates raised in excess of $600,000 each from the groups.

Many of the closest Senate races featured uneven amounts of money spent.

Sen. Jesse Helms, R-N.C., spent $14.8 million in a tough battle against challenger Harvey Gantt, who spent only $4.5 million through Oct. 17.

But in Iowa, the site of another close race, incumbent Sen. Tom Harkin, a Democrat, spent $4.9 million, while Republican challenger and Rep. Tom Tauke, spent $4.3 million.

#90310u1870 11/06/1990 ~United Press International

NEW YORK (NOV. 6) UPI - Stocks closed lower in light trading Tuesday, pressured by profit taking and late program selling after three sessions of gains.

The Dow Jones industrial average, which rose 11.39 Monday, lost 17.08 to close at 2485.15.

Among broad market gauges, the New York Stock Exchange composite index fell 1.28 to 170.21 and Standard & Poor's 500-stock index fell 2.97 to 311.62. The price of an average share lost 22 cents.

Declines led advances 769-699 among the 1,972 issues crossing the NYSE tape. Volume was 141,130,000 shares, compared with 147,510,000 traded Monday.

The Dow industrials advanced almost 60 points in trading Thursday, Friday and Monday, and analysts said some traders and investors hungry for profits from the market's recent decline saw an opportunity to take them.

Analysts have said they expect to see investors capitalizing on rallies by selling issues, with the economy faltering and the crisis in the Middle East still unsettled.

"We had some profit taking," said Michael Metz, market strategist at

Oppenheimer & Co. "A lot of players haven't seen gains in the last month or so."

Metz also said the market's late slide was due to program selling, but he nevertheless was upbeat about the market's performance Tuesday from a technical standpoint. "Considering the rise we had late last week and this week, it was a pretty good showing," said Metz.

Tuesday's weakness also came against the backdrop of a rise in oil prices, with December crude oil futures closing up 67 cents at $32.63 a barrel. But Metz dismissed the rise as having much effect on stocks, saying fundamental factors of supply and demand seem to point to lower oil prices.

"Frankly, I think oil prices have diminished as a significant factor in the market," he said. "The supply-demand situation suggests lower oil prices, not higher."

Similarly, Tuesday's auction of three-year government notes, the first leg of the Treasury's quarterly refunding, did not seem to have much effect on the market.

Yields declined on the notes to an average of 7.78 percent at the start of the government's quarterly refunding, the lowest since a 7.77 percent yield Nov. 9 1989. "The real test will be how the long bond is received in the auction Thursday," said Metz.

On the trading floor, Browning-Ferris was the most active issue, plunging six to 24 1/4 after reporting a sharp drop in fiscal fourth-quarter earnings because of a special charge related to the settlement of litigation.

Panhandle Eastern followed, up 3/8 to 10 7/8. Fannie Mae was third, off 1/8 to 30.

Waste Management was also active, sinking two to 33. The company joined Browning-Ferris Monday in settling an antitrust lawsuit alleging price-fixing in the waste container business.

Alcan Aluminum was heavily traded as well, off 5/8 to 17 3/4. The company, along with an Australian company, is studying the feasibility of setting up a major alumina plant in Australia.

Elsewhere, Circuit City Stores plunged 2 7/8 to 11 3/8 in heavy trading after reporting a seven percent decrease in comparable-store sales for October. The company said it was disappointed by the results, which the chain said reflected consumer uncertainty about the economic environment.

Among the blue chips, International Paper gained 1/2 to 48 after agreeing to acquire Cookson Group's graphics business for about $215 million. AT&T lost

5/8 to 34 5/8, IBM was unchanged at 107 7/8, Eastman Kodak lost 1 1/8 to 39 3/8, and Coca-Cola lost 5/8 to 44 3/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 175,626,560 shares, down from 185,399,280 shares traded Monday.

Prices were mixed in light trading on the American Stock Exchange. The Amex Market Value index rose 0.57 to 292.15. Declines led advances 276-243 among the 798 issues traded. The price of an average share rose two cents. Composite volume was 10,941,800 shares vs. 10,663,000 traded Monday. Energy Service led the Amex issues, unchanged at 2 5/8.

The National Association of Securities Dealers composite index fell 0.23 to 340.53.

#90310u1880 11/06/1990 ~United Press International

(NOV 6) UPI - World oil prices rebounded sharply Tuesday in what appeared to be a market correction of the prior day's plunge, which had been triggered by news of higher output from Saudi Arabia and declining world demand.

''It was more or less a correction to (Monday's) market,'' when the U.S. benchmark West Texas Intermediate fell $2.04 to $31.96 a barrel, said Ernie Stamper, vice president of Ashland Oil Inc., Ashland, Ky.

On the New York Mercantile Exchange, WTI for December delivery rose 67 cents to end Tuesday's trading at $32.63 a barrel.

''The fundamentals of high Saudi production and a renewed recitation of lower demand were generally known last week,'' Stamper said. ''They really were not new.''

Traders Tuesday were ''reassessing'' Monday's sharp drop in that light, he said.

In an interview in Sunday's New York Times, Saudi Oil Minister Hisham Nazer was reported as saying daily Saudi production was now running at 8.2 million barrels and was expected to rise to 8.5 million by early next year, almost 3 million barrels higher than the 5.6 million-barrel- a-day output prior to Iraq's Aug. 2 invasion of Kuwait.

There also were reports Monday of declining world demand that echoed a Friday report issued by the International Energy Agency, set up by large industrialized nations to monitor global oil production and consumption.

The IEA estimated world daily oil consumption in the current fourth quarter would drop 800,000 barrels from previous forecasts because of both the rise in prices since the Kuwait invasion and slowing world economies.

Tom Bentz said Tuesday's rebound ''was more technical than anything else.'' Many traders buy or sell on ''gaps'' between previous highs and lows and the prices covered in a particular day's trading.

Usually, these gaps are filled during a trading day, Bentz said, and when they aren't the market often views these unfilled gaps as support or resistance levels.

The failure Tuesday to fill a gap at around $31.60 lent support to the market, Bentz said. ''We then rolled up and looked at $33 a barrel and couldn't get through that,'' the trader said.

Stamper said he could not detect any ''perceptible impact'' on the market from Arab-Israeli tensions that might flow from Monday night's assassination in New York of Rabbi Meir Kahane, a militant anti-Arab and founder of the Jewish Defense League.

On the Merc, home heating oil for December delivery gained 1.92 cents on the day to 86.38 cents a gallon after having lost 2.96 cents Monday. December unleaded gasoline edged up 0.21 cent to 87.75 cents a gallon. It fell 1.67 cents Monday.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent climbed 60 cents to $33.20 a barrel.

The United Arab Emirates' Dubai Light, the key OPEC crude from the Middle East shipped mainly to the Far East, also gained 60 cents, to $27.80 a barrel.

Conoco Inc., the Houston subsidiary of Du Pont, and Marathon Oil Co., the Findlay, Ohio, unit of USX Corp., both raised the posted price they will pay for crude at the wellhead by 50 cents a barrel to $31.50 a barrel for WTI.

#90310u1885 11/06/1990 ~United Press International

UNITED NATIONS (NOV. 6) UPI - Non-aligned countries in the U.N. Security Council Tuesday called for an Arab U.N. peace force in the Persian Gulf in a move to head off a possible war between Iraq and the U.S.-led multinational force.

The non-aligned countries called their move a ''peace initiative'' and proposed to get the whole United Nations involved in discussing the plan.

''The timing of this initiative is considered crucial as there is now rather feverish talk of the war option appearing in the media,'' they said in a letter inviting ambassadors from 17 countries to debate the plan Tuesday at the Malaysian mission to the United Nations.

The non-aligned - Malaysia, Yemen, Cuba and Colombia - said the objective of their plan is to get Iraq to comply with the 10 Security Council resolutions adopted since the Iraqi Aug. 2 invasion of Kuwait.

''A diplomatic initiative of this kind is needed to avert the outbreak of war '' they said.

The peace initiative is contained in a draft resolution to be discussed by the diplomats. It asked Iraq to comply with Security Council resolutions demanding the withdrawal of the more than 400,000 Iraqi troops from Kuwait, restoration of Kuwaiti sovereignty and release all hostages.

The government of Iraqi President Saddam Hussein rejected all those U.N. demands. The council retaliated by imposing a worldwide trade and arms embargo on Iraq and ordered air and naval blockade to enforce the sanctions.

The 15-nation Security Council has no immediate plan for another move against Iraq while U.S. Secretary of State James Baker was touring Persian Gulf countries to gain support for a ''new phase'' in the gulf crisis with all the military options remaining open.

The non-aligned countries proposed the council send a U.N. peacekeeping force made up of contingents from Arab countries ''to maintain law and order in Kuwait as Iraqi forces withdraw and during the re-establishment of the government of Kuwait and restoration of its effective authority.''

They asked Secretary-General Javier Perez de Cuellar to draw up specifics for setting up the force.

They proposed that all sanctions against Iraq ''shall immediately be lifted, including trade and financial transactions, and unfreezing of assets'' upon a formal certification by the council that Iraq ''has complied'' with demands to withdraw, restore Kuwait sovereignty and release thousands of hostages, some of whom used as human shields against possible attacks by the multinational force.

They said once Iraq has complied with the three demands, ''there would not be any foreign intervention, military or otherwise, against Kuwait and Iraq.'' And the council may consider to station U.N. military observers in both countries.

They called on Perez de Cuellar to mediate peace negotiations, the International Court of Justice to consider claims for war compensations against Iraq and asked Iraq, Kuwait and other gulf countries to make democratic reforms in their countries.

NEW YORK (NOV. 6) UPI - Dave Justice, the Atlanta Braves right fielder who hit 28 home runs this season, Monday was named National League Rookie of the Year Award by the Baseball Writers' Association of America.

Justice won by a 2-to-1 margin and became the third Atlanta player to capture the award. He received 23 of the 24 first-place votes cast by a panel composed of two writers from each NL city.

Montreal second baseman Delino DeShields received the other first- place vote and finished second. Justice had 118 points, DeShields 60 points and Cincinnati first baseman Hal Morris 13.

Rounding out the voting were San Francisco reliever John Burkett (12 points), Chicago pitcher Mike Harkey (7), St. Louis catcher Todd Zeile (4) and Montreal outfielders Marquis Grissom and Larry Walker (1 apiece).

Justice broke his cheek during spring training but went on to hit .282 with 78 RBI in 127 games. He belted 23 homers after the All-Star break. Reds Manager Lou Piniella likened his swing to Ted Williams'.

After recovering from his facial injury, Justice reported to Richmond of the International League for rehabilitation. The Braves recalled him May 16 to replace first baseman Nick Esasky, who was suffering from vertigo. Justice had played only one game at first in Triple-A ball before his promotion.

Justice was hitting .243 with 8 homers and 28 RBI in 68 games when the Braves traded Dale Murphy to Philadelphia Aug. 4. Justice returned to his natural right field position after the deal.

In August, Justice hit .301 with 11 homers and 29 RBI in 30 games. It was the biggest burst by a rookie since Oakland's Mark McGwire hit 11 homers in 15 games in May 1987.

On Aug. 7, he became the first Brave to hit two homers in two consecutive games.

Other Braves to win rookie honors were Earl Williams in 1971 and Bob Horner in 1978.

#90310u1899 11/06/1990 ~United Press International

WASHINGTON (NOV. 6) UPI - Attorney General Dick Thornburgh said Monday the Justice Department's record of prosecuting more than 500 thrift employees in the past two years ''speaks for itself,'' but a review of the cases turned up some relatively small-time offenders.

Thornburgh said that since Oct. 1, 1988, the Justice Department has obtained 328 indictments charging 519 defendants with financial institution fraud. Of those indicted, Thornburgh said 355 have been convicted and 206 have been given prison sentences, while 102 are awaiting sentencing.

The defendants caused an estimated loss to the thrifts of $3.5 billion, and those convicted have been hit with $4.5 million in fines and have been ordered to pay $211 million in restitution.

Estimates of the cost to taxpayers of the S&L crisis range from $150 billion to $500 billion.

Thornburgh said the new figures show his department is committed to identifying and prosecuting those responsible for looting America's thrifts.

''Our 96 percent conviction rate in major savings and loan fraud cases speaks for itself,'' he said. ''By utilizing the full scope of our enforcement tools ... the Justice Department can continue its pursuit of white-collar crime in the nation's thrift industry.''

But a United Press International examination of the cases included in the Justice Department's list of ''major'' prosecutions shows that it includes several relatively small-time offenders.

The agency's list also includes some prosecutions of borrowers and bank tellers, hardly the ''kingpins'' often portrayed as the villians in the biggest financial catastrophe since the Great Depression. In addition, a few of the prosecutions do not appear to meet the department's own requirements for a major financial institution fraud.

For example, the Justice Department labeled as ''major'' the prosecution of Renato F. Duarte, 27, a financial service representative at Citicorp Savings in Chicago. He was indicted April 26 of embezzling $119,000 through the use of unauthorized automatic teller cards, although the estimated loss was put at only $3,000.

Also on the Justice Department list is Leonard Villines, 39, a secretary-treasurer at Madisonville Building & Loan Association, Madisonville, Ky. He was indicted April 19 for using a $15,000 certificate of deposit as loan collateral twice. The amount of fraud alleged was $13,500.

Justice Department spokesman Doug Tillett that said even if a few of the cases appear not to be major, the department's overall record is a good one.

''It's possible that some of these lower players were included with the bigger cases,'' Tillet said. ''I'm not saying we're error-proof.''

But, he said, the list of prosecutions represent real cases and real convictions: ''Nobody's making this stuff up.''

Early on in the S&L scandal, some in Congress accused the Justice Department of being slow to respond, and the department found itself without comprehensive information to refute the charges. A Justice Department official conceded the department had to scramble to come up with the figures on prosecutions to answer congressional critics.

Tillett said questions about a relatively few cases on the prosecution list amounts to ''a tempest in a teapot.''

Speaking Monday to a Washington meeting of 172 prosecutors and investigators, Thornburgh also announced an increase in the department's budget for collaring S&L cheats.

''With the additional $160 million in funding provided by the Congress, the department will be able to add even more investigators and prosecutors to our ranks,'' Thornburgh said.

''Our task is to ensure that those who have cheated our financial institutions and left the American taxpayer holding the bag not escape their just punishment.''

#90310u1918 11/06/1990 ~United Press International

NEW YORK (NOV. 6) UPI - The nation's crude oil supplies rose last week for the first time in two months as imports surged by 800,000 barrels a day, the American Petroleum Institute reported Tuesday.

For the week ended Nov. 2, the API weekly industry survey found crude inventories rose 5 million barrels to 344.5 million barrels from 339.5 million in the prior week and stood above year-ago levels of 344.4 million barrels.

Crude supplies had fallen seven consecutive weeks as a result of Middle East imports drying up because of Iraq's Aug. 2 invasion of Kuwait and the U.N. embargo on any oil shipments from the two nations.

Only recently has greater output from Saudi Arabia and other nations that are

part of the Organization of Petroleum Exporting Countries begun to make up for 4.2 million barrels of Iraqi and Kuwaiti crude lost to world markets.

Daily crude oil imports last week shot up to 5.9 million barrels from 5.1 million in the previous week and approached year-ago imports of 6.0 million barrels a day, API said.

Inventories of distillate - used for home-heating oil and diesel fuel - stayed virtually level at 138.2 million barrels, compared with 138.1 million a week earlier, but remained well above year-ago levels of 120.6 million barrels.

Daily distillate production was steady at the previous week's 2.9 million barrels. Year-ago output was 3.0 million barrels daily.

Distillate imports fell to 240,000 barrels a day from 322,000 a day in the previous week but were near year-ago daily imports of 239,000 barrels.

Gasoline supplies edged up to 221.2 million barrels from 220.4 million in the prior week but were slightly less than year-ago levels of 222.8 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also edged up to 171.6 million barrels from 171.3 million barrels a week earlier and remained significantly higher than year-ago levels of 164.9 million barrels.

Daily gasoline production held steady at 6.8 million barrels, the same level as in the previous week but less than year-ago output of 6.9 million barrels.

Gasoline imports nosedived to 195,000 barrels a day from 386,000 in the previous week and were well below year-ago imports of 554,000 a day.

U.S. refineries operated at 84.5 percent of capacity last week, compared with 82.5 percent a week earlier and 87.1 percent a year ago.

Daily imports of all refined products slipped to 1.6 million barrels from 1.7 million in the preceding week and were below year-ago imports of 2.3 million.

#90310u1921 11/06/1990 ~United Press International

NEW YORK (NOV. 6) UPI - Heavyweight champion Evander Holyfield will make his first title defense against George Foreman April 19 or 26 at Atlantic City, N.J., Trump Plaza and Main Events Promotions announced Tuesday.

Sources close to the promotion said the site fee between $10 million and $12 million topped the offer of Caesars Palace in Las Vegas, Nev. Trump would have the first option on the winner's defense against top challenger Mike Tyson,

with the two-fight package worth about $25 million.

''Trump made the best deal,'' promoter Dan Duva said.

Holyfield, who won the title from James ''Buster'' Douglas Oct. 25, last week asked boxing's three governing organizations to sanction the optional defense against Foreman.

Bob Lee, president of the International Boxing Federation, said Tuesday he will ask his executive committee to consider the request. The IBF, World Boxing Association and World Boxing Council had asked on behalf of top challenger Mike Tyson that Holyfield make his first mandatory defense within 120 days of winning the title instead of within a year.

Holyfield had signed to fight Foreman, 42, for $20 million before he beat Douglas, and the IBF and WBA said they would not stand in his way. They said they granted Tyson's request for a title shot before Foreman was rated.

Douglas was a bloated 246 pounds for his defense against Holyfield. Lee called the disciplined new champion a ''ray of sunshine'' and stressed the organizations should not strip him of his title for fighting Foreman instead of Tyson. The WBC has stood by threats to strip Holyfield.

Holyfield is 25-0 with 21 knockouts and Foreman, who held the heavyweight title in 1973-74, is 69-2 with 65 knockouts.

#90310u1930 11/06/1990 ~United Press International

LOS ANGELES (NOV. 6) UPI - Stock in MCA Inc. rose Tuesday for the fourth straight day on continued speculation that its pending deal with Matshushita Electric Industrial Co. was likely to go through soon.

MCA closed up $1.625 a share at $63.375 Monday on the New York Stock Exchange. It had jumped $3 Monday after gaining $1.125 a share both on Thursday and Friday of last week.

''There is clearly a renewed expectation in the last few days that the deal is going through,'' said Steven Hill, an entertainment analyst with Sutro & Co. of San Francisco.

MCA has been in buyout talks with Matsushita executives for more than a month. Hill and other analysts have believed the deal is likley to occur eventually because of MCA's need to stay competitive on a world- wide basis.

The stock has been knocked down several times in recent weeks on reports that the talks had been suspended or that Matsushita did not want to pay more than $65 a share, despite forecasts that MCA's value is about $85 a share.

#90310u1937 11/06/1990 ~United Press International

AGANA, Guam (NOV. 6) UPI - Republican Joseph F. Ada Tuesday became the first governor of Guam to be re-elected to a second consecutive term, defeating the widow of the late Gov. Richard J. Bordallo.

Ada garnered 55 percent of the votes in unofficial returns, defeating Democratic Senator Madeleine Bordallo, whose husband served two non-consecutive terms from 1975 to 1978 and from 1983 to 1986.

Ricardo Bordallo shot himself to death Jan. 31, just hours before he was to board a plane for California to start serving a four-year federal prison sentence.

He was convicted in 1987 of bribery and extortion in connection with favors he had performed for a group of Japanese businessmen who had contributed $60,000 to his campaign.

Ada defeated Ricardo by nearly the same margin as the defeat over his widow, who currently is a senator in the Guam Legislature.

Earlier this year, Ada signed into law a measure that contained the most restrictive abortion curbs in the United States. The law banned all abortions except in cases where pregnancy threatened the women's life.

The Democrats retained their control of the 21-seat unicameral legislature in Tuesday's elections by a narrow 11-10 margin. The Democrats had a 13-8 majority before the election.

Incumbent Republican congressional Delegate Ben Blaz retained his seat in congress for a fourth term, in a landslide victory over Democratic challenger Ben Pangilinan.

There is no cap on the number of terms for the delegate or members of the legislature, but the governor may serve a maximum of two consecutive terms.

#90310u1958 11/06/1990 ~United Press International

ANAHEIM, Calif. (NOV. 6) UPI - Running back Curt Warner, who rushed for only 139 yards in limited duty with the Rams this season, was waived Tuesday by Los Angeles.

Warner, 29, spent his first seven seasons with the Seattle Seahawks before becoming a Plan B free agent and signing a contract reportedly worth $700,000 with the Rams last summer. He started just two games with Los Angeles and

carried only 49 times before losing his job to Cleveland Gary.

For his career, the former Penn State star gained 6,844 yards on 1, 698 carries with 56 touchdowns. He also caught 193 passes for 1,467 yards and seven touchdowns.

In other roster moves, the Rams activated Clifford Hicks from the physically unable to perform list and placed fellow cornerback Mickey Sutton on injured reserve.

Hicks injured his right knee in a game against New Orleans Nov. 26, 1989, and re-injured the same knee against New England in last year's regular-season finale. He underwent knee surgery in the offseason to repair his anterior cruciate ligament.

Sutton injured his left knee in last week's 17-13 victory over the Houston Oilers.

#90310u1959 11/06/1990 ~United Press International

SAN FRANCISCO (NOV. 6) UPI - Four straight quarters of losses and a battered stock price has made Businessland Inc., one of the nation's largest computer retailers, ripe for a takeover, analysts said Tuesday.

Businessland, with sales of $1.35 billion in its last fiscal year, has been badly hurt by a combination of management snafus, slowing U.S. computer sales, steep price discounting in the computer industry, and a weakening economy, analysts said.

The San Jose, Calif.-based company surprised Wall Street with a $19.9 million first-quarter loss Monday. Its stock price has plunged from a 52-week high of $11.875 to $1.50 a share at the close Tuesday. At that price, the company's market value is just $44.8 million.

Analysts say a number of major computer manufacturers and resellers have taken a hard look at buying Businessland, which despite its problems remains one of the dominant sellers of personal computers to Fortune 1000 companies.

''To my knowledge, a number of people have actually looked at it, so there is some likelihood that it may be a takeover candidate,'' said Bruce Lupatkin, a technology analyst with Hambrecht & Quist in San Francisco.

David Norman, Businessland's chairman and chief executive officer, acknowledged that the stock price raises takeover possibilities, but he said the company has not received any offers.

''The company has a book value of $5.50 a share, and that's a conservative

balance sheet, so (a takeover) is certainly something that is a concern,'' Norman said.

However, computer reselling is a specialized field that requires managers who know the business, Norman said. In addition, the company has a shareholder rights plan, or ''poison pill,'' to deter an unfriendly takeover, he said.

''At this point in time, I don't think it would make sense for an outsider to come in on a hostile basis,'' he said.

Among the companies rumored to have considered a purchase of Businessland are EDS Corp., the Dallas-based systems integration subsidiary of General Motors Corp.; Nynex Information Services, a unit of NYNEX Corp., the big Northeastern telecommunications firm; and unnamed U.S. and Japanese computer manufacturers that want to improve distribution in the United States.

An EDS spokesman said the company was not interested in a Businessland acquisition.

''We've had rumors of this come up before, and they are unfounded,'' EDS spokesman Peter J. McLaughlin said. ''We have had no discussions on this with Businessland.''

Businessland's primary values lies in the franchise it has built up among corporate computer buyers, analysts said. Businessland sells IBM, Apple, Compaq, Next and Wyse personal computers, as wells as laptops from Zenith Electronics Corp.

Analysts said it was hard to estimate what value Businessland's franchise has left, given the company's stream of financial problems.

''The problem is, what is there to take over?'' said Seymour Merrin, who tracks the computer industry for Merrin Information Services Inc. in Palo Alto Calif. ''Every day that passes it becomes more and more difficult to turn it around, and therefore less attractive.''

Businessland has been unable to stop a flow of red ink that began in the second quarter of fiscal 1990, ended Dec. 31, 1989.

In the fiscal year ended June 30, the company lost $23.1 million, compared with a gain of $32.9 million in the previous year. On Monday, it surprised analysts by reporting a $19.9 million loss for the first quarter on declining revenue of $308.9 million.

''This company is in such disastrous financial shape it's probably a Chapter 11 (bankruptcy petitioner) within a year if things keep going they way they have been,'' said Steven Ledger, a portfolio manager for Kayne Anderson Investment Management in Los Angeles.

#90310u2013 11/06/1990 ~United Press International

HOLLYWOOD (NOV. 6) UPI - Box-office receipts have topped $4 billion so far this year - but that's still about 2 percent behind 1989's record- setting pace.

Strong showings in October by ''Ghost'' and ''Fantasia,'' ''Pacific Heights'' and ''Postcards From the Edge'' kept sales from lagging and helped boost the year-to-date box-office to nearly $4.06 billion over the weekend, Daily Variety reported Tuesday.

Last year's box office, which hit $5.03 billion at year's end, had reached $4.12 billion at the same juncture. In 1988, the total at this point had hit $3.63 billion.

If upcoming releases do well during the six-week Christmas season, the year's box-office total could match last year's. The season's films generally produce about 13 percent of a year's sales.

The top 10 movies of the weekend, led by Carolco's supernatural thriller ''Jacob's Ladder,'' took in $31.1 milion, up 1 percent from the $30.8 million of the previous weekend but off 8 percent from $33.7 million for the year-ago weekend when Tri-Star's ''Look Who's Talking'' took in $11.5 million.

''Jacob's Ladder,'' which took in $7.5 million in its three-day debut, will face new competition next weekend from Universal's ''Child's Play 2'' and Orion's ''Dances With Wolves.''

For the week, the total domestic box-office reached $65.9 million, off from $69.2 milliion for the year-ago week, but up from sales of $51.5 million in 1988.

''Ghost,'' which became the year's biggest hit over the weekend, has now pulled in $180.6 million for Paramount. Disney's ''Pretty Woman'' is second with $178.1 million and New Line's ''Teenage Mutant Ninja Turtles'' follows at $133.1 million.

Four other films released this year have topped $100 million: ''Hunt for Red October,'' $120.7 million; ''Total Recall,'' $118.3 million; ''Die Hard 2,'' $114.6 million and ''Dick Tracy,'' $103.7 million.

#90310u2021 11/06/1990 ~United Press International

WASHINGTON (NOV. 6) UPI - U.S. farmers will be better off if the government's negotiators reject a world trade agreement rather than accept one created solely to disguise unresolved problems, a coalition of 29 farm and export groups said Tuesday.

The coalition, which included some of America's major farm organizations, issued a statement in response to the slow pace of negotiations on agricultural trade reform, a key issue in Uruguay Round of global trade talks. The talks are supposed to be concluded by the end of the year.

The farm and export groups blamed the lack of progress on intransigence on the part of the European Community.

''As we have stated on many occasions, we would view no agreement to be preferable to one that fails to make substantial improvements in key problem areas,'' the group said in a letter that cited Europe's export subsidies, variable tariffs and trade barriers.

Trade ambassador Carla Hills traveled to Geneva a few days ago to try to encourage action by the EC, which for weeks has been unable to agree on a final position paper. An unofficial EC proposal to cut domestic subsidies by 30 percent has been widely criticized as inadequate.

Agriculture Secretary Clayton Yeutter told reporters he planned to visit a number of European government leaders next week to seek a more flexible European position.

''As the deadline for (an agreement) approaches ... we are becoming

increasingly concerned that a final agricultural package may be fabricated to once again 'paper over' our differences,'' the farm groups said in letters to Hills and Yeutter that asked for U.S. negotiators to remain diligent.

The groups, which included the American Farm Bureau, the American Soybean Associaton, the American Meat Institute, the National Association of Wheat Growers, the National Grange, the National Cattlemen's Association, the National Corn Growers Association and several groups representing millers and exporters, said they might refuse to support an agreement that did not satisfy their needs.

#90310u2023 11/06/1990 ~United Press International

WICHITA, KAN (NOV. 6) UPI - Learjet Inc. said Tuesday it has been awarded an additional $15.4 million contract from the U.S. Air Force for logistical support of its C-21A fleet.

Parts and maintenance for 83 Air Force and Air Naitonal Guard aircraft would be provided by GLASCO, a Learjet subsidiary with employees at U.S. Air Force bases and overseas where C-21As are assigned.

Learjet last May received a $9.4 million Air Force contract covering support through the end of fiscal 1990. The contract includes four one- year options that could bring the total contract value to $140 million.

The option announced Tuesday was the first to be exercised.

The C-21A is the Air Force's version of the Learjet 35A.

#90310u2043 11/06/1990 ~United Press International

CHICAGO (NOV. 6) UPI - Private crop analyst Conrad Leslie Tuesday lowered his estimate of 1990 soybean production and raised his estimate of the nation's corn crop, although the changes were slight.

The Leslie-ADM Investor Services survey put the soybean crop at 1.883 billion bushels and corn production at 7.978 billion.

On a per-acre basis, the survey predicted an average soybean yield of 33.3 bushels, compared with a five-year average of 32.4 bushels. The estimated corn yield of 119.6 bushels would be just under the record 119.8 bushels in 1987.

The Agriculture Department's November crop report is scheduled to be released Thursday afternoon.

#90310u2112 11/06/1990 ~United Press International
BURBANK, CALIF (NOV. 6) UPI - The battle between home furnishings chains Ikea and Stor Furnishings, which have previously fought in the courtroom, will move to the cash register Wednesday as Ikea opens its first store west of the Mississippi River.

Ikea, a Swedish-based chain, will be invading Stor's turf as it opens its 88th store, a 240,000-square-foot complex near downtown Burbank, home to Walt Disney Co., Warner Bros. studios and NBC Television studios. Ikea has stores in 21 countries.

Stor, based in Industry, Calif., has opened three stores in Southern California in the last three years.

Both chains have Scandanavian-sounding name and specialize in ready-to-assemble furniture. But Stor ran into legal trouble with Ikea several years ago because of alleged copyright infringement.

Ikea claimed that Stor had copied its retail concept, store layout, merchandise mix, product labeling and catalog.

As part of a settlement between the two companies, Stor agreed to change parts of the catalog, eliminate a ''Swedish ballroom'' (a children's playroom full of balls) and not use Ikea's blue-and-yellow color scheme.

In the meantime, Stor has been establishing a foothold in the huge Southern California marketplace. Stor went public earlier this year with a 2.25 million-share offering that raised more than $20 million.

In its first quarter ended July 20, Stor lost $1.6 million on sales of $22.7 million. Stor also has said it would open a new store in Texas next spring.

James Stadtlander, president of Stor, said Tuesday that he harbors no rancor towards Ikea.

Ikea has said it expects to attract more than 120,000 customers to the Burbank store in the first week of operation.

-30- 1921
#90310u2210 11/06/1990 ~United Press International
WASHINGTON (NOV. 6) UPI - The volatile 1990 midterm election rolled to a close Tuesday as the vote counting began and candidates in both parties waited to see if voters were in a mood for a general house-cleaning.

Most observers were uncertain how the voters would respond to new taxes, the savings and loan bailout, environmental concerns, as well as the prospect of

an economic slowdown and possible war in the Mideast, but early returns did not indicate a major anti-incumbent sweep was in the works.

President Bush, who spent the last several days traveling around the country to campaign for Republican candidates, was back at the White House where he watched the election returns.

All 435 House seats, one-third of the Senate and 36 governors' offices were at stake in the midterm election, along with thousands of other state and local contests.

Democrats were sure to retain control of Congress, but a number of individual races were being fought down to the wire as several incumbents battled for survival.

The closest Senate race was in North Carolina, where three-term Republican Sen. Jesse Helms was challenged by Harvey Gantt, the black liberal Democratic former mayor of Charlotte.

Across the country in Oregon, Sen. Mark Hatfield, the last Republican liberal in the Senate, was hoping to fight off a surprisingly strong challenge from Democrat Harry Lonsdale, a political novice whose campaign stressed environmental issues.

Going into the election, Democrats controlled the House 258-175 with two vacancies and the Senate by a 55-45 margin.

Republicans have not had a majority in the House since 1953-54 and in the Senate since 1986. Analysts for both parties expected only minor changes in the House.

In many states some well-known incumbents had little or no opposition and were certain of re-election, including Sens. Sam Nunn, D-Georgia, John Warner, R-Va., and Strom Thurmond, R-S.C.

Shortly after polls closed in some states, Cable News Network also projected Republican Robert Smith as the winner of an open Senate seat in the Granite State and Republican incumbent Mitch McConnell as a winner in Kentucky.

Of the 36 states with gubernatorial elections, 20 currently are held by Democrats and 16 by Republicans.

The hottest of those battles were fought in California between former San Francisco Mayor Dianne Feinstein and Republican Sen. Pete Wilson, and in Texas between the GOP's Clayton Williams and Democratic State Treasurer Anne Richards. Voters in both states have witnessed nasty, often mud-slinging campaigns.

In Florida, former Democratic Sen. Lawton Chiles appeared headed for victory over incumbent Gov. Bob Martinez. Shortly after the polls closed, both NBC and CBS projected Chiles the winner.

Illinois, Michigan, Massachusetts and Ohio also had hard-fought gubernatorial races.

The outcome of the governors races will effect political fortunes for the next decade since the winners will have a big say in how the state's congressional districts are carved up to fit the 1990 census.

In addition to choosing from among candidates, voters in 42 states were deciding the fate of more than 200 ballot measures, including a huge tax rollback in Massachusetts and California's ''Big Green'' initiative, to ban many pesticides, certain chemicals and off-shore oil drilling.

Strategists in both parties were expecting the Senate to stay within one or two seats of the current 55-45 margin.

Going into the election, Republican Rep. Patricia Saiki appeared to have the best chance to unseat a Democrat, Sen. Daniel Akaka of Hawaii, who was named to fill the vacancy created by the death of Sen. Spark Matsunaga, also a Democrat.

In three other races - Oregon, Minnesota and North Carolina - the veteran Republican incumbents were in danger of losing their seats to almost unknown Democratic challengers.

In the North Carolina race, where Democrats accused the Republicans of using intimidation tacticis, the Justice Department announced it would investigate for possible violations of civil rights laws. The allegations stem from a ''ballot security'' program that sent out over 100,000 postcards warning voters about giving false information.

In Minnesota, Sen. Rudy Boschwitz, a Republican seeking a third term, was in a close race against political scientist Paul Wellstone.

In Iowa, late polls showed Sen. Thomas Harkin, the Democrat, holding a seven-point lead over Republican Rep. Tom Tauke, although Iowa is considered an unpredictable state.

None of the best-known House members were considered in serious trouble.

#90310u2236 11/06/1990 ~United Press International

BEVERLY HILLS, CALIF (NOV. 6) UPI - Embattled Columbia Savings and Loan Association, the target of a possible seizure by federal regulators, reported

a third-quarter loss Tuesday of $352 million, compared with a loss of $226.3 million for the same period last year.

The loss brings the insolvent thrift's nine-month loss to $781.8 million. The 29-branch thrift, which has been clobbered by declines in the value of its junk-bond portfolio, lost $591.1 million last year.

Columbia said in its announcement that most of the third-quarter loss stemmed from a sharp decline in the market value of Columbia's portfolio of junk bonds.

The third-quarter loss gave Columbia, once the nation's most profitable thrift a negative shareholders' equity of $709.8 million.

Columbia has been trying to sell its junk-bond portfolio, assembled by former Columbia chief Thomas Spiegel through Drexel Burnham Lambert financier Michael Milken, to avoid being taken over by federal regulators. Some analysts have estimated that it could cost as much as $1.5 billion to bail out Columbia if it is seized.

As many as eight groups have been reported to have made bids for the junk-bond portfolio, including several Wall Street firms. Regulators voided one proposed sale in September for $3 billion to Gordon Investment Corp., a Canadian investment group, because of the structuring of the deal.

Columbia said Tuesday that continued credit deterioration in the junk-bond portfolio resulted in a provision for credit losses of $154.5 million for the third quarter. It also lowered the value of its investment portfolio - which consists almost entirely of the junk bonds - by $226.1 million to account for further declines in market values of its investment.

That means that the value of Columbia's investment securities is now on the books at slightly more than $2.5 billion - about half what it was at the end of the second quarter of last year.

Columbia said its third-quarter losses were partially offset by a $50.3 million gain on the sale of its securities, mostly from the sale of Columbia's investment in Motel 6 L.P.

#90310u2239 11/06/1990 ~United Press International

MINNEAPOLIS (NOV. 6) UPI - The Minnesota Vikings said Tuesday they have signed running back D.J. Dozier to a contract.

Terms and length of the deal were not revealed by the club.

Dozier had been a conditional free agent and had played baseball in the New York Mets' farm system this summer.

Dozier is to begin practicing with the team tomorrow. The Vikings have requested that the NFL grant them a roster exemption for Dozier. The league has indicated it will grant the exemption, which means Dozier would not count on the roster for up to two games.

Dozier was the Vikings' first-round draft choice out of Penn State in 1987. In three seasons with the Vikings, he rushed 157 times for 631 yards and seven touchdowns. He also caught 31 passes for 286 passes and two TDs.

#90310u2325 11/06/1990 ~United Press International

(NOV. 6) UPI - Police in New York say an Egyptian immigrant charged with gunning down right-wing Rabbi Meir Kahane apparently was acting on his own- and was NOT part of a conspiracy to assassinate the anti-Arab figure. Authorities have tightened security for other Arab and Israeli organizations, including the media and airlines.

The 34-year-old suspect is heavily sedated and hospitalized under armed guard with a bullet wound in his jaw. He is charged with second- degree murder, attempted murder, assault, criminal possession of a weapon, criminal possession of a defaced weapon and unlawful imprisonment, the last for commandeering a taxi cab in a bid to flee.

Attorney General Thornburgh is defending the Justice Department's record against savings and loan scofflaws. Thornburgh says his department has prosecuted more than 500 major figures in thrifts in the past two years. However, a U-P-I review of what Thornburgh says are major cases finds some relatively bit players in the national scandal.

Iraq announced the release of more hostages today. They are Japanese, German, Italian, Portuguese and Swedish. The largest group is Japanese... 77 of them are being released after a personal appeal by former Prime Minister Nakasone. There are unconfirmed reports that former West German Chancellor Willy Brandt secured the release of a large number of German hostages.

The Alaska Volcano Observatory is warning that Redoubt Volcano has begun shaking and steaming ''vigorously'' and might erupt at any time. U-S Geological Survey specialist Thomas Miller said in Anchorage that there is ''a strong likelihood'' the more than 10-thousand-foot mountain could erupt within a few days.

The mountain is NOT the only thing shaking in Alaska today. An earthquake measuring six-point-seven on the Richter Scale shook a relatively uninhabited area of Alaska's Aleutian Island chain today.

#90310u2326 11/06/1990 ~United Press International
(NOV. 7) UPI - SPORTS TRANSACTIONS

BASEBALL

San Diego - Named Andy Strasberg vice president of public relations, Jim Ferguson media relations director.

Texas - Named Bobby Jones manager of Tulsa of Texas League and Oscar Acosta pitching coach at Tulsa.

Toronto - Traded pitcher Willie Blair to Cleveland for pitcher Alex Sanchez; traded minor-league pitcher Earl Sanders to Atlanta for minor-league pitcher Nate Cromwell.

BASKETBALL

Sioux Falls (CBA) - Waived forwards Deanthony Langston and Leo Parent; traded forward Steve Grayer to Cedar Rapids for a 1991 fourth-round draft pick and future considerations.

COLLEGE

National Association Of Intercollegiate Athletics - Announced retirement of Associate Executive Director Charles Morris effective January 1st.

New York University - Named Nancy Pajer women's assistant basketball coach.

FOOTBALL

Cincinnati - Placed safety David Fulcher on injured reserve; activated defensive back Eric Thomas.

LA Rams - Waived running back Curt Warner; activated cornerback Clifford Hicks; placed cornerback Mickey Sutton on injured reserve.

Minnesota - Signed running back D.J. Dozier.

New England - Released center Bob White; placed tight end Eric Sievers on injured reserve; activated defensive end Chris Gannon off physically unable to perform list.

Phoenix - Assigned nose tackle Craig Pattterson to practice roster.

Pittsburgh - Activated defensive lineman Karl Dunbar from physically unable to perform list.

HOCKEY

St. Louis - Recalled center Michel Mongeau from Peoria of International Hockey League.

NY Islanders - Assigned defenseman Wayne McBean to Capital District of the American Hockey League.

CLEVELAND (NOV. 6) UPI - The Cleveland Indians announced plans Tuesday to move their spring training camp to Florida in 1993 from Tucson, Ariz., after nearly 50 years in the desert, leaving only seven teams in Arizona.

The Indians signed a letter of intent with Citrus County, Florida, located along the the Gulf Coast about 70 miles north of Tampa. Details of the exact location of the planned spring training site were not made available.

The announcement Tuesday night followed a commitment earlier in the day from the Citrus County Commission for resort tax financing. Approval is still needed from the baseball commissioner's office and the American League.

''We are pleased and excited over the possibility of training our major and minor league clubs in Citrus County,'' Indians President Hank Peters said. ''We believe a Florida location, specifically Citrus County, will provide our Cleveland area and northern Ohio fans a greater opportunity to watch and follow the Tribe during spring training.''

Peters said the club was ''saddened'' to be leaving Tucson, the Indians' training site since 1947, but said location was the deciding factor.

The Indians said a recent survey found a strong majority of people from northern Ohio select Florida as the place they choose for vacation, a winter home or retirement.

''Tucson's western location is the only reason for our decision to relocate,'' Peters said. ''The Tucson area, training facilities, weather and fans are all first-rate. ... We are confident that another major league club will be ready to locate in Tucson when the Indians relocate.''

The Florida complex is to include a 7,000-seat stadium, four practice fields, and training and medical facilities. Construction is to begin next year.

The land is being made available to Citrus County by the Tamposi family, developers of the Citrus Hills in Central Florida as well as a number of major New Hampshire projects.

The Indians said a number of Florida sites were considered. The Citrus County site is less than two hours from seven Major League training sites.

#90310u2343 11/06/1990 ~United Press International

ATLANTA (NOV. 6) UPI - Lt. Gov. Zell Miller overcame the formidable media campaign of Republican state legislator Johnny Isakson and a vocal Libertarian candidate Tuesday to handily win the Georgia governor's office.

Miller, the longest-serving lieutenant governor in the nation, had 57 percent of the vote, compared with 42 percent for Isakson with 23 percent of the precincts counted.

Libertarian candidate Carole Ann Rand had 4,405 votes, or 2 percent of the total.

Miller, 58, succeeds Gov. Joe Frank Harris, who leaves office in January after serving the maximum eight years allowed under state law.

With Tuesday's results, Isakson must settle for being one of the most serious GOP gubernatorial threats since Bo Callaway won a plurality of the popular vote in 1966 against Lester Maddox and Ellis Arnall. The Legislature elected Maddox when no candidate won a majority of the popular vote.

Miller began his march to the governor's office by defeating five Democrats, including former Atlanta Mayor Andrew Young, to win his party's nomination earlier this year.

Isakson began running TV commercials criticizing the Harris-Miller adminstrations for excessive spending one day after the August runoff pitting Miller against Young. Isakson paid an estimated $1.3 million on advertising. Miller spent $1.5 million.

Miller's backing of the state's first lottery to fund educational improvements was a trademark of his campaign and newspaper polls said it was a key to his strength among voters.

Another key campaign plank was Miller's proposal to create military- style boot camps for first-time drug offenders.

On other key issues, Miller opposes restrictions on abortion, but supports legislation that would require minors to inform their parents before having the procedure performed. He has sworn not to raise taxes and promises to reform the state budget process.

#90310u2428 11/06/1990 ~United Press International

LOS ANGELES (NOV. 6) UPI - A federal jury convicted three men Tuesday on charges stemming from the nation's largest cocaine bust but failed to reach verdicts against three others on trial.

The jury, on its seventh day of deliberations, convicted Carlos Tapia Ponce, 69, of Juarez, Mexico; and two of his sons-in-law, James Romero McTague, 42, of El Paso, Texas; and Jose Ignacio Mauricio Monroy, 37, of Mexico.

The men were convicted on two counts each of conspiracy and possession with intent to distribute the 21.4 tons of cocaine seized in a Sylmar warehouse on Sept. 28 and 29, 1989 along with $12 million in cash. It was the largest cocaine seizure in U.S. history.

McTague was also convicted on a third count of distributing 44 pounds of cocaine the day the warehouse was raided by federal and local law enforcement officers.

The jury, however, said it was deadlocked 8-4 in favor of convicting the other defendants: Tapia's son, Hector Tapia Anchondo, 39, of El Paso, Texas; Hugo Fernando Castillion, 33; and Miguel Chavez, 35, of Mexico.

U.S. District Court Judge Terry Hatter declared a mistrial in the case against those three and dismissed the jury. Prosecutors indicated they would most likely retry the men.

Following their arrests, the three men convicted had confessed to authorities that they were involved in a drug trafficking pipeline that funnelled 77 tons of cocaine into Los Angeles over a three-month period before the seziure.

But they later retracted and pleaded innocent. With their convictions, they now face maximum terms of 10 years to life when they are sentenced. A sentencing date has yet to be scheduled.

Prosecutors said the defendants received large shipments of cocaine from Mexico at El Paso, Texas and moved them in secret compartments of trucks to distribution points in Los Angeles.

The huge amount of cocaine that was seized at the 3,500-square-foot warehouse stunned law enforcement officials. It also prompted them to turn their focus in the war on drugs to the overland routes Colombian drug lords were using to smuggle cocaine into the United States.

Authorities said the seizure, which represented about 5 percent of the world's annual production of cocaine, showed that Los Angeles is at the center of the nation's cocaine trade.

During the four-week trial, prosecutors portrayed the defendants as ''cocaine

cowboys'' and ''merchants of destruction,'' saying their livelihood was based solely on cocaine trafficking.

Ledgers seized at the warehouse and elsewhere showed that the elder Tapia was drawing in as much as $3 million in drug profits daily.

The defendants pretended to run a Mexican arts and craft business which sold pinatas, oil paintings on velvet canvases and various other knickknacks in order to conceal the nature of their dealings, prosecutor said.

The government portrayed the Tapias as the key lieutenants in the operation, renting the warehouse for $1,700 a month while making millions of dollars in drug profits.

#90310u2550 11/06/1990 ~United Press International

NEW YORK (NOV. 6) UPI - James Donaldson sank two free throws with 14 seconds left Tuesday night to help lift the Dallas Mavericks to a 96-91 victory over the New York Knicks.

Donaldson's free throws gave Dallas a 94-91 lead and Herb Williams followed with two free throws to seal the victory.

Charles Oakley had given the Knicks a 91-90 lead with 1:38 left when he jammed in the rebound of a Mark Jackson miss. Patrick Ewing then blocked a Derek Harper layup, but the Knicks could not score.

Rolando Blackman hit a jumper with 37 seconds left to put Dallas back up 92-91.

The Mavericks chipped away at New York in the fourth quarter and pulled even at 82-82 on Blackman's jumper with 5:07 left.

Tarpley kept Dallas in the game in the third quarter, scoring 10 of his 29 points on a combination of power moves inside and 10- to 12-foot jumpers.

Blackman added 20 points and Derek Harper had 15 for the Mavericks.

The Knicks were led by Ewing, who had 26 points and six blocks. Gerald Wilkins scored 8 of his 15 points, in the third quarter when the Knicks went to a three-guard lineup with Oakley on the bench with four fouls.

The Knicks outscored the Mavericks 12-6 over the first seven minutes of the second quarter to take a 41-31 lead. For more than five minutes of that run, Ewing was on the bench watching.

Brian Quinnett had four points in the run. Ewing came back in to score 9 of New York's last 13 points, and with 2:05 left, the Knicks were up 49-33.

But Blackman and Harper started dropping off the Knicks guards to harrass Ewing and Oakley inside. The Mavericks ran off the last 7 points of the half to pull to 49-40.

-30- 1852

#90310u2585 11/06/1990 ~United Press International

RALEIGH, N.C. (NOV. 6) UPI - North Carolina Sen. Jesse Helms held a steady lead Tuesday over black liberal Democrat Harvey Gantt amid heavy turnout and problems that forced several polling stations to stay open late.

Voters waited into the night to settle one of the nation's most bitterly contested Senate races.

With 53 percent of the precincts counted at 9:45 p.m. EST, Helms had 522,929 votes, or 55 percent, to Gantt's 435,455, or 45 percent.

Election officials reported heavy turnout across most of the state, with lines of more than 200 people forming at some voting stations an hour after the polls opened.

Problems with ballots and voting machines forced polling places to remain open after the traditional 7 p.m. closing in at least three counties.

The Helms campaign protested the late closing in Durham County, considered a Gantt stronghold.

''The Helms campaign nor the GOP were given an opportunity to be heard before the order was entered allowing the polls to stay open until 10 p.m.,'' Helms aide Palmer Sugg said.

Susan Jetton, a spokesman for the Gantt campaign, said Helms supporters might be involved in the precinct problems.

Gantt urged his backers still waiting at broken-down voting booths ''where the lines were so terribly loing and said, 'Hang in there, keep waiting, be patient. We need your votes,''' Jetton said.

Helms, a three-term ultra-conservative, used a barrage of TV and radio advertisements to attack Gantt, the former Charlotte mayor.

The Helms and Gantt camps swapped stinging allegations until election eve, when a federal judge in New Jersey ruled that mailings by North Carolina's Republican Party in the campaign's waning days may have violated an 8-year-old court order barring the GOP from intimidating minority voters. That order resulted from a New Jersey case.

The North Carolina allegations stem from a ''ballot security'' program that sent out more than 100,000 postcards to many mostly black areas warning voters about giving false information.

The Justice Department promised an investigation to check into possible violations of civil rights laws.

Some of Helms's latest TV spots featured a disappointed white job- seeker crumpling a rejection letter with a voice-over blaming the applicant's failure on racial hiring quotas supported by Gantt and liberal Sen. Edward Kennedy, D-Mass.

Helms denied critics' allegations of bringing racism into the campaign.

''This is a contest between a liberal and a conservative, and that's about it '' he said.

#90310u2589 11/06/1990 ~United Press International

OSHKOSH, Wis. (NOV. 6) UPI - A man charged with sexually assaulting a woman by taking advantage of her multiple personalities knew of the woman's disorder a friend of the woman testified Tuesday.

Mark A. Peterson, 29, of Oshkosh, is charged with second-degree sexual assault of a 27-year-old Oshkosh woman whose psychiatrist claims has 46 different personalities.

Peterson has contended that the woman consented, but the prosecution argues that Peterson knew of the woman's disorder and coaxed one vulnerable personality - ''Jennifer'' - into having sex.

Ruth Reeves, a neighbor and close friend of the woman, testified she had told Peterson about the woman's multiple personalities.

''I explained to him that some of her personalities were vulnerable and that she was mentally handicapped. I mentioned mental illness,'' she said.

Winnebago County District Attorney Joseph Paulus then asked her what Peterson said when told of the woman's mental state.

''He said, 'I see,''' Reeves said.

One of the woman's personalities is Jennifer, described as a 20-year- old who likes music and dancing. Jennifer is the personality the prosecutor says was in control of the woman when she and the defendant allegedly had sex in a car.

The prosecution also contends that a second personality, Emily, 6, watched the

act.

The woman is expected to testify Wednesday.

Also testifying Tuesday was Lori Warchol of Clinical Services in Oshkosh, the woman's psychiatrist, who said she has worked with her for 2 1/2 years and ''I know she is not faking.''

Warchol said at the time of the alleged assault the woman had 18 different personalities but since then has developed more and now exhibits 46 personalities.

''Some of the personalities are new and some aren't new, but were only recently discovered,'' she said.

#90310u2597 11/06/1990 ~United Press International

ATHENS, Greece (NOV. 6) UPI - A major earthquake measuring 6.6 on the open-ended Richter scale hit a mountainous area of southern Iran late Tuesday, inflicting heavy damage and killing or injuring at least 100 people, sources said.

The quake, which struck at 9:57 p.m. shook a rural area about 500 miles southeast of Tehran in the Zagros mountains, an official at the Tehran University Geophysical Institute said.

The epicenter was about 50 miles east of Darab in a region inhabited by about 15,000 people, according to a spokesman for a group called the People's Mojahedin of Iran.

Some 20 villages in the counties of Forg and Abshour were heavily damaged, said Alireza Jafarzadeh, a U.S. spokesman for the Mojahedin. The Mojahedin is the principal resistance group trying to establish a democracy in Iran.

He said he was receiving information by telephone from members of the group in Iran.

''According to information on casualties one hour after the earthquake, at least 100 people were injured or killed, about 50-50,'' Jafarzadeh said. ''It happened late at night while most of the villagers were in their homes. The toll will probably go higher. Most of the homes are made of clay and aren't resistant to earthquakes.''

It was the second major tremor to hit Iran in less than five months. An earthquake measuring 7.7 on the Richter scale June 21 destroyed several towns and villages in the mountains northeast of Tehran. The Iranian government estimated the death toll at more than 35,000, with more than 100,000 injured

and 400,000 left homeless.

The reports on the strength of the temblor Tuesday were conflicting. The Tehran University Geophysical Institute said the quake was 6.6 on the open-ended Richter scale. But Rebecca Phipps of the U.S. Geological Survey near Washington said the quake measured 7.0 and was centered some 550 miles south of Tehran.

An earthquake measuring 7.0 on the Richter scale is considered a major quake and is capable of widespread heavy damage.

#90310u2618 11/06/1990 ~United Press International

WASHINGTON (NOV. 6) UPI - Alcohol and drug abuse and mental illness cost the nation at least $273 billion in 1988 in terms of treatment, reduced productivity, mortality, criminal justice expenses and other related costs, the government said Tuesday.

The Alcohol, Drug Abuse and Mental Health Administration study projected 1985 figures to 1988 taking into consideration inflation and other factors. 1985 was the most recent year for which data was available.

Dr. Frederick Goodwin, the administration's head, conceded the $273 billion figure is a ''rock bottom'' estimate since mental and addictive disorders have been consistently underreported and because the devastating crack cocaine epidemic did not hit the nation until after 1985.

Of the total, $129 billion was for mental illness, $85.8 billion for alcohol abuse and $58.3 billion for drug abuse, the report said.

Overall, 36 percent of the total economic loss was due to lost and reduced productivity, especially lost wages; 24 percent went for treatment-related costs; and 16 percent was due to lost earnings due to premature death.

Other associated costs, such as law enforcement, auto crashes, fires and lost productivity by crime victims and caregivers, accounted for the other 24 percent.

Goodwin said the report indicates ''very substantial'' costs to society for mental and addictive disorders, but he said $273 billion annually is certainly a low estimate.

''We have no way of knowing the magnitude of the underestimates ..., especially for costs associated with alcohol and drug abuse,'' he said, adding there remains an urgent need to develop more comprehensive national data bases on the disorders.

-30- 1903
#90310u2643 11/06/1990 ~United Press International

DALLAS (NOV. 6) UPI - A Dallas County probate jury voted Tuesday to remove the long-time executor to the estate of Jack Ruby, killer of presidential assassin Lee Harvey Oswald, accusing him of ''gross mismanagement'' and ''negligence.''

''We felt there was negligence starting from the beginning,'' jury forewoman Deborah Smith said.

The jury also refused executor Jules Mayer, 81, legal fees for defending the suit that unseated him.

Mayer slumped slightly after the decision was announced. Asked about an appeal Mayer's attorney and partner Marvin Levin said, ''Whatever Jack Ruby, speaking through Mr. Mayer, decides.''

''We're going to appeal it,'' Mayer said.

The weeklong hearing focused on who had the right to sell Ruby's possessions - the clothing he wore when arrested, a wristwatch, a diamond ring and the gun. The gun alone was estimated to have a value to collectors of $100,000 to $150,000.

Mayer sought the funds to pay legal expenses - more than $55,000 - accrued since Ruby's death in 1967 of cancer. The Ruby family has refused to pay Mayer claiming he mismanaged the estate.

Several times during the hearings, Mayer snapped at Ruby's lawyer, Doug Larson questioning his manhood in one exchange and threatening him with a fistfight on another.

Probate Judge Robert Price rebuked Mayer for his outbursts and threatened to remove him as executor several times during the proceedings.

Earlier in the week, Mayer testified that he sent letters to museums, gun hobbyists, television producers and shoe manufacturers to see if they wanted to buy or lease Ruby's gun or clothing.

He sent one letter to Colt Manufacturing, which made the Colt Cobra revolver used to kill Oswald.

''Did you really think Colt wanted a murder weapon?'' asked Larson.

''I just thought I'd try,'' Mayer said.

Ruby's brother, Earl, 75, said the decision was a vindication of patience.

''After 23 years of fighting, I won,'' he said. ''I learned one thing: If you know you're right, don't give up.''

Mayer was named executor in a 1950 will handwritten by Jack Ruby, and he successfully fought off three court challenges and a complaint to the Texas Bar Association. All four actions were prompted by Earl Ruby.

Members of the three-man, three-woman jury mentioned they were particularly troubled by Mayer's practice of charging up to $200 an hour for talking to reporters.

During the trial, Ruby's gun and articles of clothing were displayed in public as court evidence for the first time since Mayer had locked them in a safe deposit box 23 years ago.

-30- 2815

#90310u2656 11/06/1990 ~United Press International

WASHINGTON (NOV. 6) UPI - Democrats gained at least four governorships Tuesday night and conservative Republican Sen. Jesse Helms won after a scare in North Carolina.

Bitter races for the governorships in Texas and California also highlighted Tuesday's off-year elections. And there were close races in Michigan and Massachusetts.

There was no wholesale ''throw the rascals out'' move across the political spectrum - House members and senators fared far better in holding on to their seats - but Democrats gained in gubernatorial races.

There were only a handful of tight House races and the first upset came with the defeat of veteran Republican Stan Parris of Northern Virginia, ousted by Alexandria Mayor James Moran Jr. Parris, an outspoken abortion foe, served six terms, five consecutively after 1980.

In the District of Columbia, Mayor Marion Barry - convicted of drug possession and sentenced to six months in jail - was replaced by Democrat Sharon Pratt Dixon. Voters refused to elect Barry to a city council post.

Former Democratic Sen. Lawton Chiles won the top state job in Florida over incumbent Republican Bob Martinez, who conceded. Democratic State Treasurer Joan Finney was forecast to win the job over incumbent Republican Mike Hayden in Kansas. The open governorship in Oklahoma went to Democrat David Walters.

Democrat Bruce Sundlun beat Rhode Island Gov. Edward DiPrete in an upset and the open GOP seat in New Mexico went to Democrat Bruce King. Republican George Voinovich snagged the open Democratic governorship in Ohio.

The most closely watched races were the ones in North Carolina, Texas and California.

As the list of incumbent senators who won re-election grew during the evening - there were 35 races - the North Carolina started out tight. Gantt, a former mayor of Charlotte, wanted to become North Carolina's first black senator and Helms, the darling of the political right across the country, wanted a fourth term.

With 70 percent of the vote in, Helms held a 54 percent to 46 percent lead over Gantt. Helms invested nearly $15 million in the race.

Ann Richards was in a close race - 51 percent to 49 percent - with Republican Clayton Williams in the Texas governors race, and polls were just closing in California's gubernatorial contest between Republican Sen. Pete Williams and former San Francisco Mayor Dianne Feinstein.

In the other swap among the senior state jobs, former Sen. Lowell Weicker, a moderate Republican who lost his seat two years ago and ran for the governor's post as an independent, defeated Republican and Democratic candidates for the job.

The Senate race of Democratic incumbent Bill Bradley in New Jersey was surprisingly tight, with the former basketball player up by only a few thousand votes out of more than a million counted. Networks projected that Bradley would still win a third term. He was believed to be suffering a backlash from voters angry at higher taxes imposed by Democratic Gov. James Florio.

Rep. Newt Gingrich, the assistant House Republican leader and Georgia's only GOP congressman, was in a fierce battle with Democrat David Worley.

Another House member tossed out was five-term Rep. Roy Dyson, D-Md., beaten by Republican challenger Wayne Gilchrist. Dyson was not well known outside his district, where he got in trouble for connections to defense contractors amid the ''Ill Wind'' defense contracting scandal.

In the mountainous North Carolina 11th District seat that has bounced back and forth for the past 20 years, Rep. Jamie Clarke, a Democrat, was narrowly trailing challenger Charles Taylor.

In the northeast, Socialist Bernie Sanders, running as an independent, won the at-large House seat in Vermont.

The outcome of the governors races will affect political fortunes for the next decade since the winners will have a big say in how the state's congressional districts are carved up to fit the 1990 census.

In addition to choosing from among candidates, voters in 42 states were deciding the fate of more than 200 ballot measures, including a huge tax rollback in Massachusetts and California's ''Big Green'' initiative, to ban many pesticides, certain chemicals and off-shore oil drilling.

Going into the election, Republican Rep. Patricia Saiki appeared to have the best chance to unseat a Democrat, Sen. Daniel Akaka of Hawaii, who was named to fill the vacancy created by the death of Sen. Spark Matsunaga, also a Democrat.

In Oregon, Sen. Mark Hatfield, the last Republican liberal in the Senate, hoped to fight off a surprisingly strong challenge from Democrat Harry Lonsdale, a political novice whose campaign stressed environmental issues.

-30- 4956

#90310u2663 11/06/1990 ~United Press International

(NOV. 6) UPI - The governor of Guam has won re-election. Republican Joseph Ada won a second term, defeating the widow of a former governor. The former Guam governor shot himself in January just before he was supposed to board a plane for California to start serving a four-year prison term for bribery and extortion. Earlier this year, Ada signed into law a measure that contained the most restrictive abortion curbs in the United States.

Black voters turned out in what appears to be record numbers in Miami today. The turnout is because of blacks are angry about the Dade County School Board's choice of a superintendent. A Cuban got the job over a black man. School board members were on today's ballot. Black religious leaders called for a school and work boycott today, and it threw school bus schedules up for grabs.

A State Department official says Iraq is ''the most sealed-off nation in the history of the world.'' Jock Covey, deputy assistant secretary of state for Near East affairs, said today that Iraq is losing two-BILLION dollars a month in canceled oil sales. Plus, he says Iraq is getting only about 10 percent of its former imports.

Mourners at Rabbi Meir Kahane's funeral today hoisted signs that demanded ''Revenge'' in blood-red Hebrew letters. New York police have increased security for both Arab and Israeli groups... even though police say they believe the Egyptian immigrant who shot Kahane acted alone.

A jury in Los Angeles convicted three men today on charges that stem from the nation's largest cocaine bust. The jury failed to reach verdicts for three other defendants. They were arrested after a 21-ton cocaine seizure.

Federal mediators re-opened contract talks at the strike-bound New York Daily News today. And a union group is planning a media campaign to try to persuade

readers and advertisers to boycott the Daily News.

The split between the two Chinas showed itself again today. China broke off diplomatic relations with Nicaragua because Nicaragua re- established relations with Taiwan.

Scientists at a world climate conference in Geneva called for cutting carbon dioxide emissions in half. The scientists say present technology can reduce emissions by at least one-fifth by the year 2005.

Researchers gave new hope to cancer victims today. They say a drug commonly used to reduce the risk of recurrences of breast cancer... tamoxifen... may also help people with other types of cancer.

-30- 2628

#90310u2908 11/06/1990 ~United Press International

(NOV. 6) UPI - A Dallas jury this evening threw out the long-time executor for the estate of Jack Ruby... and replaced him with Ruby's brother, Earl. The jury accused Jules Mayer of ''gross mismanagement'' of the estate of the man who shot the assassin of President Kennedy. Mayer wanted to sell Ruby's belongings to pay legal expenses since Ruby died from cancer in 1967. Ruby's relatives have refused to pay the executor, claiming mismanagement of the estate.

During the trial... the gun Ruby used to shoot Lee Harvey Oswald was displayed as court evidence. It's the first time the gun has been seen in public since Mayer locked it in a safe deposit box 23 years ago.

The largest cocaine seizure in U-S history led to the convictions of three men in Los Angeles today. The jury failed to decide verdicts for three others on trial in L-A's federal court. Judge Terry Hatter declared a mistrial. All six men are from Mexico or Texas. They were charged in connection with a more than 21-ton cocaine stash in a warehouse.

Officials say the L-A seizure represented about five percent of the world's annual production of cocaine. Agents also confiscated 12-Million dollars in their raid.

New York City remains the nation's financial capital tonight. The chairmen of four key commodities exchanges recommended that the markets stay in Manhattan... rather than moving to a competing site across the Hudson River in New Jersey. The New York Mercantile Exchange, the Coffee, Sugar and Cocoa Exchange, the Commodity Exchange and the New York Cotton Exchange are likely to move to a new office tower near the World Trade Center, rather than go to New Jersey.

The giant shipping company United Parcel Service lost more than 20 of its

trucks and vans in Houston. Wreckers hauled away the vehicles to satisfy a former U-P-S employee's multi-Million-dollar lawsuit against the company in a false-arrest case. An attorney said United Parcel refused to pay the nearly six and one-half-Million-dollar judgment. He says more U-P-S property will be seized.

Health officials in East St. Louis, Illinois, want to collect abandoned tires from vacant lots in the town. They say picking up the tires that are breeding grounds for mosquitoes would be cheaper than spraying the tires with insecticides. State agencies advocate using the tires as fuel for boilers. The Illinois Power Company is experimenting with the idea, burning a mixture of tires and coal at its Baldwin power plant.

-30- 2656

#90310x1316 11/06/1990 ~Comtex

NEW YORK (NOV. 6) UPI - NBC got off to a fast start in the November sweeps, thanks to the theatrical film ''Three Men And A Baby,'' it was reported Tuesday.

Sweeps is the period when the ratings companies go into local markets and abandon their gadgetry to take a look at the diaries selected viewers keep of their viewing habits.

While sweeps count heads in some 200 local markets, they are important to the networks because their findings are used to help set local advertising rates.

In both the Nielsen and Arbitron count, NBC leads, CBS is No. 2 and ABC trails.

''Three Men and A Baby'' came in fourth on the Nielsen list, with the highest ratings of any theatrical movie on network television since NBC ran ''Top Gun'' in May 1989.

It was enough to put NBC into second place on Sunday night for the first time this season, but not enough to dislodge CBS from winning the night, as it often does.

CBS had the No. 2 movie, ''83 Hours 'Til Dawn,'' tied for 29th, but won the night on the strength of ''60 Minutes'' in second place and ''Murder, She Wrote,'' tied for seventh.

ABC's Sunday movie, ''The Last Best Year,'' tied for 46th.

Sunday carries a lot of weight in the ratings because it offers four hours of prime time instead of three and is the most-watched night of the week.

In the ratings for the week ending Nov. 4, according to the A.C. Nielsen Co., NBC won with a 13.5 rating and a 23 share. CBS came in second with a 12.6

rating and a 21 share, while ABC had an 11.9 rating and a 20 share.

The seven-week-old season-to-date statistics point to a tight race, with CBS only three-tenths of a ratings point behind No. 1 NBC. NBC leads with a 13.3 rating and 22 share, followed by CBS with a 13.0 rating and a 22 share. ABC is not far behind with a 12.5 rating and a 21 share.

Night-by-night competition saw NBC win Tuesday, Wednesday, Thursday and Saturday, while ABC took Monday and Friday and CBS captured Sunday.

The only new show in the top 10 was ''America's Funniest People'' (ABC), which came in 10th and is a clone of ''America's Funniest Home Videos.''

Aside from ''Funniest People,'' the top-rated new show of the week was a special edition of ''Evening Shade,'' which came in 24th when it aired on the CBS Monday night comedy lineup, which included ''Designing Women'' tied for fifth, ''Murphy Brown'' in ninth and ''Major Dad'' tied for 13th. In its regular Friday night time period, ''Evening Shade'' tied for 58th.

Other new shows in the top 50 included ''Fresh Prince of Bel Air'' (NBC), 31st; ''Married People'' (ABC), 40th; ''The Trials of Rosie O'Neill'' (CBS), 42nd, and ''Over My Dead Body'' (CBS), 50th.

ABC's ''World News Tonight'' was No. 1 for the 43rd consecutive week, with an11.4 rating and a 22 share. ''CBS Evening News'' with Dan Rather came in second with a 10.0 rating and a 19 share, while ''NBC Nightly News'' with Tom Brokaw had a 9.5 rating and an 18 share.

Each ratings point represents about 921,000 households. A share is the percentage of TV sets in use that are tuned to a particular show or network.

The top 10 programs for the week ending Sunday, Nov. 4, according to the A.C. Nielsen Co., were:

1. Cheers (NBC) 2. 60 Minutes (CBS) 3. The Cosby Show (NBC) 4. Three Men and a Baby, NBC Sunday movie 5. (tie) Designing Women (CBS)
Roseanne (ABC) 7. (tie) Murder, She Wrote (CBS)
America's Funniest Home Videos (ABC) 9. Murphy Brown (CBS) 10.America's Funniest People (ABC)

DENVER (NOV. 7) BUSINESS WIRE - Cohig & Associates Inc., the Denver-based investment banker, Wednesday announced it has completed secondary offerings for two fast-growing companies in the computer reseller industry group -- Random Access Inc. of Denver and MacLand Inc. of Tempe, Ariz.

Completion of these offerings brings to four the number of secondary offerings Cohig & Associates has managed in 1990.

For MacLand, a marketer of hardware and accessories for the Macintosh computer line, Cohig & Associates raised $1.9 million through the sale of 1.15 million units at $1.65 per unit. Units consist of two shares of common stock and one warrant. The offering was co-managed by Paradise Valley Securities of Phoenix.

As a result of the offering, MacLand's securities have been elevated to trading on the NASDAQ system. MacLand, which reported record net income of $327,000, or 4 cents per share, on revenue of $9,661,000 for the nine-month period ended Sept. 30, will use the funds for working capital, expansion of facilities and marketing and promotion.

For Random Access, Cohig & Associates raised $1.15 million through the sale of 575,000 units at $2 per unit. Units consist of two shares of common stock and one warrant. Random Access, the region's largest and fastest-growing computer reseller, will use the proceeds of the offering to develop Apple-only sales facilities, expand its service division, automate operations, and develop a memory distribution division.

Named the 15th fastest-growing small public company in America by Inc. magazine, Random has a compounded annual growth rate of 198 percent over the past five years.

Cohig & Associates is a full-service investment banking firm that specializes in capital formation for companies with $3 million to $50 million in revenue.

The firm's particular emphasis is on established public companies that have a need for working capital to fund promising business opportunities or late-stage product development.

The firm also is active in merger and acquisition counseling and makes a market in more than 150 stocks. Cohig has 62 licensed brokers located in four Colorado offices.

OREM, UTAH (NOV. 7) BUSINESS WIRE - Seagull Technologies Corp., Wednesday announced the Executive Fax, a stand-alone fax addition to laser printers that receives and prints faxes in high resolution to the laser printer when it is not in use.

Because the Executive Fax includes a processor, memory and removable mass

storage, it also provides a number of features, such as fax forwarding, fax confirmation, key account concentration, fax broadcasting and scheduling, that put executives in control of their fax communication in a business environment.

The Executive Fax prints to most Hewlett Packard and Canon laser printers, without requiring expensive memory upgrades. It does not interrupt printing from a network or computer. It waits until the printer is free.

The Executive Fax is a stand-alone machine. No need to leave expensive computers with sensitive data turned on to receive faxes as is the case with fax boards. Even if the laser printer is off, the Executive Fax receives the fax and waits until the printer is turned on. Computers are used to program the functins of the fax to the needs of the executive; after which the Executive Fax is left alone to do the work.

In addition to the savings and convenience of higher resolution on plain paper the Executive Fax can perform several advanced functions automatically:

- If executives want to reserve fax reception from only the most important accounts, the Executive Fax can be programmed to reject faxes from anyone else thus avoiding junk faxes.

- If executives need to travel, the Executive Fax can forward faxes to any destination.

- If executives desire to poll the machine for the faxes received, such a feature is available.

- If executives want to keep an audit trail of faxes received, they only need to archive the diskette.

- If for a certain account, fax accuracy must be verified, the Executive Fax will confirm receipt in one of three optional levels: by reporting back how many pages were received, the top two inches of each page or sending the entire fax back to the sender.

#90311b0018 11/07/1990 ~Business Wire
PUEBLO, COLO. (NOV. 7) BUSINESS WIRE - Burdened with the costs of an underfunded pension plan and continued weak markets for its major product lines, CF&I Steel Corp. of Pueblo, and its nine subsidiaries Wednesday filed petitions for reorganization under Chapter 11 of the U.S. Bankrupty Code in Salt Lake City.

Chapter 11 permits a company to remain in business while it reorganizes its financial affairs under court protection.

Frank Yaklich Jr., president and chief executive officer of CF&I, said, ''During this process, CF&I will continue to operate, provide jobs for our employees, and meet the needs of our loyal customers with quality products.

''We filed Chapter 11 to resolve some financial problems,'' he said. ''This action was taken only after all other options had been exhausted. I want our employees, customers, shareholders and suppliers all to know that CF&I is a survivor and that we are confident CF&I will emerge from this new challenge a stronger, better compay.''

The total underfunded liability of the pension plan is estimated at approximately $140 million. As reported in September, CF&I was unable to make a $12.3 million payment to the pension plan. Since then it has missed an October quarterly payment of $1.8 million.

Prior to Sept. 15, 1990, CF&I had made all its required pension plan contributions on time and in full, including a $15 million payment in 1988 and a $16.6 million payment in 1989.

The filing suspends all payments to the pension plan.

A series of outside economic factors occurred simultaneously, including the failing energy industry in 1982 and 1983, that led to a downsizing of the company. The downsizing dramatically increased the number of retirees, reducing the company's ability to fund the plan.

The company continues to aggressively seek an investor who will see the advantages and benefits of funding a significant upgrading of CF&I's facilities. These improvements in manufacturing technology and productivity are expected to be part of the reorganization plan.

CF&I is a major producer of steel products for the energy, transportation and agricultural markets. Founded in 1872 before Colorado's statehood, CF&I played a major role in the founding of Pueblo and remains one of the city's largest employers.

The Chaper 11 petitions were filed in Salt Lake City, the headquarters of one of CF&I's largest subsidiaries, CF&I Fabricators of Utah.

SEATTLE (NOV. 7) BUSINESS WIRE - Elliot K. Knutson, chairman and chief executive officer of Washington Federal Savings and Loan Association, of Seattle, announced that a letter of intent has been signed to acquire First Federal Savings and Loan Association of Idaho Falls, Idaho.

The two institutions will join through a merger-conversion where First Federal will convert to a stock chartered thrift and merge into Washington Federal.

During the multi-step merger-conversion process, First Federal, currently a federally chartered mutual institution, will become a stock institution and merge into Washington Federal, with the concurrent issuance of additional shares of Washington Federal's common stock. The process requires the approval of the deposit and loan customers of First Federal and the Office of Thrift Supervision.

At Sept. 30, 1990, First Federal had $99.2 million in assets, capital of $5.1 million and three offices located in Idaho Falls, Blackfoot and Rexburg, with a lending office in Ketchum, Idaho.

Washington Federal has assets of $2.6 billion with capital of $320 million for a ratio of 12.08 percent. It operates 64 offices throughout Washington, Idaho and Oregon and is listed on the National Market System of NASD under the symbol WFSL. The Oregon branches are doing business as Freedom Federal Savings.

TOKYO (NOV. 7) BUSINESS WIRE - Unify Corp. Wednesday announced it has joined forces with two major Japan-based technology companies to form Unify Japan, a joint-venture company headquartered in Tokyo to market and distribute integrated Open Systems solutions based on Unify's full suite of ACCELL 4GL and UNIFY RDBMS application development products for Unix.

Unify Japan was established in association with Sumitomo Metal Industries Ltd. (SMI), one of Japan's foremost steel manufacturers and high-technology companies, and AIR Company Ltd., Japan's leading distributor for ACCELL and UNIFY software.

At its inception, Unify Japan will have a network of more than 150 dealers, distributors, developers and support engineers, making it the largest Unix-based Open Systems solutions company in Japan.

''With the growing acceptance of Open Systems technologies in Japan, this marketplace represents an unprecedented opportunity for Unify Corporation,'' said David Saykally, Unify's president and chief executive officer.

In specific, he noted that Unify Japan has assembled these assets through its partnership announcement:

-- Strong software, hardware and integration technology
-- Closer customer/vendor relations in the Japanese market
-- Solid commercial/government distribution through both a Unify Japan direct sales force and a national network of distributors and VARs.

Sumitomo's Systems Engineering Division businesses include: system integration, systems product sales and data communications services.

AIR is Unify's largest distributor in Japan, and is also one of Japan's oldest distributors of Unix software products, beginning its business in Osaka in 1985. Since that time, AIR has established a number of strategic relationships with Japan's most successful Unix hardware vendors, including Hitachi, Fujitsu and NEC.

Moreover, AIR and its network of Value-Added Resellers have combined to create hundreds of Kanji-based ACCELL/UNIFY applications for accounting, banking, health, manufacturing and retailing, among others. Unify Corp.

Unify is the manufacturer and developer of the ACCELL/SQL ''Open Systems'' application development toolset and the UNIFY family of RDBMS. ACCELL/SQL is the only application development system to support all leading Unix databases (including Oracle, Informix, SCO/Integra, Sybase and UNIFY) and graphical user interfaces or GUIs, (including Open Look, Motif and Microsoft Windows).

ACCELL and UNIFY have been translated into Kanji and Chinese character scripts for easy use and integration into the Asian markets. ACCELL/UNIFY have also been ported to more than 170 different Unix platforms, including AT&T System V BSD, XENIX, AIX and Ultrix. These features make ACCELL/UNIFY the most portable software packages in the world.

Unify Corp. is a leading manufacturer of Unix-based application development software tools, and the leading supplier of Unix software to the Japanese market. Based in Sacramento, Calif., Unify employs 260 people in 19 offices across the United States, Europe and Japan.

AIR Company Ltd. is Japan's leading distributor of Unix products. Based in Osaka, AIR has established strategic partnerships with some of Japan's most successful hardware vendors, including Fujitsu, Hitachi and NEC. As Japan's leading supplier of Kanji-based software, AIR has licensed Unify software at more than 25,000 sites.

RUSTON, LA (NOV. 7) BUSINESS WIRE - The board of directors of Willamette Industries Inc. (OTC: WMTT) Wednesday declared a dividend of 40 cents per share on its common stock, payable on Dec. 14, 1990, to shareholders of record at the close of business on Nov. 26, 1990.

The company anticipates a smooth start-up of its fine paper mill, under construction in Bennettsville, S.C., sometime near the end of this month. Expenses related to the start-up are estimated to be 21 cents per share in the fourth quarter. The mill will begin operation in a strong white paper market with high internal demand for the product.

Willamette continues to experience weak markets for many product lines and has curtailed some lumber and plywood operations in Oregon because of poor demand for these products. The combination of reduced operating earnings, start-up expenses from the Bennettsville mill, increased interest costs, and restructuring costs at its Penntech operation will all have a negative impact on fourth quarter earnings.

EL SEGUNDO, CA (NOV. 7) BUSINESS WIRE - Rockwell International Corp.'s board of directors Wednesday declared quarterly dividends on the company's common and preferred stock.

The board declared a quarterly dividend of 21.5 cents per share on both the common and the Class A common stock, payable Dec. 10, 1990, to stockholders of record on Nov. 19, 1990.

In addition, the board declared regular quarterly dividends of $1.1875 per share of Series A preferred stock and $0.3375 per share of Series B preferred stock. Both preferred dividends are payable Jan. 1, 1991, to stockholders of record on Nov. 30, 1990.

Rockwell International is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

#90311b0049 11/07/1990 ~Business Wire
TEMPE, AZ (NOV. 7) BUSINESS WIRE - UDC-Universal Development L.P. (NYSE:UDC) Wednesday said its third quarter results were consistent with the company's expectations.

Net income was $5.3 million, or 21 cents per common share, on revenues of $82.2 million, compared with last year's record third quarter net income of $11.6 million, or $1.05 per common share, on revenues of $98.9 million.

The Tempe, Ariz.-based homebuilder said net income was affected by the decline in the national housing market and net income per common share continues to be impacted by the August 1989 partial recapitalization.

Closings for the third quarter ended Sept. 30 reached $77.6 million for 489 homes, compared with the record $94.3 million and 591 homes a year ago.

Net orders were $77 million for 462 homes, compared with 1989's record third quarter net orders of $107.8 million for 656 homes.

For the nine months ended Sept. 30, net income was $17.2 million, or 82 cents per common share, on revenues of $246.1 million. During 1989, a record net income of $30.9 million was recorded, or $2.74 per common share, on revenues of $255 million.

Closings for the nine months totaled $231.5 million for 1,431 homes, compared with last year's record $244 million for 1,517 homes.

Nine month net orders were $265.7 million for 1,619 homes, compared with 1989's record of $353.4 million for 2,117 homes.

UDC's backlog of homes ordered but not yet closed at Sept. 30 was $158.9 million for 973 homes, compared with last year's record $215.4 million for 1,284 homes.

During the third quarter, UDC repurchased approximately $6 million of its outstanding 12.25 percent subordinated debt, due in 1993. These repurchases, funded by a placement with an institution of $30 million 11.26 percent senior notes, due in 2000, increased third quarter and nine month net income per common share by 11 cents.

UDC-Universal Development L.P. builds quality family and adult residential communities in the Sun Belt, with operations in Arizona, California, Florida, Georgia, North Carolina and South Carolina. Its common and preferred shares are traded on the New York Stock Exchange.

#90311b0050 11/07/1990 ~Business Wire

HOUSTON (NOV. 7) BUSINESS WIRE - Texas Instruments has begun limited customer sampling of two versions of advanced memory chips that can store more than 16 million bits of data.

The devices, known as 16- megabit dynamic random access memories (DRAMs), each can store the equivalent of approximately 1,000 pages of single-spaced text. This is four times the density of the 4-megabit chips that are the most advanced DRAMs available today from TI and other suppliers.

TI is one of the first manufacturers to produce fully functional 16-Mbit DRAMs based on a design developed by TI for high-volume, cost-effective production. Using its initial set of photomasks, or tooling, TI produced fully functional devices that met all design specifications without the use of built-in, yield-enhancing repair capabilities.

Applying the most sophisticated new technology, chipmakers traditionally have been able to bring a new DRAM generation to market every four years. Devices in each new generation hold two key advantages over those in the previous

generation -- they can store four times as much information, and they typically have a lower cost per bit. DRAMs are used extensively in computers to store software programs and operating data.

Today's current generation of memory chips is just beginning its transition from the one-megabit to the four-megabit DRAM. TI has begun production shipments of four-megabit DRAMS and is ramping up for volume production. Analysts estimate that more than two billion four-megabit chips will be shipped by semiconductor manufacturers -- including TI -- during the next few years, with fewer than 20 million units shipped to date.

For 1990, the worldwide DRAM market is estimated at $6.6 billion, representing 11.7 percent of the total worldwide semiconductor market, according to Dataquest, a market research firm in San Jose, Calif. Dataquest estimates that the DRAM market will grow to $18.7 billion in 1994, at 18.23 percent of the total semiconductor market. Initial low-volume shipments of 16-megabit DRAMs by semiconductor manufacturers are not expected to begin until late 1991 or early 1992, with volume production ramping up in 1992/93. TI expects to beamong the early leaders.

Texas Instruments Inc., headquartered in Dallas, is a high-technology company with sales and operations in more than 30 countries. TI develops, manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems, industrial automation and control systems, electrical controls, metallurgical materials, and consumer electronics products.

#90311b0058 11/07/1990 ~Business Wire

PORTLAND, OR (NOV. 7) BUSINESS WIRE - Portland General Electric Co. (PGE) is pleased with the results of Tuesday's election that saw 60 percent of Oregon voters rejecting the shutdown of the Trojan Nuclear Plant, Portland General Chairman and CEO Ken L. Harrison said at a news conference today.

This marks the second time in four years Oregonians have defeated attempts to shut down the state's largest producer of electricity.

''The electricity produced at Trojan is crucial in our commitment to provide our customers with safe, reliable and low-cost electricity,'' Harrison said. ''I think voters recognized this fact and voted accordingly.''

The loss of Trojan would have been felt immediately, Harrison said. Trojan supplies on average a minimum of 25 percent of the electricity used in its

service area and 15 percent of the electricity used in Oregon.

''Closing a plant that produces as much electricity as Bonneville Dam just when our electrical demands are greatest and when energy is the focus of worldwide concern could have created havoc in trying to meet the needs of Oregonians during the winter months,'' Harrison said. ''I also believe it would have sent a negative signal to companies looking at Oregon as a place to do business.''

Harrison took issue with accusations made by the shutdown measure's proponents during the campaign that Trojan was unsafe.

''No one should doubt my personal commitment to safety at Trojan nor the commitment of the more than 1,000 men and women who work at the plant,'' Harrison said. ''If there were any question in my mind on our ability to operate Trojan in a manner that assures me of its safety, I would shut it down.''

Harrison also disputed claims made by shutdown proponents that PGE could substitute Trojan's electricity immediately with conservation.

''PGE is already pursuing energy efficiency as its preferred source of power to meet growing electricity demand in the future,'' Harrison said. ''However, conservation and energy efficiency alone are not enough. Shutting down a large, operating plant that already produces low-cost and environmentally clean electricity just makes no sense.''

FRESNO, CA (NOV. 7) BUSINESS WIRE - WestAir Holding Inc. (ASE: WAH), operating as United Express through marketing agreements with United Air Lines (UAL), Wednesday reported preliminary traffic results for the month of October 1990.

The airline boarded 246,499 passengers during October, a 17 percent increase compared to the same month last year when the company boarded 209,900 customers.

Revenue passenger miles (RPM's) in October increased 22 percent from 44,096,000 in 1989 to 53,664,000 during October 1990. Available seat miles (ASM's) in October increased 24 percent from 105,705,000 in 1989 to 131,195,000 in 1990. Load factor for the month was 40.9 percent, down from the 41.7 percent figure logged during October 1989.

Through the first ten months of 1990, WestAir Holding Inc. boarded 2,411,218 passengers, 24 percent over the same period last year when 1,943,817 passengers were boarded. Revenue passenger miles for the ten months were up 33 percent, with 532,937,000 RPM's logged in 1990, compared to 400,809,000 during 1989.

Available seat miles through October were 1,210,039,000, up 36 percent compared to the 889,204,000 ASM's logged in 1989. Load factor during the first ten months of 1990 was 44.0 percent, down 1.1 percentage points compared to the 45.1 percent figure logged during the same period in 1989.

WestAir Holding Inc.'s airline units operate as United Express through marketing agreements with United Airlines. The company previously announced it is merging its two wholly owned subsidiaries into a single airline operation with a Pacific Coast Division and an Atlantic Coast Division.

WestAir Holding serves cities in the West and along the East Coast utilizing both jet and turbo-prop aircraft. The company's major hubs are Los Angeles, San Francisco, Fresno, Portland, Seattle, Sacramento, and Washington, D.C. WestAir Holding Inc. is headquartered in Fresno, Calif.

OAKLAND, CA (NOV. 7) BUSINESS WIRE - Golden West Financial Corp., (NYSE/PSE/MSE:GDW) parent of World Savings and Loan Association, announced Wednesday that its board of directors voted to raise the company's quarterly cash dividend by 12.5 percent, to $.045 per share.

In making the announcement, Herbert M. Sandler, chairman of the board and chief executive officer of Golden West, said: ''The Board felt that an increase in cash dividends is appropriate at this time in light of the Company's favorable earnings and strong capital position.''

He went on to say: ''The Company's principal subsidiary, World Savings, continues to be one of the most highly capitalized financial companies in the nation. World's capital exceeds not only current requirements, but also the stricter fully phased-in ratios which become effective in 1995.'' At Sept. 30 1990, the most recent quarter end, World's risk-based capital ratio was 13.8 percent.

The dividend is payable on Dec. 10, 1990, to holders of common stock of record on Nov. 16, 1990. Golden West previously paid cash dividends of 4 cents per share each quarter, amounting to an annual rate of 16 cents per share. The December payment brings the new indicated annual dividend rate to 18 cents per share.

Golden West is a savings and loan holding company with assets in excess of $21 billion. The company's principal subsidiary, World Savings and Loan Association, headquartered in Oakland, currently has 113 authorized offices in that state, 65 in Coloradao, 10 in Kansas, 7 in Texas and 6 in New Jersey.

A separate subsidiary, World Savings and Loan Association of Ohio, conducts business through eight facilities, while a third subsidiary, World Savings and Loan Association of America, located in the state of Washington, operates two branches in the Seattle area.

With a total of 211 offices, the Golden West system comprises one of the largest multi-state branch networks in the country. The company's stock is listed on the New York, Pacific and Midwest Stock Exchanges under the ticker symbol GDW. Options on Golden West's stock are traded on the Philadelphia Options Exchange.

SANTA CLARA, CALIF. (NOV. 7) BUISNESS WIRE - National Semiconductor Corp.'s Computer Enhancement Group (CEG) and LIR Corp. of San Jose, Calif., have signed a connectivity technology agreement that allows CEG to manufacture and market LIR's FPXTM family of intelligent communication boards worldwide.

The boards give standalone and networked PCs and PS/2s access to mainframe computers through the standard SNA communications protocol and X.25

packet-switched networks.

Under terms of the agreement, CEG will initially purchase the communications boards from LIR and offer them with CEG's software under the name LAN MicroNodeTM Gateway. The agreement also gives LIR the option of purchasing the boards from CEG, once the group begins manufacturing them.

The hardware technology license agreement with LIR allows CEG to expand its offering of connectivity system solutions for IBM PCs and compatibles, which include PC Ethernet, 3270 terminal emulation, PC fax and SNA gateway products. The agreement also gives LIR access to the latest IC technology from National Semiconductor.

LIR's FPX communications boards connect PCs to Wide Area Networks, and are used by OEMs and software developers for applications that include mainframe communications and terminal emulation. FPX boards are available for PC, PC/XT and PS/2 computers running DOS, OS/2 or UNIXTM System V.3 and for VME and MULTIBUSR environments.

National Semiconductor Corp. designs, manufactures and markets high-performance semiconductors and board-level connectivity products. Headquartered in Santa Clara, the company is a global leader in mixed analog-and-digital technologies. LIR Corporation, established in 1989, is a member of the Paris based LIR Group of companies, founded in 1979.

The LIR Group provides wide area data communications products and services with a particular focus on European and international standards in multi-vendor environments.

LIR has established itself in a position of European leadership for data communication software such as X.25 packets switching and OSI, and also provides connectivity for de-facto standards such as IBM's SNA and Bull's DSA. LIR also offers engineering and consulting services for domestic and export markets.

#90311b0073 11/07/1990 ~Business Wire

SEATTLE (NOV. 7) BUSINESS WIRE - People 62 and older now can travel at reduced rates on Alaska Airlines and sister carrier Horizon Air through the carriers' new discount coupon book program for seniors.

The books come in four- and eight-coupon packs and cost $464 and $776

respectively. They are good for travel up to one year after purchase.

Each coupon is good for one-way travel between any Alaska or Horizon destination within the Lower 48 states, between any Alaska Airlines-served communities in Alaska, and between Canada and the continental U.S. Two coupons are required for one-way travel between the state of Alaska and the continental U.S. or Canada.

Flight reservations must be made at least 14 days in advance of desired departure date. Seats are limited and partially used books are non-refundable. Coupons, each ticketed in the name of one person, cannot be transferred. Other restrictions apply.

To illustrate the savings they represent, consider that a four-coupon book -- when used on two round trips between Seattle and Phoenix -- is some 30 percent less than the current lowest published round trip fare. Similarly, an eight-coupon book -- when used on two round trips between Anchorage and Palm Springs -- is more than 40 percent less than the current lowest published fare.

Senior citizens also are eligible for another, separate discount on Alaska and Horizon. The two carriers offer passengers 62 and older a 10 percent discount on most published fares. The discount applies to companion travelers as well, regardless of age.

Seattle-based Alaska and Horizon serve more than 60 cities in Alaska, Mexico and seven Western states.

PALO ALTO, CA (NOV. 7) BUSINESS WIRE - Varian Associates Inc. (NYSE:VAR) Wednesday announced that it has signed a letter of intent to sell its Solid State Operations to Litton Industries.

Completion of the transaction is subject to a number of conditions, including the execution of a definitive agreement. The price and terms were not disclosed.

Varian's Solid State Operations are based in Santa Clara, Calif., where they produce gallium arsenide devices and solid state microwave and other equipment for radar, communications, and defense applications. The operations had annual sales of approximately $20 million in fiscal 1990.

The activities to be sold are included in a number of non-core businesses and

product lines which Varian indicated it would divest under a restructuring program announced earlier this year.

Varian Associates Inc., is a diversified high-technology company with annual sales of $1.4 billion with offices and facilities throughout the United States and in five other countries. It produces equipment and components for communications, scientific, medical, industrial and defense markets worldwide.

#90311b0097 11/07/1990 ~Business Wire
LOS ANGELES (NOV. 7) BUSINESS WIRE - Z-Nix Co. Inc. Wednesday announced that it has filed an antitrust complaint against Microsoft in the U.S. District Court in Los Angeles.

Z-Nix is also seeking a declaratory judgment confirming the validity of a contract between the two companies.

Z-Nix is a supplier of advanced computer input devices and accessories, with headquarters in Pomona and distribution worldwide. The company's major customers include Tandy Corp., CompuAdd, Commodore Europe and PC Brand.

The complaint filed against thee Redmond, Wash.-based software giant claims that Microsoft is in violation of antitrust law under Section 1 of the Sherman Act. In Section 1, the law against ''tie-in'' prohibits a company in control of one market (in this case, the Windows market) from using its position to control another (the mouse market).

Z-Nix also claims that Microsoft is in breach of a contract agreement between the two companies for bundling the Z-Nix Super Mouse II with Windows 3.0.

Frank Yeh, vice president of sales and marketing at Z-Nix, said: ''While we negotiated in good faith and began executing marketing programs against an agreement, Microsoft was using its market clout to muscle us out of another market. The little company has no chance playing with these rules on Microsoft's field.''

Thomas T. Chan, attorney for Z-Nix and noted expert on software distribution law, said, ''It's time for us to stand up to Microsoft's unfair trade practices, and stop the slow death of innovation in this industry.''

Chan described the chronology of events that culminated in the legal action:

December 1989 -- Microsoft contacted Z-Nix regarding patent infringement by its Super Mouse II product.

February 1990 -- Microsoft sent a proposal for settlement; Z-Nix agreed with minor changes.

March 1990 -- Microsoft responded with a second proposal for resolution, this one even more restrictive than the first.

June 1990 -- Z-Nix filed for a patent on the redesign of Super Mouse II.

Yeh noted that: ''Instead of negotiating toward a compromise, we went backwards to a much more restrictive agreement. We subsequently discovered

that this is typical of negotiating with Microsoft.''

According to Chan, Z-Nix executives were also working with different Microsoft staff on an unrelated agreement to bundle the Z-Nix Super Mouse II with Windows 3.0:

August 1990 -- Microsoft gave Z-Nix a quote of $27.50 for royalties on the bundling deal. Z-Nix agreed and, while the contract was being formalized, proceeded with ambitious plans to market the bundled product.

Chan noted that Z-Nix relied on its agreement in principal with Microsoft and proceeded in good faith to execute its marketing plans and accept purchase orders based on the agreed-upon price from Microsoft.

Z-Nix Co. was founded in 1985 as the distributor for Jow-Dian Enterprises, a Taiwanese manufacturer of computer input devices. Z-Nix is now a privately owned U.S. company, developing and marketing a line of input/pointing devices. The company's products include the Super Mouse II, the FasTrak trackball and the Z-Scan hand-held scanner.

#90311b0102 11/07/1990 ~Business Wire

MILPITAS, CA (NOV. 7) BUSINESS WIRE - California Micro Devices Corp. (NASDAQ:CAMD) Wednesday reported a net loss of $704,000, or 17 cents per share for the first quarter ended Sept. 30, 1990, compared with income of $425,000, or 10 cents per share, for the like quarter in fiscal 1989.

Revenue for the quarter was $7,103,000, a decrease of 15 percent from last year's $8,396,000 for the like period.

''Operational results for the company's Thin Film operations in Milpitas, California compared favorably to those for the first quarter of last year,'' said Chan Desaigoudar, chairman and chief executive officer.

''Revenue and profits for the Thin Film Division rebounded significantly. More than 80 percent of the revenue increase is attributed to substantial completion of our inkjet printhead production tooling contract.''

''The Microcircuits Division in Tempe, Arizona suffered a 49 percent drop in revenue attributed primarily to reduced volume and price erosion on several existing telecommunication products.

''This decline in revenue severely affected the profitability of the division.

In response to the lower levels of available semiconductor business additions cost reduction programs, which were implemented last quarter, continue to be in effect.

''The Vanguard Semiconductor Division, while keeping research and development costs in line with those of last year, experienced delays in new product introduction releases which also adversely affected anticipated revenue for the quarter. Increased efforts to complete new products that are currently in the design stage are underway,'' added Desaigoudar.

A high-performance, microelectronics component technology company, California Micro Devices designs, manufactures, and markets a wide range of microelectronic components through its Thin Film, Microcircuits and Vanguard Semiconductor divisions. These components are marketed to communications, computer, disk drive, industrial, medical, aerospace and military customers.

#90311b0104 11/07/1990 ~Business Wire

LOS ANGELES (NOV. 7) BUSINESS WIRE - Wells Fargo Bank Wednesday announced it will form three new retail banking divisions in Southern California in an effort to focus its customer service and community involvement more closely on local markets.

The three divisions, named for the regions they represent in Los Angeles, Orange County and San Diego, replace the previous arrangement of one Southern California branch division, with headquarters in Los Angeles.

Executive vice president Lois Rice, 50, has been named manager of the 85-branch Los Angeles division, which also includes 16 offices in Ventura, Santa Barbara and San Luis Obispo counties.

Rice, a Southern California native, began with Wells Fargo at its Ventura office in 1967. She later became regional manager for the San Gabriel Valley and also managed the bank's largest commercial banking branches statewide.

Most recently she served as manager of the bank's Central California division, with headquarters in San Francisco. The Central California division included 176 branches with deposits of more than $14 billion in San Francisco, Oakland, and communities south along the coast to King City and Bakersfield north to Lodi. Rice became an executive vice president in 1989, one of three women currently with this title.

Senior Vice President Larry Crabtree has been named manager of a new Orange County division, with headquarters in Irvine. The division includes 37 Wells

Fargo offices in Orange County and 21 offices in Los Angeles County.

At the completion of Wells Fargo's purchase of Great American Bank's branches in Orange, Riverside, and San Diego counties, another 12 Great American offices in Orange County will join Crabtree's division, making a total of 70 offices in his area.

Wells Fargo expects to close the first phase of a planned 130-branch purchase from Great American on or about Friday, Nov. 30. The transaction received approval from Great American shareholders on Thursday, Oct. 18, and still requires approval from federal regulatory agencies.

Before joining Wells Fargo as a branch manager in 1983, Crabtree served 13 years on the Downey and Los Angeles police forces and later as the head of his own security company.

At Wells Fargo, Crabtree has managed four branches and four districts in the Los Angeles area, including most recently the Wilshire district, which covers West Los Angeles.

#90311b0112 11/07/1990 ~Business Wire

DALLAS (NOV. 7) BUSINESS WIRE - Hinderliter Industries Inc. (AMEX:HND) announced Wednesday a year-end loss for fiscal year ending June 30 of $8,362,000, compared to a loss for the same period a year earlier of $24,000.

The loss amounted to $2.32 per share compared to a loss of 1 cent per share in 1989. Hinderliter intends to mail its annual report to the shareholders before the end of November.

Richard H. Hughes, chairman of the board and chief executive officer of Hinderliter, stated that the 1990 loss resulted from Hinderliter's commitment to divest of all assets unrelated to its 80 percent owned subsidiary, Corken International Corp., and to reserve for all contingencies.

Hughes pointed out that the company's operating profit before consideration of non-recurring charges was $547,000 in 1990 compared to an operating loss of $206,000 in 1989.

Of the non-recurring charges incurred in 1990, approximately $3.7 million related to Hinderliter's litigation with Signal Capital Corp.; $800,000 to the termination of all refinancing activities, including withdrawal of an S-1 Filing; and $900,000 for retirement, severance and relocation costs.

Hinderliter's operational profit in 1990 improved over 1989 by $753,000 before consideration to these one-time charges.

Hinderliter previously announced that an adverse verdict was rendered in the State Court of San Antonio for approximately $3.3 million relating to legal fees and trial expenses in the counter-claim lawsuit by Signal Capital Corp. against Hinderliter, which arose from Hinderliter's $28 million lender liability suit against Signal Capital Corp.

Hughes said that the company intends to vigorously appeal the verdict, and at the present time, the court plans to hear arguments on the verdict on Dec. 17. Consequently, Arthur Andersen's audit has been prepared assuming that the company will continue as a going concern.

Hughes also said that Hinderliter is exploring all options to protect Hinderliter's shareholders, assuming the jury verdict becomes a judgment, including but not limited to, seeking protection by filing for a Plan of Reorganization in Bankruptcy under Chapter 11.

#90311b0136 11/07/1990 ~Business Wire

FREMONT, CA (NOV. 7) BUSINESS WIRE - Vicom Systems Inc. and Sun Microsystems Inc. announced Wednesday a joint marketing and development agreement.

Under the agreement Vicom will license Sun's SunVision visualization software package for distribution with its MASTER Data Visualization Server, and the

two companies will cooperate in a technology exchange involving high speed bus interfaces. The agreement also calls for joint marketing activities in selected markets.

SunVision is an integrated visualization environment consisting of application programming interfaces for image processing and high quality rendering, and interactive tools for image processing, high quality rendering, volume rendering, and 3-D interactive graphics.

The MASTER Data Visualization Server is an enabling technology for distributed image processing applications. It provides high speed connectivity, bulk storage, and video rate display processing in a standards environment.

According to Rick Seaman, Vicom's vice president of Marketing, ''We think the relationship makes good strategic sense. The product lines are complementary and the agreement gives both companies access to a broader line and a faster time to market.''

Mary C. Whitton, Sun's director of Marketing for visualization and imaging products, stated: ''Vicom is a leader in the imaging market and their adoption of SunVision is important to us. SunVision running on Vicom's MASTER product, with its ability to handle very large data sets efficiently, allows SunVision to reach a new segment of the visualization market.''

Vicom Systems Inc. is a privately held manufacturer of image processing hardware and software products. Located in Fremont, the company has over 5,500 installations throughout the world involved in all aspects of image processing applications.

Sun Microsystems Inc., with headquarters in Mountain View, is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

SunVision is a registered trademark of Sun Microsystems Inc. UNIX is a registered trademark of AT&T. MASTER is a registered trademark of Vicom Systems Inc.

#90311b0154 11/07/1990 ~Business Wire

COLUMBUS, OH (NOV. 7) BUSINESS WIRE - In a restructuring move designed to substantially boost cash flow and consolidate company operations, Rax Restaurants (NASDAQ/NMS:RAXR) is shutting down and selling all its restaurants in Florida.

''Florida has continued to be a cash drain and to drag down overall sales and company profitability,'' said Ira A. Hermann, president and chief executive officer of Rax Restaurants Inc. ''Rax didn't have the market penetration in the state to afford advertising and this limited our ability to compete in Florida's high-cost and highly competitive market.''

Hermann said the closing of the company's 26 remaining Florida stores, a move approved Nov. 2 by the Rax board of directors, caps off a far-reaching program for the restructuring of operations to improve cash flow.

''The consolidation is a key, major step in Rax's restructuring and permits us to focus our attention on our strongest market area, the Midwest,'' said Hermann. ''While Rax's 1990 financial statements will show a substantial loss that includes a loss from the closing of these stores and its earlier closed stores in Louisiana, this move is a critical step in the company's efforts to improve cash flow and return Rax to profitability.''

Other recent restructuring efforts include a September corporate staff reduction of 25 percent, the pending disposition of its office building to the mortgagor, and an earlier write-off to close Rax company stores in Louisiana.

The closings announced Wednesday combined with other streamlining efforts should boost cash flow by approximately $4.5 million annually. In addition, the company also is pursuing other avenues to increase its cash flow further, Hermann said.

Several companies already have expressed interest in the Florida properties and Rax officials say these stores are especially attractive in that market because of impact fees on new construction assessed by several Florida counties.

While company-store operations in Florida will end, 15 franchised Rax stores presently intend to continue operating in the state.

Rax Restaurants Inc. owns, operates, develops and franchises restaurants that feature a variety of specialty sandwiches and other fast foods. Rax has company-owned and franchised stores in 29 U.S. states and in Canada. Incorporated in 1977, the publicly held company is traded over-the-counter on the NASDAQ National Market System under the RAXR symbol.

MENLO PARK, CA (NOV. 7) BUSINESS WIRE - Cisco Systems Inc. (NASDAQ: CSCO), a manufacturer of internetworking computer systems, Wednesday reported its first quarter results for the period ended Oct. 28, 1990.

Net revenue for the first fiscal quarter was $32,761,000 and net income was $7,924,000, or 51 cents per share. This compares to net revenue of $14,082,000 and net income of $2,519,000, or 20 cents per share in the like period last year, and are increases of 133 percent, 215 percent and 155 percent, respectively.

Earnings per share for the period reflected the issuance of 2,850,000 shares issued by the company in its public offering in February 1990.

"The company's first quarter revenue and profit growth accelerated over that of the immediately preceding July quarter and was helped by increased shipments of the company's new high-end AGS+ product line and greater acceptance of computer internetworking concepts," said John Morgridge, Cisco's president and chief executive officer.

Cisco and Leonard Bosack and Sandra Lerner also announced today that Bosack and Lerner have resigned as officers and employees of Cisco and will become consultants to the company through December 1991.

Bosack, who will remain a director of Cisco, stated that: "Sandy and I founded Cisco in 1984 and have thoroughly enjoyed participating in its achievements. We would now like to move on to new entrepreneurial activities in a non-competing area."

John Morgridge chief executive officer of Cisco said: "Len and Sandy, as founders, have made a significant contribution to Cisco's success and it is our intent to continue to draw on their counsel on technical and strategic issues. We will, of course, continue to benefit from Len's participation as a Board member and we wish Len and Sandy all the best in their new endeavors."

In connection with their change in status, the company and its financial backer, Sequoia Capital, have granted Besack and Lerner the right to request a secondary offering of shares, the timing of which is likely to be in the first calendar quarter of 1991.

It is currently contemplated that such offering would be for up to a total of 3,000,000 shares, of which up to 25 percent would be available for Sequoia Capital, a current holder of registration rights, and that the company would not include any shares in such offering.

Cisco Systems Inc. is a leading supplier of high-performance, multi-media and multi-protocol routers, bridges and terminal servers.

AUSTIN, TX (NOV. 7) BUSINESS WIRE - Tracor Applied Sciences Inc., a subsidiary of Tracor, has received a contract from the Naval Coastal Systems Center (NCSC), Panama City, Fla., to provide acoustic simulation and modeling services to support U.S. Navy Acoustic Warfare Programs.

The contract is for one base year, representing $3.36 million, and four option years for a total potential value of $17.5 million.

K. Bruce Hamilton, president of Tracor Applied Sciences, said, ''Tracor will provide the simulation and modeling disciplines necessary to support NCSC in weapons and countermeasures development programs.''

Tracor has provided acoustic simulation and modeling support for NCSC Acoustic Warfare programs since 1973. Hamilton said the contract will be performed by the Tracor Applied Sciences' Analysis & Applied Research Division under the direction of Homer E. Wieland, division vice president, from its operations in

Austin, Texas; and Panama City. Wieland said the program will be managed by Terry D. Plemons under the direction of Jerry J. Dow, director of Signal Processing.

Tracor, owned by privately held Westmark Systems Inc. is an international technological products and services company with headquarters in Austin. The company is a significant engineering and support contractor in sonar, communications, and aviation; a leader in the development and production of electronic countermeasures systems and other advanced defense electronics; and a major manufacturer of electrical components.

LOS ANGELES (NOV. 7) BUSINESS WIRE - Telecredit Inc. (NASDAQ:TCRD) announced Wednesday that it has adjourned its shareholders meeting called for the purpose of voting on the merger agreement between Telecredit and Equifax Inc. (NYSE:EFX).

The merger agreement provides for an exchange ratio of 2.69048 shares of Equifax common stock for each share of Telecredit common stock. Under the merger agreement, a condition of Telecredit's obligation to complete the merger is that 2.69048 shares of Equifax common stock have a market value of at least $50 based upon the average price during a specified period.

The market value of 2.69048 shares of Equifax common stock for the purposes of

this condition is less than $50. Equifax and Telecredit are currently having discussions to determine whether a revision of the exchange ratio is appropriate.

Telecredit provides check authorization, credit card processing and other payment services to retail merchants, financial institutions and others in the United States and Canada.

Equifax is the leading provider of information services and systems for consumer financial transactions throughout the United States and Canada.

#90311b0220 11/07/1990 ~Business Wire

IRVINE, CA (NOV. 7) BUSINESS WIRE - Toshiba engineers have announced a revolutionary new battery technology that not only provides users of portable computers with up to 80 percent more power per unit weight of competitors' nickel cadmium (NiCad) batteries, but does away with the so-called ''memory effect'' that limits the capacity of earlier rechargeable cells.

The new batteries are based on a nickel-metal hydride formulation based on the electrochemical properties of a hydrogen-absorbing alloy. This alloy becomes metal hydride during the charging of the battery by absorbing relatively large volumes of hydrogen -- a reaction that is reversed during the discharge cycle.

The operating voltage for the new nickel hydride battery is 1.2 volts, providing compatibility with NiCad in its varous applications.

The implications for users of Toshiba laptop and notebook computers is clear: even more freedom and flexibility than they have enjoyed.

The capacity of the positive electrode determines the useful capacity of the battery. Like NiCad cells, nickel hydride batteries are completely enclosed structures, with positive and negative electrodes sealed in with a liquid eletrolyte.

Unlike NiCad, however, the charge capacity of the negative pole -- the hydrogen-absorbing alloy -- is far higher than that of the positive pole material. This means that a much larger quantity of positive pole material can be contained within the balanced, enclosed structure, allowing for a significant increase in the volume of the positive electrode and, hence, in the charge capacity.

The nickel hydride battery exhibits almost flat voltage characteristics throughout the discharge period. Its discharge voltage of 1.2V is closely equivalent to that of NiCad batteries, assuring compatibility. After 500 complete charge/discharge cycles, no large drop of battery capacity can be observed.

NiCad battery systems have been known to exhibit a condition referred to as ''memory'' which does not exist with the new nickel hydride batteries.

Therefore, nickel hydride batteries often accept a fuller charge than their NiCad counterparts. When recharged before full discharge, NiCads may mistakenly ''remember'' this partial charge level as the full discharge point.

As a result, NiCads fail to return to full power on the next recharge, which greatly reduces battery life. Only through repetitive complete discharge/recharge cycles can the NiCad batteries be returned to their original life. Nickel hydride batteries may be charged/discharged to various levels with no adverse affects.

Toshiba America Information Systems Inc. (TAIS) is an independent operating company, owned by Toshiba America Inc., a subsidiary of the $29 billion Toshiba Corp. world leader in high technology products with 71 major subsidiaries worldwide.

With headquarters in Irvine with 1989 sales exceeding $900 million, TAIS is comprised of eight divisions which manufacture and market a wide a range of business and information-oriented products.

#90311b0223 11/07/1990 ~Business Wire

IRVINE, CA (NOV. 7) BUSINESS WIRE - The Computer Systems Division of Toshiba America Information Systems Inc. has added a new member to its full line of portable computers with the introduction of the T1000LE, a 6.5 pound notebook featuring built-in hard disk and diskette drives.

The T1000LE is shipping now, at a suggested retail price of $2,499.

Designed to offer the best value in terms of performance, dependability, weight and price, the T1000LE is the ideal machine for traveling professionals writers and students requiring word processing, electronic mail or

spreadsheet abilities in a highly portable package.

The T1000LE comes equipped with a 9.54-megahertz 80C86 processor, and runs for three hours on a standard removable, rechargeable slim-line battery pack. An optional second battery extends the computer's battery life to five hours.

The T1000LE is the third member of Toshiba's 80C86-based notebook family, which includes the T1000SE and the T1000XE. The new entry brings Toshiba's notebook line to six members including the 80C88-based T1000, the 80C286-based T1200XE and the 80386SX-based T2000SX. The T1000SE features a single diskette drive and the T1000XE a hard disk drive. The T1000LE includes both a 20MB hard disk drive and an internal 1.44MB diskette drive.

With the introduction of the T1000LE, Toshiba has announced price reductions on the T1000SE and T1000XE. Previously $1,699 and $2,399 consecutively, the T1000SE now retails for $1,499, and the T1000XE for $2,199. Also reduced from $599 to $499 is the price of the 1MB memory card for the T1000LE, T1000SE and T1000XE.

The T1000LE's sidelit liquid crystal display (LCD) with 640 x 400 pixel graphics and AT&T mode, provides superior graphics compared to CGA displays when using popular software such as Lotus 1-2-3, Harvard Graphics, Microsoft Word and Microsoft Windows. It also offers optimum readability due to its superior brightness. In addition, the double-scan CGA capability provides better on-screen fonts.

For ultimate ease-of-use, the T1000LE features AutoResume (tm), which saves time and battery power by remembering the place the user was working when the computer was last turned off, eliminating the need to reboot or reload the application program or data file. In addition, Toshiba's T1000LE is equipped with hypertext on-line documentation.

The T1000LE continues Toshiba's tradition of offering the industry's best portable computer keyboards. The T1000LE's 82-key, sculptured keyboard with full-size, standard-spaced keys, offers the user advantages in both layout and number of keys. There are also 12 dedicated function keys and eight dedicated cursor control keys as well as a special Fn key for extended functions. The arrow keys are arranged in the standard, easy-to-use ''inverted T'' pattern with separate keys for home, page-up, page-down and end.

Toshiba America Information Systems Inc. (TAIS) is an independent operating company, owned by Toshiba America Inc. a subsidiary of the $29 billion Toshiba Corp., world leader in high technology products with 71 major subsidiaries worldwide. Headquartered in Irvine, with 1989 sales exceeding $900 million, TAIS is comprised of eight divisions which manufacture and market a wide range of business and information-oriented products.

#90311b0271 11/07/1990 ~Business Wire

DENVER (NOV. 7) BUSINESS WIRE - Hallwood Energy Partners L.P., (AMEX:HEP) Wednesday reported revenues totalling $18,568,000 for the three months ended Sept. 30, 1990.

Net income for the period was $1,380,000, or 13 cents per unit. These amounts compare to revenue, net loss and net loss per unit of $14,872,000, $(1,162,000) and $(.16) for the third quarter of 1989. Cash flow from earnings during the third quarter of 1990 was 79 cents per unit, and HEP declared a 40 cents per unit distribution payable Nov. 15, 1990.

The increase in revenues is attributable to a 5 percent increase in production coupled with a subsantial increase in oil prices. Oil prices averaged $23.77 per barrel in 1990 (including the effects of hedge transactions entered into during the third quarter of 1990) as compared to $17.70 in 1989. Gas prices averaged $1.46 in 1990 vs. $1.48 in 1989.

The improved earnings in 1990 also reflect a $1,200,000 decline in general and administrative expenses which has resulted from operating efficiencies achieved by the general partner after the merger with Energy Development Partners Ltd. completed in the second quarter of 1990.

HEP also announced that during the third quarter of 1990 it had entered into financial contracts for oil hedging transactions for the last quarter of 1990, the year 1991 and the first two quarters of 1992. The transactions involve approximately 120,000, 536,000 and 147,000 barrels of oil which represent approximately 50 percent, 60 percent, and 40 percent of the forecasted crude oil production during the last quarter of 1990, the year 1991 and the first two quarters of 1992,

respectively.

The contracted prices, after adjustments for the differential between field posting price and the contract price, transportation charges and oil gravity differentials, is expected to range from $23 to $24 per barrel for the barrels hedged.

By hedging a portion of its oil production, HEP intends to mitigate against the risk of future declines in oil prices, while ensuring that its oil is sold at a profitable price which will help provide stable cash flow to meet its near term development and distribution goals.

#90311b0285 11/07/1990 ~Business Wire

IRVINE, Calif. (NOV. 7) BUSINESS WIRE - CMS Enhancements Inc. (NYSE:CME) Wednesday announced lower net sales and lower net income for the first quarter of fiscal 1991 ended Sept. 30, 1990.

Net sales for the quarter were $33,186,000 compared with $42,932,000 for the same quarter a year ago. Net income for the first quarter ended Sept. 30, 1990, was $17,000, or 1 cent per share, compared with $857,000, or 27 cents per share, for the same quarter last year.

Per-share calculations for the first quarter of fiscal-year 1990 have been adjusted to reflect the 1-for-4 ''reverse'' split of Dec. 5, 1989.

''Our first quarter's sales and results were impacted by the continued very competitive environment within our industry, combined with expenses of our Singapore manufacturing operations.

''In addition, expenses incurred to move into expanded facilities in Irvine were realized during the first quarter and will continue into the second quarter ending Dec. 31, 1990,'' said Jim Farooquee, president and chief executive officer of CMS.

Farooquee went on to say, ''Fiscal 1991 will be a challenging year for us but we continue to feel cautiously optimistic.''

CMS Enhancements is a producer and worldwide marketer of mass data storage devices and accessories for virtually all major brands of personal and laptop computers. The company markets its products through dealers and distributors in more than 60 countries.

#90311b0288 11/07/1990 ~Business Wire

SAN JOSE, Calif. (BUSINESS WIRE - Maxtor Corp. (NASDAQ:MXTR) Wednesday agreed to issue a four-year, 13 percent subordinate promissory note of approximately $13 million to Standard Chartered Bank, London.

In addition, Standard Chartered will receive a warrant to purchase Maxtor shares. The bank also has agreed to pay Maxtor approximately $840,000 to resolve issues that arose during the MiniScribe asset acquisition, completed June 30 of this year.

Standard Chartered Bank was the principal lender to MiniScribe Corp., Longmont Colo. Maxtor had agreed to purchase MiniScribe's assets for $21.5 million in cash and $20 million worth of Maxtor stock.

Maxtor had earlier agreed that if the shares were not registered until after June 30, additional shares would have to be issued so that total value of the shares would be $20 million as of the registration date.

Maxtor issued 1,423,488 shares to the bank on June 30. The company said the note is being issued in lieu of the additional shares that would have to be delivered to bring the value of the shares up to $20 million.

For example, if the share registration were to become effective today, with Maxtor's stock price at approximately $5 a share, 2.6 million additional shares would have to be issued to the bank.

''We believe this note is in the best interest of our shareholders,'' said David M. Kowalski, Maxtor's vice president of finance. ''It allows us to avoid issuing a large number of shares at a low stock price, thereby protecting our shareholders.''

Maxtor also will issue warrants to the bank to purchase approximately 1.1 million shares of Maxtor stock at a price of about $12, exercisable after two years. In certain circumstances, Maxtor would have the right to put the warranted shares to the bank.

The exact principal amount of the note and the number of shares and exercise price of the warrant will be based on Maxtor's share price on the date the registration statement becomes effective for the shares previously issued to the bank.

Maxtor Corp., San Jose, was founded in 1982. Maxtor designs and manufactures high-performance Winchester and optical data storage products in San Jose; Longmont, Colo.; Singapore; Hong Kong and Malaysia.

Its products range from 40 megabytes to more than 2 gigabytes capacity and are designed for desktop and portable computer systems, workstations, local area networks and mainframes. Maxtor employs more than 9,000 people worldwide.

#90311b0315 11/07/1990 ~Business Wire

SAN FRANCISCO (NOV. 8) BUSINESS WIRE - The Harper Group Inc. (OTC/NASDAQ:HARG) Wednesday reported financial results for the third quarter ended Sept. 30.

Third quarter 1990 revenue increased 14 percent to $110,464,000 compared to $96,694,000 for the third quarter of 1989. Net income rose 13 percent to $4,481,000, or 47 cents per share, vs. $3,959,000, or 42 cents per share for the third quarter 1989.

For the nine months ended Sept. 30, 1990, revenue grew 9 percent to $319,048,000 compared to $292,366,000 for the like period in 1989. Net income increased 18 percent to $12,970,000, or $1.36 per share, from $10,946,000, or $1.16 per share, reported for the nine months ended Sept. 30, 1989. Net income included an after tax gain in the 1990 first quarter of $552,000, or 6 cents per share, on the sale of property in Japan.

Third quarter results reflect increased revenues and income from operations, and improved yields on airfreight business. Business acquired from Livingston International Freight Ltd. in the United Kingdom in the second quarter of 1990 while contributing to increases in revenue and net revenue, did not contribute to operating income during the third quarter.

The company continues to implement cost saving measures and anticipates the Livingston operations to be profitable during the fourth quarter.

The Harper Group is a leader in the global movement of goods, information and value-added services. Its key subsidiaries include Circle Freight International, Harper Robinson & Co., and Baxter Gruenhut Management Ltd.

#90311b0611 11/07/1990 ~Business Wire

IRVINE, CA (NOV. 7) BUSINESS WIRE - Advanced Logic Research Inc. (NASDAQ:AALR) Wednesday introduced five families of the ALR POWERPRO.

Based on the Intel 33-MHz i486 and EISA-bus, the new product families

incorporate a scaleable cache and dual processor upgrade path to accommodate two 33-MHz i486 microprocessors and up to 1-MB of ALR ServerCache on a single 12-slot system board. Additionally, the ALR POWERPRO can expand up to 49-MB of RAM on the system board using industry-standard SIMMs.

Positioned to support high-performance requirements in a broad range of network server and data-intensive multiuser environments, the ALR POWERPRO is strategically aimed to compete with Compaq's SYSTEMPRO.

The high-performance ALR POWERPRO, from single i486-based models to dual i486 configurations, delivers a range of processing performance from 14.7 to 40 MIPS.

At its highest configuration level, its efficiency is twice that of a single-processor approach when running under operating environments like SCO UNIX/System V386 Release 3.2 with SCO's MPX multiprocessor software. Furthermore, the ALR POWERPRO offers an industry-standard platform capable of supporting off-the-shelf SCO UNIX applications.

As a Novell network server, the ALR POWERPRO single-processor system provides the performance compatibility with minicomputers as well as the storage capacity and power source security needed to tackle the intense applications found in this environment.

Disk mirroring, disk duplexing and disk spanning are among the many advanced features the ALR POWERPRO supports when using Novell NetWare 386 or any of the popular network operating systems.

The ALR POWERPRO, using the ALR Intellimux system, can have up to 130 users sharing resources in complex department database applications. In addition, the ALR POWERPRO hard drive expansion can be increased up to 10-Gigabytes to handle large departmental databases and productivity applications.

Available in a variety of configurations, the ALR POWERPRO has a suggested retail price ranging from $7,495 to just below $25,000.

Systems are shipped in a floor-standing chassis with either a single or dual 33-MHz i486 processor(s); 5- or 17-MB of 64-bit RAM using industry-standard SIMMs expandable to 49-MB; 12 expansion slots; eight EISA, two ISA and two ALR proprietary; from 64-KB and 128-KB expandable to 1-MB scaleable read/write-back cache RAM; two serial ports expandable to 130 user stations; a 1.2-MB 5 1/4-inch floppy drive; and either an embedded IDE 80-, ESDI 150-, 330- or 650-MB and 32-bit EISA Bus Master SCSI 1.2-GB hard disk drive option.

Shipments are forecasted for first-quarter 1991 and will be available through a select group of qualified resellers. Twelve-month optional on-site and extended warranty options are available for these systems.

The ALR POWERPRO 486/33 Models 1 and 80 offer a buy-back incentive program providing customers a rebate toward the purchase to upgrade to dual processing. For the return of their 33-MHz i486 CPU Module and 64-KB CachePak card, customers will receive $1,000 direct from ALR.

The ALR POWERPRO systems will be featured during the COMDEX '90 exhibition at the Las Vegas Convention Center in booth 1886.

Advanced Logic Research is a leader in high-performance CPU technology. The company carries a comprehensive line of ISA-, Micro Channel- and EISA-based PCs ranging from entry-level 12.5-MHz 286 computers to 33-MHz 386 and 33-MHz i486-based high-performance systems and multiprocessor systems based on UNIX and Novell.

ALR products can be purchased through value-added resellers, value-added dealers, major chains and retail locations throughout the United States, Canada, Europe, Mexico, Latin America and Asia.

#90311b0612 11/07/1990 ~Business Wire

CULVER CITY, CA (NOV. 7) BUSINESS WIRE - Showscan Corp. (NASDAQ:SHOW) reported significantly lower revenues for its second quarter ended Sept. 30, 1990, according to an announcement by President and Chief Executive Officer Roy Aaron.

Revenues for the quarter were $618,000 with a net loss of $1.3 million, or 44 cents loss per share, as compared with revenues of $10.3 million with a profit of $36,000, or 1 cent per share, for the second quarter of the previous year; 70 percent of the previous year's second-quarter revenue was attributed to non-recurring production of a specialty film.

Aaron said that the second-quarter results are not representative of the company's current business and prospects, as no systems were shipped during the quarter due to a variety of internal, external and customer-requested delays, most of which are now resolved.

For the six months ended Sept. 30, the company reported revenues of $3.7 million with a net loss of $2.2 million, or 75 cents loss per share, compared with revenues of $17.1 million with a profit of $162,000, or 5 cents per share for the previous year. The previous year's six-month revenues included $10.4 million in non-recurring production of specialty films.

Showscan develops and supplies advanced image and experiential technologies to

stimulate, entertain and educate the public. It is also developing products for use in high-definition television.

#90311b0613 11/07/1990 ~Business Wire

NEW YORK (NOV. 7) BUSINESS WIRE - The 1990 Nintendo Tour de Fun is set to arrive in New York Wednesday on the last stop of the nationwide search for America's definition of fun.

Led by the world's only ''Fun Master,'' Nintendo's Howard Phillips, the Tour de Fun will bring fun to citizens throughout New York, while also learning from them why activities they consider fun -- Knick games, backyard barbecues, movies and video games -- are fun.

''We are out to 'break the code' on fun,'' Phillips explained. ''For thousands of years, people have been having fun for numerous reasons. We want to take that intangible emotion and make it into a concrete principle so we can continue to ensure the entertainment we offer reflects America's desire for fun. We are looking to America to help us establish that 'credo of fun''' he added.

Phillips will start the Tour de Fun visit to New York by setting up ''Fast 15 Fun Zones'' in front of the New York Stock Exchange from 7:30 a.m. to 8:30 a.m. Phillips and his ''Fun Crew'' will stop busy traders and encourage them to start their hectic day with a few minutes of fun with the help of Nintendo's portable video game system, Game Boy.

Then the ''Fun Master'' will bring a little fun into the lives of young patients at Tisch Hospital at NYU Medical Center from 11 a.m. to noon, where Phillips will visit and play games with the children. After that, Phillips will give Nintendo fans the chance to beat him at his own game -- the game of fun -- when he visits Toys R Us in Long Island City from 5 p.m. to 6 p.m.

As part of bringing fun to New York, Nintendo will donate thousands of dollars worth of products to recipients who could use a little more fun in their lives. ''In addition to visiting with the children at Tisch Hospital, Nintendo will donate a Nintendo Entertainment System and two Game Boys, along with a selection of our more popular fun-filled games,'' Phillips said.

Nintendo of America Inc. sells personal, home and arcade video games in the United States. The Redmond, Wash.-based company is the headquarters for the

company's marketing in North America and is a subsidiary of the world's largest manufacturer and marketer of video games, Nintendo Co. Ltd.

#90311b0618 11/07/1990 ~Business Wire

NEW YORK (NOV. 7) BUSINESS WIRE - New Line Cinema Corp. (AMEX:NLN) Wednesday announced that it has closed its three year, $75 million revolving credit facility with Chemical Bank as agent and a syndicate of other leading commercial banks including Bank of America, The Bank of California, Imperial Bank, National Westminster Bank PLC, Societe Generale and The Yasuda Trust and Banking Co.

As previously announced, the new credit facility replaces a $35 million revolving credit facility that New Line had with Chemical Bank. New Line will use the new facility for general corporate purposes including film production.

Commenting on the increased credit facility, chairman and chief executive officer Robert Shaye said, ''Our ability to secure an expanded credit facility undescores the soundness of our approach to the entertainment business.

''Chemical has been an important source of financing to New Line for many years and we are delighted to be associated with the prestigious consortium of banks that Chemical has assembled to participate in this new facility.''

John Miller, managing director, Entertainment Industries Group at Chemical Bank, said, ''New Line has demonstrated that its sound business and financial strategies have provided a strong platform for continued growth and success. Chemical is very pleased to have agented such an important financing for this leading independent.''

Shaye added, ''New Line's ongoing expansion and production plans, supported by this expanded facility, will futher distinguish us in the industry. We believe the access to the global banking markets will facilitate the continued expansion of our presence in markets worldwide.''

New Line Cinema Corp. is a leading independent producer and distributor of theatrical motion pictures.

#90311b0620 11/07/1990 ~Business Wire
FREMONT, CA (NOV. 7) BUSINESS WIRE - Fremont Communications Tuesday introduced the Frecom Fax96 CommCenter, a 9600/2400 bps fax-and-modem board with fax and modem software, Faxography(TM) software for like-typeset faxes and FaxCupl(TM) the first firmware that allows a PC faxboard to communicate locally with a standalone fax machine.

This makes it possible for a CommCenter user to scan from a fax machine into the PC and, using Fremont's Faxography software, to print from the PC directly to a nearby fax machine.

The Frecom Fax96 CommCenter package includes a full-length PC fax/modem board, telephone cabling and Fax96 software. All system components and the easy-to-follow manuals are designed and priced (under $500) for people working in a home office or small business.

The Frecom Fax96 CommCenter is: 1. A 9600 bps fax board. 2. A 2400 bps modem with MNP5 2:1 data compression. 3. A Frecom Fax96 1-Liner that lets the user operate a telephone with answering machine on the same phone line as the Fax board. Software bundled with the CommCenter includes: 1. Frecom Fax software 2. FarFetchFax, a software package which lets the user remotely retrieve fax messages which have been received since the last call. 3. Faxography software that lets the user include typographic information in faxes. 4. FaxCupl(TM), new software that couples a standalone fax machine to the Fax96 board over standard telephone wires and allows bidirectional communication between fax board and fax machine.

At 2400 bps, the modem will transfer about 240 characters per second. The modem firmware includes MNP5 (Microcom Networking Protocol, Level 5), which permits 2:1 data compression when connected with another modem using this protocol. The net result is the possible doubling of throughput to about 480 characters per second.

Faxography is a new faxing technique that improves the output quality of fax messages. The Frecom Fax96 CommCenter includes the first Faxography product, Frecom Faxography(TM) LQ. It sends typeset fax images to any Group III fax machine. The result is very high quality output, noticeably superior to messages that have been scanned by a fax machine.

Many small businesses which already have a fax machine have been adding the

Fax96 faxboard to some of their more active communicators' PCs. For these heavy fax users, Fremont has developed software that lets fax boards talk to local fax machines in both directions--send and receive. The fax machine can provide 200x200 dot scanned input for the PC, and the faxboard user can ''print'' to the fax machine in his office over a standard telephone wire.

The Frecom CommCenter will be demonstrated to dealers at Fall Comdex in November. Delivery is scheduled to begin during December, 1990.

Suggested retail price for the complete package, containing 9600 bps fax board 2400 bps modem, Faxography software for LQ and Laser printers, fax software, and FaxCupl, is $495.

To get the name of a nearby dealer, the reader can call 415/438-5000. Fremont Communications Company is headquartered at 46309 Warm Springs Boulevard, Fremont 94539.

MONROVIA, CA (NOV. 7) BUSINESS WIRE - Vision Sciences Inc. (NASDAQ:LENZC) announced results for the three months ended Sept. 30, 1990.

Revenues for the period were $402,157 with a loss of $1,221,710, or 18 cents per share, compared with revenues of $1,602,714 and a loss of $894,427, or 13 cents per share, for the same period last year.

According to Chief Executive Officer Gerald T. Keahl, the company has resolved the earlier problems associated with products released in 1989, and it relaunched its line with new product and product improvements, in September 1990. He expressed optimism regarding the outlook for market acceptance of the company's products.

Vision Sciences is the recognized leader in the manufacture of office-based spectacle lens casting equipment. In-office lens casting provides eyecare professionals with the latest technology available in the production of quality yet inexpensive spectacle lenses.

HERCULES, CALIF. (NOV. 7) BUSINESS WIRE - Bio-Rad Laboratories Inc. (ASE:BIO.A/BIO.B) Wednesday reported that sales for both the third quarter and the nine months ended Sept. 30 reached new highs.

The third-quarter sales increase of 26 percent was the strongest of the year for the company. Sales have increased in all three segments of the company's business. For the year-to-date, Diagnostic products continue to show particular strength, while sales growth in Research Products and Analytical Instruments is somewhat below expectations.

The company's total operating expenses have grown faster than sales and, as a result, operating income for the quarter is up only 12 percent over last year, and for the year-to-date operating income is slightly behind 1989.

Earnings for the quarter were 20 cents per share, up from 18 cents last year. For the year-to-date, earnings are 93 cents per share, slightly behind the 96 cents per share reported last year.

Bio-Rad Laboratories Inc. is a multinational manufacturer of research products clinical diagnostics and analytical instruments based in Hercules.

CAMBRIDGE, MA (NOV. 7) BUSINESS WIRE - Lotus Development Corp. Wednesday announced that its wholly-owned subsidiary, North Subsidiary Corp., has commenced a tender offer for all of Samna Corp.'s outstanding shares of common stock at a purchase price of $18.84 per share, net to the seller in cash.

The tender offer is being made pursuant to a merger agreement signed Nov. 1, 1990, among Lotus, North Subsidiary Corp. and Samna. The offer is conditioned

upon, among other things, at least a majority of the issued and outstanding shares, on a fully-diluted basis, being validly tendered and not withdrawn.

Samna Corp.'s board of directors has unanimously approved the merger agreement and determined that the offer and the merger, considered as a whole, are fair to and in the best interests of the company's stockholders. The board recommends that all of the company's stockholders accept the offer, tender all of their shares, and approve the merger agreement and the merger, if required by law.

As previously announced, any share not acquired in the tender offer will be converted in a subsequent merger into the right to receive $18.84 per share in cash.

The offer and withdrawal rights expire at midnight, New York City time, on Thursday, Dec. 6, 1990, unless extended.

Lotus will provide North Subsidiary Corp. with the approximately $65 million of funds required for the offer and the merger. Lotus will obtain these funds from cash on hand, or borrowings under its existing credit lines.

The First Boston Corporation is serving as dealer manager for the offer and Georgeson & Company Inc. is serving as information agent for the offer.

Lotus Development Corp. (NASDAQ:LOTS), founded in 1982, develops, markets and supports business software and CD-ROM databases that help users access, analyze, communicate and share information. The company's first product, Lotus 1-2-3, is the most popular personal computer software program in the world with more than 14 million users. Lotus markets its broad range of products in more than 65 countries and offers users comprehensive support options, including 24-hour-a-day, 7-day-a-week support in the U.S. for PC versions of its 1-2-3 spreadsheet.

TAMPA, FL (NOV. 7) BUSINESS WIRE - PMSI (NASDAQ:PMSV) Wednesday announced it has signed a letter of intent to acquire Resource Opportunities, Inc., (ROI) a leading regional provider of medical case management services in the workers' compensation industry.

ROI uses a case management approach to assist workers' compensation insurance carriers, TPAs and self-insured companies address the continued escalation of

work injury healthcare costs. Programs are created and implemented to significantly reduce medical costs while improving the overall quality of care particularly in chronic and catastrophic cases. During its fourteen-year history, ROI's largest customers have included Nationwide Insurance, USF&G, Liberty Mutual, and State Farm Insurance.

''The acquisition of ROI will be a significant step in our growth and service strategy as we look to broaden our medical cost containment offering to the workers' compensation industry, thereby expanding our national sales force and existing relationships with 30,000 workers' compensation claims representatives,'' said Cecil S. Harrell, President and Chief Executive Officer.

''Our operating infrastructure and growth management expertise combined with ROI's continuing management commitment makes ROI a natural addition to PMSI's services.''

ROI, based in Richmond, Virginia, operates 13 offices in seven states, concentrated mainly in the Southeast. For its fiscal year ending December 31, 1990, ROI expects sales of approximately $5,800,000.

The aggregate consideration to be paid by PMSI is expected to approximate $5.3 million and the parties anticipate a closing prior to December 31, 1990.

PMSI is a leading independent national provider of medical cost containment services and products to workers' compensation payors and claimants and to the physical therapy clinics in the rehabilitation product and services marketplace.

HAYWARD, CA (NOV. 7) BUSINESS WIRE - Scientific Technologies Inc. (NASDAQ:STIZ) announced that for the third quarter ended Sept. 30, 1990, operating income advanced 31 percent to $517,000 on revenues of $2,520,000, compared to operating income of $395,000, on revenues of $2,158,000 for last year's third quarter.

Income was $312,000, or 7 cents per share, compared to $244,000, or 5 cents per share, in the like period last year. Net income of $329,000, or 7 cents per share, in the third quarter of 1989, included $85,000, or 2 cents per share, in benefits from net operating loss carryforwards.

Anthony R. Lazzara, chairman, said that STI's 29 percent improvement in gross margins, which reached 56 percent of sales in the quarter, resulted from improved manufacturing productivity and higher unit sales rates.

Lazzara observed that although third-quarter results were penalized by deferred deliveries and expenses associated with relocating the Control Components Division from San Diego to Hayward, the consolidation of manufacturing facilities is expected to contribute to operating efficiencies in the future.

During the quarter, STI introduced its new TearScan, a solid-state laser-based sensor product for detecting edge tears in manufacturing processes with rapidly moving web materials such as paper, film and foil. Shipments are scheduled to begin this winter.

For the nine-month period ended Sept. 30, 1990, operating income rose 26 percent to $1,522,000, compared to operating income of $1,212,000 in the like period of 1989.

Revenues for the period were $7,595,000, a gain of 21 percent over revenues of $6,258,000 in the first nine months of last year. Income rose 24 percent for the nine-month period to $947,000, or 20 cents per share, compared with $765,000, or 16 cents per share, last year.

Net income of $1,032,000, or 21 cents per share, for the nine months of 1989 benefited from the utilization of tax loss carryforwards of $267,000, or 5 cents per share.

Scientific Technologies Inc. manufactures and markets computer systems, industrial sensors, optical profilers, and data communication products for factory automation applications.

#90311b0652 11/07/1990 ~Business Wire

SOUTH SAN FRANCISCO, CA (NOV. 7) BUSINESS WIRE - Armanino Foods of Distinction Inc. (NASDAQ:BLUE) Wednesday reported record sales results for its Armanino brand products for the first quarter of fiscal 1991, ended Aug. 31.

The $807,000 in sales for Armanino Foods for the quarter ended Aug. 31, 1990, compares to $596,000 in Armanino Foods sales for the quarter ended Aug. 31, 1989, an increase of approximately 35 percent.

This increase in sales of Armanino brand products reflects the concentration

of selling efforts in the food service and industrial markets for fast-selling products with higher profit margins.

Sales for the quarter as reported in its consolidated financial statements, were $1,814,307 as compared to $596,262 for the quarter ended Aug. 31, 1989. Included in the consolidated quarterly sales figures were $807,000 in sales attributable to Armanino Foods products marketed under the Armanino brand name and $1,007,000 in sales attributable to Artanis Foods (a California limited partnership) which markets a line of Frank Sinatra brand Italian food products. Armanino Foods has a 46 percent ownership interest in Artanis.

The $1,007,000 in sales attributable to Artanis Foods represents the introduction of the Artanis food products into the Northern and Southern California retail markets.

The net consolidated loss for the quarter ended Aug. 31 is $76,371. The loss reflects substantial costs attributable to the introduction of the Artanis Foods' product line in California, particulary advertising and promotional costs. Although the consolidated results show an overall loss, Armanino Foods generated a modest profit for the quarter.

The consolidated balance sheet reflects total current assets of $3,422,810; total liabilities of $698,163; total assets of $3,542,987; with total shareholders' equity of $2,844,824.

Armanino Foods of Distinction Inc. is a national speciality food company.

#90311b0653 11/07/1990 ~Business Wire
SANTA MONICA, CA (NOV. 7) BUSINESS WIRE - Vidmark Inc., (NASDAQ:VDMK) Wednesday announced that earnings for the first quarter of fiscal 1991, ended Sept. 30, 1990, were $215,000, or 4 cents per common share, on revenues of $8.2 million.

This compares with earnings of $521,000, or 13 cents per share, on revenues of $7.7 million for the same period in 1989. Revenues increased 6 percent over the same period last year.

For the quarter, the company reported that performaces of the company's titles did not achieve expectations and, as a result, the percentage of costs attributable to these revenues increased, resulting in lower gross profits.

Additionally, the company said it experienced an increase in selling expenses which were necessary to service expanded markets and to enhance the quality of

its sales force to meet an increasingly competitive environment.

For the second quarter, the company has several high-profile pictures scheduled for release on home video. Included in the upcoming quarter are: ''The Cook, The Thief, His Wife and Her Lover;'' ''Amityville IV;'' ''Texas Guns,'' starring Richard Widmark, Willie Nelson and Angie Dickinson; and ''Rainbow Drive,'' starring ''Robocop's'' Peter Weller.

Vidmark is an international distributor of motion pictures, primarily engaged in the distribution of feature films for the domestic home video market and in the licensing of distribution rights to motion pictures for foreign markets.

#90311b0655 11/07/1990 ~Business Wire

SANTA CLARA, CA (NOV. 7) BUSINESS WIRE - Confirming its DOS Protected Mode Interface specification as the de facto industry standard, the DPMI committee, and industry-wide committee composed of 12 application and system software leaders, has announced that IBM has officially joined the committee and that nearly 2,000 copies of the specification released in May have been shipped.

Additionally, the committee will be demonstrating the first DPMI compliant applications at the upcoming COMDEX conference. The demonstrations will take place in the DPMI Room 21A in the main hall of the convention center.

The DPMI specification defines a standard interface that allows extended DOS applications to more fully implement the capabilities of protected-mode, multitasking operating environments for Intel-based personal computers.

The first version of the DPMI specification, version 0.9, was released in May. DPMI allows extended DOS applications to be multitasked reliably under DPMI-compliant operating environments, including Microsoft Windows 3.0. Other multitasking environments that will implement DPMI include DESQview, OS/2, Unisys CTOS, VP/ix on UNIX 386 and VM/386.

The DPMI standard offers important benefits to both software developers and end users. DPMI provides a standard way for extended DOS applications to cooperate in the multitasking DOS operating environments using the protected-mode feature of Intel's 286, 386 and

i486 microprocessors. DPMI provides the key for binary portability for extended DOS applications across multiple operating environments.

Software developers who support DPMI can now sell a single shrink-wrapped extended DOS application that can run on multiple extended DOS operating

environments. End users will optimize their investment since they will no longer need to upgrade their extended DOS applications when they switch to newer, more powerful operating environments.

The DPMI committee is composed of 12 founding member companies, plus advisory members. Numerous other companies are currently developing products that conform to the specification. The founding member companies are Borland, Ergo Computing, IBM, IGC, Intel, Locus, Lotus Development, Microsoft, Phar Lap, Phoenix Technologies, Quarterdeck and Rational Systems.

Additionally, the committee has shipped nearly 2,000 copies of the specification.

#90311b0661 11/07/1990 ~Business Wire

LOS ANGELES (NOV. 7) BUSINESS WIRE - Carolco Pictures Inc. (NYSE:CRC) Wednesday announced that its wholly owned subsidiary, Carolco International N.V., has completed the previously announced purchase of shares of Carolco common stock held by New CIBV, a company in which Carolco Chairman Mario Kassar has a substantial interest, under terms negotiated by the Independent Committee of Carolco's board of directors and approved by the Independent Committee and Carolco's board of directors.

The Independent Committee of Carolco's board of directors and New CIBV negotiated a transaction in which an amount equal to approximately 50 percent of the $90 million aggregate proceeds from Carolco's sale of Series B and Series C convertible preferred stock to Canal+ Productions, S.N.C., and

Pioneer LDCA Inc. would be used by Carolco or a wholly owned subsidiary to purchase Carolco common stock owned by New CIBV.

The purchase of Carolco common stock from New CIBV was contemplated by the terms of the Canal+ and Pioneer agreements under which Canal+ and Pioneer purchased the preferred stock.

In exchange for 3,461,538 shares of Carolco common stock, New CIBV received $44,999,994 and warrants of Carolco to acquire an aggregate 1 million shares of Carolco common stock at an exercise price of $18.50 per share for a term of seven years.

Payment by Carolco International N.V. of the $44,999,994 was made by (i) assumption of certain debt owed by New CIBV to Carolco, (ii) payment of certain debts of New CIBV to a third party and (iii) execution of a promissory note in favor of New CIBV.

New CIBV, which owned approximately 62 percent of the outstanding shares of common stock of Carolco prior to the purchase, now owns approximately 57 percent of the outstanding shares, before taking into account options and warrants.

PLUMSTEADVILLE, PA (NOV. 7) BUSINESS WIRE - Global Environmental Corp. (NASDAQ: GLEN), a full service environmental and air conveying company,

received a new contract totaling $2.5 million to design, engineer, supply, and install a turnkey project to a major plastics company. The project is expected to be completed in September 1991.

The company's new orders for the month of October soared to approximately $4.5 million resulting in a backlog of approximately $7 million. This will have a positive effect on fiscal 1991 results. Of the $4.5 million, $1.6 million was previously announced.

Global Environmental Corp., headquartered in Plumsteadville, Pa., provides engineering, manufacturing, installation and testing of environmental systems, including air, odor control and conveying systems.

The company has three wholly owned subsidiaries: Danzer Metal Works, Hagerstown, Md.; Texcon Inc., an engineering firm located in Greenville, S.C., and Rage Inc., a pneumatic conveying company located in Plumsteadville.

#90311b0668 11/07/1990 ~Business Wire

NEWPORT, KY (NOV. 7) BUSINESS WIRE - NS Group Inc. (NYSE:NSS) Wednesday announced the results for its fiscal year ended Sept. 29, 1990.

Net income for the fiscal year ended Sept. 29, 1990, was $13,047,000, or 97 cents per share, compared to net income of $12,773,000, or 95 cents per share, for fiscal 1989. Sales for fiscal 1990 were a record $249,871,000 compared to $219,414,000 for fiscal 1989.

For the fourth quarter of fiscal 1990 net income was $3,387,000, or 25 cents per share, on sales of $66,831,000. Net income was $3,405,000, or 25 cents per share, on sales of $58,192,000 for the fourth quarter of fiscal 1989.

C.R. Borland, president and chief executive officer of NS Group Inc., commented ''fiscal 1990 was a very rewarding year, one in which many new milestones were reached and one which saw the company further position itself for continued growth. Sales for the year reached an all time high on the strength of four consecutive quarters of increased shipments at both Newport Steel and Kentucky Electric.

''There was some improvement in oil and gas drilling activity in the U.S. during the course of the year, which enabled Newport to ship over 285,000 tons a record for the company. We're hopeful, however, that 1991 will bring further improvements in shipments and in particular, pricing, which remained relatively unchanged in 1990 due to overall weaker pricing in the steel

industry in general.''

Borland further noted that the improvement in Newport Steel's business is timely with the completion of Newport's new continuous slab caster in September of this year. ''We've had a very successful break in period and are already running ahead of plan. We are extremely pleased with the performance of the equipment and quality of the cast product.''

NS Group Inc. is a holding company that owns five operating subsidiaries: Newport Steel Corp., a tubular steel producer; Kentucky Electric Steel Corp., a producer of steel bars; Erlanger Tubular Corp., a processor of tubular products; Imperial Adhesives Inc., an adhesives manufacturer and Koppel Steel Corp., acquired in October 1990, a manufacturer of steel bar and tubular steel products.

NS Group Inc.'s common stock (symbol NSS) is traded on the New York Stock Exchange.

#90311b0673 11/07/1990 ~Business Wire

NEW YORK (NOV. 7) BUSINESS WIRE - The Continental Corporation (NYSE:CIC) Wednesday reported third quarter 1990 net income of $53.3 million, or $.97 per share, compared with a net loss of $27.7 million, or $.54 per share, for the third quarter of 1989.

''We continue to take advantage of the soft market to upgrade our book of business by driving off poorly priced and non-strategic risks,'' said John P. Mascotte, chairman and chief executive officer. ''Our confidence in our ability to stay the course is supported by the very high quality of our $9 billion investment portfolio, only two percent junk bonds and mortgages, which provides us with the underlying financial strength to weather the uncertain economic climate.''

Revenues for the third quarter were $1.5 billion, compared with $1.5 billion in 1989. Consolidated net investment income for the quarter was $191.2 million, up from $185.1 million a year ago. The company realized pretax capital gains in the 1990 third quarter of $41.9 million, versus gains of $46.8 million for the same period last year. After tax, third quarter 1990 realized capital gains were $.51 per share, against $.58 per share in 1989.

Earnings for the 1990 third quarter do not include a tax benefit resulting from the ''fresh start'' provision of the Tax Reform Act of 1986. Third quarter 1989 earnings included a $.15 per share reversal of previously recorded ''fresh start'' benefits due to the magnitude of underwriting losses

including losses resulting from Hurricane Hugo.

Book value per share was $37.40, compared with $41.47 at September 30, 1989. Book value with all investments valued at market prices was $36.26, versus $42.25 a year ago. Insurance Operations

Insurance operations contributed third quarter pretax income of $78.3 million, compared with $10.1 million in 1989. The increase resulted from substantially lower underwriting losses due to a significant drop in catastrophe losses. Net written premiums for the quarter were $1.2 billion, down 3% from a year ago.

The Continental Corporation is a New York City-based property/casualty insurance organization with over $5 billion in annual revenues. Its subsidiaries are leading writers of commercial and personal package policies and select specialty coverages through major independent agents and brokers.

TAMPA, FL (NOV. 7) BUSINESS WIRE - D. Mark Olson has been named president and chief executive officer (CEO) of INVEST Financial Corporation, a subsidiary of Kemper Financial Companies Inc., announced James R. Boris, chairman of INVEST's Board of Directors.

INVEST is widely recognized as the premier provider of annuities, mutual funds and unit investment trusts to clients of financial institutions. INVEST Centers are located in about 200 banks nationwide.

''INVEST has expanded its number of branch locations to more than 730, an increase of 40 percent in the past year,'' said Boris. ''Mark Olson's appointment as president and CEO confirms our commitment to the long-range plan for additional expansion and growth at INVEST, which began 18 months ago '' he said.

Olson, 42, previously served as executive vice president and chief operating officer of INVEST. He has been with INVEST since June, 1989. Olson is a member of INVEST's Board of Directors.

Before joining INVEST, Olson held positions with Kemper Financial Services and Shearson Lehman Brothers, with a total of 15 years experience in a series of expanding capacities in the financial services industry. He holds a degree in economics from Texas A&M University.

INVEST, which founded its industry in 1982, is the largest and most experienced company of its kind with branches in 41 states. Alternative

products and services sold at INVEST Centers generate fee income for banks that are subscribers in the INVEST network.

Kemper Financial Companies Inc., a subsidiary of Kemper Corporation, owns more than 90 percent of INVEST Financial Corporation.

WORTHINGTON, OH (NOV. 7) BUSINESS WIRE - Liqui-Box (OTC:LIQB) achieved a healthy 9 percent increase in net sales and an 11 percent increase in income for the third quarter, ending Sept. 29.

The company has begun shipping its new line of Modular One fillers and is actively engaged in launching the new Pressure Pak dispensing system for volume feeding operations, the DeCap system for water coolers, and bag-in-box packaging for detergents and other sanitary cleaning supplies.

On the environmental front, bag-in-box packaging is a major answer for ''source reduction'' vs. plastic pails and is expanding its rebuy/regrind/recycle program for polycarbonate UnGlass bottles to all bottle plant locations.

Liqui-Box is the leading supplier of flexible, bag-in-box packaging molded containers and filling equipment for the processed food, beverage (soft drink) bottled water, dairy, wine and specialty chemical markets, and sells internationally through licenses, direct exports, and agents on five continents.

DETROIT (NOV. 7) BUSINESS WIRE - Unisys Corp. Wednesday announced that Barnett Bank, the largest commercial bank in the state of Florida, has signed a contract valued in excess of $15 million to purchase the Unisys InfoImage Image Item Processing System (IIPS).

As the first bank in Florida to adopt imaging technology, Barnett will use IIPS to process checks and other payment instruments. Barnett also is the first bank in the country to order Unisys recently announced IR 9210 Courtesy Amount Reader module, an optional hand-print and machine-print recognition system for the IIPS platform.

Barnett Bank currently processes more than three million checks each day, creating large amounts of paperwork that must be handled mny times in the conventional proof encoding and sorting process. By investing in imaging technology, Barnett will be able to eliminate the repetitive physical handling of documents.

This will enable Barnett to provide continuing improvements in customer service.

''As one of the first banks in the U.S. to adopt imaging technology for check processing, Barnett is leading the way in the banking community,'' said Jonathan Palmer, executive vice president of Barnett technology and operations. ''We are confident that implementation of the Unisys imaging solution will enhance our position as Florida's leading commercial bank.

''This investment of over $15 million in advanced technology represents a significant step by Barnett to offer the latest and most effective solutions to our customers.''

''We expect image check processing to increase productivity and reduce errors, resulting in lower processing costs per check and better customer service,'' added Steve Milstid, executive director of Barnett systems development.

''Barnett's selection of the IIPS platform provides further proof that Unisys has the correct approach to image check processing,'' said O.G. Greene, president of Unisys Financial Systems Division.

''As an active participant in the Unisys Image Advisory Council, Barnett has played an important role in guiding the development of IIPS. This significant investment in high-speed image processing technology emphasizes Barnett's commitment to provide the highest level of service to its retail and

commercial customers.'' List of IIPS Users Continues to Grow

NEW YORK (NOV. 7) BUSINESS WIRE - AT&T Wednesday announced it has signed a contract with Best Western International Inc. to make AT&T Long Distance Service available to the nearly 1,800 independently owned and operated Best Western properties nationwide.

The three-year contract, a renewal, is valued at approximately $60 million. AT&T currently provides long-distance service to more than 1,400 U.S. Best Western properties.

Under the agreement, AT&T will provide 24-hour operator services for calling card, person-to-person, billed-to-third number and collect calling service from all guest rooms at participating Best Western locations.

''Making AT&T Long Distance Service available to our guests is a natural extension of Best Western's policy of providing the highest quality and service available,'' said Keith Barlow, vice president for reservations and systems

AT&T customers calling from hotels, airports and other locations which have not selected AT&T, need to dial an access code -- 10-ATT-0 -- then the area code and number they're calling to reach AT&T.

Best Western, headquartered in Phoenix, is the world's largest hotel chain with more than 3,300 independently owned and operated hotels, motor inns and resorts in 36 countries throughout North America, western Europe, Hungary, Israel, South America and the South Pacific.

RESEARCH TRIANGLE PARK, NC (NOV. 7) BUSINESS WIRE - Telephone companies can now provide more than twice as many of their business customers with central office automatic call distribution (ACD) service.

Meridian ACD Server, a new product announced Wednesday by Northern Telecom (NYSE:NT), can work with virtually any vendor's central office switching system, regardless of its age or technology.

US West Communications and Northern Telecom today announced an agreement to market the new central office-based system.

ACD is typically used by such businesses as banks, insurance companies, or airline reservation centers to improve customer service by directing callers to the first available agent.

Meridian ACD Server offers unparalleled capacity, supporting up to 4,000 agents. The system is easily installed and expanded, compliant with established administration and maintenance procedures, and supports multiple customers.

The system is contained in a stand-alone cabinet and connects with existing telephone company central office equipment through standard trunking facilities. Maintenance and administration costs are minimized because the server can be managed through central offices with existing procedures and

Bellcore-defined operations support systems.

With over 100 systems in service or on order, Northern Telecom is the ACD central office market leader. Meridian ACD Server enables telephone companies to offer the same proven service to all customers. Because Meridian ACD Server's software is based on the DMS Meridian ACD system's generic software, features will expand as the system continues to evolve.

Further, the new server supports all current standard Northern Telecom Meridian Digital Centrex business telephones, including industry standard 2500-type sets.

Meridian ACD Server extends Northern Telecom's full family of ACD solutions, which offers PBX-based systems as well as those based in the central office.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems, providing products and services to telephone operating companies, corporations, governments, universities and other institutions. Northern Telecom, with 1989 revenues of $6.1 billion, employs more than 49,000 people around the world.

#90311b0706 11/07/1990 ~Business Wire

WAYNE, PA. (NOV. 7) BUSINESS WIRE - American Film Technologies Inc. (NASDAQ:AFTI, PHLX:AFT) Wednesday announced unaudited results of operations for the first quarter ended Sept. 30, 1990.

First quarter revenues amounted to $3,366,416, while revenues for the like quarter last year were $3,508,073. Net income for the first quarter amounted to $74,051, or 1 cent per share, while net income for the year-ago quarter totalled $559,969, or 6 cents per share.

Chairman George R. Jensen Jr. said first quarter results were effected by one-time costs associated with the transition of film coloring production to the company's new facility in Tijuana, Mexico. ''The Tijuana facility is truly world class, allowing for outstanding production efficiency,'' Jensen added. ''When it is fully staffed, we expect to reduce production costs significantly. We have already completed our first COLORIMAGED Film in Tijuana and colorists there are proving to be highly-productive and very quality conscious.''

Jensen said expenses were also increased in the first quarter by the expansion of the compnay's animation capabilities. He believes upcoming business for the animation division will offset future expansion costs.

American Film Technologies Inc. creates color versions of black-and-white motion pictures and television productions, and produces digital ''paperless'' animation and special effects for original television and film production.

STAMFORD, CT (NOV. 7) BUSINESS WIRE - COMTEC Market Analysis Services, a division of Gartner Group, Inc., Stamford CT, is proud to announce the availability of the Telephone Systems report.

The installed number of phones in the U.S. Business, Health, Education and Government market grew only 3.5 percent. This represents 68,987,493 phones in use as of 1/1/90. Unlike most other markets, the telephone systems market is fully penetrated since the entire universe which COMTEC studies has some kind of telephone system. This includes PBX, Key systems, Centrex or POTS (Plain Old Telephone Service).

Since 1982, COMTEC has tracked the U.S. market for telephone equipment and services, PCs, computers, terminals, textprocessing equipment, facsimile and more. The annual study, based on a statistically valid sample of the 6.7 million U.S. establishments, collects data on the inventory, usage and future plans of equipment and services from interviews with over 35,000 executives. Since its inception, COMTEC has been the outstanding source of market intelligence for key information industry companies.

The current report on Telephone Systems portrays a segemented profile of the

U.S. market. Throughout the fourteen sections, key statistics, issues and analysis are presented and discussed such as:

In the Centrex Market Analysis section, key facts about this part of the market are explored such as the distribution of the 5.5 million telephones attached to Centrex in the U.S. a 17.3 percent increase over last year; another section, Establishment Penetration provides several views of how the multiple ''sub-markets'' exist for Telephone Systems within the U.S. establishments.

The remaining sections include: Market Demographics; Key Systems Market Analysis; PBX Systems Market Analysis; Competition Key Systems; Competition PBX Systems; Office Equipment Environment; 1989 Shipment Activity; Distribution Channels; Plans & Opportunity Analysis; Year to Year Trends.

The data in the report allows analysis by specific industry groups, vertical markets, size of establishment and location to mention only a few of the demographic data which is available. The basis of the report is a comprehensive and extensive database which provides the capability of ''relentless segmentation''. Clients may license both the report and the database for further analysis and custom reporting.

#90311b0715 11/07/1990 ~Business Wire

MELVILLE, NY (NOV. 7) BUSINESS WIRE - Miltope Group Inc. (NASDAQ:MILT), the nation's largest independent (non-OEM) manufacturer of militarized and ruggedized computer peripheral equipment for defense and derivative commercial applications, Wednesday reported sales and earnings for the third quarter and nine months periods ended Sept. 30, 1990.

For the 1990 third quarter, net sales were $27,553,000, compared to year-ago third quarter net sales of $26,151,000. 1990 third quarter net earnings were $459,000, or 8 cents per share, compared to $298,000, or 5 cents per share, reported for the comparable 1989 third quarter. Per share results were computed on the basis of 5,864,000 and 5,862,000 average shares outstanding in the 1990 and 1989 periods, respectively.

Net sales for the first nine months of 1990 were $80,274,000, an 18% increse over net sales of $68,266,000 in the corresponding 1989 period. 1990 nine months net earnings were $1,637,000, or 28 cents per share, compared to earnings of $1,560,000, or 27 cents per share, reported a year ago. Earnings per share are based on 5,864,000 and 5,865,000 average shares outstanding in the 1990 and 1989 periods, respectively.

The sales improvements in the quarter and nine months periods are primarily attributable to a higher sales volume in the U.S. Army Tactical Command and Control System, Common Hardware/Software Program (ATCCS/CHS), for which Miltope seves as prime contractor. ATCCS/CHS sales in the quarter were $12.3 million, compared to $11.1 million in the year-ago third quarter.

Miltope's 1990 first and second quarter order backlog levels were $86.5 million and $87 million, respectively. At the close of the year-ago quarter, Miltope's order backlog was $108.5 million.

Miltope Group Inc., through its wholly-owned subsidiaries, Miltope Corp. and Miltope Business Products Inc., is engaged in the design, development, manufacture and testing of microcomputer and computer peripheral equipment for military, rugged and other specialized applications requiring operations in severeland, sea and airborne environments.

The company provides disk mass memories, high speed printers, digital magnetic tape products, bubble memories, transportable microcomputers, and a complete line of ruggedized Hewlett Packard 32-bit computers and related peripherals.

#90311b0723 11/07/1990 ~Business Wire

BOSTON (NOV. 7) BUSINESS WIRE - Tech/Ops Sevcon Inc. (AMEX:TOC) reported that net income per share for its fiscal year ended Sept. 30, 1990 was 93 cents compared to 68 cents per share for the previous year, a gain of 37 percent.

Net income was $1,649,000 compared to $1,380,000 in 1989, a gain of 19 percent while revenues were $16,876,000, 18 percent higher than the $14,323,000 recorded in the previous year.

Early in the year, the company repurchased 334,000 of its common shares, or 16.5 percent of the outstanding amount, and average common and common equivalent shares for 1990 were 1,778,000 compared to 2,026,000 in 1989.

For the fourth fiscal quarter, Tech/Ops Sevcon reported net income of $413,000 compared to $299,000 for the similar quarter of 1989. Income per share was 24 cents compared to 15 cents in 1989. Sales in the quarter were $4,435,000 compared to $3,266,000 the previous year.

Tech/Ops Sevcon Inc. manufactures and distributes solid-state controls for battery-driven vehicles such as fork lift trucks and underground mining

vehicles. The company has facilities in Burlington, Mass., the United Kingdom and France.

#90311b0734 11/07/1990 ~Business Wire

MIAMI (NOV. 7) BUSINESS WIRE - Atlantis Group Inc. (AMEX:AGH) announced Wednesday that it has filed an action against Rospatch Corp. (OTC:RPCH) and certain of Rospatch's major shareholders.

The defendent shareholder groups are the Alizac Partners shareholder group, the Coyne Family shareholder group and the Williametta K. Day Trust shareholder group.

Atlantis Group Inc. beneficially owns 19.71 percent of the outstanding common stock of Rospatch. In the aggregate, the Alizac Partners, Coyne Family and Williametta K. Day Trust shareholder groups beneficially own approximately 26.5 percent of the outstanding shares of Rospatch common stock.

There are currently several other litigations pending between Atlantis and Rospatch.

The complaint alleges that the three defendent shareholder groups have violated federal securities laws concerning disclosure of the relationship among these shareholder groups, that the Rospatch board has failed to issue rights certificates as is required pursuant to the provisions of the Rospatch ''poison pill'' rights plan and that the voting rights represented by certain Rospatch common stock owned by any of the three defendant shareholder groups are null and void.

The complaint alleges that concerted activity among the three shareholder groups has resulted in their becoming a ''group'' for the purposes of Section 13(d) of the Securities Exchange Act of 1934. That section requires public disclosure of the existence of a ''group'' of shareholders which beneficially owns, in the aggregate, at least 5 percent of the outstanding common stock of an issuer.

The complaint additionally alleges that the same concerted action among the three shareholder groups which resulted in the formation of the Section 13(d) ''group'' has triggered the provisions of the Rospatch ''poison pill'' shareholder rights plan, which was adopted by the Rospatch board in 1986.

The Section 13(d) ''group'' is the beneficial owner of more than 20 percent of Rospatch common stock. Under the provisions of the ''poison pill,'' such a beneficial ownership level in effect requires Rospatch to distribute separate

certificates evidencing rights to purchase Rospatch common stock at a discount.

These certificates must be issued to all Rospatch shareholders except those which constitute the group beneficially owning 20 percent of the outstanding shares of Rospatch common stock. Atlantis seeks to force the Rospatch board to abide by the terms of the ''poison pill'' which it has adopted.

Finally, the complaint alleges that the same concerted action among the three shareholder groups which resulted in the formation of the Section 13(d) ''group'' has triggered the provisions of the Michigan Control Share Acquisition Act.

Under that law, when a group of shareholders acquires voting power with respect to 20 percent or more of the outstanding stock of a corporation which is subject to this law, the shares so acquired have only such voting rights as are conferred by a majority of all ''disinterested'' shareholders.

No vote of shareholders has ever been held which would allow the members of the Section 13(d) ''group'' to exercise voting rights with respect to their Rospatch common stock above the 20 percent threshold.

Thus, in the action initiated by the filing of its complaints, Atlantis seeks to have the voting rights of the Section 13(d) ''group'' members declared null and void with respect to such shares.

Atlantis, headquartered in Miami, is a diversified plastics and furniture company.

UPPER SADDLE RIVER, NJ (NOV. 7) BUSINESS WIRE - Western Union and Incotel Inc., announced Wednesday that they have completed the joint testing and certification for connectivity between Incotel's XMS-400 MHS and Western Union 400 (SM) service.

This certification gives users of Incotel's X.400 products the most sophisticated and enhanced level of connectivity for inter-enterprise communication.

Western Union 400 service is fully integrated with the Company's EasyLink (R) service, the nation's largest supplier of public electronic mail services for the business community. EasyLink gives its users worldwide delivery capability via fax, telex and electronic mail, as well as access to more than 900 online databases.

Western Union has completed commercial X.400 interconnections with 10 domestic and international X.400 public service providers, in addition to its certification of leading software vendors.

The Incotel XMS-400 product is a native mode X.400 software implementation. The software is written in the ''C'' programming language and runs on the IBM System/88 and Stratus Computer, Inc., fault-tolerant computing systems. Incotel XMS-400 operates over X.25 data networks and 802.3 local area networks and is fully compatible with the 1984 CCITT X.400 recommendations.

Incotel Inc., headquartered in New York City, has been a leading worldwide supplier of message and data handling systems since 1970.

Western Union provides a broad range of messaging, financial and other services, both domestically and internationally, to meet specific needs of business customers and individual consumers. The Company's electronic mail services enable its business customers to reach more than seven million electronic mail, fax and telex users worldwide.

#90311b0742 11/07/1990 ~Business Wire

BOSTON (NOV. 7) BUSINESS WIRE - Consolidated earnings of Eastern Utilities Associates (NYSE Symbol: EUA) were $6.4 million, or 40 cents per share, on operating revenues of $116 million for the three months ended Sept. 30, 1990, Chairman and Chief Executive Officer Donald G. Pardus announced Tuesday.

This represents a decrease of $3.8 million from third quarter 1989 earnings of $10.2 million. An additional 2.5 million common shares were outstanding during the second quarter.

In explaining the decrease in earnings, Pardus noted: ''The earnings decrease is primarily due to the sale of short-term power by our EUA Power subsidiary at rates that were significantly below our actual operation, maintenance and debt related costs and to a lesser extent, to the continuing regional economic slump.''

Pardus went on to explain: ''As a result of Seabrook commencing commercial operation on August 19th, EUA Power no longer records Allowance For Funds Used During Construction (AFUDC). Normally, the loss of non-cash AFUDC earnings would be replaced by actual cash earnings when an asset is placed in-service.

''However, as we previously have stated, in the case of EUA Power, we expect earnings to be negatively impacted until EUA Power signs long-term contracts since the short-term sale of power will be at prices below our actual costs.''

EUA Power is EUA's New Hampshire wholesale power subsidiary which owns 12.1 percent of the Seabrook nuclear generating station.

EUA's consolidated earnings through the first nine months of 1990 were $26.7 million, or $1.69 per share, compared with earnings of $29.7 million, or $2.20 per share in the year-earlier period.

For the 12-month period ending Sept. 30, 1990, consolidated earnings were $37.8 million, or $2.43 per share. For the comparable period last year, earnings were $38.5 million, or $2.86 per share. In each current period, there were in excess of 2.1 million additional shares outstanding.

Eastern Utilities (EUA) is a Boston-based investor-owned holding company whose shares are traded on the New York and Pacific Stock Exchanges. Subsidiaries are Blackstone Valley Electric Co., Eastern Edison Co., Newport Electric Corp.

EUA Cogenex Corp., EUA Energy Investment Corp., EUA Ocean State Corp., EUA Power Corp., EUA Service Corp., and Montaup Electric Co. Together, the companies are known as the EUA System.

NEW ORLEANS (NOV. 7) BUSINESS WIRE - Robert E. Howson, chairman of the board and chief executive officer, McDermott International Inc. (NYSE:MDR), Wednesday announced that M.E. ''Bo'' Eagles has been named vice president, marketing, engineering and industrial group, and will report to Robert W. Page executive vice president and group executive.

Eagles will have responsibility for McDermott's corporate marketing policy and planning, as well as for the engineering and industrial group's commercial marketing. He will have direct marketing responsibility for Hudson Engineering and Project Management and provide general marketing support for other divisions in the group. He will be located in Houston.

Eagles comes to McDermott from Cooper Oil Tool, a division of Cooper Industries Inc., where he was vice president, marketing. He joined Cameron Iron Works, now a division of Cooper Industries, in 1959.

He held a number of positions at Cameron including manager of subsea technology operations and Eastern Hemisphere operations. He was the company's general sales manager before being named vice president, marketing in 1981.

McDermott International Inc. is a leading worldwide energy services company. The company and its subsidiaries manufacture steam-generating equipment, defense products and tubular products.

They also provide engineering and construction services for industrial and utility facilities onshore and to the oil and gas industry offshore.

#90311b0746 11/07/1990 ~Business Wire

FRAMINGHAM, MASS. (NOV. 7) BUSINESS WIRE - Perini Corp. reports net income of $935,000 or 10 cents per common share for the third quarter of 1990, compared with $2,851,000 or 60 cents per common share for the third quarter of 1989.

For the first nine months of 1990, the company reports net income of

$3,403,000 or 46 cents per common share, compared with net income of $9,973,000 or $2.44 per common share for the first nine months of 1989.

Earnings per common share for both the third quarter and nine-month results ending Sept. 30, 1990, were affected from the increase in the average common shares outstanding from the company's stock offering in June 1989 of 470,000 shares and the sale in July 1989 of 262,774 shares of the company's treasury stock to its Employee Stock Ownershhip Trust.

Construction and real estate revenues totaled $737,162,000 for the first nine months of 1990 compared with $620,711,000 for the first nine months of 1989.

The Sept. 30, 1990 construction backlog totaled $.95 billion compared with a backlog of $1.02 billion at the same date in 1989.

The operating results for the third quarter of 1990 generally followed the pattern experienced in the first and second quarters of 1990. Domestic construction, led by its heavy construction operations, made a very strong contribution to Perini's operating income. Building oeprations also made a positive contribution, due largely to increased revenues generated by a high level of activity in the hotel/casino industry.

Canadian operations contributed to third quarter profits due to increased revenues, with nine month results approximating the 1989 level. Perini International also contributed to the third quarter results, but at a lower level than 1989 due to a market slowdown.

Real estate did not close any major transactions in either the third quarter or first nine months of 1990, resulting in unprofitable operations compared to strong operating results a year ago, which is the major reason for the earnings decline compared to 1989.

TUCSON, AZ (NOV. 7) BUSINESS WIRE - Sierra Tucson Cos. Inc. announced the opening of a 70-bed Center for Eating Addictions and Disorders (C.E.A.D.) on Nov. 1.

The treatment modalities addressing eating disorder diseases are expected to result in a longer average length of stay than the present 30-day average patient stay. The addition of the 70 eating disorder beds brings the total number of beds operated by Sierra Tucson Cos. to 317.

During October of 1990, the Arizona facility licensed one half of its beds

(125) ''special hospital/psychiatric.'' The licensure authorizes Sierra Tucson to treat a wider range of patient illnesses than previously possible. Also, the opening of a 450-seat auditorium, fitness center, and the expansion of kitchen and dining facilities to support the increased number of patient beds, completes this phase of construction at the Arizona facility.

DALLAS (NOV. 7) BUSINESS WIRE - Uranium Resources Inc. (''URI'') announced net income for the third quarter ended Sept. 30, 1990 of $1,777,000, or 23 cents per share vs. net income of $309,000, or 4 cents per share in 1989.

Revenue for the period was $6,586,000 compared to $4,360,000 in 1989.

Net income for the nine months ended Sept. 30, was $2,429,000, or 33 cents per share in comparison to net income for the same period of 1989 of $3,744,000, or 52 cents per share.

Revenues for the nine months ended Sept. 30 were $14,647,000 compared to $20,509,000 for the same period in 1989. All per share amounts in this release reflect the adjustment of previously reported amounts for the effect of the 1-for-4 reverse split which became effective on Aug. 1, 1990.

Commenting on the quarterly results, Raymond G. Larson, CEO, said ''We are pleased with the earnings for the third quarter and for the first nine months of 1990. We expect to have a profitable fourth quarter which should bring total earnings in 1990 to approximately $3 million.

''Even though the uranium market remains very weak, with our existing long-term sales contracts at prices of approximately $20 per pound, we continue to expect very strong profitability in 1991 with earnings substantially above the levels of 1990.

''Our efforts this year continue to be focused on our major projects, including putting our Rosita property into production early in the fourth quarter, continuing our aggressive marketing efforts and continuing to prepare the New Mexico properties for production over the next few years.''

URI sells uranium to utilities primarily under long-term contracts. At. Sept. 30, 1990, the company had contracted deliveries of over $100 million through 1997 under its seven long term contracts at average selling prices of over $20 per pound.

Uranium Resources Inc. is a Dallas based uranium mining company, whose shares trade on the Toronto Stock Exchange under the symbol URX and on the NASDAQ National Market System under the symbol URIX. The company's warrants trade on NASDAQ under the symbol URIXW.

The company produces uranium in South Texas using low cost in situ solution mining techniques, and holds substantial uranium reserves in New Mexico.

CLARK, NJ (NOV. 7) BUSINESS WIRE - Whitman Medical Corp. (NASDAQ:WHIT) Wednesday reported net income of $34,702, or 3 cents per share on revenues of $767,787 for the second three months ended Sept. 30, 1990.

The company recorded net income of $66,074, or 6 cents per share on revenues of $761,765 for the first three months ended June 30, 1990.

The company attributes the decline in net income to an increase in expenses ($728,305 in the second quarter 1990 vs. $694,423 in the first quarter 1990), primarily associated with maintaining the newer Ultrasound Diagnostic Schools in Atlanta, Tampa and Pompano Beach.

Enrollment has increased considerably and revenues are increasing from this division. Students attending any of the 10 Whitman Medical-owned schools earn college credits. It takes approximately three years of operation for each school to turn a profit.

Therefore, in order to maximize shareholder value, the company's management decided to delay the opening of other schools until the schools opened in 1988 have had time to mature and become profitable. Instead, the company is hastening the development of other surgical and medical products, which they intend to license.

At this time, the company is completing a prototype of the Fluid Flow Control Valve. This device will be utilized to regulate the amount of fluid the patient receives in intravenous therapy and internal feeding therapy.

The company is also developing a new needleless injection valve. There is now a dramatic need for this type of device as it protects the medical staff from sticking themselves while giving fluid therapy treatments to patients, thereby eliminating the potential of being contaminated by infectious disease such as the AIDS and Hepatitis virus.

Whitman Medical Corp. develops medical and surgical products and is the largest operator of schools specializing in the training of sonographers for the field of medical diagnostic ultrasound.

DAYTON, OH (NOV. 7) BUSINESS WIRE - Moto Photo Inc. (NASDAQ:MOTO) Wednesday announced third quater earnings of $57,535 as compared to $155,906 in the thrid quarter of 1989.

After provisions for preferred dividends of $125,250 there is a net loss of 1 cent per common share this year compared to a 1 cent income per share last year. Revenues were $9,812,551 this year as compared to $10,567,436 last year. For the nine months ended Sept. 30, Moto Photo Inc. reported a net loss of $763,279 improved from last year's nine month loss of $1,028,579.

Revenues for the nine months were $27,082,115 compared to $29,091,805 last year. Net loss per share after preferred dividend provisions were 20 cents this year compared to 25 cents last year.

Michael F. Adler, president and chief executive officer of Moto Photo Inc. said, ''Moto's difficulties have centered in the company stores which continue to experience a comparable store sales decline as compared to our franchise system which is showing store for store increases.

''Beginning the third quarter the trend in company stores has shown steady sales improvement and profits have increased. These improvements are especially gratifying given the declining economy, particularly in the Northeast, where over 60 percent of the company stores are located.''

Adler continued, ''We did not equal last year's third quarter earnings because of lower revenues from new franchise store openings which were $512,988 in 1989 as compared to only $214,426 this year. After a slow start, franchise activity has been strong since May. However, we do not recognize revenue when a franchise is sold but only when the store is opened.''

Adler concluded by saying, ''I am encouraged with recent trends in the business and by many significant growth opportunities that are being pursued on the development side. However, the uncertainties in our economy are causing us to reexamine all of our planning assumptions.''

Moto Photo Inc., is a Dayton based franchisor and operator of one-hour photofinishing stores with 342 stores in operation and 21 under development in the United States, Canada, Norway and Sweden.

DAYTON, OH (NOV. 7) BUSINESS WIRE - NCR Corp. and Micah Systems Inc. Wednesday announced a joint marketing agreement to provide a Health Information System (HIS) to hospitals and healthcare facilities that will use Micah's Client/Server software and NCR's new System 3000 hardware.

Estimated value of the agreement is over $25 million for Micah and NCR for the next two to three years.

Micah's Client/Server platform is designed to accommodate a network of high-speed servers and microcomputer workstations which can work with thousands of users with no apparent difference in performance. NCR's System 3000 is a broad range of compatible, scalable, general purpose computer systems which are based on Intel microporcessors and support the industry-standard operations systems -- UNIX V.4, SCO UNIX, OS/2 and MS DOS. The system is designed to address any computing level or task in business applications.

Micah's Client/Server system differs from traditional approaches to multi-user computing by not requiring a central processing unit (CPU), which can be

expensive, difficult to maintain, and under heavy loads, can have performance/expansion problems, high costs and limited capability.

Micah Systems, based in Reading, Pa., provides a wide selection of turnkey software/service solutions to the healthcare industry -- including fully-integrated patient accounting, financial, clinical, patient care, decision support and executive information applications.

Service and maintenance support for NCR products in provided by 5,000 field and software engineers at 400 locations in the United States.

NCR Corp., based in Dayton, develops, manufactures, markets and supports business information processing systems for worldwide markets.

SHELTON, CT (NOV. 7) BUSINESS WIRE - Shelton Bancorp Inc. announced that the board of directors nominees for directors, Joseph A. Pagliaro, Pasquale Papale and Charles H. Sullivan, were re-elected for the three year term at the Nov. 7, 1990 Annual Meeting.

Commenting on the voting results, Kenneth E. Schaible, president and treasurer stated that ''As in prior years, stockholder participation was extremely high. Approximately 87 percent of all eligible shares were voted. We believe that this is a clear indication of the support and confidence that our stockholders have always given our board and management.''

Shelton Bancorp Inc. is the parent company of Shelton Savings Bank, a Connecticut-chartered, FDIC-insured savings bank. Since its founding in 1919, Shelton Savings Bank has specialized in retail banking, with specific emphasis on residential mortgage lending. The bank is headquartered in Shelton, Conn. and operates five full service offices within eastern Fairfield and southwestern New Haven counties.

VAN NUYS, CA (NOV. 7) BUSINESS WIRE - Com Systems Inc. (AMEX:CTM) reported a 35 percent increase in revenue to $35,707,000 for the third quarter ended Sept. 30, 1990, vs. $26,477,000 for the corresponding period in 1989.

Revenue for the nine months ended Sept. 30, 1990, was $100,548,000, a 41 percent increase compared to revenue of $71,386,000 in the same period in 1989.

For the three months ended Sept. 30, 1990, the company had net earnings of $15,000, but a loss of 10 cents per common share (after preferred dividends), vs. a net loss of $4,406,000, or 89 cents per common share (after preferred dividends), for the three months ended Sept. 30, 1989.

For the nine month period ended Sept. 30, 1990, the company had a net loss of $1,510,000, or 53 cents per common share (after preferred dividends), as compared to a net loss of $6,481,000, or $1.38 per common share (after preferred dividends), for the corresponding period in 1989.

Rex Licklider, chief executive officer of Com Systems, stated, ''The net earnings reported in the third quarter, while modest, reflect our success in reducing network costs and bad debt and controlling operating expenses. The integration of TMC Communications, which was acquired in March of 1990, is largely complete and we are recognizing the expected economies from the consolidated operations.

''Based on these factors and the recent $20 million accounts receivable facility, which will reduce interest expense, we anticipate continued improvement in operating performance.''

Com Systems is a diversified telecommunications company, providing long distance direct dial and operator assisted calling and other enhanced services to customers located in the Western United States.

CONCORD, NH (NOV. 7) BUSINESS WIRE - New Hampshire Savings Bank (NASDAQ:NHSB) reports a net loss of $13.2 million, or $2.14 per share for the third quarter ended Sept. 30, 1990, compared to a net loss of $22.7 million, or $3.69 per share, for the same quarter a year ago.

For the first nine months of 1990, the company reports a net loss of $33.0 million, or $5.34 per share, compared to a net loss of $36.0 million, or $5.84 per share, for the same period a year ago.

Nonperforming assets increased from $159.6 million at June 30, 1990 to $168.8 million at Sept. 30, 1990, or from 12.19 percent to 13.61 percent of total assets. At Sept. 30, 1990 nonperforming assets consisted of $139.0 million of loans on nonaccrual and 90 days past due and $29.8 million of other real estate owned.

During the third quarter a provision of $7.8 million was made to the allowance for credit losses. At Sept. 30, 1990 the allowance for credit losses was $57.9 million which represented 6.04 percent of net loans and leases and 34.27 percent of total nonperforming assets. Net charge-offs for the third quarter were $9.3 million.

At June 30, 1990 the company's shareholders' equity was $11.6 million. Due to the quarterly loss of $13.2 million, shareholders' equity was a deficit of $1.6 million at Sept. 30, 1990. The company's primary capital, which is principally the allowance for credit losses was $56.2 million and its primary capital ratio was 4.33 percent.

The company's principal affiliate bank, New Hampshire Savings Bank has consented to a cease and desist order issued by the Federal Deposit Insurance Corp. and the New Hampshire Banking Department. The consent order requires the bank, among other things, to increase its primary capital by $40 million by Dec. 31, 1990.

The consent order also requires the bank to reduce its classified assets by a significant amount in a timely manner; requires the bank to submit to the regulatory authorities plans to improve a comprehensive range of business operations and procedures, including management, capital, liquidity and profitability; and requires regulatory approval for the declaration or payment of dividends by the bank.

The company has received regulatory approval to merge its two largest affiliate banks, New Hampshire Savings Bank and New Hampshire Savings Bank South, and completed this merger on Nov. 2, 1990. The company recently sought regulatory approval to merge its Rockingham County Trust Co. affiliate with the lead bank and expects to complete this merger by the end of 1990.

The company continues to explore prospects of selling Seabrook Bank and Trust Co. If a suitable transaction cannot be arranged, the company will seek regulatory approval to merge Seabrook Bank and Trust Co. with the lead bank.

New Hampshire Savings Bank Corp., headquartered in Concord, N.H., is the fourth largest bank holding company in the state with assets of $1.24 billion and deposits insured by the FDIC to the maximum extent permitted by law, serving individuals, corporations and municipalities throughout central and southern New Hampshire.

APPLETON, WI (NOV. 7) BUSINESS WIRE - Peter M. Platten III, president and chief executive officer of Valley Bancorporation (NASDAQ: VYBN) announced Wednesday that approval has been received from the Federal Reserve Board for the affiliation of the Citizens State Bank, Kiel with Valley.

The transaction is expected to be consummated on Dec. 3, 1990.

Citizens State Bank had assets of approximately $42 million at Sept. 30, 1990. Upon completion of this transaction, Valley will have total assets of approximately $3.4 billion and will add service locations, with the addition of offices in Keil, Newton and Glenbeulah.

Platten stated, ''We are enthused about expanded Valley's presence into these strong and growing communities. We look to expand the excellent services Citizens presently offers to these communities. Affiliation with Citizens represents an extension of our current market and provides Valley with an opportunity to expand further into eastern Wisconsin.

''This acquisition fits Valley's philosophy of expanding existing markets to meet our goals relative to growth, market presence, and profitability.''

Citizens will continue to be directed by its existing management team, with current Vice President of Lending, Larry LeMahieu becoming chief operating officer of the bank. In order to further strengthen Citizens management, Gerald H. Zimmel, president and chief executive officer of Valley Bank,

Kewaskum, will assume president responsibilities and William Haskey, executive vice president of Kewaskum will provide additional support.

Valley Bancorporation is the third largest bank holding company headquartered in Wisconsin. Valley, with assets of $3.3 billion, currently serves Wisconsin through more than 100 banking offices with additional financial service companies engaged in leasing, insurance, data processing, trust service, brokerage and credit card servicing.

The company's common stock is traded on the National Market System under the NASDAQ symbol VYBN.

MIDDLETOWN, OH (NOV. 7) BUSINESS WIRE - Pinnacle Bancorp Inc., the holding company for MidFed Savings Bank, announced earnings of $277,000, or 40 cents per share, for the quarter ended Sept. 30.

Pinnacle posted net income of $282,000, or 41 cents per share, for the first quarter of fiscal 1989. The 1989 results were enhanced by a one-time gain of $341,000 from the sale of FHMLC stock.

''Our recent financial restructuring is yielding steady increases in core earnings,'' stated Loren E. Richardson, Pinnacle's chairman and CEO. ''Net interest income, the key component of core earnings, has increased steadily over the past four quarters.

''We continue our strategies of controlling costs and expanding our customer base thorugh new products,'' stated Richardson. ''This strategy is sound.''

In a related event, the Pinnacle board of directors declared a $.125-per-share quarterly cash dividend payable Nov. 30 to shareholders of record on Nov. 19.

The board of directors also announced the termination of further merger discussions with Columbia Federal Savings and Loan of Hamilton, Ohio.

''The present economic and regulatory environments are not favorable to permit active pursuit of this business transaction,'' said Richardson.

WALTHAM, MA (NOV. 7) BUSINESS WIRE - Parametric Technology Corp. (NASDAQ: PMTC) announced major functional enhancements to its Pro/ENGINEER mechanical design automation software with today's introduction of Release 6.0.

This release adds the capability for advanced surface and curve modeling, improved drafting and detailing capabilities, dynamic viewing and large assembly capabilities to the Pro/ENGINEER product family. The release also incorporates more than 250 customer-requested enhancements.

Parametric Technology believes that this software will open new markets for the company's products. ''The ability to design large assemblies and to create complex surfaces and curves for aircraft, automobiles, and ship surfaces adds entirely new categories of users for our products,'' stated Steven C. Walske, president and chief executive officer. ''In addition, the enhancements to our drafting system now makes the entire Pro/ENGINEER product family production-oriented.''

Walske continued, ''Parametric Technology has been introducing major new technology to the market on a six-month cycle and, consequently, the demand for our products continues to increase at a rapid pace. Release 6.0 will add to that demand and further accelerate our growth.''

Parametric Technology Corp. is the technology leader in the mechanical design automation industry. Its Pro/ENGINEER family of CAD/CAM/CAE software products are used by the world's largest manufacturing companies to improve productivity and product quality.

SARASOTA, FL (NOV. 7) BUSINESS WIRE - Christian Purchasing Network Inc. has completed the second phase of its initial public offering with sale of 153,000 units at $1,536,000 for a total of $4.2 million.

The church services company previously received proceeds of sale of 266,000 units on Oct. 1. Each $10 unit is made up of two shares and warrants.

CPN Chairman, Dr. Thomas J. McElheny said the Securities and Exchange Commission has granted a 60 day extension on the offering, which contains a maximum of 600,000 units.

Management Securities of Fort Lauderdale, Fla. is the underwriter. Mayer Securities of New York and Corporate Securities of Sarasota, Fla. are co-underwriters.

CPN in 1989 executed exclusive marketing agreements with publishing houses for Assemblies of God, Church of God, and Disciples of Christ denominations.

Recently, CPN signed a similar agreement to provide goods and services to a fourth denomination, Pentecostal Church of God. Additionally, four other major denominations are presently negotiating with the company.

WALTHAM, MA (NOV. 7) BUSINESS WIRE - Parametric Technology Corp. (NASDAQ: PMTC) Wednesday announced the addition of a sheet metal design product to its Pro/ENGINEER mechanical design automation system.

The new software module, Pro/SHEETMETAL, includes specific functions and capabilities for automatically creating sheet design models and unbending them into flat patterns.

With Pro/SHEETMETAL, designers can create models of sheet metal parts and assemblies quickly and easily. These models are fully parametric to allow changes in shape, size or thickness. Once a model is created, a sheet metal product family can easily be created by varying features, dimensions, or components. In addition, sheet metal models can be combined with other Pro/ENGINEER models at any time throughout the design-to-manufacturing cycle for analysis and design verification.

Pro/SHEETMETAL can be added to the Pro/MANUFACTURING module of the Pro/ENGINEER family of products or can run in a stand-alone configuration.

Pro/SHEETMETAL will be available in early 1991.

Parametric Technology Corp. is the technology leader in the mechanical design automation industry. Its Pro/ENGINEER family of CAD/CAM/CAE software products provide manufacturing companies with unprecedented flexibility in the creation and production of new mechanical designs.

Pro/ENGINEER offers a unique capability that allows users to shorten new product time-to-market, reduce manufacturing costs, and improve product quality through the evaluation of multiple design alternatives.

WHITE PLAINS, N.Y. (NOV. 7) BUSINESS WIRE - NYNEX announced Wednesday the sale of Telco Research Corporation, which NYNEX acquired in 1986, to several

Telco Research officers for an undisclosed amount.

Based in Nashville, Tenn., Telco Research develops and markets integrated software products and services to help businesses manage their telecommunications and information systems. The company is being purchased by three of its officers: Ralph Sonntag, who will become the new president, Ray Montgomery and Karl Steakley.

The sale is part of NYNEX's strategic re-tooling of its software and consulting interests toward a more vertical focus. Telco Research, now free from the restrictions of the Modification of Final Judgment, can enter new markets, including interLATA network management and information services provisioning.

MIAMI LAKES, FL (NOV. 7) BUSINESS WIRE - Suave Shoe Corp. (NYSE:SWV) Wednesday reported the following results for the fourth fiscal quarter and fiscal year ended Sept. 30.

For the last quarter, Suave had net income of $751,000 on net sales of $10,594,000.

Pedro Mirones, chief financial officer, said, ''We are pleased with the improvement in profitability for the quarter and year ended Sept. 30, 1990 as compared to the prior year.

''Such improvement is due mainly to higher margins as a result of increased unit sales for the year, lower than anticipated prices of raw materials, the positive effect of LIFO accounting resulting from reductions in inventories and lower net interest costs as a result of the sale of our import division during the year.''

Net income from continuing operations for the quarter and year ended Sept. 30, 1990 and 1989 include the impact of adjustments to LIFO inventories. For fiscal 1990, the adjustment increased net income by $327,000 (18 cents per share) and for fiscal 1989 the adjustment decreased net income by $314,000 (17 cents per share).

The results for the quarter and year ended Sept. 30, 1989 also include an

increase in income taxes of $346,000 (18 cents per share) representing deferred tax benefits which, in accordance with generally accepted accounting principles, cannot be recorded as an asset until realized in the company's tax return.

#90311b0855 11/07/1990 ~Business Wire
YOUNGSTOWN, OH (NOV. 7) BUSINESS WIRE - Ronald E. Klingle, chairman of the board of American Waste Services Inc. (NYSE:AW) Wednesday announced financial results for the third quarter and nine months ended Sept. 30, 1990.

Net operating revenues for the third quarter of 1990 increased to $24.9 million, compared to $9.6 million in the third quarter of 1989. For the first nine months of 1990, net operating revenues were $68.3 million, compared to $26.2 million in the comparable 1989 period.

The increases in revenues for both the three and nine month periods ended Sept. 30, 1990, were primarily due to increased transportation revenues, as a result of the DartAmericA Inc. acquisition in January 1990, increased transportation brokerage revenues and, to a lesser extent, increased landfill revenues. Net income totaled $2.6 million or 11 cents per share in the current quarter compared to net income of $1.7 million or 8 cents per share in the prior year third quarter.

Net income for the nine months ended Sept. 30, 1990, rose to $6.7 million or 28 cents per share, up from $4.8 million or 21 cents per share in the prior year.

American Waste Services Inc. provides integrated waste management services, including disposal, transportation and brokerage to industrial, commercial, municipal and governmental customers. With the acquisition of Earth Sciences Consultants Inc. and two affiliated companies on Oct. 12, 1990, these services have been expanded to include environmental engineering, site assessment, analytical laboratory and remediation services.

NORTH SPRINGFIELD, Vt. (NOV. 7) BUSINESS WIRE - Vermont Research Corp. announced that for the year ended Sept. 30, 1990, it had a net loss of $217,000, or 11 cents per share, as compared to net income of $1,906,000, or 94 cents per share, for the year ended Sept. 30, 1989.

Net sales for the year amounted to $4,120,000, down 7 percent from net sales of $4,412,000 in fiscal 1989.

Although net sales and services for the current year were down from the prior year, net sales and services for the fourth quarter of fiscal 1990 were $1,300,000, up 64 percent from the fourth quarter sales one year ago of $791,000. Net loss for the fourth quarter ended Sept. 30, 1990 was $19,000, or 1 cent per share, as compared to net income of $61,000, or 3 cents per share, for the fourth quarter of fiscal 1989.

Net product sales and services have increased in each quarter of the 1990 fiscal year. Sales of the company's primary product, Solid State Disks, accounted for the bulk of the sales during the year.

#90311b0866 11/07/1990 ~Business Wire

AUSTIN, TX (NOV. 7) BUSINESS WIRE - Healthcare International Inc. (ASE PSE:HII), Wednesday announced that a subsidiary of Greenery Rehabilitation Group Inc. has become the single largest holder of Healthcare's Class B common stock.

Healthcare's Class B common stock carries 10 votes per share and, subject to certain contractual limitations, which are described below, the holders thereof are entitled to elect a majority of Healthcare's board of directors.

Greenery's majority position has arisen as a result of (i) last week's conversion to Class A shares of 1,451,600 Class B shares owned by Healthcare's former chairman, James L. Fariss, and (ii) the subsequent exercise by Greenery of warrants to purchase 400,000 Class B shares.

The conversion of Fariss's Class B shares occurred automatically upon his death. Greenery now owns 650,000 Class B shares of a total of 1,190,315 outstanding and has warrants to purchase additional Class B shares.

Pursuant to a voting agreement among Greenery and most of the other holders of Class B shares, Greenery cannot exercise voting control with respect to election of directors until after Oct. 30, 1991.

In the meantime, a majority of the holders of the other Class B shares subject to the voting agreement, consisting largely of Healthcare management personnel will be entitled to direct the voting of all Class B shares subject to the voting agreement in director elections.

However, Greenery will continue to be entitled to name one representative to Healthcare's board (which to date it has not done), and Greenery will also be entitled to vote its Class B shares on matters other than the election of directors.

In an unrelated matter, the company announced that it has paid approximately $2.9 million to HealthVest, representing certain rent and mortgage payments due for November.

As was announced earlier this week, the standstill agreement between

Healthcare and HealthVest expired on Oct. 31, and the two companies have reached an impasse in negotiations regarding an extension and certain interim restructuring matters.

Jean P. Smith, Healthcare's President, said Healthcare had made the payments in an effort to keep discussions open and to facilitate a mutually agreeable resolution of the two companies' problems.

Healthcare International provides a wide range of health care products and services to both local and national markets through 21 facilities in 4 states. The company's class A common stock is listed for trading on the American and Pacific Stock Exchanges under the symbol HII.

#90311c0038 11/07/1990 ~Comtex

WASHINGTON (NOV. 7) COMTEX - Mosler Inc. filed a registration statement with the SEC in which it proposes to offer 200,000 shares of its common stock to its employees.

There is no public market for the common stock and none is expected to develop the company reports.

The offering price is $10.00 per share.

Mosler is a manufacturer and distributor of physical and electronic security systems.

The company's executive office is located at 1561 Grand Blvd., Hamilton, Ohio 45012 and its telephone number is (513) 867-4000.

-30- 696

#90311c0040 11/07/1990 ~Comtex

WASHINGTON (NOV. 7) COMTEX - Sequel Inc. filed a registration statement with the SEC in which it proposes to offer 375,000 units.

Each unit consists of 40 Class B common shares.

The initial public offering price is $6.00 per unit.

This is a blind pool/blank check offering in that neither the use of the proceeds nor the business of the company is specified.

The company's executive office is located at Pruneyard Towers II, Sixth Floor, Campbell, California 95008.

#90311c0041 11/07/1990 ~Comtex

WASHINGTON (NOV. 7) COMTEX - The 8-K report filed at the SEC shows effective Oct. 12, 1990, Western Community Bancorp merged with and into its wholly-owned subsidiary, Western Community Bank.

Western Community Bank is a California state-chartered bank.

Pursuant to the merger, each outstanding share of Western Community Bancorp's common stock was converted into an equal number of shares of Western Community Bank's common stock.

Accordingly, Western Community Bancorp no longer exists and the company reports this 8-K filing will be its last report under the Securities Exchange Act of 1934.

Western Community Bancorp's executive office is located at 321 East Sixth Street, Corona, California 91719-1599. Its telephone number is (714) 734-4110.

WASHINGTON (NOV. 7) COMTEX - The 8-K report filed at the SEC shows on Oct. 25 1990, First National Realty Associates Inc. acquired substantially all the business and assets of Jim Royer Realty Inc. as of Oct. 17, 1990.

The purchase price for Royer's assets was 200,000 shares of First National's common stock, and $350,000 in cash.

First National additionally placed 200,000 shares of its common stock in escrow, to ensure, at the end of the restricting holding period, that the value of such 200,000 shares would not be less than $2.50 per share.

First National's executive offices are located at 154 East Avenue, Norwalk, CT 06851, and its telephone number is (203) 866-3800.

-30- 846
#90311c0060 11/07/1990 ~Comtex
WASHINGTON (NOV. 7) COMTEX - The 8-K report filed at the SEC shows a subsidiary of The Boston Five Bancorp Inc.(TICKER: BFCS), Boston Five Cents Savings Bank F.S.B., assumed on Oct. 19, 1990, $462.0 million in deposits from the receiver of First American Bank for Savings in Dorchester, Massachusetts.

First American was declared insolvent by the Commissioner of Banks and placed in receivership by the Federal Deposit Insurance Corp. (FDIC) on Oct. 19, 1990.

The Boston Five Cents Savings Bank paid $2.1 million as a premium for the rights to the deposits and received $460.0 million in cash from the FDIC.

WASHINGTON (NOV. 7) COMTEX - The 8-K report filed at the SEC shows on Oct. 31 1990, Hart Holding Co. Inc. announced that in connection with its previously announced intention to dispose of its ARA Automotive Group, it intends to take a charge to earnings of $51.1 million ($32.6 million after taxes) in the third quarter ending Sept. 29, 1990.

The company's executive offices are located at 1120 Post Road, Darien, CT 06820, and its telephone number is (203) 655-6855.

-30- 643
#90311c0062 11/07/1990 ~Comtex
WASHINGTON (NOV. 7) COMTEX - The 8-K report filed at the SEC shows on Oct. 23 1990, Allomon Corp. obtained a restraining order prohibiting American Adventure Inc.(TICKER: AAIX) from transferring any assets which are subject to Allomon's security interest, including the company's bank accounts.

A hearing was scheduled for Nov. 8, 1990, on Allomon's petition for a preliminary injunction seeking to block all funds of American Adventure.

These actions were taken by Allomon in connection with its pending suit, previously reported, for judicial foreclosure of mortgages and liens on substantially all of the assets of American Adventure.

Subsequently, American has been forced to advise its employees that they will not be compensated for continuing to work for American, and American reports it expects to close its campgrounds.

American's executive offices are located at 2121 South Bundy Drive, Los Angeles, CA 90025, and its telephone number is (213) 207-1990.

-30- 1144
#90311c0064 11/07/1990 ~Comtex
WASHINGTON (NOV. 7) COMTEX - The 8-K report filed at the SEC shows on Oct. 22, 1990, Engy Inc., a 91% owned subsidiary of Energy Ventures Inc.(TICKER: ENGY), closed various agreements with Columbia Gas Development Corp. and Golumiba Gas Transmission Corp.

The agreements provided for, among other things, i) the dissolution of the COLEVE joint venture, a joint venture with Columbia Gas Development, ii) the transfer by Engy of certain leasehold interests received by it as part of the dissolution of COLEVE, iii) the settlement of all litigation among the parties relating to COLEVE and iv) the receipt by Engy of approximately $49.5 million in cash.

Prior to this transaction, COLEVE engaged in oil and gas exploration and production off the Louisiana and Texas coasts.

Energy Ventures says it expects to report, after minority interests and before income taxes, income of approximately $45 million as a result of these transactions.

SEOUL (NOV. 7) - The U.S. aircraft maker McDonnell Douglas hinted Wednesday that it may cut the price of jet fighters it plans to sell to South Korea, which says it is reviewing the multi-billion dollar deal.

But company executives said price increases which caused the South Korean government to take a second look had been outside its control and were much less than officials here claimed.

McDonnell Douglas also for the first time revealed how much the increase had been, saying it "was less than 20 per cent" and raised the cost of the program from around five billion dollars to six billion.

Some South Korean officials have put the increase at more than 40 per cent, or more than two billion dollars.

The company's International Program Development Director George Hibbard also warned that a reversal of the decision to buy the McDonnell Douglas FA 18 Hornets might spook companies wishing to do business here in the future.

The South Korean government picked McDonnell Douglas over General Dynamics,

which was offering the F-16, in December after an evaluation of more than six years, one of the longest in the history of McDonnell Douglas.

But the Ministry of National Defense surprised the St. Louis, Missouri-based aircraft manufacturer last week when it said it would review the deal again.

Mr. Hibbard said the two main reasons why the price had increased was that the prices were conceived two years ago and that estimates for inflation over the next 10 years had ballooned.

"All of these factors are factors that McDonnell Douglas does not directly control," he said. "McDonnell Douglas did not arbitrarily increase the price of the aircraft after our aircraft was selected."

HANOI (NOV. 7) - Oil production from Vietsopetro, a joint venture between Hanoi and Moscow, is expected to reach 3.5 million tons in 1991, more than a million tons higher than this year's output, the daily Nhan Dan said Wednesday.

Crude oil production from the Bach Ho (White Tiger) field had risen from 8,500 tons daily to 10,000 tons a day and the joint venture's output was at its "highest level ever," the official newspaper said.

If the trend continued, 1990 output would be 160,000 tons higher than the production target of 2.5 million tons, which was itself an increase of one million tons over the previous year, Nhan Dan said.

Output reached more than 2.2 million tons up as of Wednesday and an eighth well would be put into operation before the year ended, the newspaper said.

The 10-year-old company now employs 6,000 Vietnamese and 1,200 Soviet workers and is the only one in production in Vietnam, Nhan Dan said.

British Petroleum, the French company Total, Anglo-Dutch-Belgian consortium Petrofina-Shell and the Anglo-French group, CEPT-Enterprise, are all prospecting for oil in Vietnamese territorial waters.

TOKYO (NOV. 7) - Shares in Japan's TDK Corp., a world leader in the manufacture of blank cassette tapes, will be quoted on the Frankfurt Stock Exchange from next Tuesday, TDK said here Wednesday.

The move was aimed at allowing TDK to finance European expansion in view of German reunification, developments in Eastern Europe and the abolition of internal tariff barriers in the European Economic Community in late 1992, observers said here.

TDK has already said it would open a new factory in Luxembourg next spring and would form a joint venture with German firm Robert Bosch GmBH in January.

TDK's shares are quoted in London, New York, Paris, Amsterdam, Brussels and Antwerp.

The shares of 57 Japanese companies are already quoted in Frankfurt.

WELLINGTON (NOV. 7) - New Zealand's biggest public company, Fletcher Challenge Ltd. (FCL), is aiming this financial year at a net profit similar to last year's record of 662 million New Zealand dollars (403 million dollars U.S), chairman Sir Ronald Trotter told the company's annual meeting Wednesday.

FCL is a dominent player in the world pulp and paper industry and also specialises in energy production and construction.

Sir Ronald said FCL was conscious of the uncertain outlook in the national and international business environment. The immediate aim was to continue improving FCL's debt to equity ratio, which stands at 55:45 -- unchanged since the June 30 balance date.

"Further initiatives will not be undertaken if they have an adverse effect on our financial ratios," Sir Ronald said.

He said the company expects to realise the benefits of a major capital spending programme. It had reduced its product range and focused on business areas where it had a competitive advantage.

This had resulted in divestments worth more than two billion dollars (1.2 billion U.S.) in the past three years.

He said FCL now had "strategic positions" in the United States, Britain, Chile Brazil, Australia, Canada and New Zealand.

The company's capital spending had peaked and would decline substantially over the next 18 months. Pulp and paper mill upgradings had been completed and the

company would increasingly benefit from that over the next two years.

Sir Ronald also said FCL ranked as a sizeable intermediate company in the international oil business, with reserves of 440 million barrels of oil equivalent.

Chief executive Hugh Fletcher later told reporters that moves to cut debt would involve more asset sales, but declined to say what FCL planned to sell.

#90311d0300 11/07/1990 ~French/German News Agency

BEIJING (NOV. 7) - China's steel production in the first 10 months of the year rose by 8.2 percent to 54.48 million tons and reached 89 percent of its production target for all of 1990, the China Daily said Wednesday.

It quoted a Metallurgical Industry Ministry official as saying 1990 steel production was expected to reach 64 million tons, three million tons above target, despite a slowdown in production expected for the rest of the year.

The official English-language newspaper said the official attributed the higher production mainly to improved raw material and electricity supplies.

However, profits from the country's key iron and steel enterprises had fallen by 15.7 percent in the first nine months of the year, and nine major enterprises, which the official did not name, were losing money, China Daily said.

China is the fourth largest steel producer in the world.

#90311d0330 11/07/1990 ~French/German News Agency

TOKYO (NOV. 7) - Japan remained pessimistic Wednesday about a successful conclusion to the current Uruguay Round of trade talks despite the European Economic Community's agreement on cutting farm subsidies by 30 per cent.

"We are not so optimistic on the possibilities of an agreement on farm issues " said an official handling negotiations on the General Agreement on Tariffs and Trade (GATT) which are due to end in December.

EEC agriculture ministers agreed late Tuesday, after weeks of talks, to cut farm subsidies by 30 per cent over 10 years, retroactive to 1986.

The United States and other food exporting countries want much larger cuts in the subsidies, which have become one of the crucial issues in the Uruguay Round.

An official at Japan's agriculture ministry said the EEC agreement followed "difficult political negotiations" and it was hard to see what future developments would be, given that the EEC package was "wide apart from U.S. demands."

It was only a "starting point," like the Japanese and U.S. positions, another official said, adding that the negotiations would remain difficult.

Tokyo has likewise proposed a 30 per cent cut in farm subsidies, he said.

"We are now studying the implications of the proposals, ... (and) the amendments including special community preference," he said.

Japan, for its part, has repeatedly refused to open its domestic market to rice imports, claiming self-sufficiency in food production was essential to national security. Observers here say Tokyo might be ready to make some concession on this at the GATT talks.

WELLINGTON (NOV. 7) - Australia and New Zealand will coordinate their anti-driftnet fishing maritime surveillance this southern summer season, New Zealand Foreign Minister Don McKinnon said in a statement here Wednesday.

Driftnet fishing is strongly criticized by environmentalists as being damaging and is opposed by all South Pacific governments and the United States. The major driftnet operator in this region is Taiwan.

The fishing season usually starts this month and runs through to around March.

Mr. McKinnon said the Royal New Zealand Air Force and the Royal Australian Air Force would monitor activities by driftnet fishing vessels in the Tasman Sea and the south-west Pacific.

The decision to co-ordinate surveillance was originally announced in February, when Australia's Prime Minister Bob Hawke signed a convention for the

prohibition of fishing with long driftnets in the South Pacific.

New Zealand signed the convention in November 1989.

LAGOS (NOV. 7) - The Nigerian government is to investigate claims that businessmen have imported large quantities of blood for sale to hospitals, Health Minister Olikoye Ransome-Kuti has announced here.

The independent National Concord daily on Wednesday reported that the minister was tipped off to the alleged imports on Tuesday by a professional midwife attending a workshop on "safe motherhood".

The blood of unknown origin has been distributed across Nigeria, subjecting unsuspecting patients to the risk of transfusions of unscreened blood, the paper said.

Prof. Ransome-Kuti told the workshop that a special committee had been set up to prepare guidelines on transfusion with a view to formulating a national policy.

He was quoted as saying that at least 500,000 people in Nigeria may have been infected by the deadly HIV virus causing the Acquired Immune Deficiency Syndrome. AIDS can be transmitted by transfusions of blood with the virus.

#90311d0720 11/07/1990 ~French/German News Agency

NAIROBI (NOV. 7) - The brother of a murdered Kenyan foreign minister has fled to United States, where he has been accepted as a refugee, a Kenyan Foreign Ministry official said Wednesday.

Barrack Mbajah, a brother of Robert Ouko, whose killing sparked anti-government riots in February after opposition figures blamed the government for his death, disappeared 10 days ago.

A commission investigating Mr. Ouko's killing had attempted to summon Mr. Mbarajah to answer contempt charges after he was quoted in a local newspaper as saying that his brother's murder was "no passing cloud".

The foreign ministry official said the U.S. Embassy had informed the ministry that the United States has accepted Mr. Mbajah as a refugee "on the United Nations High Commissioner for Refugees' recommendation."

He quoted the embassy as saying that "neither the embassy nor the United States government played a role in Mr. Mbajah's departure from Kenya."

The embassy said Mr. Mbajah had applied to UNHCR for refugee status from outside Kenya, according to the Kenyan official. U.S. embassy officials refused to comment, but did not deny the foreign ministry official's statement.

Kenyan authorities called in British police to help investigate Mr. Ouko's killing after his charred and mutilated body was found in February.

But they have refused to make public a Scotland Yard report which several London newspaper articles have said implicates Mr. Ouko's fellow cabinet colleagues and suggests political motives for his killing.

Mr. Ouko had called for a corruption probe into members of the government shortly before he was killed.

HANOI (NOV. 7) - Vietnamese authorities have recovered 100 billion dongs (16 million dollars) in a crackdown on tax evasion, the official Nhan Dan newspaper said Wednesday.

Only just over a month since their creation, the task forces set up to track down tax evasion have uncovered tax frauds totalling more than 150 billion dongs (24 million dollars), it said.

Tax evasion and smuggling cost Hanoi heavily in lost revenue and are compounding the country's economic crisis.

#90311d0910 11/07/1990 ~French/German News Agency

BASTIA, CORSICA (NOV. 7) - An epidemic that has killed more than 250 dolphins in the Mediterranean is caused by a virus similar to one responsible for a nervous disease in dogs, French veterinary services said here Wednesday.

But "the development of this virus is due to the general degradation of the environment and all the pollution associated with it", said Denise Viale, the services' expert on marine mammals.

She warned that the region faced a "serious epidemic" first spotted "in July on the Spanish coasts and which has spread progressively".

More than 250 dead dolphins have washed up on French and Spanish beaches since July. Five more were found on the Corsican coast at the weekend and were being autopsied here in an attempt to find out more about the disease that killed them.

#90311d0990 11/07/1990 ~French/German News Agency
KHARTOUM (NOV. 7) - A senior military officer has said that there is a plan by the government to give military training to all Sudanese within the next five years, it was reported here Wednesday.

The officer, Brigadier Babiker Abdul Mahmoud, was speaking at the passing out ceremony of 1,500 recruits of militiamen known as People's Defense Forces.

The ceremony took place in Muglad in southern Kordofan, the only area in northern Sudan where the rebel Sudan People's Liberation Army (Spla) has caused security concern.

Brigadier Mahmoud was quoted by the ''el Ingaz el Watan'' daily as saying that the People's Defense Forces would be deployed to defend the oil fields abandoned by Chevron Oil Company because of the Spla activty.

The brigadier reiterated the government's determination to train 150,000 militiamen by June 30 next year when the country will be celebrating the second anniversary of the National Salvation Revolution that came to power in a military coup in 1989.

#90311d1230 11/07/1990 ~French/German News Agency
JOHANNESBURG (NOV. 7) - The British government on Wednesday announced it had inaugurated a second fellowship program in honor of veteran anti-apartheid campaigner Helen Suzman.

The scholarship will cater for 20 black women at Johannesburg's University of the Witwatersrand.

Whitehall will contribute 250,000 rand (95,000 dollars) per annum over the next three years for black women students to attend the university, the British ambassador to South Africa, Sir Robert Renwick, said at the launch of the scheme.

Last year the British government announced 20 scholarships for students to study in Britain to mark Mrs. Suzman's retirement from the South African parliament.

The Suzman awards were created in honor of her contribution to human rights and democratic freedoms in South Africa.

BAGHDAD (NOV. 7) - Former Japanese prime minister Yasuhiro Nakasone and 77 Japanese nationals held here against their will left Baghdad for Tokyo Wednesday, airport sources reported.

Their Japan Airlines 747 took off at 3.25 p.m. (1225 GMT), leaving some 270 Japanese nationals still held hostage.

President Saddam Hussein on Tuesday ordered the release of the Japanese, along with 31 citizens of other countries.

They had been held by Iraqi authorities to deter a feared attack by U.S.-led forces that assembled in Saudi Arabia and elsewhere in the Gulf after the August 2 Iraqi invasion of Kuwait.

The Japanese Foreign Ministry earlier Wednesday said 78 Japanese nationals had been freed.

#90311d1360 11/07/1990 ~French/German News Agency

NEW DELHI (NOV. 7) - A 17-year-old Hindu schoolboy died here of burns after setting himself alight Wednesday to protest last week's police shooting of Hindus who tried to storm a mosque in northern India.

The Press Trust of India (PTI) quoted doctors as saying Sanjay Goel, who had been rushed to hospital with burns covering his whole body, died late Wednesday afternoon.

He had poured kerosine over himself and lit a match outside his school early in the morning.

It was the second immolation attempt over a raging mosque-temple dispute in the northern Indian town of Ayodhya, where militant Hindus want to raze a 16th century mosque and replace it with a temple.

An activist of the Hindu-revivalist Bharatiya Janata Party (BJP), Kewal Krishnan Kapoor, set himself on fire here October 26 to protest the arrest of his party leader, Lal Krishna Advani. He is still hospitalized.

Mr. Advani was detained by the government to stop him leading Hindu militants to Ayodhya, where Hindus tried to storm the mosque twice last week.

BELGRADE (NOV. 7) - Cordless telephones were declared illegal by the Federal Office of Radio Communication, the Belgrade daily Vecernje Novosti reported Wednesday.

Gavrilo Vuksanovic, deputy director of the federal office, said the decision was made because the telephones interfered with radio frequencies used by civil aviation, the police, army and rescue services.

However, owners of cordless phones are likely to continue using them as the

fines for possessing one do not exceed 100 dinars (less than a dollar).

The paper reported that 100 miliwatt or less cordless phones with a range of 50 metres (165 feet) indoors and 400 metres (1,320 feet) outdoors were not banned.

-30- 854

#90311d1540 11/07/1990 ~French/German News Agency

JEDDAH, SAUDI ARABIA (NOV. 7) - Interior ministers of the Gulf Cooperation Council (Gcc) met here Wednesday to discuss ways of bolstering security cooperation.

The ministers of Saudi Arabia, Kuwait, Qatar, Bahrain, Oman and the United Arab Emirates (Uae) are expected to review the new situation in the wake of the Iraqi invasion of Kuwait on August 2.

The Gulf News Agency said the ministers would also discuss a formula for a comprehensive security umbrella to protect the six Gcc member states.

Omani Interior Minister Bader bin Saud bin Hareb, who chaired the session, said ''Iraq's occupation of Kuwait and infringement of its sovereignty and sanctity are a dangerous precedent which the entire world has not witnessed since the Second World War.''

Given the current East-West detente, ''Iraq's aggression represented a flagrant violation of all international charters and laws,'' the minister said.

''These developments call on us to exert more efforts to maintain security and stability in our countries, which have always provided a vivid example of security and stability for others,'' he added.

The Gcc, set up in 1981 after the start of the Iraq-Iran war, is designed to coordinate economic and defence policies of the six conservative oil-rich states.

#90311d1710 11/07/1990 ~French/German News Agency
TOKYO (NOV. 7) - Japan's Sekisui Chemical Co. Ltd. said Wednesday its net profit fell 5.4 percent from a year earlier to 11.4 billion yen (82 million dollars) in the six months to September.

The fall reflected a 36 percent decline in investment income to 8.7 billion yen (63 million dollars) following a slump in Japanese stock prices during the period, a company official said.

Sekisui, a major chemical firm with strong polyvinyl chloride (PVC) and pre-frabricated housing activities, said sales rose 10.9 percent to 296 billion yen (two billion dollars).

Pre-fabricated house sales surged 15.7 percent to 149 billion yen (one billion dollars) while sales of pipes and fittings rose 5.2 percent to 44 billion yen (320 million dollars).

Sales of films and molded products advanced 6.3 percent to 28 billion yen (205 million dollars) and chemicals increased 10.8 percent to 22 billion yen (160 million dollars). But sales of adhesives, tapes and related products dropped 0.4 percent to 20 billion yen (146 million dollars).

For the full year to March, the company forecast a net profit of 26 billion yen (188 million dollars) on sales of 600 billion yen (4.3 billion dollars).

-30- 1390
#90311d1720 11/07/1990 ~French/German News Agency
TOKYO (NOV. 7) - Japan's biggest pharmaceutical company Takeda Chemical Industries Ltd. said Wednesday its net profit rose 5.2 percent from a year earlier to 19 billion yen (138 million dollars) in the six months to September.

But sales shrank 6.8 percent to 271 billion yen (two billion dollars), reflecting the expiry of a marketing agreement for Bayer products in April following the German company's establishment of an independent Japanese unit.

Takeda's operating profit also declined but was offset by increased investment income which helped to boost the company's overall net profit.

Sales of pharmaceuticals, accounting for 66 percent of all sales, dropped 11 percent to 179 billion yen (1.3 billion dollars). Sales of foodstuffs, agricultural chemicals and veterinary drugs also declined but sales of other chemicals rose, the company said.

Takeda forecast a net profit of 38.5 billion yen (280 million dollars) for the full year on sales of 555 billion yen (four billion dollars).

#90311d1790 11/07/1990 ~French/German News Agency

MANILA (NOV. 7) - Despite fears of a worldwide recession, Taiwan should maintain moderate growth and mild inflation over the next four years, two Taiwan economists said at a regional conference here Wednesday.

However, due to sluggish exports and an industrial production slump, the gross domestic product (GDP) growth for 1990 will be a mere 4.5 percent, compared to 7.5 percent last year, Joan Lo and Yu Tzong-shian said in their paper.

Mr. Yu, of the Academia Sinica and the Chung-hua Institution for Economic Research, and Ms. Lo, from Academia Sinica's Institute of Economics, presented their study at an "Asian Economic Outlook" meeting sponsored by the Manila-based Asian Development Bank (ADB).

If Taiwan upgraded its industrial structure and realized "liberalization and internationalization" of its economy, it should post a GDP growth rate of 6.6 percent next year, 6.5 percent in 1992, 7.5 percent in 1993 and 7.8 percent in 1994, the paper said.

The forecasts are conditional on the Gulf conflict being "settled" this year, the absence of major political instability at home and military conflicts across the Taiwan Strait with China, and an average annual growth rate of around three per cent in Western economies.

The economists forecast a 0.9 percent decline in exports of goods and services this year from a 5.5 percent growth last year, due to a fall in exports to the

United States and Japan, with protectionism and rapid appreciation of the Taiwan dollar weighing in.

Exports were expected to pick up by 3.3, 4.2, 6.3 and 7.6 percent over the next four years, they added.

Imports will rise by 3.2 percent this year due to low growth in industrial production, then rise to 4.7 percent next year, 8.5 percent in 1992, 9.2 per cent in 1993 and 10.5 percent the year after.

Manila (NOV. 7) - For the first time in four years, the Philippines trade with the European Community has slipped into a deficit, Manila reported here Wednesday.

Trade with the E.C. in the first seven months of 1990 produced a deficit of 60.13 million dollars, compared to a 16 million dollar surplus in the same period last year, the Ministry of Industry and Trade reported.

Exports to the E.C. reached 852.44 million dollars, up from 807 million dollars in the first seven months of last year. But imports rose more strongly, to 912.57 million dollars, compared to 791 million dollars in the January-July 1989 period.

MANILA (NOV. 7) - Hong Kong will experience modest economic growth in the next few years because of the anticipated world recession and local capacity constraints, experts told a regional conference here Wednesday.

Economists Win-lin Chou and T.B. Lin of the Chinese University of Hong Kong told the conference hosted by the Asian Development Bank (ADB) that the colony's gross domestic product (GDP) would grow by 2.6 percent this year.

This would improve to four to five per cent in the next two years, according to their forecasts made before the effects of the Gulf crisis were known.

"Because of the difficulties in predicting the impact of external factors such as the oil price upsurge shocks and the possible U.S. economy recession in ascertaining the speed of adjustment, the forecast is subject to a high degree of uncertainty," they said.

Economic and political policies in China, which resumes sovereignty over Hong Kong in 1997, would also affect the British colony's prospects, they said without going into detail.

They noted that the impact of last year's June 4 massacre of pro-democracy students in Beijing contributed to the colony's GDP growth slowdown to 2.5 per cent in 1989, after expansion rates of 13.9 and 7.9 percent in 1987 and 1988 respectively.

Exports will grow by only about one per cent in 1990 because of the oil shock and the decline in demand from major markets registered in the first semester, but would rise to 5.5 percent in the next two years, they said.

CAIRO (NOV. 7) - The foreign ministers of Egypt, Syria and Saudi Arabia are to meet Friday and Saturday in Damascus to discuss the situation in the Gulf after the tour of U.S. Secretary of State James Baker.

Mr. Baker was in Bahrain and Saudi Arabia at the week end, Egypt on Tuesday and is now in Turkey. He will travel on to the Soviet Union, Britain and France to consult members of a coalition opposed to the Iraqi invasion of Kuwait August 2.

Esmat Abdel Meguid of Egypt, Farouk al-Shara of Syria and Prince Saud al-Faisal of Saudi Arabia will also consider the current Middle East mission of Chinese Foreign Minister Qian Qichen.

The three Arab ministers, whose countries have all strongly condemned Iraq's occupation of Kuwait, met October 31 in Jeddah, Saudi Arabia.

CANBERRA (NOV. 7) - Treasurer Paul Keating on Wednesday tipped further interest rates cuts, the Australian dollar fell and share prices rose in the wake of much lower than expected inflation for the September quarter.

The latest figures released by the Australian Bureau of Statistics showed prices increased by only 0.7 percent for the quarter, giving an annual rate of six percent.

This compared with a rise of 1.6 percent in the June quarter, making an annual rate of 7.7 percent, and 2.3 percent in the September quarter of last year, an annual rate of 8.3 percent.

The latest increase gave the Labor Government a much needed boost. It was significantly below financial market predictions of inflation between 1.6 per cent and 1.9.

Mr. Keating said the inflation figure showed further cuts in interest rates were still possible this calendar year.

It was the fifth consecutive quarterly fall in inflation and the underlying rate, he said. It was also the lowest since the June quarter of 1971.

Mr. Keating denied at a news conference that Prime Minister Bob Hawke had ruled out further cuts in monetary policy when he said Tuesday the government could do no more with rates to help farmers.

"What this figure shows is that we have inflation decelerating and it is a possiblity that we could see official rates cut off more," Mr. Keating said.

Within the eight major categories of the consumer price index, transportation, tobacco and alcohol recorded the largest quarterly increases.

A sharp fall in vegetable prices helped offset petrol price rises, with a drop in car prices and lower housing prices also having a moderating influence.

Some economists said the reduction underlined the recessionary state of the economy to a point where further rate falls are essential.

However, Intosh Hamson Hoare Govett chief economist Saul Eslake said the latest figures were "an extremely lucky break for the government", which had forecast a fiscal year end inflation rate of six percent.

SEOUL (NOV. 7) - Yugoslav President Borisav Jovic arrived here Wednesday for a four-day state visit to South Korea.

He was welcomed at Seoul's Kimpo airport by South Korean Prime Minister Kang Young-Hoon.

He is scheduled to have talks with South Korean President Roh Tae-Woo on Thursday and meet South Korean business leaders.

He is accompanied by his wife and Federal Secretary for Foreign Affairs Budimir Loncar.

Yugoslavia followed Hungary and Poland in establishing formal diplomatic ties with South Korea in December, ignoring protests from traditional communist ally North Korea.

Two-way trade totalled 67 million dollars last year but jumped to 149 million dollars during the first seven months of this year.

HANOVER (NOV. 7) - The German tire manufacturer Continental said here Wednesday it was prepared to continue discussions with Pirelli on a possible merger, but insisted that the Italian firm should refrain from any stock acquisitions for two years.

A continental spokesman said that if Pirelli was really interested in cooperating and was not seeking a hostile takeover, then it should accept the two-year moratorium condition.

His remarks followed on a statement in Milan by Pirelli that it was willing to refrain from adding to its equity stake in Continental during any negotiations but that the two-year moratorium was unacceptable.

Continental is the world's fourth-largest tire maker, and Pirelli fifth-biggest. The Italian firm says that together with various allies it effectively controls more than 50 percent of Continental's shares.

BRUSSELS (NOV. 7) - Trade partners of the European Economic Community (EEC) served notice Wednesday that they will not easily swallow the EEC's proposed farm subsidy cuts reached after a month of hard bargaining here.

New Zealand was the first country Wednesday to reject the EEC offer. Deputy Foreign Affairs Minister Philip Burdon said it was "unacceptable" to the Cairns group of 13 major food exporting countries, of which it is a member.

In Tokyo, a spokesman for the Japanese Ministry of International Trade and Industry (MITI) said Japan was "not optimistic" about an agricultural accord at a GATT conference next month. Tokyo's offer is similar to that of the EEC.

In Geneva on Tuesday, Brazilian Ambassador Rubens Ricupero told a GATT meeting that developed nations had shown little political will to make concessions on textiles and agriculture - critical exports of the third world.

Anticipating these criticisms, European Commission vice-president Frans Andriessen, the EEC's GATT negotiator, stressed Wednesday that agriculture was not the only subject of GATT, and that negotiations needed to be realistic.

And a spokesman for the Union of Industrial and Employers Federations of Europe warned: "Do you want to take from Europe more than it can give in farm matters, and risk sinking the Uruguay Round (of GATT talks)?"

The 12 EEC member countries agreed Tuesday on a 30 percent cut as its formal

offer on overall farm subsidies at a General Agreement on Tariffs and Trade (GATT) conference here December 3-7.

The conference, involving over 100 countries, is due to decide on wide-ranging drops in barriers to free trade. It wraps up four years of negotiations under the Uruguay Round of GATT negotiations.

#90311d2110 11/07/1990 ~French/German News Agency

JOHANNESBURG (NOV. 7) - Police and welfare officials on Wednesday emphatically denied a report in the Johannesburg Star that a 30-month-old boy had been chained to a kennel with a dog for the past two years.

And in an interview with the South African Press Association (SAPA) news agency, the boy's mother, who has not been named, also denied that the child had been made to sleep in a dog kennel.

A SAPA reporter visited her house, in the mining town of Springs east of here, where she pointed out a neat room with a bed where she said her son had slept.

The Star report said that the infant had been found in a kennel, could not walk upright and "can only crawl, bark and whimper".

The report, published alongside a picture of an attractive blond boy in a hospital bed where he is being treated, said his hands were curved like paws and his feet slightly turned in.

There were chafe marks on his neck, possibly caused by a dog collar, it added.

Medical sources quoted by the newspaper said the boy would not have survived had it not been for the dog and that the infant was showing signs of trauma at being separated from the animal.

MBARARA, UGANDA (NOV. 7) - Thousands of refugees from Rwanda's Hutu tribe who fled here after civil war erupted last month refuse to be settled with Tutsis who have been in Uganda for 30 years, refugee officials say.

The Hutus fear "psychological torture" and persecution by the Tutsis, a relief worker who declined to be named said Tuesday.

Thousands of Tutsis poured into Uganda after tribal massacres in 1959, when the majority Hutus seized power from the minority Tutsis, Rwanda's traditional rulers, in the runup to independence in 1962.

Many Tutsis have lived in refugee camps near the Rwandan border for the past 30 years.

Another 13,000 Rwandans have fled to Uganda since Rwandan rebels invaded north-east Rwanda on October 1 to topple the government of President Juvenal Habyarimana, officials of the United Nations High Commissioner for Refugees (UNHCR) said Tuesday. The number had previously been estimated at 14,000.

The rebels, mainly Tutsi refugees based in Uganda, said they were fighting for the right to be allowed back to their homeland, but ironically their invasion has created a new refugee problem.

A UNHCR official said plans to move the new refugees, currently crowded in makeshift camps along the Rwandan border, to the Nakivali refugee settlement, 35 kilometres (21 miles) east of here, had been postponed "for the time being."

The move had been scheduled for Wednesday.

Eschborn (NOV. 7) - Consumption of light heating oil surged by 25 percent in western Germany in the first eight months of 1990, while motor vehicle fuel demand rose 3.7 percent, the Federal Office of Industry (Baw) said here Wednesday.

The Baw said that light heating oil turnover came to 21.7 million tons through August in what was a technical adjustment in the market. In 1989, after a tax on heating oil was imposed, light heating oil sales in West Germany fell by 10 million tons.

Meanwhile gasoline consumption rose by 3.7 percent in the first eight months of 1990 to 17.85 million tons, while diesel fuel turnover rose 5.7 per cent to 11.8 million tons, the Baw said.

Demand for heavy heating oil increased 4 per cent to 4.4 million tons.

NAIROBI (NOV. 7) - The rebel Sudan People's Liberation Army (SPLA) has seized a strategic garrison town in southwest Sudan's Bahr el Ghazal region, radio SPLA announced in a broadcast monitored here Wednesday.

The radio said that after heavy fighting with Sudanese government forces, SPLA guerrillas overrun the garrison town of Deim Zubeiri, 200 kilometres (125 miles) west of the region's capital, Wau.

Also overrun was the military outpost of Yagulo, close to Sudan's border with neighbouring Central African Republic, the rebel radio said.

The radio did not, however, specify the date of their capture.

This is the first major engagement reported between the SPLA and government forces since September 25, when the rebels claimed they killed 21 government troops and wounded more than 80 in a three-hour battle with a large convoy sent from Juba on August 4 to try to rescue the besieged garrison town of Yei.

#90311d2380 11/07/1990 ~French/German News Agency

NAIROBI (NOV. 7) - Rwandan rebel leader Fred Rwigyema was killed by his second-in-command Peter Bayingana, who was himself killed by rebels loyal to Major-General Rwigyema, sources close to the rebels said here Wednesday.

The account was confirmed by Western diplomats here.

The rebel sources, speaking on condition of anonymity, said Major Bayingana had opposed Maj.-Gen. Rwigyema's plan to stage a lightning strike on Kigali, the Rwandan capital.

Maj. Bayingana wanted to wage a slow guerrilla war to wear down the government of President Juvenal Habyarimana.

The row developed into a fight, and Maj. Bayingana killed the leader of the Rwandan Patriotic Front (RPF) on October 3, only two days after the rebels invaded north-east Rwanda from neighbouring Uganda, the sources said.

Maj. Bayingana and other rebel commanders then kept Maj.-Gen. Rwigyema's death a secret. It was not announced by the rebels until after Maj. Bayingana himself was killed on October 22 or 23.

The RPF has repeatedly denied reports that Maj.-Gen. Rwigyema was killed by fellow rebels, saying he died in a mine blast near the border post of Kagitumba, where the rebels launched their invasion.

But the Rwandan army said no mines were planted near Kagitumba.

The rebels announced that Maj. Bayingana died in combat, but the sources said he and Major Chris Bunyenyezi, another top rebel commander, were killed by rebels who opposed their leadership and were angered by the death of Maj.-Gen. Rwigyema.

"We gave out the story that they had died in battle because we didn't want to undermine morale or publicise our internal problems," said a source close to the rebels.

"But we hope the lesson has been learnt. They shouldn't have started arguing before we had even achieved our goal. They should have settled it after we toppled Habyarimana," the source said, adding that the rebels were now united under their new leader Major Paul Kagame.

The RPF is led by Rwandan exiles based in Uganda.

Most of its fighters are Ugandan army deserters of the Tutsi tribe whose families fled Rwanda amid horrific tribal massacres in the late 1950s, when the majority Hutus seized power from the minority Tutsis, Rwanda's traditional rulers, in the runup to independence in 1962.

KARACHI (NOV. 7) - Higher fuel prices and a coming insurance surcharge in the wake of the Gulf crisis have wiped out Pakistan International Airlines's (PIA) profit for 1990-91, airline sources said here Wednesday.

The loss of the projected 820 million rupee (37 million dollar) profit might force another rise in air fares and cargo charges, the sources said.

The International Air Transport Association recently recommended a four to eight per cent increase in passenger fares and seven per cent in cargo costs to offset the rise in fuel prices, which have nearly doubled since the Iraqi invasion of Kuwait in August.

A final decision about any fare increase by PIA would be taken by the government, the sources said.

#90311d2860 11/07/1990 ~French/German News Agency
LAGOS (NOV. 7) - An outbreak of a "mysterious" disease, suspected to be yellow fever, has killed 45 persons in one month in Nigeria's north-eastern Gongola state, near Cameroon, the official newspaper said Wednesday.

The official 'New Nigerian' quoted head of the health ministry in the state, Dr. Zainab Abubakar.

But according to an investigation by the newspaper, more than 100 must have died as a result of the disease as many cases were not officially reported to the health authorities.

Victims of the disease vomited and excreted thick black blood, and died after two or three days, the report said.

Following the outbreak, which was first officially reported last October 20, the government vaccinated more than 42,000 persons and established nine treatment centres within the state, Dr. Abubakar stated.

Of the 20,000 diarrhoea cases tretaed in the state between last July and September, 34 children have so far died, he also said.

#90311d2980 11/07/1990 ~French/German News Agency
LAGOS (NOV. 7) - An interim government led by Liberian academic Amos Sawyer will next week be inaugurated in Monrovia, the chief of staff of West African peacekeeping troops despatched there said Wednesday.

Brigadier Cyrili Iweze, in Lagos to brief the Nigerian military government, added that Prince Johnson's rebels were cooperating with the troops, while many men commanded by rival rebel leader Charles Taylor were defecting.

The brigadier is chief of staff of a five-nation force sent into Liberia by the Economic Community of West African States (ECOWAS) in August, eight months after Mr. Taylor launched his bid to oust the late president Samuel Doe.

Earlier Wednesday, African diplomats and informed sources in Freetown said that Monrovia's small James Spriggs Payne airport had re-opened, adding that the interim government would be flown into Liberia shortly.

The Sawyer government was formed at a conference of Liberian politicians, religious leaders and exiles under ECOWAS auspices. Mr. Taylor, however, has declared himself president of Liberia.

Brig. Iweze told a press conference here that peace was gradually being restored to Liberia. Mr. Taylor's men had violently opposed intervention by the ECOWAS troops while the rebel leader stalled on accepting an ECOWAS

ceasefire agreement, asking for clarification.

Libyan marks and labels were found on weapons seized from Mr. Taylor's rebels, the brigadier said, without giving further details.

Earlier Wednesday, Brig. Iweze met here with President Ibrahim Babangida and heads of the nation's military and security agencies.

Asked about casualties among the ECOWAS troops, he said the figure was still "acceptable" in military terms, totalling around two per cent of the entire force.

The intervention force is made up of about 7,000 troops drawn from Nigeria, Ghana, Guinea, Sierra Leone and Gambia.

In a message Sierra Leone officials have said they are not taking lightly, Mr. Taylor has threatened to "destroy" the Freetown international airport if ECOWAS aircraft posted there continue to bomb his positions.

#90311d3460 11/07/1990 ~French/German News Agency
BRUSSELS (NOV. 7) - The Belgian Red Cross said Wednesday it has counted 13,492 displaced people in Rwanda following a rebel invasion of the north of the country from Uganda on October 1.

The organisation said it had counted 9,000 new displaced persons to add to a figure of 4,492 compiled on November 4. The figures do not include people who have fled to neighbouring countries such as Uganda.

The Belgian Red Cross said it was supplying the people in Rwanda with food, medicines and blankets bought with funds from the European Economic Community (717,000 dollars) and the Belgian government (815,000 dollars).

The organisation sent two aid missions to the troubled little African country on Wednesday, one to the northeast and the other to the northwest.

#90311d3500 11/07/1990 ~French/German News Agency
LONDON (NOV. 7) - Aluminium dipped Wednesday, as heavy selling continued following the sharp increase in stocks announced Tuesday, but the market steadied out at near unchanged levels in late after-hours dealing.

Three month metal dropped as low as 1580 dollars per tonne in morning deals before recovering to quote at 1,626 dollars per ton in after hours kerb deals, six dollars up from Tuesday.

There were suggestions among operators that one particular aluminium producer and trader was responsible for heavy selling earlier in the week.

Lead was higher, the three month price of 370 pounds at the unofficial close was up 4 dollars on Tuesday's close, and prices of 376 pounds per ton were quoted in after hours kerb trading.

Dealers said modest gains were due to increased trade interest.

The price of 3 month tin fell from 6235 dollars at the close Tuesday to 6120 at the close of unofficial trading Wednesday.

ANKARA (NOV 7) - Police on Wednesday detained seven suspects in the strangling of Eleanor Thomson, a retired U.S. journalist who formerly worked for Agence France-Presse, the news agency Anatolia reported.

The seven were detained in Selimiye, near the Mediterranean resort of Antalya, where Ms. Thomson was murdered with a bowstring on Sunday night, Anatolia said.

Referring to her will, notarized in 1989 at Manavgat, near Selimiye, local officials quoted by Anatolie said a dispute over inheritances will could have been at the root of the crime. Burglary was also mentioned as a possible cause.

Ms. Thomson, 75, had divided her will between her Turkish and foreign friends.

Manavgat prosecutor Selamettin Celep said Ms. Thomson was last seen late Sunday after returning from a local restaurant. Friends found her body and notified the police late Monday.

Ms. Thomson had no relatives in Turkey but had frequent visitors during the holidays, according to Mr. Celep.

A lawyer in Antalya contacted by telephone from Ankara said that Ms. Thomson had no enemies and had led a quiet life at Selimiye, where she was working on a book on the area.

American consular officials have requested that an autopsy be carried out.

A native of California, Ms. Thomson was an AFP correspondent in Asia in the 1960s, and also worked in Paris as a desk editor.

Local officials indicated that her Agence France-Presse press card dating from 1970 was found when her home was searched, according to Anatolia.

Ms. Thomson had lived in Turkey since 1966 and had asked to be buried in Selimiye.

#90311d3640 11/07/1990 ~French/German News Agency

BRUSSELS (NOV. 7) - The European Economic Community (EEC) has agreed on

measures to protect community farmers against a surge of farm products from former East Germany, a diplomatic source said here Wednesday.

And the European Commission, the executive arm of the EEC, announced new steps to help beef farmers who had been hurt not only by cheap imports from eastern Germany, but by lower exports to the Gulf and cattle disease.

The announcements of the higher subsidies followed the EEC's agreement Tuesday on proposals to lower farm subsidies for an important conference of the General Agreement of Tariffs and Trade (GATT) next month.

The diplomatic source said EEC farm ministers agreed to lower the commission's proposed sugar quotas for farmers of the former communist country.

The integration of East German agriculture into the EEC since German reunification last month will cost the community an estimated 1.75 billion dollars in farm support next year.

The ministers also agreed to raise the amount of beef, milk powder and butter the EEC can buy to maintain the earnings of farmers when market prices are falling.

#90311d3700 11/07/1990 ~French/German News Agency

JAKARTA (NOV. 7) - Senior officials from Australia and the Soviet Union arrived here late Wednesday for talks aimed at restarting an international peace conference on Cambodia.

"There is at least another six weeks or two months of work before the final resolution," Australian Deputy Foreign Affairs Secretary Michael Costello said upon his arrival.

Mr. Costello and officials from at least 12 other nations are expected here for the first senior official meeting towards the resumption of the Paris International Conference on Cambodia (PICC), expected next month.

Soviet Deputy Foreign Minister Igor Rogachev, arriving earlier, said the "PICC should be reconvened before the end of this year" despite squabbling within the Cambodian Supreme National Council (SNC) over its leadership.

Mr. Costello arrived from Bangkok after visits to Phnom Penh, Hanoi, and Beijing to sound out opinion ahead of the Jakarta talks.

The talks are due to start Friday to draft an overall peace plan and pave the way for restarting the PICC, which broke down in August 1989 over the question of power sharing.

Also expected to take part in the meeting are officials from the United States France, Britain, China, Canada, Japan, India, Malaysia, Laos and host Indonesia as well as a representative of the United Nations secretary general.

"My understanding is that there's a considerable reservation to reconvene the PICC ... unless the members of the SNC can resolve their problems," Mr. Costello said.

The SNC, comprising representatives of the four warring Cambodian factions, was set up in September as part of a U.N. brokered peace plan with the purpose of representing Cambodian sovereignty.

Officials said results of the meeting here would be presented to the SNC ahead of a second meeting in Paris later this month which would also decide if and when the PICC could be resumed to endorse and sign the peace plan.

The Chinese chief delegate, Assistant Foreign Minister Xu Dunxin, said on his arrival earlier Wednesday that despite the squabbling in the SNC "we think the prospect for settlement is bright."

Mr. Xu said however that the SNC should elect its chairman so that it could function properly.

AMMAN (NOV. 7) - King Hussein returned here Wednesday from a European tour which centered around talks on the Gulf crisis with French President Francois Mitterrand and British Prime Minister Margaret Thatcher, official sources said.

After meeting with Mr. Mitterrand on Monday in Paris, King Hussein travelled to Geneva for talks with Mrs. Thatcher and French Prime Minister Michel Rocard on the sidelines of the Second World Conference on the Environment.

In a declaration made to the news agency Petra upon his arrival in Amman, King Hussein said that he was "very hopeful efforts will be directed towards a peaceful solution of the Gulf crisis so as to avoid a catastrophe whose effects will not be limited to this region."

On Tuesday in Geneva, he had said that a "war in the Gulf would provoke an ecological catastrophe of a sort the world has not known since the accident at the Chernobyl nuclear reactor."

He described his talks with Mr. Mitterrand as "frank and cordial," and expressed satisfaction with his visit to Paris.

King Hussein was accompanied on his tour by Foreign Minister Marwan al-Kassem, official sources said.

ABIDJAN (NOV 7) - Ivory Coast President Felix Houphouet-Boigny was re-elected in the West African country's first multi-party elections October 28 with 81.68 percent of the votes, according to official results released by the Supreme Court here Wednesday.

The 85-year-old head of state won his seventh five-year mandate with 2,445,365 votes against 548,441 for his first ever challenger, professor Laurent Gbagbo, 45, leader of the opposition Ivorian Popular Front (FPI).

A total of 4,408,810 voters had registered for the polls against 3,512,882 in 1985. Some 30.84 percent of those registered failed to turn out to vote.

In 1985, Mr. Houphouet-Boigny, the only candidate representing his ruling Democatic Party (PDCI), was elected with 100 percent of the votes cast.

The president's party has been in power since independence from France in 1960.

Mr. Gbagbo's party has accused the PDCI of rigging the elections and committing "countless irregularities." On Friday, party leaders submitted a request to the Supreme Court to cancel the election results.

Mr. Houphouet-Boigny, Africa's most senior head of state, said last month that his seventh term in office would be his "last." Sources close to the government suggest that he will retire within a year's time.

On Tuesday, parliament amended Article 11 of the constitution to enable the parliament speaker to become president and complete the current mandate with full powers in case the head of state dies, resigns or is unable to fulfil his functions.

With the amendment, the heir apparent would be Henri Konan Bedie, 56, who ohas served as parliament speaker since 1980.

Ivory Coast voters are to go to the polls again for legislative elections November 25, and then December 16 for municipal polls.

NEW YORK (NOV 7) - The U.N. Security Council committee supervising the embargo against Iraq has approved the delivery of Kuwaiti crude oil and petroleum products being held in Yemen, the committee's chairwoman, Finnish

Ambassador Marjatta Rasi, said Wednesday.

The oil is earmarked for Mauritius, Zimbabwe, Tanzania, Seychelles and the Comoro Islands.

Kuwait had shipped the oil to the Yemeni port city of Aden for refining before it was invaded by Iraq on August 2. Although Yemen abstained during the U.N. vote establishing the embargo, it cited the trade boycott in refusing to release the oil.

According to committee sources, Yemen still refuses to permit the oil's export calling into question the stated amount of 200,000 tonnes. The Kuwaitis claim to have documents confirming the amount.

BANGKOK (NOV 7) - U.N. Human Rights Commission special envoy Sadako Ogata, in Burma to prepare a report on human rights, spent Wednesday on two government-organized tours, the official Rangoon Radio reported.

The radio, in a dispatch monitored here, said Mrs. Ogata visited three new satellite towns on the outskirts of Rangoon -- Dagon, Shwe Pyi Tha and Hlaing Thaya -- where she studied civil development projects.

The report said Civil and Regional Department Director General Aung Phone and senior Construction Ministry officials explained their projects and developments to the envoy.

Mrs. Ogata also took a sightseeing tour around the Burmese capital.

The radio said both trips were arranged by the State Law and Order Restoration Council (SLORC), the official name of the ruling military government, which seized power in a September 1988 coup to crush a nationwide pro-democracy movement.

Last February the U.N. Human Rights Commission severely criticised the Burmese junta for their human rights records.

Mrs. Ogata arrived in the Burmese capital on Saturday for a week-long visit, and is expected to prepare a report on human rights in the country.

DHAHRAN, Saudi Arabia (NOV 7) - A U.S. soldier was killed in Saudi Arabia on Wednesday while attempting to free a truck which had become stuck in the sand, the U.S. Army announced here.

The army said in a statement that the 1st Cavalry Division trooper, who was not identified, was fatally injured in an accident which occurred while he was trying to free the two-and-a-half-ton truck from the sand.

The exact circumstances of the accident were not immediately available.

The soldier is the 44th U.S. serviceman killed in incidents related to the deployment of U.S. troops in the Gulf following the August 2 Iraqi invasion of Kuwait.

Thirteen U.S. airmen died in then-West Germany on August 28 while taking off on a flight to Saudi Arabia and 10 U.S. sailors were killed on October 30 in a steam leak aboard the USS Iwo Jima off Bahrain.

WASHINGTON (NOV. 7) - President George Bush will meet with Soviet President Mikhail Gorbachev in Paris on the sidelines of the Conference on Security and Cooperation in Europe (CSCE) on November 19-21, the White House said Wednesday.

Secretary of State James Baker, who was in Moscow Wednesday, was expected to set the date for the summit between the two heads of state whose discussions will likely focus on the Gulf crisis.

Mr. Bush will be in Paris November 18-21 and will hold a series of bilateral talks as well as dine with French President Francois Mitterrand on the evening of his arrival, spokesman Marlin Fitzwater said.

Mr. Bush has prior visits scheduled to Czechoslovakia on November 17, the first visit by an American president for the one year anniversary of the "velvet revolution."

He will meet with Czechoslovakian President Vaclav Havel and leaders of the the Czech and Slovak republics and will express strong support for the democratic revolutions in Eastern Europe, Mr. Fitzwater said.

The U.S. leader is also expected to give a major policy speech in Prague about the status of U.S.-European relations, the spokesman added.

Mr. Bush goes on to Germany the following day for several hours during which time he will meet with Chancellor Helmut Kohl in the town of Ludwigshafen near the Swiss border, Mr. Fitzwater added.

At the CSCE summit, Mr. Bush is expected to sign a conventional arms-reduction treaty on the 19th, as well as the summit's final statement on November 21, Mr. Fitzwater added.

Following his tour of Europe, Mr. Bush will go on to Egypt and Saudi Arabia, where he is expected to spend the U.S. Thanksgiving Day holiday with some of the 230,000 U.S. troops stationed there.

Also in Saudi Arabia, Mr. Bush will meet with Saudi King Fahd and the exiled emir of Kuwait, Sheikh Jaber al-Ahmad al-Sabah.

Mr. Fitzwater refused to give further details of Mr. Bush's visit to the Middle East, citing security concerns.

JOHANNESBURG (NOV 8) - South Africa's ruling National Party crushed its rightwing opposition Wednesday in a key by-election that was seen as a test for President Frederik de Klerk's reform policy.

Np candidate Marthinus van Schalkwyk polled 10,882 votes against the 1,967 won by Leonie Steele, the white supremacist candidate fielded by the Conservative Party (Cp) in the northern Transvaal province town of Randburg, northwest of Johannesburg.

The Cp had predicted a massive swing to the right by Randburg voters in protest against de Klerk's programme of racial reforms.

Observers said the result in Randburg, traditionally a white-collar constituency, could not be seen as a test of Cp backing. The rightists have drawn their support mainly from blue-collar worker areas.

The Randburg seat became vacant when the liberal Democratic Party (Dp) member of parliament resigned and left politics. The Dp decided against contesting the seat and encouraged its supporters to vote for the Np.

WASHINGTON (NOV 7) - The U.S. Air Force has ordered thousands of new high-tech gas masks -- costing more than 6,225 dollars apiece -- to protect its jet fighter pilots against Iraqi chemical weapons, Aviation Week and Space Technology reported.

The masks, made by Boeing, have superior ventilation and pressure than older models and are condensation resistant, the trade magazine said in this week's edition.

Pilots can still drink and use their radios and night-vision goggles while wearing the masks.

The Air Force is to spend some 33 million dollars for the 5,300 masks which pilots will receive over a 17-month period beginning in January, Aviation Week said.

COLD LAKE, Canada (NOV 7) - A U.S. cruise missile test was aborted after the missile had been launched above the Beaufort Sea Wednesday, a spokesman for the Cold Lake Canadian military base said.

The abort was ordered because of a fault in the missile's guidance system, said base spokesman Luigi Rossetto.

He added that the defect became apparent when an aircraft responsible for following the test lost contact with the missile which had been fired from a B-52 bomber.

The object of the test was to try out the missile's guidance system.

#90311d5870 11/07/1990 ~French/German News Agency

NICOSIA, (NOV 8) - Iraqi Information Minister Latif Nassif Jassem voiced his "contempt" and "pity" for British Minister Margaret Thatcher who Wednesday warned Iraqi President Saddam Hussein that he would be forced out of Kuwait.

Speaking in parliament she said, "time is running out for him. The implacable message from this House must be either he gets out of Kuwait soon or we and our allies will remove him by force. He has been warned."

She also said that "Iraq's chemical, biological and nuclear capability must be eliminated so that it can never again threaten world peace."

In a violent attack on the British leader, Mr. Jassem described Mrs. Thatcher as "old witch" and as "mentally, psychologically and physcially unbalanced."

"We treat Thatcher's statements with contempt and we pity her," Mr. Jassem said. "Sounding the bugle will not help reverse her falling popularity in Britain," he added.

GENEVA, (NOV 7) - An influential United States senator Wednesday night bluntly dismissed the European Economic Community's offer to to cut farm subsidies by 30 per cent and said the EEC and Japan must do more to open their

markets to U.S. farmers.

Senator Lloyd Bentsen, a Texas democrat and chairman of the U.S. Senate Finance committee, told a dinner audience the hard-fought compromise Uruguay Round platform for farm trade bargaining agreed by EEC ministers Tuesday night was "unacceptable."

"I think the EEC believes (its proposal) is the end of the road," he said. "It's a start, not the end... They have to do more to open their markets."

"What we see now tabled is a step back" compared with the original proposal by EEC agriculture commissioner Ray MacSharry, Sen. Bentsen added.

With "political will", he asserted, the EEC could "eliminate" its exports subsidies -- which he said would total 12 billion dollars this year against 280 million spent by the United States -- and Japan could wipe out its rice import restrictions.

The United States, he said, was itself reducing farm support by 13 billion dollars under the just-concluded budget deal struck by the Bush administration and Congress.

Sen. Bentsen, the democratic nominee for vice president in the 1988 U.S. elections, joined the U.S. delegation to the General Agreement on Tariffs and Trade (GATT) in Geneva this week with three other U.S. senators.

WELLINGTON (NOV. 8) - New Zealand posted a record balance of payments deficit in the year to June of 4.27 billion New Zealand dollars (2.63 billion U.S.), the government said Thursday.

The annual deficit surpassed the previous record of 4.19 billion dollars (2.57 billion U.S.) in the year to March 1986, government statistician Steve Kuzmicich said.

The provisional current account for the June quarter was in deficit by 643 million dollars (395 million U.S.), compared with 540 million dollars (332 million U.S.) in the same period a year ago.

Contributing to the latest June quarter deficit was a deficit in invisibles of 1.48 billion dollars (912 million U.S.), which more than offset a merchandise trade surplus of 841 million dollars (517 million dollars).

TOKYO (NOV. 8) - Domestic shipments of personal computers totaled 1.292 million units in the April-September period, up 15 percent from the same half year in 1989, an industry association said Thursday.

Officials of the Japan Electronic Industry Development Association attributed the rise to a 73 percent increase in shipments of 32-bit computers, accounting for a third of the total.

Shipments of the book-size laptop computers increased 2.3 times to 398,000 units, accounting for 41 percent of the total, they said.

The shipments, including printers and peripherals, were worth 620.6 billion yen (4.8 billion dollars), up 24 percent over the same period last year.

Shipments of personal computers would likely top two million units in fiscal 1990 ending next March, the association official said.

#90311e0018 11/07/1990 ~Latin America New Agency

Guatemala City (NOV. 7) EFE - The Guatemalan Supreme Electoral Tribunal (TSE) Wednesday denied reports that this weekend's presidential elections were to be postponed because of complaints of irregularities presented by banned hopeful Efrain Rios Montt.

TSE spokesman Manuel Ruano Mejia told EFE that the vote would go ahead.

"There is no danger that the elections will be put back, everything is ready and the polling will without a doubt be held next Sunday," said Ruano.

It had been rumoured that the TSE had agreed to postpone the presidential vote after the supporters of Rios Montt, a rightist and former general, complained of irregularities in registering candidates.

The TSE has admitted that it is studying their complaint that candidates were not registered correctly.

Rios Montt was banned from running in the elections under a constitutional clause which bars the leaders of coups from holding public office.

The retired general, who had topped opinion polls, came to power in a 1982 coup. His brief stay in power was marked by bloody anti-insurgency operations during which thousands of people were killed.

At least 23 people, including politicians and journalists, have been killed in the runup to the elections. The polls are to be monitored by teams of international observers.

Rios Montt has urged voters to write his name on ballot slips when they vote Sunday and has repeatedly warned that violence could break out as a result of his being banned.

#90311e0019 11/07/1990 ~Latin America New Agency

DAMASCUS (NOV. 7) EFE - A Damascus newspaper which speaks for the military said Wednesday that London should reestablish diplomatic ties with Syria and lift economic sanctions if it wants the release of three British hostages in Lebanon.

"If the British goverment was concerned about the fate of its citizens, it would reestablish relations with Syria, which would help free the hostages in Lebanon," said an editorial in the Damascus daily Tishrin.

Britain broke off relations with Syria in 1986, after accusing Damascus diplomats of collaborating with a Jordanian who tried to plant a bomb on an Israeli airliner at London's Heathrow airport.

Later London went on to pressure the European Community into approving limited diplomatic and economic sanctions against the Damascus government.

"Other Western nations have improved their relations with Syria, but Mrs. Thatcher has gone the other direction and recently asked the EC to maintain the economic embargo against Syria, which makes her to blame for the captivity of the British hostages in Lebanon," the paper said.

"The policy of Great Britain has been characterized by intransigence and confrontation, which is not what the British people want and further complicates the solution to this problem," the paper added.

A peace accord Monday between Lebanon's rival Shiite Moslem factions, the pro-Iranian Hezbollah (Party of God) and the Syrian-backed Amal (Hope), had raised hopes that 12 Western hostages would soon be freed.

The three Britons held captive in Lebanon include Anglican church envoy Terry Waite, journalist John McCarthy, and pilot Jack Mann. Six Americans, two Germans and an Italian are also held hostage.

London (NOV. 7) EFE - Iraqi warplanes are superior in air combat to U.S. F-16 fighter planes according to a test carried out by the German Luftwaffe, an authoritative British weekly magazine on defense affairs reported Wednesday.

Jane's Defence Weekly, quoting an anonymous Luftwaffe source, said the Soviet-built MiG-29 managed "to kill" the F-16 from a distance of 60 km in the aerial dogfight test.

Iraq has 30 Soviet MiG-29 warplanes which it could use if war broke out between Baghad and a U.S.-spearheaded multinational force massed in the Gulf following Iraq's August 2 invasion and subsequent annexation of Kuwait.

The Soviet Union was Iraq's largest weapons supplier before the Gulf crisis.

#90311e0046 11/07/1990 ~Latin America New Agency

FREETOWN (NOV. 7) EFE - Liberian rebel leader Prince Johnson has said he will not allow seven members of President Amos Sawyer's provisional government to return to Monrovia, a spokesman for that government said Wednesday.

Johnson said the arrival of the seven provisional government members could create "difficulties", without specifying what those might be.

Sawyer's provisional government was formed in August in the Gambian capital of Banjul, under the auspices of the Economic Community of West African States (ECOWAS), and is currently based in the Sierra Leone capital of Freetown.

Five member nations of the 16-country ECOWAS sent a 5,000-strong troop force into Liberia this summer to try to end the bloody civil war which has brought the country to its knees.

Johnson fought alongside National Patriotic Front leader Charles Taylor at the beginning of his uprising against late president Samuel Doe almost a year ago, but split earlier this summer when the rebel forces neared Monrovia.

Since then, Johnson's forces have controlled large parts of the capital, as well as capturing Doe and murdering him.

Meanwhile Taylor has declared himself president, created an interim assembly, and called elections.

But Johnson has sided with the ECOWAS forces to defeat Taylor, who is still in control of large parts of the country.

#90311e0050 11/07/1990 ~Latin America New Agency

MOSCOW (NOV. 7) EFE - Soviet envoy and presidential adviser on the Gulf crisis, Yevgeny Primakov, Wednesday said he was still optimistic on reaching a political solution to the conflict after his meeting 10 days ago with Iraqi President Saddam Hussein.

Primakov, who has met twice with Saddam in Baghdad since Iraq invaded Kuwait in August, told a press conference that there was a "big difference" between the first meeting in early October and the last one.

He said Saddam was very rhetorical in the first meeting over the Iraqi presence in Kuwait, but in the second he "did not mention" that Kuwait was once part of Iraq. That fact has been Saddam's main rationale for the invasion.

"We now have to use all means at our disposal" to find a peaceful solution to the crisis, Primakov said, and reiterated that the Soviet Union wants a total withdraw of Iraqi troops from Kuwait.

"We will be facing a new situation" if that does not happen, he said.

He said the international media was wrong when it reported during President Mikhail Gorbachev's visit to Paris last week that the Soviet leader said a military solution was +unacceptable+.

Primakov said he clearly told Saddam that if he did not withdraw his troops he would face a military attack.

Saddam "hinted that he was prepared to do something. I am still optimistic," Primakov said, and then asked reporters to not press him for further details so as not to risk the success of his mission.

Primakov said Gorbachev had ordered him to insist that Saddam release all remaining foreign hostages in Iraq and Kuwait, and added that the recent trickle of hostages leaving Baghdad was a result of those talks, which has added to his feeling of optimism.

He said he was satisfied that Soviet citizens still in Iraq will be able to leave when they want, and that Soviet military advisers can leave without conditions when they complete their contracts.

The Soviet Union, one of the five permanent members of the United Nations Security Council, has backed opposition to the invasion, but has also spoken up in favor of a negotiated settlement to the dispute.

Oservers believe that if the military option is decided upon, it is doubtful that the Soviet Union will send troops to join a possible U.S.-led attack force.

He said the Kremlin's experience in Afghanistan was discouraging it from sending troops to join the multinational force in the Gulf deployed against Iraq.

In an interview with a Saudi newspaper published Wednesday, Primakov said, "It is not easy (to send troops) given that we have to think hard about the experience we, the Soviets, had in Afghanistan."

Soviet troops invaded Afghanistan in 1979 to prop up a communist government threatened by Moslem guerrillas. At least 15,000 soldiers died before Moscow withdrew last year.

#90311e0052 11/07/1990 ~Latin America New Agency

MEXICO CITY (NOV. 7) EFE - The Mexican government is to receive a dlrs three billion windfall this year thanks to skyrocketing oil prices, according to an Energy, Mines and Federal Industry Ministry (SEMIP) report released Wednesday.

The report said the government had calculated its oil earnings for 1990 at dlrs 5.8 billion, but given the rise in oil prices after Iraq's invasion of Kuwait, Mexico would make dlrs 8.89 billion this year.

Production by Mexico's state-owned oil company PEMEX is nearly 2.5 million barrels a day, and officials had calculated profits on dlrs 13 per barrel.

The SEMIP report added that export earnings would rise even while the volume of crude sold abroad was on the decrease.

During 1990, Mexico is to export a total of 485 million barrels of oil, 3.3 percent less than 1989 when PEMEX exported a total of 495 million barrels.

The government takes around 50 percent of PEMEX profits in taxes.

A Treasury Ministry spokesman said that part of the windfall would be used "to heal the public sector's finances".

-30- 1246

#90311e0054 11/07/1990 ~Latin America New Agency

WASHINGTON (NOV. 7) EFE - The U.S. Commerce Department Wednesday described as "unacceptable" the European Community's offer to reduce farm subsidies within the framework of international GATT trade liberalizing talks.

The United States hopes the EC will reconsider its offer to cut grants to its farmers by 30 percent over 10 years, the Commerce Department press office said.

The cuts fall far short of the 90 percent reduction called for by the Cairns

Group of 14 agriculture-exporting countries and the United States.

The offer was made as part of the four-year-long Uruguay Round of talks aimed at reducing international trade barriers under the General Agreement on Tariffs and Trade (GATT) which is due to be completed in December.

But observers point out that the whole Uruguay Round could end in failure over the farm issue which threatens to scuttle talks involving more than 100 countries in some 15 sectors, ranging from agriculture to computer software and financial services.

After weeks of wrangling between the member states and the EC's failure to present any proposal at all to the Uruguay Round by the original October deadline, the EC Council of Ministers managed Tuesday to agree on the 30 percent cuts.

The reductions will affect subsidies to producers of a range of products including cereals, rice, vegetable oils, animal derivatives, wine, fruit and tobacco.

The United States has said that bigger cuts should be made by industrialized nations to encourage the liberalization of world trade and to encourage developing countries to increase their exports.

Carla Hills, the U.S. trade representative at GATT in Geneva Monday urged the EC member states to pay attention to the needs of the members of the Cairns Group -- which includes Argentina, Brazil, Chile, Colombia and Uruguay -- and the farming nations of Asia and Africa.

Of the EC member states, France and Germany were initially the most determined not to accept cuts to their farmers' subsidies.

With the unification of East and West Germany, the conservative government in Bonn has acquired thousands of impoverished farmers in what was formerly communist-run East Germany.

Observers said Latin American Cairn Group members see the attitude of the EC -- and Germany, in particular -- as confirmation of their worst fears that the EC's focus on the developing world will in the future be confined to Eastern Europe.

Argentina last week threatened to pull out of the Uruguay Round altogether over the farm issue.

#90311e0055 11/07/1990 ~Latin America New Agency

QUITO (NOV. 7) EFE - The Ecuadorean Defense Ministry promised Wednesday that

it would punish "with all the rigor of the law" the three soldiers who allegedly kidnapped and raped a British tourist in October.

"This deed, which we do not hesitate to condemn, is the exclusive responsibility of the infrastructure and does not compromise the prestige of the Armed Forces," a ministry statement said.

Lorna Ashby, 23, was snatched from a tourist zone in the capital on October 10 by the three soldiers and taken to the outskirts of the city where she was raped by one of the men.

On their arrest, two of the soldiers, Cpl. Nereo Astudillo and Pvt. Carlos Fuentes Montalvo, told a civil judge the woman had been raped by Pvt. Washington Tabango Moreno, who had allegedly wanted to demonstrate to them that he was the "most macho".

Tabango has refused to answer the judge's questions.

#90311e0056 11/07/1990 ~Latin America New Agency

PRAGUE (NOV. 7) EFE - Saudi Arabia has officially asked Czechoslovakia to send a specialist anti-chemical warfare unit to join multinational forces deployed in its territory, a Defense Ministry official said Wednesday.

Gen. Jiri Jindra, who recently returned from the Middle East where he headed an 18-member government team, said a unit would be sent to the Gulf once the Czechoslovak and Saudi governments had signed an accord agreeing to the move.

Jindra said the unit of nearly 200 men aimed to provide humanitarian and anti-chemical rearguard aid to the Saudi population in the event of a chemical attack.

Iraq has massive stockpiles of nerve and mustard gas which were used during its eight-year war with Iran and against the Kurdish minority in its own country in 1988.

Baghdad has made veiled threats to use the weapons if the U.S. launches an attack.

Jindra said only U.S. military transport planes could take the unit to the Gulf where the Saudi government will cover their expenses.

The delegation accompanying Jindra to the Middle East was made up of specialists from the foreign and defense ministries and officials from the anti-chemical warfare unit.

Multinational forces have been deployed in the Gulf following Iraq's August

invasion and subsequent annexation of Kuwait.

#90311e0062 11/07/1990 ~Latin America New Agency
PANAMA CITY (NOV. 7) EFE - Panamanian Attorney General Rogelio Cruz said Wednesday conditions were ripe for a coup to topple U.S.-backed President Guillermo Endara despite the presence of thousands of U.S. troops in the country.

Cruz told a press conference that Panama is going through the same situation which prompted officers of the National Guard to topple former president Arnulfo Arias Madrid in October 1968.

Just 11 days after Arias took office, Col. Omar Torrijos Herrera led the coup against the president, who Torrijos accused of planning to set up a dictatorship.

Cruz said that while the U.S. troops may be a dissuasive factor for the predicted coup, "before 1968 it was said that a coup would be impossible because the Americans were in Panama' but there was one and the military regime "lasted 21 years".

The United States invaded Panama last December to oust military strongman Manuel Antonio Noreiga and bring him to trial in Florida on drug-trafficking charges.

The attorney general said "foreigners may be behind" recent rumors of a destabilization plot, but he gave no further details of that claim.

The former chief of Panama's revamped police force, Eduardo Herrera, was two weeks ago taken into custody for questioning on the alleged plot.

Herrera said the allegations were groundless.

A week before Herrera was detained, four police officers were arrested in connection with the plot, which Endara has described as "ridiculous, infantile simple-minded and crazy".

The alleged plot is rumored to be linked to a series of bomb attacks in Chiriqui province, close to the Costa Rican border, in August and September.

Cruz said militarist sentiments +still persist+ and added that their backers "are trying to erect a powerful political base".

Endara's popularity has suffered amid recent scandals and reports of his connection with a bank suspected of laundering drug profits.

A Gallup poll published over a week ago predicted that he would win only 13 percent of the vote if elections were called.

TOKYO (NOV. 7) KYODO - THE BALANCE OF REAL DEPOSITS AT JAPAN'S 12 LEADING COMMERCIAL BANKS EDGED DOWN 0.4 PERCENT IN OCTOBER TO 189.8 TRILLION YEN FROM THE PREVIOUS MONTH, ACCORDING TO THE FEDERATION OF BANKERS ASSOCIATIONS.

ASSOCIATIONS OFFICIALS SAID A GROWING NUMBER OF SAVERS WERE CHANNELING FUNDS INTO ''WIDE'' FUNDS AND OTHER POPULAR INSTRUMENTS THAT PROMISE HIGHER YIELDS THAN REAL DEPOSITS.

''WIDE'' FUNDS ARE DEBENTURES WHICH HAVE INTEREST COMPOUNDED SEMIANNUALLY AND THAT IS PAID AT MATURITY.

CORPORATE DEPOSITS LEVELED OFF, WITH INDIVIDUAL DEPOSITORS ACCOUNTING FOR THE MARGINAL FALL-OFF.

JAPAN'S THREE LONG-TERM CREDIT BANKS ISSUED A NET 2.68 TRILLION YEN WORTH OF ''WIDE'' FUNDS IN OCTOBER, UP 6.1 PERCENT FROM THE PRECEDING MONTH.

THE BALANCE OF LOANS BY THE 12 MAJOR COMMERCIAL BANKS INCHED UP 0.2 PERCENT TO 207.36 TRILLION YEN FROM THE MONTH BEFORE, THE ASSOCIATION SAID.

OFFICIALS SAID STRONG CORPORATE DEMAND FOR FUNDS FOR CAPITAL INVESTMENT OFFSET THE DROP IN LENDING TO INDIVIDUALS WHO WERE DISCOURAGED FROM TAKING OUT LOANS DUE TO HIGHER INTEREST RATES ON HOUSING LOANS.

#90311k0054 11/07/1990 ~Japanese News Agency

TOKYO (NOV. 7) KYODO - JAPAN'S GROSS NATIONAL PRODUCT (GNP) IS EXPECTED TO GROW ABOUT 3 PERCENT IN FISCAL 1991, BEGINNING APRIL 1991, DOWN FROM THE ESTIMATED 5 PERCENT GROWTH RATE IN THE CURRENT FISCAL YEAR, THE LONG-TERM CREDIT BANK OF JAPAN PREDICTED WEDNESDAY.

THE SLOWDOWN WAS BLAMED ON HIGHER CRUDE OIL PRICES AND RISING INTEREST RATES, THE BANK SAID. ITS ECONOMISTS ADDED THAT THE ECONOMY WILL PEAK BEFORE NEXT SUMMER, AND THAT IT IS UNLIKELY THAT THE RECENT ECONOMIC BOOM WILL LAST LONGER THAN THE SO-CALLED ''IZANAGI'' PERIOD OF ECONOMIC EXPANSION THAT RAN FROM NOVEMBER 1965 THROUGH JULY 1970, THE LONGEST BOOM ON RECORD.

THE ECONOMISTS LISTED THREE MAIN REASONS FOR THE SLOWDOWN IN GNP GROWTH: A DROP IN CONSUMPTION TRIGGERED BY RISING PRICES, SAGGING CAPITAL AND HOUSING INVESTMENTS RESULTING FROM HIGH INTEREST RATES AND LOW STOCK PRICES, AND SLUGGISH EXPORTS. THE BANK EXPECTS CONSUMER PRICES TO RISE 4 PERCENT NEXT FISCAL YEAR.

THE PESSIMISTIC OUTLOOK WAS BASED ON ASSUMPTIONS THAT CRUDE OIL PRICES WILL STAY IN A RANGE OF 25 TO 30 DOLLARS PER BARREL AND THAT THE U.S. ECONOMY WILL GROW ONE PERCENT IN 1990 AND 1991.

THE BANK'S STUDY SAID ANXIETY OVER PETROLEUM SUPPLIES FROM THE MIDDLE EAST IS EXPECTED TO REMAIN A FACTOR EVEN IF SUBSTANTIAL PEACETALKS BEGIN WITH BAGHDAD AND OIL EXPORTS FROM IRAQ AND KUWAIT ARE RESUMED.

SINGAPORE (NOV. 7) KYODO - THE PORT OF SINGAPORE AUTHORITY ON WEDNESDAY

SIGNED A 95 MILLION SINGAPORE DOLLAR (55.9 MILLION U.S. DOLLAR) CONTRACT WITH MAJOR JAPANESE TRADING HOUSE C. ITOH & CO. FOR CONSTRUCTION OF EIGHT NEW CRANES FOR THE PORT'S NEW TERMINAL.

PORT AUTHORITIES SAID IN A STATEMENT THAT C. ITOH WILL DESIGN, CONSTRUCT, DELIVER, TEST, AND COMMISSION EIGHT QUAYSIDE CRANES FOR CONTAINER HANDLING.

THE PORT SAID THE FIRST FEW UNITS ARE EXPECTED TO BE READY BY THE FIRST QUARTER OF 1992.

TOKYO (NOV. 7) KYODO - DOMESTIC SHIPMENTS OF PERSONAL COMPUTERS ROSE A STRONG 26 PERCENT IN THE APRIL-SEPTEMBER PERIOD COMPARED WITH THE SAME PERIOD LAST YEAR, THE JAPAN ELECTRONIC INDUSTRY DEVELOPMENT ASSOCIATION SAID WEDNESDAY.

THE HIGH FIGURES IN THE FIRST HALF OF THE CURRENT FISCAL YEAR MAKE IT LIKELY THAT THE YEAR'S SHIPMENTS WILL EXCEED TWO MILLION UNITS, ABOVE AN INITIAL ESTIMATE OF 1.95 MILLION UNITS FOR THE WHOLE YEAR, THE ASSOCIATION SAID.

CONTRIBUTING MOST TO THE INCREASE WAS A 91 PERCENT RISE IN SHIPMENTS OF 32-BIT COMPUTERS, WHICH CONSTITUTED A THIRD OF THE TOTAL.

THE 16-BIT COMPUTERS WHICH HAVE SO FAR BEEN THE MAINSTREAM IN PERSONAL COMPUTERS, GREW ONLY 12 PERCENT COMPARED WITH LAST YEAR'S APRIL-SEPTEMBER PERIOD.

A STRONG DEMAND FOR SMALL-SIZED AND LIGHT-WEIGHT COMPUTERS WAS APPARENT, IT SAID. SHIPMENTS OF LAPTOP COMPUTERS IN THE A-4 SIZE INCREASED 2.3 TIMES TO 398,000 UNITS, MAKING UP 41 PERCENT OF THE TOTAL SHIPMENTS.

THE VALUE OF SHIPMENTS IN THE HALF-YEAR PERIOD ROSE 20 PERCENT TO 450.4 BILLION YEN.

BUT TOTAL SHIPMENTS FOR EXPORTS DROPPED 9 PERCENT TO 316,000 UNITS AS A RESULT OF MANUFACTURERS' STEPPED-UP PRODUCTION OVERSEAS.

#90311k0061 11/07/1990 ~Japanese News Agency

JAKARTA (NOV. 7) KYODO - INDONESIAN FORESTRY MINISTER HASJRUL HARAHAP ANNOUNCED WEDNESDAY THAT HE HAS SUSPENDED THE LICENSE OF THE BINTUNI UTAMA MURNI LOGGING COMPANY, WHICH IS FINANCED BY MARUBENI CORP. OF JAPAN, ON THE GROUNDS THAT HE NO LONGER TRUSTS THE FIRM.

''AS LONG AS I AM MINISTER, I CANNOT TRUST THE BINTUNI COMPANY,'' HARAHAP SAID.

HARAHAP TEMPORARILY BANNED BINTUNI'S MANGROVE LOGGING ON SEPTEMBER 24 AND FINED THE COMPANY 1.1 BILLION RUPIAHS (ABOUT 590,000 U.S. DOLLARS) FOR ILLEGAL FELLING SINCE EARLY 1989.

HOWEVER, BINTUNI OFFICIALS REPORTEDLY TOLD MARUBENI REPRESENTATIVES IN JAKARTA THAT THEY HAD NOT HEARD FROM THE INDONESIAN GOVERNMENT EITHER ABOUT THE SUSPENSION OF ITS MANGROVE LOGGING OPERATIONS OR THE FINANCIAL PENALTY.

#90311k0062 11/07/1990 ~Japanese News Agency

TOKYO (NOV. 7) KYODO - THREE OUT OF SEVEN MAJOR JAPANESE NONFERROUS SMELTERS REPORTED WEDNESDAY THEIR LARGEST EVER GAINS IN UNCONSOLIDATED PRETAX PROFITS DURING THE APRIL-SEPTEMBER PERIOD.

HIGHER NONFERROUS METAL PRICES DURING THE SIX-MONTH PERIOD AND THE YEN'S LOWER VALUE AGAINST THE U.S. DOLLAR COMBINED TO BOOST THE EARNINGS OF THE THREE SMELTERS TO A RECORD HIGH, COMPANY OFFICIALS SAID.

A MARKED YEAR-ON-YEAR RISE IN MARKET PRICES OF COPPER AND ZINC IN PARTICULAR HELPED IMPROVE THEIR PROFIT STRUCTURE, THE OFFICIALS SAID.

THE THREE WERE MITSUBISHI METAL CORP., SUMITOMO METAL MINING CO., AND FURUKAWA CO. SUMITOMO WILL PAY A DIVIDEND OF 3 YEN PER SHARE FOR THE PERIOD, THE FIRST SUCH PAYMENT.

AMONG THE SEVEN LEADING NONFERROUS SMELTERS, NIPPON MINING CO. AND MITSUI MINING AND SMELTING CO. SUFFERED SUBSTANTIAL DECLINES IN PRETAX PROFITS IN THE FIRST HALF OF FISCAL 1990, ENDING NEXT MARCH 31.

NIPPON MINING, WHICH HAS OIL REFINING OPERATIONS, REGISTERED A 88.7 PERCENT YEAR-ONYEAR PLUNGE IN PRETAX PROFITS DURING THE SIX MONTHS, SEVERELY HIT BY SOARING CRUDE OIL PRICES CAUSED BY THE MIDDLE EAST CRISIS SINCE EARLY AUGUST.

MITSUI MINING AND SMELTING ALSO SUFFERED A 25.4 PERCENT FALL IN PRETAX PROFITS DUE CHIEFLY TO HIGHER DOMESTIC INTEREST RATES.

THE OTHER FIVE SMELTERS POSTED A 1 TO 52 PERCENT YEAR-ON-YEAR GAIN IN PRETAX PROFITS IN THE APRIL-SEPTEMBER PERIOD.

FOR THE ENTIRE FISCAL YEAR, THREE SMELTERS -- NIPPON MINING, MITSUI MINING AND SMELTING, AND TOHO ZINC -- PREDICT MODERATE DECLINES IN THEIR PRETAX PROFITS.

THE OTHER FOUR COMPANIES, MEANWHILE, FORECAST A SLOWER GROWTH RATE IN THEIR PRETAX PROFITS FOR ALL OF FISCAL 1990, COMPARED WITH THE APRIL-SEPTEMBER PERIOD.

FOLLOWING ARE THE FIRST-HALF FINANCIAL RESULTS FOR THE SEVEN LARGEST

NONFERROUS SMELTERS IN TERMS OF BILLIONS OF YEN, WITH THE PERCENTAGE OF YEAR-ON-YEAR INCREASES OR DECLINES IN PARENTHESES.

	SALES	PRETAX PROFIT	NET PROFIT
NIPPON MINING	450.5 (12.1)	1.2 (-88.7)	0.5 (-87.2)
MITSUBISHI METAL	355.7 (15.5)	15.0 (4.0)	34.0 (415.2)
SUMITOMO METAL MINING	274.2 (12.8)	14.3 (42.4)	4.7 (- 7.6)
MITSUI MINING	217.6 (54.2)	3.9 (-25.4)	3.4 (-30.3)
DOWA MINING	105.8 (14.1)	2.5 (19.6)	1.2 (20.2)
FURUKAWA	80.3 (13.2)	7.0 (52.9)	3.2 (46.5)
TOHO ZINC	41.1 (9.5)	2.3 (1.0)	1.2 (43.2)

#90311k0067 11/07/1990 ~Japanese News Agency

TOKYO (NOV. 7) KYODO - ADDITIONAL CONGRESSIONAL SEATS WON BY THE DEMOCRATIC PARTY IN THE MID-TERM U.S. ELECTIONS HELD EARLIER IN THE DAY COULD AGGRAVATE JAPAN-U.S. RELATIONS IN THE FINANCIAL AND TRADE SECTORS, GOVERNMENT OFFICIALS SAID WEDNESDAY.

DEMOCRATIC LEGISLATORS, WHO ARE SEEN AS BEING MORE PROTECTIONIST THAN THEIR REPUBLICAN COUNTERPARTS, WOULD PUT PRESSURE ON THE JAPANESE TO OPEN FURTHER THEIR RICE AND FINANCIAL MARKETS, THE OFFICIALS SAID.

THEY WARNED THAT RELATIONS BETWEEN THE TWO COUNTRIES, WHICH HAVE BEEN RELATIVELY CALM IN RECENT MONTHS, COULD TAKE A TURN FOR THE WORSE SINCE THE NEW DEMOCRATIC LAWMAKERS, ALONG WITH THEIR INCUMBENT COLLEAGUES, ARE EXPECTED TO TAKE A HARSH STANCE AGAINST JAPAN.

THE THORNIEST ISSUE SEEN CONFRONTING THE TWO COUNTRIES IS THE RICE PROBLEM.

''IT WILL BE INEVITABLE THAT THE U.S. WILL TURN UP THE HEAT ON JAPAN TO FURTHER PRY OPEN ITS RICE MARKET'' SINCE IT IS UNDER ENORMOUS PRESSURE TO COME UP WITH A SUCCESSFUL CONCLUSION TO THE URUGUAY ROUND OF MULTILATERAL TRADE TALKS BY THE DECEMBER DEADLINE, SAID AN OFFICIAL AT THE MINISTRY OF AGRICULTURE, FORESTRY AND FISHERIES.

IF THE U.S. DOES NOT GET THE CONCESSIONS IT WANTS ON FARM TRADE AT THE END OF THE ROUND HELD UNDER THE AUSPICES OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT), IT IS EXPECTED TO TRY TO FORCE OPEN JAPAN'S RICE MARKET THROUGH BILATERAL TALKS, HE SAID.

ADDITIONAL DEMOCRATIC CONGRESSIONAL LAWMAKERS COULD HEIGHTEN TENSIONS BETWEEN THE TWO COUNTRIES IN THE FINANCIAL ARENA AS WELL, BY HELPING CONGRESS PUSH THROUGH A BILL SEEKING RECIPROCAL TREATMENT FOR U.S. BANKS AND BROKERAGE HOUSES IN JAPAN.

THE FAIR TRADE IN FINANCIAL SERVICES BILL, WHICH WAS REJECTED BEFORE REACHING THE SENATE IN LATE OCTOBER, COULD WIN APPROVAL IF CONGRESS DECIDES TO REVIEW THE MATTER AGAIN NEXT JANUARY.

''PASSAGE OF THE MEASURE WILL UNDOUBTEDLY STOKE UP ILL WILL BETWEEN THE TWO COUNTRIES OVER JAPAN'S FINANCIAL MARKET,'' SAID AN OFFICIAL WITH THE FINANCE MINISTRY.

''I HAVE NO DOUBT THAT THE U.S. GOVERNMENT WILL TAKE A TOUGH STANCE'' ON JAPAN'S PAPER PRODUCTS DISTRIBUTION SYSTEM AND ITS GOVERNMENT'S PROCUREMENT OF COMPUTERS, A FOREIGN MINISTRY OFFICIAL.

THE OFFICIALS ALSO SAY THE DEMOCRATIC-LED CONGRESS WILL STEP UP PRESSURE ON JAPAN TO SHOULDER A GREATER PORTION OF THE COSTS NEEDED TO MAINTAIN U.S. TROOPS STATIONED THERE, GIVEN THE TOWERING U.S. BUDGET DEFICIT.

BUT CHIEF CABINET SECRETARY MISOJI SAKAMOTO SAID HE DID NOT KNOW WHETHER THE OUTCOME OF THE ELECTION WILL LEAD TO GREATER FRICTION BETWEEN THE TWO COUNTRIES.

#90311k0083 11/07/1990 ~Japanese News Agency

TOKYO (NOV. 7) KYODO - TEXAS INSTRUMENTS INC. (TI) OF THE UNITED STATES ANNOUNCED WEDNESDAY THAT IT HAS BEGUN SAMPLE SHIPMENTS OF NEXT-GENERATION 16-MEGABIT DYNAMIC RANDOM ACCESS MEMORY (DRAM) CHIPS AND THAT IT IS NOW MASS-PRODUCING 4-MEGABIT DRAMS.

THE SAMPLE COMMERCIAL SHIPMENTS OF THE 16-MEGABIT MEMORY CHIPS ARE EXPECTED TO BE FOLLOWED BY SIMILAR PRODUCTS FROM TOSHIBA CORP. AND NEC CORP. EARLY NEXT YEAR.

HITACHI LTD., WHICH HAS BEEN JOINTLY DEVELOPING 16-MEGABIT DRAM CHIPS WITH TEXAS INSTRUMENTS, ALSO PLANS TO START SAMPLE SHIPMENTS LATE THIS YEAR.

IN THE INITIAL STAGE, THE U.S. CHIPMAKER IS TO PRODUCE SAMPLES OF 16-MEGABIT DRAMS AT ITS FACTORY IN DALLAS, TEXAS, AND IN TWO YEARS WILL SHIFT THE PRODUCTION TO OVERSEAS PLANTS IN ITALY AND OTHER COUNTRIES, ACCORDING TO OFFICIALS AT TI'S JAPANESE SUBSIDIARY.

TI HAS SEMICONDUCTOR PLANTS IN IBARAKI, SAITAMA, AND OITA PREFECTURES IN JAPAN.

#90311m0001 11/07/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (NOV. 7) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

Tokyo share prices fell nearly 2% with the Nikkei losing 465.50 following a loss of 419.58 point on Tuesday. ... WAL-MART agrees to buy the WHOLESALE CLUB in a $172 million transaction. ... THE GREAT ATLANTIC AND PACIFIC TEA CO. acquires a 51% stake in the WAREHOUSE CLUB. ... BROWNING-FERRIS's profit sank 55% in the third quarter. ... Four commodities exchanges agree to stay in New York City and build a new headquarters rather than move to New Jersey. A tax break and incentive package was offered by the city to keep the exchanges from moving.

WHAT'S AHEAD:

The TREASURY DEPARTMENT auctions its 10-year note today. ... The FEDERAL RESERVE BOARD OF DIRECTORS meets in open session today to discuss bank credit. ... PRUDENTIAL-BACHE SECURITIES INC. plans to lay off up to two-thirds of its investment banking division as the chairman of the Wall Street firm declares that "business stinks."

FROM THE BULLS:

"It seems all the gurus are on one side of the boat - the bearish side," says RICHARD PERKINS, president of PERKINS CAPITAL MANAGEMENT. "The market will not accommodate the majority and that's one reason why I am expecting a significant rally." He says the tensions in the Middle East have eased slightly, and he expects the Fed to ease as well. "I definitely feel a significant rally to perhaps Dow 2700 is in the cards," says Perkins. ("Investor's Daily", 11/7)

STOCK MARKET:

"On a low volume day, you can get a tremendous amount of volatility because of the lack of liquidity. It's nice that the market just drifted lower and that the bears didn't pound the stuffing out of the market," says CHRISTOPHER PEDERSEN, director of trading at TWENTY- FIRST SECURITIES. (WSJ, 11/7)

"Bonds are near-term over bought, so the best I can see for stocks at this point is a market rally that could recover possibly 50% of the entire July-to-October slide," says STUART SHINBEIN, senior technical editor at "Commodity Research Bureau." "That would take us somewhere into the 2660-to-2680 area, but if it's a bear market rally, it might only recover one-third of the entire decline." (CNBC "Market Wrap- Up", 11/6)

"There's always a little nervousness about the Treasury refundings," says chief trader KENNETH DUCEY at S.G. WARBURG. "I think a lot of people are content just to sit back and watch the progress - talk right now is that it will all go pretty well, but you can probably expect a pretty dull market for the next couple of days." ("The Washington Post," 11/7)

"We had some profit taking," says MICHAEL METZ, market strategist at OPPENHEIMER & CO. "A lot of players haven't seen gains in the last month or so." Metz is still optimistic about the market. "Considering the rise we had late last week and this week, it was a pretty good showing" Tuesday. (UPI, 11/6)

MONTE GORDON at DREYFUS CORP. compares the current market to "a slab of meat hanging in the wind and you get blown back and forth depending on which way Mr. [Saddam] Hussein chooses to turn at that particular moment." But even setting Mideast uncertainty aside, Gordon says "you don't see the kind of ingredients for the kind of economic recovery that would be essential for the market to start moving." (CNBC "Market Wrap-Up", 11/6)

"There's really nothing in the news," says analyst NEWTON ZINDER at SHEARSON LEHMAN BROTHERS. "Every time the Dow gets over 2500 it runs into resistance." ("USA Today", 11/7)

The 17 point decline in the market yesterday was a natural reaction to a three-day, 60 point climb, says BARRY SCHRAGER, a money manager at WHETHER PARTNERS in Eatontown, N.J. "This is a digestive process," he says. He knows people who are selling stock short betting that they can be bought back later more cheaply "simply because the market has been up three days in a row." (WSJ, 11/7)

STOCK TIPS:

BARRINGTON RESEARCH ASSOCIATES recommends buying stock in NEWCOR INC., a manufacturer of specialty machinery and equipment used for auto manufacturing and in the aerospace, medical and machine-tool industries. Their earnings should grow 15% annually in the next few years. Barrington also notes that 32% of the company's stock is held by insiders. ("USA Today", 11/7)

For the second time in a row, stocks chosen by a toss of the darts outperformed the stocks chosen by professionals in the "Wall Street Journal" contest. The pros picks for the upcoming contest are as follows: LAWRENCE CISNEROS, president of SAN JUAN ASSET MANAGEMENT, likes ST. JUDE MEDICAL CO. He says the stock is "now of the size to attract ... institutional investors." MICHAEL SEYFER, president of STARMONT CAPITAL LTD. chooses APPLIED MAGNETICS CORP. because "they cannot manufacture products fast enough to fill the orders" for their magnetic recording heads for computers. Money manager JEAN-MARIE EVEILLARD of SOGEN INTERNATIONAL FUND recommends HANCOCK FABRICS, and TONY HITSCHLER, president of BRANDYWINE ASSET MANAGEMENT CO. suggests K MART. (WSJ,)

"USA Today" shines its company spotlight on CIRCUIT CITY which has fallen victim to a clear trend in the industry "for seriously weakening sales," according to SKIP HELM of WILLIAM BLAIR. "There's not a great need for everybody in this country to have a new stereo." BARRY BRYANT of

PRUDENTIAL-BACHE SECURITIES INC. predicts that the stock will slump further and recommends selling it. Analyst DONALD TROTT of DEAN WITTER REYNOLDS still recommends the stock for those prepared to hold it for up to two years. He says, "For the longer term the company is still the best in the business." ("USA Today", 11/7)

FIRST ALBANY director of investment strategy HUGH JOHNSON has compiled a list of stocks that he believes are good buys, have paid steady dividends and may increase their dividends. His list is comprised of GE, AT&T, BORDEN, WESTVACO AMERICAN BRANDS, CARTER- WALLACE, CORNING, STANLEY WORKS and COLGATE-PALMOLIVE. "If you're going to buy stocks in this kind of market, these are the kind of stocks that make sense," says Johnson. ("Investor's Daily", 11/7)

Analysts seem to be in favor of WAL-MART's purchase of the WHOLESALE CLUB INC. "They have one high-growth business already. And layer another extremely rapid growth business on top of that, it makes for a real juggernaut," says BO CHEADLE of MONTGOMERY SECURITIES. ("USA Today", 11/5)

-30- 6772

#90311m0002 11/07/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (NOV. 7) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The currency market's reluctance to sell aggressively into the lows suggests the dollar may be "building a bottom" around the 1.4825-50 mark range, says KEITH RAPHAEL of CHASE MANHATTAN BANK in New York. (WSJ, 11/7)

"With the dollar down so much, the risk of further depreciation is reduced," says CHARLES LIEBERMAN of MANUFACTURERS HANOVER. He says the dollar may move higher on the strength of buying from overseas. (FNN "Marketwrap", 11/6)

The unresolved questions of the Middle East and the elections gave the dollar a boost yesterday, according to KAREN GIBBS of DEAN WITTER REYNOLDS. "Just that uncertainty makes people cover up their short positions," says Gibbs. ("Investor's Daily", 11/7)

Bearishness toward the dollar persists, but many participants feel that a correction is due. The market "needs some catalyst ... to spur a turnaround" and to stop the dollar's downtrend, says CHRISTA BLEYLEBEN, vice president at BANK OF BOSTON. (WSJ, 11/7)

"We had a very strong auction. This should set the tone for the rest of the week," says SKIP SHAW, head of the government bond department at the New

York-based investment bank, BEAR STEARNS & CO. Shaw notes that the heavy bidding wasn't necessarily a vote of confidence in the economy. "Bond investors have a rather negative point of view on the underlying economic fundamentals. In a perverse way, this is positive for the bond market" as investors "reposition out of corporate bonds and equities and get into government securities because of credit concerns." ("The Washington Post", 11/7)

"This was a terrific [Treasury] auction and it really lived up to its advance billing," says WILLIAM SULLIVAN at DEAN WITTER. "We thought all along there would be tremendous reception accorded the three-year [T-bills], given the unsettled investment environment, and if anything it was a bit better than expected." (CNBC "Market Wrap-Up", 11/5)

"It was a great auction," says ANTHONY KARVDAKIS, an economist at FIRST NATIONAL BANK in Chicago. "It lived up to the market's best expectations." ("USA Today", 11/7)

"Investors are thinking the economy is not going any place," says SAMUEL KAHAN chief economist for FUJI SECURITIES in Chicago. "Every time you open up the newspaper and see that this or that junk bond is in trouble, there is an advantage for risk-averse investors to buying government securities. It is the better-safe-than-sorry syndrome." ("The Washington Post", 11/7)

THE ECONOMY:

"We've been hearing for so long about how weak the economy is and we have yet to see anything come through with a clear cut signal," says LISA FINSTROM of SHEARSON LEHMAN BROTHERS. The expectation is that "the worst is yet to come," according to Finstrom. (FNN "Marketwrap", 11/6)

BILL WOLMAN, chief economist at "BusinessWeek" and "CNBC" says there are some legitimate comparisons with economic conditions now and in the 1930s. However he says that is a far cry from saying there will be a Depression. The problem is not a severe, severe downturn as in the 30s, he says, the "serious worry" now is that "the 90s will be a period of very sluggish growth in which opportunity will be pinched, where young people have a hard time getting jobs and making careers. The real threat ... is not a deep recession ... it is with the possibility of 10 years of real sluggishness." (CNBC "Market Wrap- Up", 11/5)

"We're looking at the U.S. economy going into a rather nasty recession," says FRANCOISE SOARES-KEMP of CREDIT SUISSE. She says at the moment, the "great opportunities" are in Europe. (FNN "Marketwrap", 11/6)

"I don't think the Persian Gulf is the only reason the [stock] market went down into the 2400s," says JEFFREY BELL of LEHRMAN BELL MUELLER CANNON. "Since Bush took office, we've never had a quarter that was better than a 1.8%

annual growth rate, and now the administration doesn't have a way to make the economy grow anymore since they've, in effect, made tax cuts illegal." Bell predicts the economy will rebound in the first half of 1991, but will be weak once again in the second half. ("Investor's Daily", 11/7)

The LABOR DEPARTMENT reported that the productivity of U.S. workers improved modestly in the third quarter, but not enough to boost the ailing economy. Productivity often fizzles near the end of economic expansions, as firms draw on the last available labor and equipment. "In my view, we had reached that [point] last year," says AUDREY FREEDMAN, a labor economist at the CONFERENCE BOARD. "Now, I think 1990 has been a year of exhaustion." (WSJ, 11/7)

-30- 5007

#90311p4070 11/07/1990 ~PR Newswire

LOS ANGELES (NOV. 7) PR NEWSWIRE - Bonneville Pacific Corp. (NASDAQ: BPCO) and Texaco Cogeneration and Power Co. (TCAP), a division of Texaco Inc. (NYSE: TX) have, through their subsidiaries, entered into two parntership agreements to design, construct and operate BPC's two 85 megawatt, natural gas-fired cogeneration facilities outside Las Vegas, Nev., it was announced today by Robert A. Keegan, executive vice president of BPC and James L. Pauley, president of TCAP.

A majority of the natural gas fuel requirement will be supplied by Texaco Gas Marketing Inc, another subsidiary of Texaco Inc., under long-term gas management agreements with the partnerships.

Keegan stated, "This represents the fulfillment of over two years worth of development by Bonneville in these projects. The relationship with Texaco represents a win-win strategy for both organizations. These partnerships greatly increase the overall value of the projects by the unique structure of the fuel supply agreements. We look forward to future business opportunities with TCAP in other projects."

Pauley stated, "TCAP is enthusiastic to join forces with BPC in the development and operation of these facilities. The formation of these partnerships meets Texaco Inc.'s strategic initiative to create value by expanding our presence in the growing market of private power generation."

The two projects, which will come on line in mid to late 1992, will be substantially similar in design and construction. Construction is expected to begin for both projects in the first quarter of 1991 with total construction costs for each facility anticipated to be approximately 100 million dollars. Financing is under active negotiation.

Texaco Clark County Cogeneration Co. and Bonneville Nevada Corp. have formed Nevada Cogeneration Associates No. 1, which will provide thermal energy to Georgia-Pacific Corp.'s gypsum board production facilties. In like manner,

Texaco Nevada Cogeneration Co. and Bonneville Nevada Corp. have formed Nevada Cogeneration Associates No. 2, which will provide the same to Pacific Coast Building Products Inc.'s (PABCO) gypsum production facility. The two projects which are within 10 miles of each other, will sell their electrical power to Nevada Power Co.

#90311p4071 11/07/1990 ~PR Newswire

DENVER (NOV. 7) PR NEWSWIRE - Caprock Corp. (NASDAQ: CPRK) today announced results of a drilling program on its Valdez, Alaska property that has identified proven gold reserves of 87,895 Troy ounces having a total value of $33 million based on current market prices.

In addition to the proven reserves, the drilling program indentified probable reserves of 25,788 Troy ounces and possible resource of 66,700 Troy ounces, bringing the total geologic reserves to 180,347 Troy ounces.

The calculation, completed by James Askew Assoc. Inc., a mining, geological and geotechnical engineering company with operations in Denver and Australia, was based on 112 reverse circulation drill holes in an area 4,000 feet long and 1,400 feet wide and an additional 29 drill holes 6,500 feet upstream in the Valdez Creek Valley.

The gold bearing gravels begin at depths as shallow as 10 feet and continue as deep as 150 feet from the surface. The average grade of the pay zone is .052 ounces of fine gold per cubic yard, a grade well above the average found in comparable deposits. The deposit remains open in all directions and, with only a very small area of the property drilled, it is believed to have excellent potential for substantially larger reserves. The feasibility for 1991 production on the property is currently being evaluated.

#90311p4082 11/07/1990 ~PR Newswire

GLENDALE, CA (NOV. 7) PR NEWSWIRE - If peace were declared in the Persian Gulf tomorrow, it would take the major greeting card companies six months or more to get a "Welcome Home, Returning GI" card to the retail stores.

The inability of the industry to rapidly meet the changing needs of its customers is only one reason why Len Davidson and Matt Russell are confident they have developed a unique computerized greeting card system called CreataCard, which they believe will change the way greeting cards are marketed. Russell and Davidson need only as little as 48 hours to get a

"current event" greeting card to the market.

Developed by Custom Expressions Inc. of Glendale, CreataCard guides consumers through a series of user-friendly menus using a touch-sensitive display screen. After selecting the style of card they desire, consumers enter relevant information such as names, dates, ages, messages, etc. Then, using a sophisticated color printing device that draws as if by hand, line for line (as if an artist is locked inside the machine), the cards are drawn in full view of customers. The cards currently retail for $2.95 each.

The two company principals point out the ease with which they can update the unit's card inventory to offer topical or event-related cards, such as their "Desert Shield" line.

So far, many consumers seem to be enamored with CreataCard's vast and sometimes risque card selection. There are cards for virtually every occasion including a "You're a Jerk" category that contains numerous revenge-oriented snippets ranging from mild to downright nasty.

Russell and Davidson are evaluating 100 other applications for their system. Already, a variety of other instantly produced, custom-printed products, such as personalized bumper stickers, invitations, horoscopes, certificates, plaques and party kits, are being developed.

#90311p4083 11/07/1990 ~PR Newswire
PORTLAND, OR (NOV. 7) PR NEWSWIRE - Eight semiconductor companies with facilities in the Portland metropolitan area and Salem, Ore., have banded together to solve a common problem, the Portland Development Council announced today.

All are encountering difficulties in recruiting experienced workers. Working in partnership with the Oregon Economic Development Department, the Portland Development Commission and five area community colleges, they have pooled resources in an unprecedented cooperative effort known as the Oregon Semiconductor Initiative to establish a common entry-level training program. Ordinarily, firms in the semiconductor industry are fiercely proprietary about all aspects of their businesses.

A three- to four-week curriculum is being developed by technical representatives from each of the companies, Fujitsu Microelectronics Inc., Wacker Siltronic Corp., OKI Semiconductor, Siltec Silicon, Sharp Microelectronics, Intel Corp., Tektronix Inc. and Bipolar Integrated Technology Inc. The curriculum will encompass everything from an overview of

the chip-making process and computer familiarity to clean room procedures, elementary statistical process control and semiconductor terminology. The program will go into full operation early next year.

Over one fifth of the Portland area's manufacturing workforce is employed by high technology firms. There are more than 450 such firms in the region; it has the third highest concentration of electronics companies in the United States on a per capita basis, according to the American Electronics Association. One attraction: the workforce is highly educated. About 87 percent of all Oregon adults are high school graduates and 25 percent have completed college -- far exceeding the national average in both categories.

Contact Harry Lenhart at 503-796-5241 for sources in the public and private sectors who can provide more information on this and other news items about Portland and Oregon.

ALEXANDRIA, VA (NOV. 7) PR NEWSWIRE - CEL-SCI Corporation (NASDAQ: CELI) announced today that the Florida Department of Health and Rehabilitative Services (HRS) has given approval to start two Phase II clinical cancer trials with its natural Interleukin-2 (IL-2) lymphokine "cocktail." This is the first time the natural Interleukin-2 "cocktail" will be administered to cancer patients in Phase II clinical trials in the United States.

The trials will focus on metastatic malignant melanoma and unresectable head and neck cancer. Both of these cancers are presently untreatable and have a relatively high rate of occurrence in the state of Florida.

The trials will take place at the H. Lee Moffitt Cancer Research Center in Tampa. John Hadden, M.D., a renowned immunopharmacologist and professor at the University of South Florida Medical College in Tampa, will be the co-investigator of both trials with surgeons at the H. Lee Moffitt Cancer Center.

Florida legislation permits the intrastate manufacture, sale and use of certain investigational drugs for the treatment of cancer patients in Florida under protocols as approved by HRS. Upon successful completion of the trials, CEL-SCI intends to apply to the Florida HRS for permission to manufacture and sell the drug in the state of Florida. This would transform CEL-SCI Corporation from a pure R&D company at present to a company with marketable products and would open the door to the large and growing cancer/immunorestorative market.

Maximilian de Clara, president of CEL-SCI Corporation, said, "This approval

may very well signal increased acceptance of the 'cocktail' principle in immuno-therapy, pioneered by CEL-SCI in the early 1980s when most pharmaceutical companies failed to appreciate the potential for 'cocktail' therapies using immuno-modulators." De Clara continues, "Phase I clinical trials for the natural cell-cultured IL-2 'cocktail' have already been successfully completed in Britain, and British government approval for Phase II clinical trials has also been granted."

CEL-SCI holds an exclusive license for 12 U.S. and European patents covering production, product and administration of cell-cultured natural IL-2, IL-2 "cocktail" and IL-1. Its 50 percent owned subsidiary, Viral Technologies, Inc., has just completed its first phase of human trials with its HGP-30 AIDS vaccine. Further tests are scheduled to start soon in the United States and in Europe.

SAN DIMAS, CA (NOV. 7) PR NEWSWIRE - Vestar Inc. (NASDAQ: VSTR) today announced that it has been informed by the Medicines Control Agency (MCA) that AmBisome is receiving "Fast Tracking" review for marketing approval in the United Kingdom. The next pivotal step in the process is consideration by the Advisory Committees. The company has been informed by the MCA to be prepared for such review in early 1991.

Dr. Roger J. Crossley, president and chief executive officer, stated, "This is further welcome news regarding regulatory review of AmBisome. As announced previously, the BGA (Germany) has also allocated a first priority classification to this product."

AmBisome is the trade name for the intravenous liposomal formulation of amphotericin B, a broad spectrum, anti-infective agent used to treat potentially fatal systemic fungal infections that often occur in immune-compromised patients who have undergone cancer therapy, post-organ/bone marrow transplants and AIDS patients.

Vestar Inc. is a pharmaceutical company focused on the development of therapeutic and diagnostic agents for cancer, AIDS and related diseases.

BALTIMORE (NOV. 7) PR NEWSWIRE - USF&G Corporation (NYSE: FG) today reported a consolidated net loss of $15 million, or $.22 per share, for the third

quarter of 1990, compared with a net loss of $17 million, or $.25 per share, in the same period in 1989.

The net loss for the quarter includes realized gains on investments of $9 million, or $0.11 per share, compared with realized losses on investments of $9 million in the third quarter of 1989. For the first nine months of 1990, USF&G had consolidated net income of $41 million, or $.35 per share, compared with consolidated net income of $15 million, or $.03 per share, for the same period in 1989. Net income for the first nine months of 1990 includes realized gains on investments of $3 million, compared with realized losses of $79 million during the same period in the prior year.

Operating loss, which excludes realized gains and losses, for the third quarter of 1990 was $19 million or $.27 per share compared with a loss of $8 million, or $.15 per share for the same period in 1989. Nine month operating income totalled $38 million in 1990 compared with $94 million for the same period in 1989.

Consolidated revenues for the third quarter and the first nine months of 1990 were $1.2 billion and $3.4 billion, respectively. Consolidated net investment income for the third quarter of 1990 was $231 million, compared with $224 million in the same period in 1989. For the first nine months of 1990, consolidated net investment income was $698 million, up from $666 million in the same period in the prior year.

Assets were $13.9 billion as of Sept. 30, 1990, and shareholders equity totalled $1.6 billion or $17.01 per share.

Baltimore-based USF&G Corporation, with assets of $13.9 billion, is composed of subsidiaries engaged in the writing of property/casualty and life insurance and in the sale of financial services. The corporation's principal subsidiary is United States Fidelity and Guaranty Company.

#90311p4101 11/07/1990 ~PR Newswire

NEW CANAAN, CT (NOV. 7) PR NEWSWIRE - Smith Corona Corporation (NYSE: SCO) late yesterday, filed an anti-dumping duty petition seeking relief from dumped imports of personal word processors from Japan and Singapore. In its petition Smith Corona estimates dumping by the major Japanese producers, including Brother and Panasonic, by margins of over 30 percent in the past year.

The Smith Corona petition was filed in the wake of a decision by the U.S. Department of Commerce last Friday, that found that the personal word processor created by the addition of a visual display and disk drive to a typewriter does not exclude those machines from the anti-dumping duty order

already in place on Japanese typewriters. This decision means that imports of portable word processors built on a typewriter chassis which do not have a detachable keyboard will be subject to estimated duties and to review under the anti-dumping law.

The new action means that Smith Corona's major products will be covered either by the existing anti-dumping duty order or by the newly filed petition. According to the Department of Commerce, the department will determine whether to initiate a separate investigation based on the petition by Nov. 26. If initiated, the U.S. International Trade Commission will investigate and make a preliminary decision as to whether Smith Corona is injured by the dumped imports by Dec. 21, 1990.

In an earlier decision handed down on Sept. 26, the U.S. Court of Appeals for the Federal Circuit in Washington, had affirmed a trial court decision which found that Japanese portable typewriters with text memories were covered by an existing anti-dumping order.

Smith Corona, based in New Canaan, is the world's largest manufacturer of portable electronic typewriters and personal word processors. It recently announced its entry into the home, student, home office and small business segments of the personal computer market, beginning in early 1991. The company also markets office supplies, forms and customized printed products.

MUNICH, Germany (NOV. 7) PR NEWSWIRE - Sixteen of the world's top tennis players have accepted their invitations to compete in the first ever Compaq Grand Slam Cup.

The climax of the tennis year, the Compaq Grand Slam Cup is sponsored by Compaq Computer Corporation (NYSE: CPQ), a world leader in the manufacture of PC systems and desktop, portable and laptop personal computers. The tournament will be played in the Munich Olympiahalle Dec. 11-16.

The Four Grand Slam Champions of 1990 -- Australian Open winner Ivan Lendl, French Open champion Andres Gomez, Wimbledon title-holder Stefan Edberg and U. S. Open hero Pete Sampras -- head an elite field of 16.

Players with the best records at the four Grand Slam Championships qualified for a place in the event and will compete for a first prize of $US 2 million.

Tennis fans all over the world will enjoy the spectacular tennis of Edberg (Sweden), Lendl (Czechoslovakia), Andre Agassi (U.S.), Gomez (Ecuador), Sampras (U.S.), Goran Ivanisevic (Yugoslavia), Jonas Svensson (Sweden), Thomas

Muster (Austria), David Wheaton (U.S.), Yannick Noah (France), Andrei Cherkasov (U.S.S.R.), Michael Chang (U.S.), Aaron Krickstein (U.S.), Henri Leconte (France), Kevin Curren (U.S.) and Christian Bergston (Sweden) at the Compaq tournament. Brad Gilbert (U.S.) and Thierry Champion (France) will be invited to Munich as alternates.

The event, which will be seen on television in more than 70 countries by a potential audience of more than one billion, will provide $2 million for the Grand Slam Development Fund for the benefit of tennis worldwide.

Eckhard Pfeiffer, president, Compaq Europe and International, said, "As a company with a rapidly increasing worldwide presence, we are very excited about bringing the world's leading tennis players to a truly global audience."

Founded in 1982, Compaq Computer Corporation has consistently set business and industry growth records. This year, Compaq achieved "Global Fortune 500" status, as ranked (No. 438) in Fortune Magazine's 1990 listing of the world's largest companies. COMPAQ products are sold in 64 countries through a network of more than 3,000 Authorized COMPAQ Computer Dealers.

#90311p4103 11/07/1990 ~PR Newswire

DAYTON, OH (NOV. 7) PR NEWSWIRE - Shopsmith, Inc. (NASDAQ: SHOP) today reported $9.6 million in revenues for its fiscal second quarter ended Sept. 30 1990 as compared to revenues of $10.2 million for the same period last year. The company typically realizes its lowest sales in the second quarter. Revenues for the first six months ended Sept. 30, 1990 were $20 million compared to $21 million of revenues for the first six months of last year.

Despite cost improvements implemented during the period, operations resulted in net losses of $443,000 or $.20 per share for the quarter and $877,000 or $.39 per share for the first half. This was caused by the reduced sales volume and the increase in operating costs from the company's retail stores opened in fiscal 1990. Second quarter and first half losses last year were $162,000 or $.07 per share and $147,000 or $.07 per share, respectively.

Shopsmith chairman and chief executive officer John R. Folkerth said, "The weakening of the U.S. economy has caused reduced demand for our products this summer. Additionally, competition in our market is increasing.

"Several programs designed to improve sales of major products were implemented during the quarter. It was encouraging to see that sales of these products began to strengthen late in the quarter. We are also pleased to have an

attractive offering of new products for our upcoming Christmas selling season." He noted that the fiscal third quarter should produce improved financial results.

Shopsmith is the leader in the production and marketing of quality multipurpose woodworking tools. The company markets over 1,200 products through mail order and through 44 company-owned stores in the U.S., Canada and Great Britain.

#90311p4104 11/07/1990 ~PR Newswire

MUNICH, GERMANY (NOV. 7) PR NEWSWIRE - Compaq Computer Corporation (NYSE: CPQ) will introduce a world first in tennis at the Compaq Grand Slam Cup at the Munich Olympiahalle, Dec. 11-16.

Compaq, title sponsor of the event, will make available the most comprehensive and detailed tennis database to date for the world press, and for the first time ever, the spectators. Complementing this enormous fund of information will be on-the-spot online statistics fed into the database.

Compaq Computer Corporation will install a combination of 100 COMPAQ desktop, laptop and notebook PCs for users to tap into a wealth of detailed historical information and personal data on players. For example, vital statistics on the game, points and performance, longest rally and number of first serves, will be fed into the database by a resident programmer, and users will have immediate access to results as they occur.

Both press and spectators alike will have access to personal profiles of each player, encompassing age, status, education and career path, extra curricular activity, game philosophy, and historical data on player performance for all tournaments held in 1990. Users will be able to create a full picture of any tennis event from a tournament, a match, or a player, right down to an analysis of a particular stroke served on the court in front of him.

The COMPAQ SYSTEMPRO, the first of an emerging class of extremely powerful personal computer systems, will support COMPAQ desktop, laptop and notebook PCs over a Novell NetWare 3.1 network installed throughout the Munich Olympiahalle. Linking the Stadium, Press Office, demonstration areas and hospitality lounges, Compaq has ensured the database can be accessed by anyone attending the event. A user-friendly online, menu-driven database gives excellent accessibility for first-time users. For journalists with their own personal laptop PCs, Compaq has also ensured access to the network.

Compaq Computer Corporation is a world leader in the manufacture of PC systems and desktop, portable and laptop personal computers. COMPAQ products are sold in 64 countries through a network of more than 3,000 authorized COMPAQ computer dealers.

Founded in 1982, Compaq has consistently set business and industry growth records. This year, Compaq achieved "Global Fortune 500" status, as ranked (No. 438) in Fortune Magazine's 1990 listing of the world's largest companies.

ZURICH, SWITZERLAND / BRATISLAVA, CZECHOSLOVAKIA (NOV. 7) PR NEWSWIRE - The following has been released by General Motors (NYSE: GM) in Europe:

General Motors Europe and the government of the Slovak Republic have signed a protocol exclusively selecting GM to establish transmission manufacturing and vehicle assembly operations at the Bratislavske Automobilove Zavody (BAZ) facilities in Bratislava, pending the outcome of current negotiations.

Initial plans are for the manufacture of up to 250,000 automobile transmissions annually for export to other GM facilities in Europe, as well as the assembly of Opel passenger cars for sale in Czechoslovakia. Production could begin in late 1992. GM is also in the process of establishing a distribution organization for the sale of Opel vehicles in the CSFR.

Following recent developments in Eastern Europe, GM has already established a facility for assembly of the Opel Vectra in Eisenach, eastern Germany, where production began in early October. The comnpany is also further developing its plans for engine production and vehicle assembly in Szentgotthard, Hungary scheduled to start up in 1992. In addition, GM's Packard Electric Division has a joint venture producing automotive wiring harnesses in the town of Szombathely in western Hungary.

TUSTIN, CALIF. (NOV. 7) PR NEWSWIRE - Techniclone International Corp.'s (NASDAQ: TCLN) announced Wednesday that its common stock will continue to be included for quotation in the National Association of Securities Dealer's Automated Quotations Systems (NASDAQ) via an exception from the capital and surplus requirements.

While Techniclone failed to meet this requirement as of July 31, 1990, the NASD has granted a temporary exception from this standard subject to Techniclone meeting certain conditions. While the company believes that it can meet these conditions, there can be no assurance that it will do so according to Lon H. Stone, chief executive officer and chairman of the board of Techniclone International Corp. If at some future date the company's securities should cease to be quoted on the NASDAQ system, they should continue to be quoted in the over-the-counter market. For the duration of the exception, the company's NASDAQ symbol will be TCLNC.

NEWPORT BEACH, CALIF. (NOV. 7) PR NEWSWIRE - EIP Microwave Inc. (NASDAQ: EIPM) reported net sales for the fourth quarter ended Sept. 30, 1990, of $2,165,000, a 40 percent decrease from the same period last year. The decrease resulted primarily from a significant decline in domestic defense-related business. Net loss of $107,000 ($.05 per share) was incurred for the quarter, as compared to net income of $293,000 ($.13 per share) earned during the fourth quarter of fiscal 1989.

Incoming orders for the fourth quarter were $1,804,000, an 18 percent decrease from the same period a year ago.

Net sales for the fiscal year ended Sept. 30, 1990, were $11,333,000, an 18 percent decrease from fiscal year 1989. The company earned net income of $127,000 ($.06 per share) for fiscal year 1990, as compared to net income of $771,000 ($.35 per share) recorded during the previous year.

The prior year's results include a pre-tax charge to operations of $1,050,000 resulting from the write-down of certain assets associated with the company's realignment of technical, financial and management resources. The prior year's results also reflect a benefit of $748,000, or $.34 per share, the cumulative effect of adopting the new accounting standard on income taxes.

The company believes that the decline in defense related spending will continue to depress revenue levels. At the same time, the company expects to continue to invest heavily in new product development. As a result, the company expects to incur a net loss for the first quarter of fiscal 1991.

EIP Microwave Inc. manufactures high frequency test and measurement instruments, which are predominantly used in the defense and telecommunications industries. The company has manufacturing facilities in Milpitas, Calif. and maintains corporate offices in Newport Beach. The company's common stock is traded over the counter on the NASDAQ National Market System using the symbol "EIPM."

BALTIMORE (NOV. 7) PR NEWSWIRE - USF&G Corporation (NYSE: FG) announced today that its board of directors, in order to conserve the company's capital base and strengthen its competitive position in a challenging marketplace, authorized a reduction in its quarterly common stock dividend to $.25 per share and approved a program to trim costs by approximately $75 million. The dividend change will be reflected in the next dividend, payable Jan. 31, 1991 to holders of record on Dec. 21, 1990. The board also declared a regular quarterly dividend on its preferred stock of $1.025, payable Jan. 31, 1991 to holders of record on Dec. 21, 1990.

The board further announced that it has been informed by USF&G's chairman, president and chief executive officer, Jack Moseley, of his decision to take early retirement. Moseley, who was named to these positions in 1981, will continue to serve until a successor is appointed. The board said that it has selected a successor, who is an executive of national stature, and will announce the appointment within a few weeks.

The corporation said that the board undertook an intensive review of the corporation's financial position and business strategies, during which it determined that reducing the dividend and lowering costs were essential steps for USF&G to take.

The corporation anticipates the cost reduction program will include staff reductions at all levels and all segments of the corporation through terminations and attrition. Details of the program will be announced in the coming weeks. The benefits of the cost reduction program will be significantly realized in 1991 and fully in 1992. On an annualized basis, the reduction in the dividend will conserve approximately $160 million of the corporation's retained earnings.

The corporation said that conserving USF&G's capital position through these steps will enable it to maintain the effectiveness of its marketing programs and the quality of its customer service, while supporting the long-term strategy to achieve balance and growth in its overall business. The corporation also stated that it believes these steps will help position USF&G to more readily take advantage of opportunities during the next upturn in the underwriting cycle, and that in the aggregate these initiatives will enhance shareholder value.

Baltimore-based USF&G Corporation, with assets of $13.9 billion, is engaged through it subsidiaries in the writing of property/casualty and life insurance and in the sale of financial services. The corporation's principal subsidiary is United States Fidelity and Guaranty Company.

#90311p4120 11/07/1990 ~PR Newswire

WASHINGTON (NOV. 7) PR NEWSWIRE - In a broad clean-up of ineffective ingredients in non-prescription drug products, the Food and Drug Administration today banned 223 ingredients in 19 classes of products for problems ranging from acne to a need to stop smoking.

FDA said no proof that the ingredients are effective for certain conditions has been submitted during the agency's ongoing review, even through manufacturers have had many opportunities.

Among the substances banned are juniper tar and pine tar in dandruff products, various enzymes and dehydrated garlic in digestive-aid products, aspirin in external medications and prune concentrate in powders in stimulant laxatives. These ingredients were introduced into products before 1962, when a change in the law required manufacturers to submit effectiveness data for FDA's approval before future drug products could be marketed.

In 1972, FDA began a massive review of some 300,000 non-prescription products then on the market. In earlier actions, FDA has banned ingredients when their safety or effectiveness was in doubt and has required revised labeling for many drugs.

In addition to the 223 ingredients banned today, FDA also proposed Oct. 29 to ban 111 drug ingredients in so-called diet products sold without prescription (see press release P90-50).

Some manufacturers have already abandoned some of the ingredients because in the early stages of FDA's non-prescription drug review advisory panels of non-government medical experts had reported there was insufficient evidence to judge their effectiveness.

Some major products would by affected by the ruling, published in today's Federal Register. Anti-dandruff products such as Tegrin Lotion could no longer include allantoin, and Packers Shampoo and Packers Soap could no longer include pine tar. The antidiarrheal product Donnagel could no longer include atropine sulfate, hyoscyamine sulfate and scopolamine hydrobromide.

Other ingredients affected by the ban include some used for allergies, boils, cold symptoms, digestive problems, ingrown nails, constipation, oral health problems, pain psoriasis and other skin problems, nailbiting and thumbsucking, seborrheic dermatitis, smoking and swimmer's ear.

Some of these same ingredients have been found effective for other conditions. For example, aspirin is banned in today's action as an external analgesic ingredient. However, when used in internal pain relief products, it is considered effective.

Once the ban takes effect in six months, manufacturers wishing to include any of these ingredients in non-prescription products will have to provide FDA evidence that the ingredient is safe and effective for its intended use and obtain the agency's approval.

In the agency's review of non-prescription drugs, officials review advisory panel reports and subsequent public comments. FDA then publishes a proposed rule with another comment period that includes an opportunity for a public hearing. Ultimately, FDA issues a final regulation or monograph that in effect becomes a "recipe" listing acceptabe ingredients, doses, formulations and labeling.

#90311p4122 11/07/1990 ~PR Newswire

BALTIMORE (NOV. 7) PR NEWSWIRE - USF&G Corporation (NYSE: FG) announced today that its board of directors, in order to conserve the company's capital base and strengthen its competitive position in a challenging marketplace, authorized a reduction in its quarterly common stock dividend to $.25 per share and approved a program to trim costs by approximately $75 million. The dividend change will be reflected in the next dividend, payable Jan. 31, 1991 to holders of record on Dec. 21, 1990. The board also declared a regular quarterly dividend on its preferred stock of $1.025, payable Jan. 31, 1991 to holders of record on Dec. 21, 1990.

The board further announced that it has been informed by USF&G's chairman, president and chief executive officer, Jack Moseley, of his decision to take early retirement. Moseley, who was named to these positions in 1981, will

continue to serve until a successor is appointed. The board said that it has selected a successor, who is an executive of national stature, and will announce the appointment within a few weeks.

The corporation said that the board undertook an intensive review of the corporation's financial position and business strategies, during which it determined that reducing the dividend and lowering costs were essential steps for USF&G to take. While for more than two decades USF&G successfully implemented a policy of sustaining dividend and employment levels during all phases of the underwriting cycle, the corporation said that the extended duration of the present trough in the property and casualty market and the economic uncertainty resulting from a general business downturn required these extraordinary actions.

The corporation anticipates the cost reduction program will include staff reductions at all levels and all segments of the corporation through terminations and attrition. Details of the program will be announced in the coming weeks. The benefits of the cost reduction program will be significantly realized in 1991 and fully in 1992. On an annualized basis, the reduction in the dividend will conserve approximately $160 million of the corporation's retained earnings.

Baltimore-based USF&G Corporation, with assets of $13.9 billion, is engaged through it subsidiaries in the writing of property/casualty and life insurance and in the sale of financial services. The corporation's principal subsidiary is United States Fidelity and Guaranty Company.

NEW YORK (NOV. 7) PR NEWSWIRE - The Gitano Group, Inc. (NYSE: GIT) today announced, for the third quarter ended Sept. 30, 1990, net income of $6,262,000, a 27.2 percent decrease from $8,603,000 in the 1989 third quarter. Net sales totalled $239,489,000 for the quarter, reflecting a 34.1 percent increase from net sales of $178,615,000 recorded a year ago. Earnings per share for the quarter were $.40 based on 15,722,170 weighted average shares outstanding, compared with $.62 per share based on 13,920,655 shares outstanding in 1989 (a 13 percent increase in the number of shares outstanding).

For the first nine months of 1990, Gitano reported an increase of 7.2 percent in net income to $27,086,000, from $25,280,000 in 1989. Net sales increased 37.1 percent to $643,729,000 from $469,392,000 recorded a year ago. Earnings per share totalled $1.85 for the first nine months based on 14,659,671 shares outstanding, compared with $1.82 last year, based on 13,920,655 shares outstanding.

Haim Dabah, president and chief operating officer of The Gitano Group, Inc. said, "We are pleased by the sales increase achieved this quarter under very difficult retail conditions as economic concerns continue to affect consumer spending. We believe our sales increases are due primarily to the continuing demand for the Gitano brand by the American consumer, as well as sales from our recent acquisitions. Earnings for the third quarter reflect a weak and highly promotional back-to-school selling season, re-orders at low margins as well as our continuing program of aggressive inventory reduction. While these factors resulted in lower profit margins for us in the short-term, it is enabling us to continue and strengthen our relationship with our major accounts as we help them with product "sell-throughs" in this difficult retail climate. This inventory reduction program strengthens our balance sheet by increasing inventory turn, resulting in improved capital productivity."

Commenting on the fourth quarter, Dabah said, "While sales and earnings for the fourth quarter and the holiday selling season are difficult to estimate in today's uncertain retail environment, present trends clearly indicate a continuing downturn at the retail level. Despite these conditions, we believe that our sales and market share will continue to grow through the balance of the year, but our earnings for the fourth quarter will be below that of last year."

The Gitano Group, Inc. is a marketer, designer and manufacturer of branded apparel sold under the Gitano and Gloria Vanderbilt trademarks. Diversified product lines include women's jeanswear, sportwear, swimwear and intimate apparel in junior, missy, maternity and plus sizes as well as men's and children's jeanswear and sportwear. Gitano brand products are sold primarily through mass merchants and discounters throughout the U.S. at an average retail price of under $20.

#90311p4129 11/07/1990 ~PR Newswire

DALLAS, TEXAS (NOV. 7) PR NEWSWIRE - The Hallwood Group Incorporated (NYSE: HWG) announced today that it intends to purchase from time to time, on the American Stock Exchange or in privately negotiated transactions, units of limited partnership interest (the "units") in Hallwood Realty Partners, L.P. (AMEX: HRY). As previously announced, on Nov. 1, 1990, Hallwood Realty Partners completed its consolidation of eight publicly held real estate partnerships initially sponsored by Equitec Financial Group, Inc. and on Nov. 2, 1990, the units began trading on the American Stock Exchange. Hallwood Realty Corporation, a wholly owned subsidiary of The Hallwood Group, is the general partner of Hallwood Realty Partners.

The Hallwood Group stated that it is proposing to purchase units because it believes that, at current trading prices on the American Stock Exchange, the units are significantly undervalued and therefore represent an attractive investment opportunity. The Hallwood Group indicated that the number of units it might purchase would depend on market conditions prevailing from time to time and that all purchases, other than "block purchases," as defined in Rule 10b-18 under the Securities Exchange Act of 1934, would only be made in accordance with the volume limitations and other provisions of such rule.

ROCKVILLE, MD (NOV. 7) PR NEWSWIRE - GE Information Services today announced "Letters From Home" - a program to allow families and friends of those serving with the U.S. Armed Forces in the Persian Gulf region to send free electronic mail messages via the GEnie service.

"Letters From Home", offered in cooperation with the U.S. Armed Forces, the Saudi-American General Electric Company, GE Rents and Pitney Bowes Inc., allows individuals in the United States with access to a personal computer and modem to send personal messages to loved ones serving in the Persian Gulf region.

Letters will be sent electronically via GE Information Services' worldwide teleprocessing network to GE's local telecommunications facility in Saudi Arabia. The letters will be received and printed on computers and printers supplied by GE Rents.

The mail will then be folded, inserted, and sealed in envelopes using state-of-the-art equipment provided by Pitney Bowes. The letters will then be given to the U.S. Armed Forces for delivery to the designated serviceperson.

In announcing "Letters From Home". GEnie general manager Bill Louden said, "All of us at GE are proud of the men and women serving our country in the Persian Gulf. And we are pleased that our electronic mail service can significantly reduce the time required for delivery over traditional mail."

"We also hope that the expeditious delivery of these letters through our worldwide teleprocessing network can serve as a real morale booster for the troops," added Louden.

Subscribers to the GEnie service need only type the word "Letters" at any menu prompt on the service. Non-subscribers can dial a local access telephone number or, if they are not near one of the more than 500 GE Information Services dial-up locations, access via a toll-free 800 number.

To send a Letter From Home, an individual will need to know the name and rank, social security number, unit or ship and APO or FPO of the recipient. The Letters From Home system will automatically prompt senders for the appropriate information.

The GEnie service, one of the leading on-line information services, is available throughout the United States, Canada, Japan, Germany, Austria, and Switzerland via a local phone call. For further information on the GEnie Service and its free "Letters From Home" project, please call GEnie Client Services at 1-800-638-9636.

#90311p4131 11/07/1990 ~PR Newswire

NEW YORK (NOV. 7) PR NEWSWIRE - Citicorp (NYSE: CCI) today announced it will redeem $275 million of its $950 million of auction rate and remarketed preferred stock to bring the amount outstanding to a level more in line with market demand for this specialized security.

Citicorp expects the move to improve rates it pays at repricing auctions on the $675 million of the stock remaining in the market. It also expects the move to benefit the market for this type of preferred, preserving it as a financing option for Citicorp and a wide range of other companies in banking and other industries.

The immediate effect of the Citicorp action is to redeem at the earliest possible date the $75 million of its series 5F preferred stock scheduled for auction to day. Other series subject to today's redemption announcement are $100 million of Series 5A and $100 million of Series 5B (including shares exchanged for those securities) which will be redeemed after the expiration of the previously announced exchange offers.

Citicorp will keep its options open concerning future auctions and whether it may call further amounts of its auction or remarketed rate preferred.

Reducing the number of the shares outstanding should allow the market to better match supply and demand, producing rates more in line with those of other Citicorp instruments in the market.

Citicorp short term commercial paper, for instance, has been selling in a rate range of 7.85 percent to 8.10 percent in the last three months, consistently lower than the composite rate for comparable commercial paper compiled by the Federal Reserve. The pattern is the same for all Citicorp and Citibank short-term funding, in contrast to an aberrational "spiking" in rates which has recently occurred in its auction rate and remarketed preferred stock

repricings.

Citicorp's overall funding, including Citibank, has very different characteristics from typical money center banks, with 65 percent now accounted for by deposits, particularly a very large and stable consumer deposit base. Equity, long-term debt and other items make up about 25 percent, and short-term funding in the markets accounts for less than 10 percent.

BINGHAMTON, NY (NOV. 7) PRNEWSWIRE - Resource Recycling Technologies, Inc. (AMEX: RRT), a diversified waste recycling concern, posted revenues of $11.3 and $23.0 million for the three and nine month periods ended Sept. 30, 1990, respectively, a 95 percent and 83 percent improvement over the same period last year, reports Lawrence J. Schorr, president. Net income for the quarter and nine months ended Sept. 30, 1990 was $328,000 ($0.12/share) and $497,000 ($0.20/share), respectively, versus $99,000 ($.06/share) and $122,000 ($-/share) for the comparable prior year periods.

Schorr indicated that the third quarter basically tracked management expectations, although general economic conditions are of concern. Commodity prices, particularly newspaper and aluminum, continue to be soft, thereby reducing profitability. Schorr further stated that controlling expenses requires constant vigilance, especially in the aggressive growth mode of the company.

Schorr also stated that the company is on track with the construction of its two newest facilities in Ocean County, N.J. and Palm Beach County, Fla., with expected operational dates in May 1991. The company expects to complete contract negotiations on two other facilities in the fourth quarter (Hartford, Conn. and Monroe County, N.Y.) which will provide construction backlog for 1991 and new operations in 1992. Schorr stated that the new plastics division has been adversely affected by deteriorating general economic conditions, which are not expected to improve until the second quarter of 1991. On a stand-alone basis, this division is expected to break even for 1990.

Resource Recycling Technologies, Inc. is a vertically integrated organization dedicated to the advancement of recycling programs and technologies, and the development of new markets for secondary materials.

BINGHAMTON, NY (NOV. 7) PR NEWSWIRE - Resource Recycling Technologies, Inc. (AMEX: RRT), Lawrence J. Schorr, president, announced today that the company has received notice from the Bank of New York, the senior lender to International Seaway Trading Corp. (f/k/a Spitz Corp. and the maker of certain purchase money promissory notes, which have a total balance due of $1.925 million at Sept. 30, 1990 payable to the company in connection with the 1988 leveraged buyout of its former shoe business assets) that ISTC is in technical default to the bank and therefore no current payments may be paid to the company under the notes. The company will be meeting with the bank to discuss the situation. Reserves, if any are subsequently determined to be necessary for losses on the notes, will be recorded in the fourth quarter. Although the company does not anticipate any adverse cash flow impact to its current operations, in the event such reserve is deemed necessary, a material adverse impact on earnings and book value may result from such a reserve.

COLUMBUS, OH (NOV. 7) PR NEWSWIRE - Lancaster Colony Corporation (NASDAQ: LANC) today reported that sales were up slightly, but earnings were off slightly in the first fiscal quarter ended Sept. 30, 1990, compared with results for the corresponding three months a year ago.

Net income amounted to $5,545,000 on sales of $128.8 million compared to $5,924,000 on sales of $127.2 million last year. Earnings per share were 48 cents vs. 50 cents.

John B. Gerlach, president of Lancaster Colony, said the sales increase was produced by the food operations which "continue very strong, and we expect our food group to have a record year in both sales and profits."

He noted that sales and earnings were down in consumer glassware and candles due primarily to later shipping dates this year. He added that he is encouraged by orders for candles and glass which exceed last year's levels.

Gerlach said, "While we continue to see a very soft economy in most areas, we expect a good second quarter partially due to the shift in volume from the first quarter." He went on to say, "We expect the full 1991 fiscal year to show improvement over fiscal 1990."

LANCASTER COLONY CORPORATION CONSOLIDATED SUMMARY OF SALES AND EARNINGS
(UNAUDITED)

Three Months Ended Sept. 30:	1990	1989

JACKSONVILLE, FL (NOV. 7) PR NEWSWIRE - Barnett Banks (NYSE: BBI) today announced its intent to purchase a new system for processing checks that will significantly enhance customer service, improve productivity and provide the technological foundation for developing new products.

Barnett will be the first bank in Georgia or Florida and among the first in the nation to install the Unisys Infolmage Item Processing System (IIPS). This system is a major step forward in the technology for processing checks and other payment instruments.

As Florida's leading bank with almost 24 percent of the state's banking deposits, Barnett currently processes more than 3 million checks a day and expects that number to increase significantly.

By investing in imaging technology, Barnett will be able to eliminate the repetitive physical handling of documents, providing the opportunity for significant advances in customer service and productivity.

"As one of the first banks in the United States to adopt imaging technology for check processing, Barnett is leading the way in the banking community," said Jonathan Palmer, executive vice president in charge of technology and operations. "We are confident that implementation of the Unisys imaging solution will enhance our position as Florida's leading commercial bank.

"This investment of over $15 million in advanced technology represents a significant step by Barnett to offer the latest and most effective solutions to our customers," he added.

Image check processing involves creating a computer digitized picture of the check and processing that image rather than the check itself. This computer image will be made avilable through any Barnett office, providing instant access to customers and avoiding the need to physically sort through files to retrieve checks. It also eliminates other costly handling of checks, which are currently handled an average of six times in processing before being returned in the customer's bank statement.

"We expect image check processing to increase productivity and reduce errors, resulting in lower processing cost per check and better customer service," said Steve Milstid, executive director of systems development. "In the near future, Barnett customers will get even more benefit from imaging technology when we provide them with image statements. Instead of checks, customers will get high-quality picture images of checks paid during the statement period. This will eliminate the need to send checks themselves, reducing the weight of a statement package, thereby reducing mailing costs and helping to keep down customer fees."

With $31.4 billion in assets and 590 offices in Florida and Georgia, Barnett is the leading financial institution in Florida and the 20th largest in the country.

#90311p4144 11/07/1990 ~PR Newswire

EVANSVILLE, IN (NOV. 7) PR NEWSWIRE - Southern Indiana Gas and Electric Company (NYSE: SIG) reported earnings per share of $1.05 for the three months ended Sept. 30, 1990, compared to 99 cents in 1989.

Increases in retail electric sales and wholesale electric sales, up three percent and 44 percent, respectively, were offset by scheduled maintenance project expenditures at one of the company's major generating stations and increases in other operating expenses causing income from electric operations to remain flat for the quarter.

Income from gas operations was approximately the same for the quarter, reflecting little change in gas sales. Increases in earnings per share were primarily the result of repurchases of the company's common stock as part of its common stock repurchase program.

For the first nine months of 1990, earnings per share were up 17 cents from the same period in 1989. Improved electric sales were offset by scheduled maintenance project expenditures which caused a slight decrease in income from electric operations while income from gas operations increased due to improved margins on gas sales.

Also, contributing to the increase in earnings per share were repurchases of the company's common stock as part of its common stock repurchase program.

Earnings per share of $2.97 for the 12 months ended Sept. 30, 1990 represents a 4.6 percent increase compared to the prior period of $2.84. The increase is attributed to improved electric sales, better margins on gas sales, an increased customer base and repurchases of the company's common stock, all partially offset by increased plant maintenance expenditures.

SOUTHERN INDIANA GAS AND ELECTRIC COMPANY

Three Months Ended Sept. 30:	1990	1989

PETROMINERALS CORPORATION REPORTS THIRD-QUARTER EARNINGS OF $204,000

TUSTIN, CA (NOV. 7) PR NEWSWIRE - Petrominerals Corp. (NASDAQ: PTRO) today announced results for the quarter ending Sept. 30, 1990. Revenues for the period were $1,979,000, compared to $1,695,000 for the same period in 1989. Net income for the quarter increased to $204,000, or 3 cents per share,

compared to $25,000 or $.00 per share for the same period last year.

Commenting on the favorable results, Everett L. Hodges, chief executive officer, stated, "Production revenues were positively impacted during the quarter due to the explosion of world oil prices. As a result, gross margins from oil production activity for the third quarter increased by 85 percent over the same period last year."

For the nine months ended Sept. 30, 1990, revenues were $5,405,000, versus $4,828,000, for the same period last year. Net income for the period was $142,000 or 2 cents per share, versus a net loss of $258,000 or 3 cents per share for the same period in 1989.

During the third quarter the average daily production was 397 compared to 406 barrels for the third quarter of 1989. "Our daily production rate decreased due to the performance of necessary well maintenance that will allow more efficient production activities in the future. As a result of this maintenance, operating expenses for oil and gas production increased 25 percent as compared to the third quarter of 1989," said Hodges.

The average price Petrominerals received for its crude oil during the third quarter increased 29 percent to $17.26 as compared to the average price of $12.27 for the third quarter of 1989.

Due to increases in world oil prices, activity at Lunn Production Service, a division of Petrominerals Corp., increased approximately 6 percent during the quarter. Operating expenses at Lunn increased as a result of repair and maintenance costs. During the third quarter of 1990, Lunn Production Service purchased two well servicing rigs, which are currently under contract with major oil companies.

Petrominerals Corp. engages in the production and marketing of crude oil and natural gas in California and Louisiana. Lunn Production Service, a division of Petrominerals Corp., services and maintains oil and gas wells for a number of major oil companies.

CONCORD, MASS. (NOV. 7) PR NEWSWIRE - Stardent Computer, Inc. has relocated its corporate headquarters to 521 Virginia Rd. in Corcord, Mass. The 60,000-square-foot facility houses research and development, marketing, finance, administration, customer service and the northeast east sales office.

The move ends a four-month-long search for a new headquarters following the company's announcement that the west coast facilities would relocate to the east coast. Since its founding in 1985 as Stellar Computer, Stardent's headquarters were in Newton, Mass.

According to Dave Rowe, Stardent's chief financial officer, "The Concord facility met all of our criteria for new headquarters, specifically, it's easily accessible from major highways, it's economical and there is room to grow. Most importantly, we are the sole tenant which gives us the added boost of having our own facility rather than a multi-tenant situation."

Stardent Computer Inc. is the leading developer and marketer of visualization systems. These include desktop and deskside graphics supercomputers, departmental supercomputers and visualization software. The company markets the leading interactive 3D visualization environment, AVS, which runs on Stardent systems and has been licensed to run on many other hardware platforms.

Stardent's products are marketed to government, commercial and research accounts in mechanical computer-aided engineering, computer-aided molecular design, computational fluid dynamics, geophysical analysis, animation and visual simulation, econometric modeling, scientific research and image processing.

JERICHO, NY (NOV. 7) PR NEWSWIRE - Getty Petroleum Corp. (NYSE: GTY), through its wholly owned subsidiary, Kingston Oil Supply Corp., today purchased the assets of Labone Petroleum Sales Corp., d/b/a Greene County Oil and Gas, for an undisclosed price.

Labone Petroleum Sales Corp., headquartered in Cairo, N.Y., is a supplier of propane and heating oil to residential and commercial accounts in the Mid Hudson Valley area of New York.

According to David Motzkin, vice president of Kingston Oil Supply Corp., the purchase of these assets follows the company's strategy for continued growth in product sales and service in their marketing areas.

Getty Petroleum Corp., one of the nation's largest independent marketers of gasoline and petroleum products, markets in a 13-state area, Maine through Virginia. The company is also a major marketer of heating oil and is a wholesale distributor of a variety of petroleum products through its East Coast petroleum storage and distribution network.

TOKYO (NOV. 7) PR NEWSWIRE - Emery Worldwide announced today a streamlining of its international organization with all six of its offshore area officers reporting directly to the air freight carrier's newly appointed chairman and chief executive officer, Arthur C. Bass.

According to Bass, the reorganization is aimed at ensuring more rapid response to increased customer needs for moving shipments to and from the United States as well as between all sectors of the company's global network. It also will provide international shippers with customs brokerage, distribution, banking and consular services.

In making the announcement at a press conference here, Bass stressed that the reorganization is in direct response to Emery's continuing emergence as one of the most important air express and freight carriers throughout the world, especially for handling shipments between various intercontinental "freight lanes."

"Much of Emery's potential for the future is here in Japan, specifically, and internationally, in general," Bass said. "While we have a long history of conducting business internationally, we strongly believe this will be a most significant area of continuing growth. By reporting directly to me, our international organization will be able to respond quickly to customer needs in the very competitive global marketplace."

Bass also announced that Brian Costar, former vice president - international, has been transferred, at his request, to Auckland, New Zealand, where he is serving as vice president - Pacific Sector.

Emery is a diversified air freight company specializing in the delivery of urgent envelopes and small parcels as well as heavy freight. Emery's international structure consist of six geographic sectors, including Emery Worldwide, Japan, a wholly owned subsidiary with Yutaka Saito serving as president. The other sectors are Asia; the Pacific; Europe; the United Kingdom Africa, and the Middle East; and Latin America.

"As a pioneer in establishing international air freight operations over 31 years ago, we are especially proud of our 25-year record in Japan, the success of which was reflected recently when Emery was awarded more than half of this year's cargo charter flights by the U.S. Department of Transportation," Bass stated.

Emery Worldwide, based in Palo Alto, Calif., is a subsidiary of Consolidated Freightways, Inc. (NYSE: CNF), a $4-billion diversified transportation company with businesses in long-haul and regional trucking, air freight, ocean container freight and intermodal rail service.

CONTACT: Jim Allen of Emery Worldwide, (415) 326-1700; or Rocco Sacci of Manning, Selvage & Lee, (212) 213-7041, for Emery.

LANSING, MI (NOV. 7) PR NEWSWIRE - Marking another important step toward becoming the No. 1 customer-caring car company, Oldsmobile announced that the hearing- and speech-impaired may now contact the division's nationwide customer-assistance network using TDD (Telecommunication Device for the Deaf) equipment.

A TDD user makes a call by dialing 1-800-TDD-OLDS and then places the receiver on a TDD coupler. When the phone is answered, the user types a message onto a display screen and the call is transferred to Oldsmobile's TDD-equipped customer-assistance network.

To receive a call, a ringing or flashing signal alerts the user, who places the receiver on his or her TDD coupler. A message will then appear on the display screen and the user can type a response on the TDD keyboard.

"All of us at Oldsmobile have vowed to become the No. 1 customer caring car company," said Ivan Stebbins, assistant general sales manager for service. "This new toll-free number for the hearing- and speech-impaired marks another important step in that goal."

Oldsmobile also has toll-free numbers for customers that do not require the use of TDD equipment. Oldsmobile customers may dial 1-800-442-OLDS for questions or concerns about their vehicle and anyone interested in obtaining

more information about Oldsmobile, including sales brochures, can now call 1-800-242-OLDS.

"We are absolutely committed to customer satisfaction, and these new toll-free numbers will make us more responsive than ever to all our present and future customers," added Stebbins.

BRYN MAWR, PA. (NOV. 7) PR NEWSWIRE - On Sept. 13, Philadelphia Suburban Corp. (NYSE: PSC) announced a strategy to concentrate its future activities on water services.

In this connection, PSC said it intends to dispose of its non-water services businesses consisting of its information services, telemarketing, and energy engineering and software operations.

PSC today reported earnings from continuing operations in the third quarter of $1.8 million or $.24 per share, compared to $2.8 million or $.37 per share in the same period of 1989. For the nine months, earnings from continuing operations were $5.6 million or $.74 per share, compared to earnings of $7.3 million or $1 per share for the same period last year. For the third quarter, the operations to be discontinued reported a loss of $2.8 million or $.36 per share, compared to a loss of $.1 million or $.02 per share in the same period in the prior year. For the nine months, the discontinued operations lost $3.7 million or $.49 per share, compared to a loss of $1.6 million or $.23 per share in the same period of 1989.

The combined activities lost $.9 million or $.12 per share for the quarter, as compared to a profit of $2.7 million or $.35 per share in 1989. For the nine months, the combined activities had a profit of $1.9 million or $.25 per share as compared to a profit for the same period in 1989 of $5.7 million or $.77 per share. The results of operations for the quarter and nine months include the previously announced special charge for the write-off of software and other assets of $2.6 million or $.34 per share, of which $1.9 million or $.25 per share related to the discontinued operations.

Revenues from continuing operations in the third quarter were $26 million compared to $25 million for the third quarter of 1989. For the nine months, revenues from continuing operations were $76.5 million compared to $72 million for the same period a year ago.

Philadelphia Suburban Corp. operates Philadelphia Suburban Water Co., one of the nation's largest investor-owned water utilities, as well as four non-regulated operating subsidiaries that provide information and engineering

services mainly to utility and municipal customers.

#90311p4162 11/07/1990 ~PR Newswire

EXETER, N.H. (NOV. 7) PR NEWSWIRE - Tyco Laboratories, Inc. (NYSE: TYC) reported today that net income in its first quarter ended Sept. 30, 1990 reached an all-time high $35.0 million or 79 cents per share. This compares to the $27.7 million or 68 cents per share earned in the same period last year. Sales for the first quarter reached a record $741.2 million vs. $512.6 million a year ago.

First quarter sales and profits increased at the Fire Protection/ Flow Control segment. These increases resulted from the inclusion in this year's quarter of Wormald's Fire Protection operations since the date of their acquisition on Aug. 2, 1990 and good performances at Grinnell's Fire Protection and Flow Control operations.

Tyco's Packaging Materials group added to the performance as Ludlow made a strong contribution with higher sales and earnings levels compared to the year earlier quarter. Armin's results were lower than last year because of higher raw material prices, caused by the Middle East crisis, and its inability to completely pass on to its customers the full amount of these increases.

The company's Electrical and Electronic Components segment also contributed to the record first quarter results. Both Simplex Wire & Cable Company and Tyco's Printed Circuit Board Group reported higher earnings vs. the year earlier period.

Also, as previously announced, the company has changed its fiscal year end to June 30, beginning with fiscal 1991. Accordingly, comparative results for the year earlier fiscal quarter have been restated to reflect the new quarterly period.

Tyco is a worldwide manufacturer of fire protection/flow control systems, electrical and electronic components and packaging materials.

#90311p4166 11/07/1990 ~PR Newswire

AGORDO, ITALY (NOV. 7) PR NEWSWIRE - Luxottica Group S.p.A. (NYSE: LUX) today announced its results for the third quarter and nine months ended Sept. 30,

1990. The company's results, as presented herein, are in accordance with U.S. GAAP, and all dollar amounts are calculated at an exchange rate of $1.00 equals Lire 1170.7 in effect on Sept. 30, 1990.

Net sales for the quarter increased 14.6 percent to Lire 82,269 million (U.S. $70.3 million) from Lire 71,774 million (U.S. $61.3 million) in the third quarter last year. Net income was Lire 9,486 million (U.S. $8.1 million) compared with Lire 10,252 million (U.S. $8.7 million) in the comparable quarter last year. Earnings per American Depositary Share (ADS) for the third quarter of 1990 were Lire 421, equivalent to approximately $0.36.

For the nine month period ended Sept. 30, 1990, net sales increased 16.6 percent to Lire 264,631 million (U.S. $226.0 million) from Lire 226,877 million in the first nine months of last year. Net income rose 16 percent to Lire 35,858 million (U.S. $30.6 million) compared with Lire 30,860 million in the comparable period last year. Earnings per ADS for the first nine months of 1990 were Lire 1,592, equivalent to approximately $1.36.

Commenting on the results, Leonardo Del Vecchio, founder of Luxottica Group and chairman of the board and chief executive officer, said, "The quarterly results are in line with our projections and budgets. As usual, the third quarter was characterized by the shutdown of our industrial facilities for a month of summer holiday. Nevertheless, Luxottica succeeded in expanding sales, particularly outside of the United States."

Luxottica reported that since the beginning of the year the volume of eyeglass frames sold increased by about 12 percent to over 6.7 million frames. Designer lines accounted for about 27 percent of total sales. On a geographical basis, U.S. sales accounted for slightly less than half of total revenues, while Italy and the rest of the world accounted for 20 percent and 30 percent of sales, respectively.

The third quarter profit and loss figures have been affected by the unfavorable exchange rates of the dollar to the lira. Gross profit for the quarter rose 11.5 percent to Lire 55,158 million compared to Lire 49,491 in the year-ago period. Income before taxes decreased 7.2 percent to Lire 17,139 million versus Lire 18,478 during the third quarter of last year.

Luxottica Group is a world leader in the design, manufacture and marketing of high quality eyeglass frames in the mid- and premium-priced categories. The company's products which are designed and manufactured in four facilities in Italy, and include over 850 styles available in a wide array of colors and sizes.

#90311p4168 11/07/1990 ~PR Newswire

ABBOTT PARK, ILL. (NOV. 7) PR NEWSWIRE - Abbott Laboratories (NYSE: ABT) has introduced a new diagnostic test for managing breast cancer patients. Recently approved by the U.S. Food and Drug Administration, the product helps physicians determine a patient's prognosis and her prospects for response to hormonal therapy.

The new Abbott test measures the amount of progesterone receptor in cancerous tissue. Abbott, world leader in diagnostics and the leading supplier of cancer monitoring tests, has a similar product on the market that measures estrogen receptors.

Estrogen and progesterone receptors are protein molecules located in the cell nucleus. They bind tightly to the hormones estradiol and progesterone. Upon binding, the receptor/hormone complex stimulates cell growth. In receptor rich tumors, hormonal therapy inhibits growth.

"It is generally accepted medical practice that all breast tumors should be tested for estrogen and progesterone receptors prior to the selection of therapy," said David V. Milligan, Ph.D., vice president of diagnostic products R&D at Abbott. "Since most tumors that respond to hormonal therapy contain small amounts of estrogen or progesterone receptors, the clinician needs to know if the cancer is receptor rich or receptor poor."

The receptor status of a breast tumor can help predict if the cancer will respond to hormonal manipulation. Women with early-stage cancers that are progesterone or estrogen receptor positive, in most cases, have a favorable prognosis for successful therapy, according to Milligan. For those with advanced breast cancer, a response to hormonal therapy can be expected in up to 60 percent of cases when the cancer is receptor positive. However, in cases where the tumor is receptor negative, the response rate to hormonal therapy is only 20 percent.

Abbott Laboratories is a worldwide manufacturer of health care products employing 42,000 people. In 1989, the company's sales and net earnings were $5.4 billion and $860 million, respectively, with earnings per share of $1.93.

NIAGARA FALLS, NY (NOV. 7) PR NEWSWIRE - Sevenson Environmental Services Inc. (NASDAQ-NMS: SEVN) announced today that it has been awarded a $4.4 million contract under the EPA's Alternative Remedial Contracting Strategy Program (ARCS) for cleanup work at the Pinette's Salvage Yard Superfund site in Washburn, Maine.

The Pinette's site is an automobile salvage yard. In 1979 a portion of the site was used to dismantle electrical transformers. In the dismantling process transformer fluids containing PCBs were spilled on the ground.

Sevenson's contract includes the excavation and off-site incineration of approximately 500 tons of the most highly PCB contaminated soil. Another 2,800

tons of soil with lower PCB-contamination will be treated on-site using a solvent extraction process. Spent solvent and extraced PCB contamination from the process will be incinerated off site.

Project work will begin this year and be completed by the end of 1991. Sevenson provides a comprehensive range of field services for the remediation of sites and facilities contaminated by hazardous materials.

The company, which is headquartered in Niagara Falls, N.Y., operates in the United States and Canada. Since entering the site remediation business in 1979 the company has performed over 250 projects including projects at the Love Canal and at other Superfund sites.

#90311p4183 11/07/1990 ~PR Newswire

NEW YORK (NOV. 7) PR NEWSWIRE - Alan J. Hirschfield and Allan R. Tessler, co-chief executives of Financial News Network Inc. (NASDAQ-NMS: FNNIE) and Infotechnology, Inc. (NASDAQ-NMS: ITCHE), which owns 47 percent of FNN, today

announced that based on preliminary reviews of the financial and operating status of the companies, they will recommend offering for sale the companies' principal operations.

In order to effect the most valuable and timely transactions for both the creditors and the shareholders of FNN and Infotech, the investment banking firm of Wertheim Schroder & Co., Inc. has been retained. Wertheim Schroder is internationally known for its expertise in media property mergers, acquisitions and divestitures.

Hirschfield and Tessler stated: "Wertheim has confirmed for us that FNN remains a very valuable franchise, and is one of the top 10 leading cable programming networks in the country. To date, indications of interest in buying FNN have been received from many of the major national and international media companies. Even during this difficult period, FNN continues to increase its subscriber base and gross revenues. More than 80 percent of its subscribers are under long-term contracts at increasing subscriber rates."

"We also believe that FNN's market data companies are quite valuable franchises, and many inquiries have been received regarding their sale. The companies' investment bankers expect to have available, in the near future, offering memoranda for prospective purchasers of FNN and the other businesses. They hope to receive acceptable offers and to conclude negotiations of the contracts for such sales by year end," Hirschfield and Tessler added. The CEOs noted that at this preliminary stage in the sales process there can be no assurance that any such sales will be completed.

"We believe the prices that FNN and Infotech businesses are anticipated to command could satisfy the companies' financial obligations," they continued.

FNN currently has outstanding approximately $49.5 million principal amount of bank loans and approximately $88 million of equipment lease obligations. Infotech currently has outstanding approximately $20.7 million principal amount of bank loans.

"Discussions with our banks are ongoing," stated Hirschfield and Tessler. "We hope to obtain a 90-day moratorium on interest and principal payments and on any defaults. Furthermore, we have met with representatives of substantially all of the lessors of equipment to the companies and are currently in negotiations with them to obtain a 90-day moratorium on all leasing payments. Although there can be no assurance that we will obtain these moratoriums, we remain optimistic about both of these negotiations."

The chief executives also noted that serious interest has been expressed by several parties in the purchase of Infotech's 97 percent owned United Press International, and/or some of its lines of business.

Hirschfield and Tessler added: "As a result of recent contract cancellations and other ongoing factors, UPI currently has a substantial negative monthly cash flow. It has been necessary to make some painful decisions regarding layoffs and reduced compensation to continuing employees, in order for UPI to remain in business until suitable purchasers are identified."

FNN and Infotech previously announced that operating cash flows at the companies were insufficient to meet operating expenses or to cover maturing obligations with respect to the bank loans of the two companies and FNN's lease obligations. Hirschfield and Tessler said: "Following the streamlining measures currently being implemented at the companies, we believe cash flows will fall more closely in line with costs. However, the companies may require additional cash availability during the contemplated sales process."

Hirschfield and Tessler commented: "Overall, we are satisfied by the progress we have made since the boards of directors appointed us on October 24, at preserving the values of the FNN and Infotech businesses. No one is ever pleased with the hard realities of streamlining a business, but when such steps are necessary to ensure the very viability of the companies, they must be done," the CEOs continued. "Our primary objective is to maintain the substantial franchise value of FNN. To do this requires making the necessary overhead reductions that enable the great majority of our employees to remain on the job," they added.

Hirschfield and Tessler added: "We are distressed by many of the unfounded rumors surrounding current events at the companies. First and foremost, any and all allegations concerning fraud or misappropriation of funds at the companies have been, and are being, taken extremely seriously by the boards of directors and have been, or are being, thoroughly investigated by the companies' outside auditors. In addition, the companies are cooperating with the Securities and Exchange Commission's inquiries that we have previously disclosed. To date, inquiries by a special committee of the board of FNN, assisted by auditors and legal counsel, have found only one incident in which company funds were improperly paid and not properly identified on the books of the company. That incident, previously disclosed by FNN, involved the receipt by FNN's former chief financial officer of compensation payments, which were not properly authorized, in the approximate amount of $795,000."

FNN and Infotech collectively own 51 percent of The Learning Channel. In addition to its interest in FNN and UPI, Infotech owns 51 percent of Shark Information Services Corporation, the other 49 percent of which is owned by FNN, and has investments in a number of other media, communications and biotechnology companies.

Infotechnology, Inc. is an integrated communications and information company positioned to meet the needs of businesses and consumers with fast, easy-to-use information products of economic value to its customers.

Financial News Network provides three services to more than 35 million homes on 3,500 cable systems throughout the United States and Canada. The television programming services are FNN:BUSINESS (business news and personal financial management) and FNN:SPORTS (sports information and news), and its market data service is FNN:Data Broadcasting (stock quotes and market information to personal computers). FNN also operates a business radio network.

#90311p4184 11/07/1990 ~PR Newswire

BUFFALO, N.Y. (NOV. 7) PR NEWSWIRE - With five of its nine car lines showing improvements, Ford Motor Company's Lincoln-Mercury Division registered a slight year-over-year increase in October sales in the area.

Lincoln Continental's 35 percent year-over-year increase led the list, with Lincoln Mark VII, Lincoln Town Car, Mercury Sable and Mercury Grand Marquis also showing gains. The newly introduced Mercury Capri contributed to the increase.

For the month -- although overall division sales were lower -- the Grand Marquis showed a strong 59 percent sales increase, along with increases in Mark VII and Mercury Tracer.

The Ford Division sales story for the year continues to be the new Explorer compact sport utility vehicle, which is responsible for a 31 percent year-to-date improvement for the division in that segment of the market.

Ford Aerostar played a strong supporting role, with a 7 percent increase so far in 1990. Both trucks also were up in October, compared to a year ago. On the passenger car side, Ford Crown Victoria showed a year-to-year increase.

Nationally, Ford Motor Company (NYSE: F) sales were down somewhat for the calendar year, although the final 10-day period of October exhibited a strong increase, with total vehicles sales up 9.2 percent (cars up 12.1; trucks up 5.2).

Roger Olsen, Ford Division's Buffalo District sales manager, said, "Explorer sales in October were nearly double last year's Bronco II sales. Together with the strong showing by the Aerostar, that performance has helped us maintain our momentum in the face of a very tough market."

Steve Robida, sales manager for Lincoln-Mercury's New York District, added, "We are continuing to see strong improvement in the Tracer, along with continuing strength in our luxury cars. Nationally, October was the first

month since February 1989 that the Tracer and Escort both had sales increases over their year-ago levels. The Tracer results nationally were mirrored in Buffalo area sales, which showed Tracer up 17 percent for October."

MINNEAPOLIS (NOV. 7) PR NEWSWIRE - ADC Telecommunications, Inc. (NASDAQ: ADCT) today estimated record sales and orders for the quarter and year ended Oct. 31 1990.

Estimated sales of $71.7 million for the quarter ended Oct. 31, 1990, represented a 22 percent increase over the $59.0 million recorded in the quarter ended Oct. 31, 1989. Estimated orders of $76.1 million for the quarter ended Oct. 31, 1990, were 18 percent higher than the $64.6 million recorded in the quarter ended Oct. 31, 1989.

For the year ended Oct. 31, 1990, estimated sales were $259.8 million, compared to $196.4 million for the year ended Oct. 31, 1989, reflecting a 32 percent increase. Estimated orders of $265.4 million for the year ended Oct. 31, 1990 were 29 percent greater than the $206.4 million in orders reported for the year ended Oct. 31, 1989.

The quarter and year ended Oct. 31, 1990 include estimated sales and orders for Kentrox Industries, Inc. (Kentrox), purchased by ADC in July 1989, and American Lightwave Systems (ALS), purchased by ADC in July 1990.

Due to the timing of these acquisitions, sales and orders amounts for Kentrox are included in 1989 results for only four months and no ALS amounts are included in 1989 results. Final sales, orders and earnings for 1990 will be announced in mid-December.

ADC Telecommunications, Inc. designs, manufactures, and markets a wide variety of circuit management devices, transmission products, and network management systems used by telephone companies, broadcast networks, and large private telecommunications networks.

NOTE: All amounts are estimated as of Nov. 7, 1990.

CONTACT: Aimee Gallogly of ADC Telecommunications, (612) 893-3338.

#90311p4188 11/07/1990 ~PR Newswire

WASHINGTON (NOV. 7) PR NEWSWIRE - The United States and Turkey today signed a new bilateral aviation agreement that provides significant economic

opportunities for the airlines of both countries.

Under the agreement, signed by Secretary of Transportation Samuel K. Skinner and Turkish Minister of Transportation and Communications Cengiz Tuncer, Turkey will eliminate restrictions on U.S. air transport services between Europe and Turkey.

"This agreement provides opportunities for the airlines of both countries to expand and develop the U.S.-Turkey air market, leading to increases in passenger travel and air cargo trade between the two countries" Skinner said. "We also expect it will encourage U.S. airlines to increase their promotion of Turkey to the U.S. tourism industry and the American public, leading to more Americans traveling to Turkey."

Major provisions in the document state that each country may designate one or more airlines to operate between the U.S. and Turkey, and neither country may unilaterally restrict capacity, frequency, or type of aircraft used. In addition, each country's airlines may establish sales offices in the other country.

There are several "first-time provisions" in the agreement, which: -- Provide for a separate route for all-cargo services, permitting each country three points of its choice. For combination services, the U.S. has rights to Ankara, Istanbul and Izmir, and Turkey can choose three U.S. points.

-- Cover charters, which are subject to the rules of the country in which the traffic originates.

-- Contain the U.S. model computer reservation systems (CRS) language, to assure non-discrimination within and competition among CRS systems.

Pan American World Airways has operated service to Turkey since l947 and presently flies from New York to Istanbul and Ankara via Frankfurt. Trans World Airlines, which started service to Turkey in September l988, operates between New York and Istanbul via Frankfurt. Turk Hava Yollari (THY) introduced its U.S. service in August l988 and operates between New York and Istanbul via Brussels.

COLUMBUS, OH (NOV. 7) PR NEWSWIRE - E. Gordon Gee has been elected a director of Banc One Corporation (NYSE: ONE), it was announced today by John B. McCoy, chairman and chief executive officer of Banc One Corporation.

E. Gordon Gee is president of The Ohio State University, which includes a

central campus in Columbus, and regional campuses in Lima, Mansfield, Marion, Newark, and Wooster, Ohio. The University's total enrollment is more than 60,000.

Prior to becoming the eleventh president of The Ohio State University in Sept. 1990, Gee had served as president of University of Colorado since July 1985. He had been president of West Virginia University from Nov. 1981 until mid-1985 and had served as dean and professor of the university's College of Law from 1979 until 1981. Prior to that, Gee had been with J. Reuben Clark Law School of Brigham Young University for four years where he served as associate dean and professor. In 1974-75, Gee was a judicial fellow and senior staff assistant for the Chief Justice of the U.S. Supreme Court and from 1973-74, he was assistant dean for administration at University of Utah College of Law.

Gee, 46, received a bachelor's degree in history from the University of Utah in 1968. He then received a law degree in 1971 and a doctorate in education in 1972 from Columbia University. A recipient of honors in the field of law and education, Gee also serves on numerous boards and commissions, including the board of directors of the American Council on Education, the Advisory Council of Presidents to the Association of Governing Boards of Universities and Colleges; and the Corporate Board of the Central Ohio Council, Boy Scouts of America. He is married, has one daughter and resides in Bexley, Ohio.

Banc One Chairman McCoy said, "With Gordon Gee's outstanding academic background and professional career, he will be an important addition to Banc One's board of directors." The addition of E. Gordon Gee increases the board of directors of Banc One Corporation to thirteen members.

Banc One Corporation has assets of $28.4 billion and operates 51 affiliate banking organizations with 747 offices in Indiana, Kentucky, Michigan, Ohio, Texas and Wisconsin.

MELBOURNE, FLA. (NOV. 7) PR NEWSWIRE - American soldiers soon will have a new portable filmless camera system supplied by Harris Corporation (NYSE: HRS) that enables them to transmit clear photographs from remote locations to headquarters via radio waves -- within seconds.

The U.S. Army Communications Electronics Command recently awarded Harris RF Communications Group a $5.4 million contract for an electronic filmless camera system (EFCS). Under the contract, Harris will integrate and supply 126 manportable transmission systems and 36 base stations to receive the still images from remote locations around the world.

The system will allow soldiers to take digital still images without film and rapidly transmit them over HF, UHF and VHF radios or telephone lines. Using the filmless camera and portable terminals, soldiers can send pictures, text, voice and data from remote locations anywhere in the world, and transmit them back to headquarters operations.

Harris' EFCS is based on new, commercial still-video camera technology and the company's existing line of image data transmitters, known as Digital Video Imaging Transmission System (DVITS). DVITS combines the capabilities of still-frame image transmission, image processing and radio communications in one unit.

Harris RF Communications Group, located in Rochester, N.Y., is a world leader in the design, manufacture, installation and support of advanced HF, VHF and UHF radio equipment, digital video imaging transmission systems, turnkey systems and networks.

Harris Corporation, with worldwide sales of more than $3 billion, is focused on four major businesses: Electronic systems, semiconductors, communications and office equipment.

HIGHLAND PARK, MICH. (NOV. 7) PR NEWSWIRE - As the nation once again focuses on the importance of fuel efficiency and its dependence on foreign oil, Chrysler Corporation (NYSE: C) continues on a course it established more than 10 years ago.

"The American auto industry was hit hard in the last oil crisis," said Robert A. Lutz, president of Chrysler Motors. "Consequently, Chrysler vowed at that time to be ready for any fluctuation in oil prices with a solid strategy that is flexible enough to offer fuel- efficient powertrains that respond to a

variety of efficiency demands, and most importantly, respond to what customers want."

Today, Lutz said that means providing customers a choice of 4- or 6-cylinder engines on almost every car in the fleet.

"Since 1975, Chrysler has doubled its corporate fuel efficiency by downsizing vehicles, reducing vehicle weight and switching to front- wheel-drive passenger vehicles. All of our engines, thanks to a myriad of continual improvements, run more efficiently than their predecessors," said Lutz.

Arguably, no single area has provided more headway to improving overall vehicle efficiency than powertrain development. "The most significant powertrain improvement has been increasing engine efficiency with a number of technological advancements, chief of which has been changing from carburetors to fuel injection," said Chris Theodore, executive engineer of Powertrain Engineering.

Fuel injection is a more efficient fuel delivery method than carburetors and electronic fuel injection is even more refined than mechanical. The two types of electronic fuel injection are multi-point fuel injection (MPI) and throttle-body fuel injection (TBI). MPI operates with a separate injection nozzle for each cylinder, making it the most efficient form of fuel injection on the market today. TBI, on the other hand, has one nozzle at the top of the throttle body. With only one exception (5.9 liter V-8 carbureted Jeep Grand Wagoneer engine), all of Chrysler's engines are fuel injected with the majority utilizing MPI.

Typically, today's customers demand more performance with a high level of efficiency and Chrysler has responded with engines that produce more power and miles per gallon than many of its competitors.

DENVER (NOV. 7) PR NEWSWIRE - MinVen Gold Corp. (AMEX: MVG) today announces that voters in South Dakota rejected a proposed anti-mining initiative in state-wide elections held yesterday. The initiative would have restricted the amount of land available for open-pit gold mining operations in the Black Hills of South Dakota. These results represent the third defeat of anti-mining initiatives in the State of South Dakota in the last four years.

"The defeat of the initiative is a significant vote of confidence by the public for the responsible mining practices now employed by the various companies operating in the State of South Dakota and for the regulatory

authorities which help supervise the mining industry," said James A. Anderson, president and chief executive officer of MinVen Gold.

MinVen Gold is a publicly held, Denver-based gold mining company with interests in five operating mines in the United States and Canada, including the 100 percent owned Gilt Edge Mine and 33-1/3 percent owned Golden Reward Mine in South Dakota.

MinVen Gold's shares are traded on the American, Toronto and Vancouver stock exchanges under the symbol MVG.

PHILADELPHIA (NOV. 7) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE), in cooperation with emergency management agencies in Berks, Chester and Montgomery counties, has begun a $1.5 million improvement project on the 165 emergency warning sirens located within the Limerick Generating Station 10-mile emergency planning zone (EPZ).

The improvements include new control equipment at each siren location and new computerized siren controllers in the communications centers of the three counties. The work is being performed by Acoustic Technologies Inc., a Boston firm which has installed similar systems at other nuclear plants.

Craig Adams, manager of emergency preparedness at PE, said, "The present siren control system was the best available when it was installed in 1984. The improvements we are making now will provide even more accurate information, and faster monitoring of siren status and increased ease of operation for the counties."

PE installed and maintains the siren system, but the operation of the sirens is the responsibility of the emergency management officials in the three counties.

Nuclear plant operators are required by federal regulation to provide a method for local agencies to signal the public in the event of an emergency.

The sounding of the sirens would be a signal to tune a radio or TV to one of the county Emergency Broadcast Stations (EBS) for a message on the nature of the emergency.

EBS stations are listed in information brochures recently distributed by PE and the counties to all residents of the Limerick EPZ. The same emergency information is also found in the blue pages of local phone directories.

NEW YORK (NOV. 7) PR NEWSWIRE - Sterling Bancorp (NYSE: STL), parent bank holding company of Sterling National Bank & Trust Company of New York, reported consolidated net income for the three months ended Sept. 30, 1990 of $431,000 compared with a net loss of $4,133,000 for the same period in 1989. The third quarter net income was 7 cents per average common share, vs. a net loss of 66 cents for the like period 1989.

For the nine months ended Sept. 30, 1990, consolidated net income totalled $1,465,000 vs. $6,124,000 net loss, same period 1989.

Theodore H. Silbert, chairman, attributed the return to profitability "to higher net interest income resulting from the elimination of the negative interest spread related to the financing in 1989 of the bank's short term U.S. Treasury note portfolio. Also, net funds arising from the termination of this portfolio were redeployed on a more profitable basis." He stated that "the net loss for the third quarter 1989 included a $3.2 million tax provision for the settlement reached with the Internal Revenue Service for the years 1977 through 1981."

Sterling National Bank & Trust Company of New York, established in 1929, is the principal subsidiary of Sterling Bancorp. During the first nine months of 1990, the bank maintained its high asset quality, its high level of liquidity and its strong capital position.

TAMPA, FLA. (NOV. 7) PR NEWSWIRE - D. Mark Olson has been named president and chief executive officer (CEO) of INVEST Financial Corp., a subsidiary of Kemper Financial Companies, Inc., announced James R. Boris, chairman of INVEST's board of directors.

INVEST is widely recognized as the premier provider of annuities, mutual funds and unit investment trusts to clients of financial institutions. INVEST Centers are located in about 200 banks nationwide.

"INVEST has expanded its number of branch locations to more than 730, an increase of 40 percent in the past year," said Boris.

"Mark Olson's appointment as president and CEO confirms our commitment to the

long-range plan for additional expansion and growth at INVEST, which began 18 months ago," he said.

Olson, 42, previously served as executive vice president and chief operating officer of INVEST. He has been with INVEST since June 1989. Olson is a member of INVEST's board of directors. Before joining INVEST, Olson held positions with Kemper Financial Services and Shearson Lehman Brothers, with a total of 15 years experience in a series of expanding capacities in the financial services industry. He holds a degree in economics from Texas A&M University.

INVEST, which founded its industry in 1982, is the largest and most experienced company of its kind with branches in 41 states. Alternative products and services sold at INVEST Centers generate fee income for banks that are subscribers in the INVEST network. Kemper Financial Companies, Inc. a subsidiary of Kemper Corp. (NYSE: KEM), owns more than 90 percent of INVEST Financial Corp.

WIXOM, MI (NOV. 7) PR NEWSWIRE - A 22-percent increase in sales of the all-new 1991 Ford Escort, along with continued strength in the luxury car and light truck markets, helped Ford and Lincoln-Mercury Divisions' Detroit Districts -- covering most of Michigan -- finish October with strong sales momentum.

Lincoln Continental and Lincoln Town Car sales in October increased 64 percent and 4 percent over 1989, respectively.

In Ford Division's Detroit District, sales in the compact sport utility segment were up 118 percent for October compared to a year ago. The all-new Explorer replaced the Bronco II as Ford's entry in that segment earlier this year.

Additionally, sales of the Ford Aerostar, up 34 percent in October, contributed to a 3-percent improvement in retail truck sales for the month compared to a year ago.

"Nationally, October was the seventh time in the past eight months that Ford's share of the truck market increased over a year ago," said Richard Arb, Ford Division's Detroit District sales manager.

Don Huffman, sales manager for Lincoln-Mercury Division's Detroit District, said, "With greater availability of the all-new 1991 Mercury Tracer and Ford Escort, along with continuing strength in our luxury cars, we are confident

that Ford's car market share will improve over the balance of the year."

#90311p4213 11/07/1990 ~PR Newswire

OKLAHOMA CITY (NOV. 7) PR NEWSWIRE - Hadson Energy Resources Corporation (NASDAQ: HERC) today announced net earnings for the quarter ended Sept. 30, 1990 of $3.5 million, or $.58 per share, on total revenue of $13.1 million. This compares with a net loss of $195,000, or $.06 per share, on total revenue of $5.5 million for the third quarter of 1989. For the nine months ended Sept. 30, 1990, the company reported net earnings of $3 million, or $.52 per share, on total revenue of $26.8 million as compared to net income of $166,000 or $.05 per share, on total revenue of $16.9 million for the first nine months of 1989.

Cash flows provided by operating activities (before change in working capital) increased to $8.9 million for the quarter as compared to $1.8 million for the third quarter of 1989. For the nine months periods ended September 30, 1990 and 1989, such cash flows were $16.6 million and $5.9 million respectively.

The significant increases in earnings and operating cash flows experienced by the company during the current quarter are principally attributable to an increase in oil production from the company's Harriet Field, offshore Western Australia and an increase in the average price received for the company's domestic and international oil production. As the result of the acquisition of an additional 10.45 percent interest in late 1989 and a successful workover program initiated in the second quarter of 1990, the company's Harriet oil production increased to 264,000 barrels during the current quarter as compared to 125,000 barrels for the third quarter of 1989.

For the quarter, the average price received for the company's domestic and international oil production was $23.93 and $37.75, respectively. These prices represent increases of 29 percent and 109 percent, respectively, in relation to the prior year quarter. The company's international production is sold pursuant to a "net back" contract which provides for pricing based upon the market price of the products which are refined from the crude. During the quarter, the price received pursuant to this contract was consistently at a premium to the quoted price for West Texas Intermediate.

William C. Rankin, vice president and chief financial officer, stated, "We had projected that third quarter earnings and cash flows would be substantially improved as a result of the Harriet workover program, but the combined effect of the increased production with higher price levels has been remarkable. Total revenue and cash flows for the third quarter approximated those levels achieved by the company for the first half of the year. Based upon pricing and production levels which we are currently experiencing, favorable financial

results for the fourth quarter are anticipated."

Hadson Energy Resources Corporation is an independent energy company engaged internationally in crude oil and natural gas exploration, development and production.

#90311p4214 11/07/1990 ~PR Newswire

ATLANTA (NOV. 7) PR NEWSWIRE - Courier Dispatch Group Inc. (NASDAQ: CDGI) announced today that its board of directors had rejected as inadequate the offer from the John H. Harland Co. (NYSE: JH) to acquire the balance of the company's common stock at a price of $3.75 per share through an all-cash merger.

The board's determination that it could not recommend such an offer to its stockholders was based on advice from its financial advisor, The Robinson-Humphrey Co. Inc. On Nov. 6, the closing bid and ask prices for the company's common stock were $3.50 and $4.00, respectively.

According to a recent filing with the Securities and Exchange Commission, John H. Harland Co. currently owns 603,750 shares of Courier Dispatch common stock. In addition, on Oct. 2, John H. Harland Co. entered into a stock purchase agreement with certain shareholders of the company, comprised primarily of the chairman of Courier Dispatch and his family, to acquire 675,986 additional shares of Courier Dispatch common stock for $4.00 per share (subject to upward adjustment under certain circumstances) in cash. Such acquisition would raise John H. Harland Co.'s ownership level to a total of 1,279,736 shares or approximately 51 percent of the current outstanding stock of the company. Harland also reported that, in connection with the execution of such agreement the selling shareholders appointed Harland as their proxy with respect to such shares of common stock.

John H. Harland Co., headquartered in Decatur, Ga., is a major national participant in the fields of finance and education whose principal products include M.I.C.R. encoded checks, deposit slips and related forms for financial institutions and their customers.

Courier Dispatch Group Inc. is a full-service courier organization providing both scheduled and on-call ground and air courier services for transporting time-sensitive documents for its customers. The company conducts air courier service to approximately 65 cities, while operating ground courier facilities in Alabama, Florida, Georgia, Maine, Massachusetts, Minnesota, New Hampshire, North Carolina, North and South Dakota, and Rhode Island.

#90311p4215 11/07/1990 ~PR Newswire

ATCHISON, KS (NOV. 7) PR NEWSWIRE - Though down from a year ago, Midwest Grain Products, Inc. (NASDAQ-NMS: MWGP) announced that results for its first quarter ended Sept. 30, 1990, were up considerably over each of the last three quarters, heightening expectations of a favorable turnaround in profitability.

Net income for the quarter was $2,287,000, or 35 cents per share, on sales of $45,910,000. Net income for the same period last year was $3,085,000, or 47 cents per share, on sales of $48,769,000.

"While we did not return to that level of profitability, our approach to that rate reflects the onset of positive developments," Ladd Seaberg, president and CEO, said.

The most significant development was in the company's alcohol operation. According to Seaberg, fuel alcohol unit sales in the first quarter increased by almost 89 percent compared to a year ago as demand for that product surged in the wake of rising gasoline prices.

Along with volume increases, prices for fuel and high grade industrial alcohol went up also, adding significantly to first quarter profitability. Beverage alcohol prices improved slightly, Seaberg said, noting that while unit sales for this product were 4 percent below last year's first quarter, they were 6 percent above the fourth quarter sales.

Premium wheat starch sales continued upward, exceeding last year's first quarter volume by 9 percent. "This has been a consistently profitable market, and we have no signs to suggest it will change," Seaberg stated. "Rather," he added, "we remain encouraged that more opportunities will unfold as we identify and develop new markets, especially for our many varieties of specially modified wheat starches."

Though output was much lower than the same period a year ago, flour production rose 36 percent over the fourth quarter as the result of increased flour export sales. The company has since entered into additional export contracts that extend to May of 1991 and are expected to boost flour volume and margins to last year's first quarter levels.

Unit sales of vital wheat gluten declined 9 percent compared to both the first and final quarters of fiscal 1990 as competition from foreign imports remained strong. The adverse impact that competitive pressures and lower gluten prices had on profitability was softened by lower raw material costs for wheat from this summer's bumper harvest.

"These lower costs are now allowing us to compete more aggressively, and we are receiving indications that our strategies to protect our customer base are increasingly effective," Seaberg said. He added that decreased raw material costs from this fall's large corn and milo harvest presently are helping to improve the efficiency of overall operations.

Seaberg expressed optimism about continued improvements in all major product lines based on current market factors and the company's solid financial position.

#90311p4216 11/07/1990 ~PR Newswire

BOCA RATON, FL (NOV. 7) PR NEWSWIRE - GPT, a subsidiary of the General Electric Company, plc of the UK, and Siemens AG of Germany announced today that they have reached an advanced stage in their negotiations to merge their public telecommunications operations in the U.S. in a joint venture which will be North America's third largest public network supplier. A further announcement will be made shortly.

To be known as Siemens Stromberg-Carlson, the joint venture will be formed by bringing together Siemens Communication Systems, Inc. and Stromberg-Carlson Corporation. Chief executive officer will be Volker Jung, president and chief executive officer of Siemens Communication Systems.

Stromberg-Carlson is part of GPT in which Siemens has a 40 percent shareholding.

The joint venture, with the majority of its 4,000 employees located in Florida Arizona, New Mexico and New York will design, develop, produce and market computerized public telephone switches, packet switching and transmission systems.

The strategy which has been established for Siemens Stromberg-Carlson is to:

-- coordinate Siemens Stromberg-Carlson's research and development activities with those of its parents;
-- support and develop the Siemens EWSD and the Stromberg-Carlson DCO public switches and transmission equipment to service existing and future customers. Programs will be put in place to ensure that these products evolve to take advantage of the enhanced telecommunications facilities envisaged for the future;
-- integrate the existing Siemens and Stromberg-Carlson sales and marketing activities to give all potential customers full

access to the combined product range.

Siemens and Stromberg-Carlson already supply North America local telephone companies and voice and data carriers, including six of the seven Regional Bell Operating Companies (RBOCs), GTE and several hundred independent holding and operating companies. Other key markets are interexchange carriers and data communications companies.

#90311p4217 11/07/1990 ~PR Newswire

JENKINTOWN, PA (NOV. 7) PR NEWSWIRE - Flagship Financial Corp.'s (NASDAQ-NMS: FLGF) management announced today that after deducting $13 million of previously disclosed non-cash charges, the company reported a net loss of $10.9 million for the three months ended Sept. 30, 1990, or $3.16 per share.

This compares with $1.5 million of net income or $.42 per share for the same period in 1989. As discussed in a prior release, the charges to earnings include the write-off of $10 million of goodwill and the accelerated addition of $3 million to provisions for loan losses.

For the nine months ended Sept. 30, 1990, the company reported a net loss to $9.9 million or $2.85 per share, as compared to net income of $4.6 million or $1.34 per share in 1989.

In addition to the anticipated charges, results of operations included a combination of non-recurring expenses stemming from the company's decision to close its New Jersey retail outlets as well as Frank P. Felton 3rd's decision to take early retirement as chairman and chief executive officer of Flagship after 27 years of service. On a combined basis, these expenses totaled $1.2 million.

Commenting on these results, John M. Mason, the newly appointed chief executive officer, said, "As part of our strategic plan, we decided to close our New Jersey operations, accelerate the building of our loan loss reserves, and charge off a portion of goodwill in the third quarter to clear the way for more favorable profit trends in the future.

"Importantly, these charge-offs were non-cash items and therefore do not affect the core earnings power of the company. We believe that these restructuring decisions strengthen our financial condition in a weakening economy and will significantly enhance our competitive position when the economy improves."

Net interest income increased 15 percent to $6.7 million for the quarter, from $5.8 million during the same quarter last year. The net interest rate spread also showed a marked improvement from year-ago levels, with an average spread of 2.33 percent during the quarter vs. 2.06 percent for the September 1989 quarter.

Total provision for loan losses was $3.2 million for the quarter, as compared to $100,000 for the same quarter in 1989 and $1.7 million for the second quarter of 1990.

As discussed in prior disclosures, this increase resulted from management's decision to build loan loss reserves to levels that more closely approximate commercial bank standards and to provide protection from an increase in non-performing and potential problem loans. After the provision, the allowance for loan losses totaled $7 million, or .98 percent of total loans.

Non-performing assets at Sept. 30, 1990, were $15.1 million, or 1.60 percent of total assets. This represents an increase from June 30 and primarily reflects the addition of two loans totaling $1.3 million that were disclosed in the company's 1989 Form 10-K as potential problem loans.

"The increase in non-performing loans was not unexpected given the continued softening of the economy and real estate market. We are aggressively managing this portfolio and believe that our ratio of non-performing loans remains significantly below our peers," Mason said.

At Sept. 30, the company's capital position remained strong, with tangible capital equaling 8.45 percent of total assets. Both of Flagship's thrift subsidiaries continued to substantially exceed the federal government's fully phased-in capital requirements.

Non-interest expenses were up during the quarter due primarily to the non-recurring expenses related to the closure of the New Jersey facilities and Felton's decision to retire. Without these charges, non-interest expenses as a percentage of assets would have been 2.18 percent and 2.10 percent for the three and nine months ended Sept. 30, 1990, respectively.

On Oct. 15, 1990, the board of directors declared the regular quarterly common stock cash dividend of $.10 per share. This dividend will be paid on Nov. 16 to Flagship stockholders of record on Nov. 2.

Flagship Financial, which ranks among the 10 largest publicly traded thrift institutions in Pennsylvania, conducts business through its wholly owned subsidiaries First American Savings and Brandywine Savings Bank.

First American operates 12 full-service and three "convenience" branches in Pennsylvania and New Jersey; its two New Jersey full-service offices are expected to be closed by mid-November. Brandywine Savings operates nine

full-service branches in Chester County, Pa. The common stock of Flagship Financial is traded on the NASDAQ National Market System under the symbol FLGF.

#90311p4220 11/07/1990 ~PR Newswire

MIAMI (NOV. 7) PR NEWSWIRE - Pan American World Airways and Pan Am Express will increase the number of daily departures out of Miami from 63 during the peak winter season last year to 107 this year, Thomas G. Plaskett, chairman and chief executive officer of Pan Am Corporation, the parent company of the two airline subsidiaries, said at a press conference here today.

The 70 percent increase since last year includes additional frequencies in existing markets, new domestic and international flights being inaugurated by Pan American World Airways, and the start-up of service in 10 short-haul markets by Pan Am Express.

Plaskett, who stressed the importance of South Florida to Pan Am's long-term strategy, said that, as a result of a recent agreement with United Airlines to form a marketing alliance and to transfer certain North Atlantic route authorities to United, Pan Am will accelerate its planned increase in services in Miami and Latin America, including plans for a more new nonstop Miami-Sao Paulo service and new flights between Miami and Recife, Brazil.

In addition, new services to be operated by Pan American World Airways this winter include Miami to Managua, Nicaragua; San Salvador, El Salvador; Belize City, Belize; San Pedro Sula, Honduras, Detroit and Newark, with new frequencies added in markets between Miami and Los Angeles, Buenos Aires, and Orlando and Tampa.

Pan Am Express, which first inaugurated service last May between Miami and Key West, Fort Myers, Sarasota, Melbourne and West Palm Beach, has increased its schedule this winter to include service from Miami to Naples, Freeport, Marsh Harbor and Treasure Cay.

Plaskett said the carrier also plans flights in several international markets for which it has applied and awaits approval: Miami to Cancun, Bogota, Lima, Cali, Guayaquil and Toronto.

"We have been pleased with the significant increases in traffic, load factor and revenues since the build-up of our Miami hub began two years ago," Plaskett said, "Now, the broad-based cooperative agreement that we have signed with United Airlines will allow us to focus even more of our attention on our Florida and Latin American services."

Plaskett said the United agreement will benefit Pan Am's Miami services in several ways: by allowing the carrier to redeploy aircraft to Miami-originating flights; by providing the traveling public with more convenient service as a result of plans to coordinate schedules with United Airlines in Miami; and by creating one of the most extensive air networks in the world as a result of the joint participation of the carriers' two frequent flyer programs and joint marketing programs.

Plaskett reiterated the company's long-term commitment to Miami, stating that the company plans a steady increase in services over the next several years.

VALHALLA, NY (NOV. 7) PR NEWSWIRE - ComponentGuard, Inc. (NASDAQ: PLUGC, warrants: PLUWC) announced today that it received a proposal from Warranty Holdings Corp. (WHC) to acquire by merger all of the outstanding shares of common stock of ComponentGuard, Inc. (CGI) not held by WHC at a price of 50

cents per share. WHC is a corporation formed solely for the purpose of consummating the acquisition.

WHC indicated that the merger would be subject to the execution of a contract containing representations, warranties and covenants reasonably acceptable to WHC and its counsel, to the arrangement of the financing necessary for the consummation of the transaction and to the final approval of the board of directors of WHC.

The arrangements necessary for financing would include: (i) the assumption by WHC, or the conversion into shares of WHC common stock, of an aggregate of $2,500,000 principal amount of convertible subordinated notes of CGI; (ii) the exchange by certain Swiss institutional holders and certain "accredited" Unites States holders of CGI common stock of their CGI common stock for WHC common stock and (iii) the private placement of securities of WHC, the net proceeds of which would be approximately $4,750,000 to $6,000,000.

The proposal was made pursuant to an agreement entered into among WHC, Robert Minnick, the founder president and a director of CGI, and Peter Friedli, managing director of Ascent Holding A.G., a Switzerland-based investment fund which in July 1990 purchased from CGI a $1,500,000 principal amount convertible subordinated note convertible into 3,000,000 shares of common stock of CGI at 50 cents per share and a warrant to purchase 3,000,000 shares of CGI at $1.25 per share.

In addition, Ascent owns 335,000 shares of CGI common stock and Friedli is president of another fund which owns 675,000 shares of CGI common stock.

Robert Minnick is currently the sole shareholder, president and director of WHC and will, prior to the proposed merger, transfer the 4,675,000 shares of CGI common stock owned by him to WHC. Pursuant to the agreement between WHC, Minnick and Friedli, the board of directors of WHC would ultimately be composed of Minnick and two of his nominees, and Friedli and one of his nominees.

In addition, pursuant to the agreement, the aforementioned financing transaction would be conducted primarily through the investment banking efforts of Friedli Corporate Financing AG, Zurich, Switzerland, the principal of which is Peter Friedli. The private placement is contemplated to be made to Switzerland-based financial institutions.

The acquisition is also expected to be dependent upon the receipt of a fairness opinion by CGI and the affirmative vote of the majority of shares held by stockholders of CGI who are unaffiliated with WHC at a meeting of stockholders, which has not been scheduled at this time.

ComponentGuard, Inc. is a New York corporation which provides extended warranty contracts under the COMPONENTGUARD brand name on various consumer

products.

FORT WORTH, TEXAS (NOV. 7) PR NEWSWIRE - Tandy Brands, Inc. announced today that its stockholders have approved an amendment to the company's certificate of incorporation changing its name to "the Bombay Company, Inc." The action was taken at the annual meeting of stockholders of Bombay held yesterday in Fort Worth, Texas. The name change is designed to clearly identify the company with its specialty retail operations which currently consist of the Bombay Company and Alex & Ivy. The Bombay Company markets home furnishings and accessories, specializing in English reproductions from the 18th and 19th centuries. Alex & Ivy is a new home decor store test featuring European country styles. The Bombay Company, Inc., will continue to trade on the American Stock Exchange, under the symbol "BBA" (CUSIP number 097924 10 4), effective Nov. 9, 1990.

Bombay also announced that its board of directors has approved the terms of the tax-free spinoff of its Tandy Brands Accessories division to the stockholders of Bombay. Tandy Brands Accessories, Inc., a newly- formed Delaware corporation has been organized by Bombay for the purpose of operating the existing men's and boys' leather accessories, neckwear and gift accessories manufacturing and marketing business. The officers of Accessories are J.S.B. Jenkins, president and chief executive officer and Stanley T. Ninemire, vice president and chief financial officer, secretary and treasurer. Members of the board of directors are Clayton E. Niles, Chairman, J.S.B. Jenkins, James F. Gaertner, C.A. Rundell, Jr. and Robert E. Runice.

Under the terms of the spinoff, holders of record of Bombay common stock on Dec. 31, 1990, will be entitled to receive one share of the common stock of Accessories for every five shares of Bombay common stock held. Bombay stockholders will not be required to pay any consideration or exchange their shares of Bombay common stock in order to receive shares of Accessories common stock. Subsequent to the distribution of the outstanding common stock of Accessories, Bombay and Accessories will be independent public companies, and Bombay will not own any common stock of Accessories. The distribution of Accessories shares is expected to occur approximately Jan. 10, 1991, or as soon thereafter as is practicable, provided all regulatory matters are resolved.

A registration statement relating to the distribution of the Accessories common stock has been filed with the Securities and Exchange Commission, but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state. Copies of the final prospectus, once available, may be obtained by contacting Stanley T. Ninemire, secretary, Tandy Brands Accessories, Inc., 3312 E. Pioneer Parkway, Arlington, Texas 76010.

HOUSTON (NOV. 7) PR NEWSWIRE - ConVest Energy Partners, Ltd. (AMEX: CEP) today reported net income of $1,150,000 or 19 cents per unit for the three months ended Sept. 30, 1990, compared to net income of $234,000 or 4 cents per unit for the third quarter of 1989. Total revenues for the third quarter of

1990 were $3,562,000 compared to 1989 third quarter revenues of $2,457,000. Net income per unit is based on 5,914,573 units outstanding during both quarterly periods.

CEP had net income of $2,170,000 or 36 cents per unit for the nine months ended Sept. 30, 1990 compared to net income of $2,155,000 or 36 cents per unit for the same period in 1989. Total revenues for the nine months were $9,047,000 compared to 1989 revenues of $8,256,000. Net income and total revenues for the nine months ended Sept. 30,1989 included approximately $1.5 million received by CEP in settlement of two gas contract disputes and a litigation matter.

Oil and gas revenues for both the three and nine months ended Sept. 30, 1990 increased by 40 percent and 30 percent, respectively, over the corresponding 1989 periods due to increased oil production and higher oil prices during the third quarter of 1990. The other major contributor to CEP's revenue stream was increased profit margins at the Altamont Gas Plant, where 1990 revenues have exceeded 1989 revenues by about 80 percent. Gas production increased by about 50 percent between the second and third quarters of 1990 due to the re-establishment of production at CEP's Appalachian properties during July 1990 and an increase in production levels at the S. Timbalier offshore Louisiana property.

Cash flow generated from operations for the three months and the nine months ended Sept. 30, 1990 was $2,170,000 and $5,038,000 respectively. This compares to $1,082,000 and $4,475,000 (or $1,078,000 and $2,949,000 excluding nonrecurring settlement income) for the same periods in 1989. Average oil and gas prices were 47 percent and 10 percent higher, respectively, during the third quarter of 1990, as compared to the previous calendar quarter.

ConVest Energy Partners, Ltd. is a publicly traded master limited partnership whose principal business activities include the development and operation of oil and gas properties and the acquisition of additional producing properties. ConVest Energy Corporation serves as general partner of CEP and currently owns approximately 14 percent of the partnership interests.

#90311p4237 11/07/1990 ~PR Newswire

TAYLOR, MI (NOV. 7) PR NEWSWIRE - Masco Industries' (NASDAQ-NMS: MASX) sales for the third quarter ended Sept. 30, 1990, decreased 2 percent to $382 million from $390 million in 1989.

Sales of custom engineered products for the third quarter increased 3 percent, as a 7-percent increase in transportation-related sales more than offset a decline in defense sales.

Sales of specialty products declined 9 percent, as a 22-percent increase in energy-related products sales was more than offset by the absence of sales from the company's Flo-Con Systems, Inc. subsidiary, which was sold in late 1989.

Net income in the third quarter of 1990 was $0.7 million or $.01 per share, compared to $16.4 million or $.20 per share in 1989. Third-quarter 1990 results were handicapped by unrealized losses of $16.1 million ($10.6 million after tax, or $.14 per share) related to the company's marketable securities portfolio.

In 1989, the third quarter benefited from extraordinary income of approximately $10 million ($6.7 million after tax, or $.08 per share) resulting from the early extinguishment of convertible debt securities.

Profits in 1990 were also adversely affected as a result of continued margin pressures experienced by certain product groups, such as architectural and defense, which more than offset improved operating performance by the company's energy-related operations.

As previously announced, General Motors Corporation (NYSE: GM) discontinued development of the Chevrolet Beretta convertible program jointly undertaken by Masco Industries' Cars & Concepts subsidiary and Chevrolet Motor Division.

Masco Industries has invested substantial amounts in the Beretta convertible program and will pursue recovery of this investment through negotiation with General Motors. The amount of any recovery, however, is not certain, and if recovered amounts are less than Masco Industries' current carrying cost of such investment and related costs (approximately $20 million), future earnings would be reduced accordingly.

The slowing of the general economy has resulted in a softening in a number of the company's markets; in particular, the company anticipates that automotive production levels will continue to be reduced over the next several months which will negatively affect demand for certain of the company's products.

Longer term, however, Masco Industries continues to believe that maintaining its financial disciplines and business strategies should result in significant future growth for Masco Industries. Masco Industries manufactures custom engineered and other commercial and specialty industrial products.

#90311p4240 11/07/1990 ~PR Newswire

FAIRFIELD, NJ (NOV. 7) PR NEWSWIRE - S2 Golf Inc. (NASDAQ: GOLF) (doing business as Square Two Golf), a manufacturer of a complete line of men's and women's golf clubs, today announced record sales and earnings for the first nine months which ended Sept. 30, 1990. Square Two Golf is the officially endorsed club of the Ladies Professional Golf Association (LPGA).

Shipments for the first nine months of 1990 rose to $6,326,844 from $3,901,740 in the first nine months of 1989. Shipments for the third quarter, normally the slowest quarter of the golf season, rose to $1,765,943 from $1,107,997 for the third quarter of 1989.

For the first nine months, pre-tax profits were $793,796 with net after taxes of $533,511 or $.066 per share. This compares with a net profit before taxes of $685,799 with after-tax profits of $460,238 or $.058 per share in the first nine months of 1989.

For the third quarter the company posted at net profit before taxes of

$198,124, with an after tax profit of $100,325 or $.013 per share as compared with a pre-tax profit of $191,618 and after-tax profits of $128,277 or $.016 per share for the third quarter of 1989.

L.R. Jeffrey, president, attributed the improved sales results to continuing high levels of consumer acceptance of the company's products, a higher percentage of shipments of graphite clubs and to an increased number of dealers. Jeffrey stated "While the July-September period is usually the slowest quarter for the golf equipment industry, we shipped clubs at a rate considerably higher than we had anticipated.

Shipments were up almost 60 percent over those of the third quarter of 1989. As a result, we had to air freight some components from our overseas suppliers in order to meet our customer's required delivery schedules. Our Air Freight charges in the third quarter were $80,993 and for the first nine months, these charges totalled $142,537."

"Our manufacturing and office space is being increased by 50 percent preparatory to the 1991 golf season. Square Two is bringing our several new lines of clubs which should strengthen our dealer organization as well as providing a greater choice of clubs for the consumer. A line of quality golf bags is being introduced for the Christmas season. We are continuing to add new dealers and expect to be in an excellent position for the 1991 golf season."

The company's common stock is listed daily in the Additional NASDAQ Quotes list (Additional List) which is carried in the Wall Street Journal, Investors Daily and The New York Times. It is traded on the NASDAQ automated quotation system under the symbol "GOLF."

LOS ANGELES (NOV. 7) PR NEWSWIRE - St. Ives Laboratories (NASDAQ: SWIS) reported today that net sales for the three months ended Sept. 30, 1990, were

$27,523,000, an increase of $2,263,000 (9.0 percent) from the comparable period in 1989.

St. Ives reports increases in Personal Care Products, International and Custom Label Products categories in the period. Net income for the third quarter of 1990 was $836,000 or $.12 per share vs. $591,000 or $.09 per share for the comparable quarter in 1989.

Net sales for the nine month period ended Sept. 30, 1990, decreased 5.9 percent to $78,564,000 from $83,506,000 in the same period of 1989. As reported in earlier releases, the decrease in domestic sales of Personal Care Products primarily relates to the introduction of a new packaging format for Swiss Formula(R) Hair Care Systems which was not accepted by the consumer.

The company returned to the original package as soon as possible after learning of the difficulty. There was no financial impact in the third quarter relating to the packaging format change.

Net income for the nine month period in 1990 was $2,468,000 or $.36 per share vs. $3,714,000 or $.54 per share in the comparable period of 1989.

Additionally, the board of directors of St. Ives Laboratories Inc. recently authorized the repurchase of up to 250,000 shares of the company's common stock. The stock may be purchased at any time during the next 12 months at prices the company deems desirable. All stock purchases will be made in the open market.

DALLAS/FORT WORTH AIRPORT, TX (NOV. 7) PR NEWSWIRE - American Airlines reported today flying 6.62 billion revenue passenger miles in October, 5.3 percent higher than the 6.28 billion RPMs it flew the same month last year.

American's cargo traffic continued its record-setting pace, increasing 21.4 percent over the previous October.

Michael W. Gunn, the airline's senior vice president-marketing, said international traffic increased 29.8 percent.

"European traffic was above October of last year and continues to perform well " Gunn said, "while traffic for the Latin American routes was significantly above the airline's expectations."

The airline's available seat miles increased 9.0 percent in October, to 10.78 billion from 9.89 billion. Gunn added that domestic traffic and capacity within the 48 states also increased last month from the period a year ago.

Overall passenger boardings increased 2.1 percent to 6,250,225 from 6,119,471. The system load factor fell to 61.4 percent from 63.5 percent.

During the first 10 months of 1990, American's revenue passenger miles grew 4.6 percent to 64.56 billion from 61.71 billion; available seat miles increased 7.3 percent to 102.60 billion from 95.63 billion; boardings rose 1.5 percent to 61,345,479 from 60,445,490; and the load factor declined to 62.9 percent from 64.5 percent.

Freight ton miles jumped 21.4 percent in October to 72.0 million from 59.3 million, while mail ton miles rose 12.4 percent to 24.3 million from 21.6 million.

For the January-October period of 1990, freight ton miles rose 20.1 percent to 636.2 million from 529.7 million. Mail ton miles grew 16.0 percent to 222.9 million from 192.2 million.

"Our continued double-digit growth in air cargo," said William R. Boesch, American's vice president-cargo, "reflects American Airlines' corporate dedication to cargo and our focus on providing top-quality service at competitive prices."

#90311p4247 11/07/1990 ~PR Newswire

OKLAHOMA CITY (NOV. 7) PR NEWSWIRE - Hadson Corporation (NYSE: HAD) announced earnings from continuing operations for the third quarter of 1990 of $2,081,000 ($.06 per share) on total revenues of $152,733,000.

This compares to a net loss of $10,408,000 ($.30 per share) on revenues of $112,784,000 in the third quarter of 1989. For the first nine months of 1990 earnings from continuing operations were $318,000 ($.01 per share) on revenues of $397,586,000 as compared to a loss of $8,824,000 ($.25 per share) and revenues of $426,929,000 for the same period of 1989. The above results do not include amounts attributable to Hadson's Defense Systems Group which are now reflected as discontinued operations. On Oct. 9, 1990, Hadson completed the sale of its HRB Systems, Inc. defense subsidiary and further expects to complete the sale of its remaining defense subsidiary, Ultrasystems Defense, Inc., during the fourth quarter of 1990. Including the results from these discontinued operations, net earnings for the third quarter of 1990 were $2,081,000 and the nine months ended Sept. 30, 1990, resulted in a loss of $144,244,000, which reflects a write-off related to the defense operations in the second quarter of 1990.

J. Michael Adcock, president of Hadson said, "In September our Power Systems Group received final environmental permitting on the third of four cogeneration projects in Virginia. Accordingly, in the third quarter we recognized development fees and began recognizing engineering and construction revenues and profits on this project. With the addition of this third plant we now have three projects under construction in Virginia."

Adcock further stated, "Our energy products and services group, showed excellent results in the third quarter of 1990. The third quarter historically results in lower operating profits for this group due to the impact of mild weather. The improvement was due in part to higher prices for natural gas liquids, the lease to third party users of gas storage in our natural gas storage facilities and improved through-put in our New Mexico pipeline.

Hadson Corporation is an independent producer and supplier of energy products as well as an electric power services firm. Hadson has operations in natural gas and gas liquids; and the development, construction, operation and ownership of electric power generation facilities.

#90311p4254 11/07/1990 ~PR Newswire

NEW YORK (NOV. 7) PR NEWSWIRE - Financial Guaranty Insurance Company today reported strong nine-month financial results in net income, premiums written and capital base growth.

Financial Guaranty's net income for the three months ending Sept. 30, 1990 was $24.9 million, a 15 percent increase from the $21.6 million reported for the third quarter of 1989. For the first nine months of 1990, the company's net income was $68.5 million, an 8 percent increase from $63.7 million for the same period in 1989. This increase excludes the effect of a one-time gain in 1989 of $2.9 million representing the cumulative effect of the initial application of Financial Accounting Statement No. 96, "Accounting for Income Taxes." All earnings are stated on a GAAP basis.

The company also reported net premiums written of $84.8 million for the first three quarters of 1990, a 112 percent increase from the $40.1 million written for the same period in 1989. Financial Guaranty's net investment income for the first nine months of 1990 increased 11 percent to $57.0 million compared to $51.3 million for the same period in 1989. Total revenues for the first nine months of 1990 were $108.9 million, an increase of 5 percent compared to total revenues of $103.8 million for the same period in 1989.

Financial Guaranty's capital base, comprised of capital and surplus and the contingency reserve, totalled $578.0 million as of Sept. 30, 1990, an increase of 9 percent from $531.1 million as of Dec. 31, 1989. FGIC's statutory policyholders' reserves, which include capital and surplus, losses and loss adjustment expense reserves, the contingency reserve, and unearned premium reserve, totaled $1.08 billion, an 11 percent increase from the $969.9 million reported as of Dec. 31, 1989. The company's statutory unearned premium reserve equalled $488.2 million as of Sept. 30, 1990 versus $438.5 million on Dec. 31, 1989.

"Financial Guaranty's growth in net income as well as net premiums written only underscores the company's considerable success in pursuing its long-term strategy," noted Stephen Berger, president and chief executive officer. "FGIC's strategy is simple. We target quality business at attractive premiums. However, we remain conservative in our underwriting criteria and will only write business if we feel comfortable with the risk characteristics of a transaction.

"Building a quality book of business," he added, "and continually growing our capital base is Financial Guaranty's long term commitment to investors seeking

a financial guarantor of impeccable financial strength."

Financial Guaranty insured over $5.4 billion in par value, or 23 percent of the approximately $24.1 billion par value of insured new municipal bonds issued in the first nine months of 1990.

Financial Guaranty's total assets increased 10 percent to $1.17 billion as of Sept. 30, 1990 from $1.06 billion as of Dec. 31, 1989. The company's investment portfolio, consisting predominantly of high- grade municipal securities, totaled $1.06 billion as of Sept. 30, 1990 compared to $981.7 million as of Dec. 31, 1989.

A wholly owned subsidiary of GE Capital, FGIC Corporation, through its subsidiary Financial Guaranty Insurance Company, has established itself as a leading insurer of securities sold in capital markets, principally municipal bonds. The company also guarantees a growing variety of structured debt issues outside the municipal market.

#90311p4259 11/07/1990 ~PR Newswire

CHICAGO (NOV. 7) PR NEWSWIRE - Christie Hefner, chairman and chief executive officer of Playboy Enterprises, Inc. (NYSE, PSE: PLA, PLAA), today announced at the company's annual stockholders meeting increased revenues and earnings from operations for the first quarter of fiscal 1991, which ended Sept. 30, 1990. First quarter revenues were $42.1 million, compared to $39.3 million for the same period last year. Operating income, which includes earnings from the company's publishing, entertainment, and product licensing businesses and corporate administration and promotion expenses, was $.4 million compared to an operating loss of $.4 million for the quarter last year.

Net income for the quarter was $.8 million or $.04 per share. Although net income for the first quarter a year ago was $5.0 million, or $.26 per share, $4.8 million of that amount was a nonoperating pre- tax gain from the sale to a competitor of Boarts International, Inc., an international distributor of U.S. periodicals under terms that produced the above noted gain and a favorable long-term distribution contract for Playboy magazine with a larger distributor.

The improvement in operating performance was attributable primarily to a 57 percent increase in earnings of the company's publishing group, which earned $3.2 million on revenues of $34.2 million, compared to $2.1 million on revenues of $32.1 million for the same quarter last year. Every segment of the publishing group, which includes Playboy, newsstand specials and calendars foreign editions, the company's art publishing business and catalogs, had improved operating income for the first quarter compared to last year.

Advertising pages and revenues for Playboy magazine were higher in the quarter when compared to last year despite a tough economic climate and reduced tobacco advertising pages. "Despite a soft market, revenues were up more than 5 percent for the quarter. Our goal is to continue increasing advertising pages and revenues by adjusting our mix of business. Advertisers place a premium on the most efficient vehicle for reaching their targets, and that gives Playboy added value," Hefner said. She noted that the just-published Fall 1990 MRI (Mediamark Research Inc.) study shows that Playboy is the most efficient magazine for reaching men.

In the product licensing area, both operating income and revenues were stable compared to the prior year quarter, despite a volatile worldwide retail market Hefner said. Operating income was $.7 million compared to $.8 million for last year's first quarter, and revenues were $1.4 million compared to $1.5 million last year. "Looking ahead, we see significant near-term opportunities to expand territorial distribution in Western Europe and the Far East, and longer-term opportunities to distribute product in Eastern Europe, including the USSR," Hefner said.

The entertainment group reported improved revenues of $6.5 million, compared to $5.6 million for the quarter last year and slightly lower operating income of $.5 million, down from $.7 million last year. Last year's first quarter did not have the full executive and creative team on board that is now in place so administrative expenses were lower. Playboy At Night, the company's domestic cable programming service, is now available to almost four million addressable homes and is the third largest pay-per-view service in the country.

Playboy Enterprises, Inc., is an international publishing and entertainment company that publishes Playboy magazine and oversees the production of 14 foreign editions.

LONG BEACH, CA (NOV. 7) PR NEWSWIRE - A.G. Automotive Warehouses Inc. (NASDAQ: AGAWA) announced today the grand opening of its third Auto Giant warehouse, in Las Vegas, on Friday, Nov. 2, 1990. A total of three Auto Giant warehouses are now operating in California, Arizona and Nevada.

Robert J. McNulty, chairman, stated, "This third Auto Giant location is positioned in a superb metropolitan market, and is an important step towards our goal of becoming a dominant retailer of automotive parts and service in the Western United States. The company has signed leases for locations in Fountain Valley, Calif., and the Sacramento, Calif., metropolitan area. Three

additional locations are currently under negotiation. We are pleased with our progress and look forward to continued expansion in 1991."

Frank Roberts, president and chief executive officer, stated, "Our 75,000-square-foot Las Vegas warehouse features a state-of-the- art service center equipped with 36 service bays. Our unique mix of parts, accessories, tires and service make Auto Giant a one-stop destination for car and truck owners and automotive repair professionals."

Auto Giant offers a wide selection of quality, brand-name automotive products at discount prices to retail and commercial customers. Auto Giant warehouses average approximately 50,000 to 75,000 square feet, and offer approximately 17,000 items including automotive accessories, batteries, maintenance and repair parts, sound systems, cellular phones, tires and custom wheels. Each Auto Giant warehouse also contains a fully equipped automotive service center staffed with trained technicians.

LONDON (NOV. 7) PR NEWSWIRE - Hanson PLC (NYSE: HAN) announced today that the Hanson Sharesave Plan for the grant of savings related share options to employees was approved by shareholders meeting in London today. The plan is in addition to the Hanson share option schemes already in operation for more than 1,500 senior executives.

"We intend to invite eligible employees - about 25,000 people - to participate next month after publication of our annual results," Martin Taylor, vice-chairman, told the meeting.

"Those eligible are primarily full-time employees with at least one year's uninterrupted service. They will be able to save from ten to 150 pounds sterling a month for five years. At the end of that time they can use their savings to buy Hanson shares. We see this as an excellent means of involving our employees in the long term future of the company."

The meeting also approved certain technical changes to the company's memorandum and articles of association.

MINNEAPOLIS/ST. PAUL (NOV. 7) PR NEWSWIRE - AirTran Corporation (NASDAQ: ATCC) announced the declaration on Oct. 31, 1990 of a $0.04 per share cash dividend to be paid on AirTran's common stock with respect to the quarter ended Sept. 30, 1990. The record date for determining holders of common stock entitled to receive the dividend is Nov. 16, 1990. AirTran anticipates payment of the dividend on or about Nov. 30, 1990.

AirTran is the parent company of Mesaba Aviation, Inc., a regional airline which provides connecting airline service as Northwest Airlink under a marketing agreement with Northwest Airlines. Currently, Mesaba provides service to 37 airports in 10 states to the hub cities of Minneapolis/St. Paul and Detroit.

As of Nov. 7, 1990, there were approximately 3.7 million shares of common stock outstanding. AirTran has paid a quarterly dividend on its stock since 1987.

AirTran's common stock is traded on the NASDAQ National Market System under the symbol ATCC.

PASADENA, CA (NOV. 7) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) today announced record results for both the fourth quarter and the year ended Sept. 30, 1990.

Net income for the year was up over 40 percent from 1989 to $14,390,000, or $1.28 per share, on revenues of $881,757,000. Net income for last year was $10,220,000, or $0.95 per share, on revenues of $793,577,000.

For the fourth quarter, net income was $4,025,000, or $0.35 per share, on revenues of $230,301,000. This compares to net income of $3,158,000, or $0.29 per share, on revenues of $208,933,000 for the fourth quarter of 1989.

Jacobs also announced that its backlog at Sept. 30, 1990, was a record $1.34 billion. This represents an increase of more than $370 million, or 38 percent, from the backlog at Sept. 30, 1989.

ATLANTA (NOV. 7) PR NEWSWIRE - Ford Motor Co. will build a 600,000-square-foot Atlanta Parts Distribution Center (PDC) on 55 acres south of the city in Henry County, it was announced today by Ford.

Ground breaking for Ford Parts & Service Division's new facility, in Liberty Industrial Park, is scheduled for next January, for occupancy in January 1992.

The new Ford Atlanta PDC, one of 10 in the United States, will allow the company to consolidate its Southeast parts-storage operations. Parts for Ford and Lincoln-Mercury cars and Ford trucks now are stored in the company's 230,000-square-foot PDC in East Point, Ga., and three leased facilities totaling an additional 200,000 square feet.

John Oakland, PDC manager, said: "The new facility will help us provide still better service for our customers. They include vehicle dealerships and independent parts-sales outlets. Also helped," he said, "will be their customers -- the men and women who buy our cars and trucks."

Oakland praised the Atlanta Chamber of Commerce, the Henry County Economic Development organization and Norfolk Southern Railroad. "They deserve much of the credit for Ford's move to the new location. Strong team play and sincere interest were in evidence in all our discussions," he said.

Oakland also credited the PDC employees. "Employee involvement was strong throughout our year of planning," he said. "Our employees' suggestions were taken into account from day one." UAW Local 882 represents PDC employees.

The new PDC will be southwest of the intersection of I-75 and Georgia Highway 155, just southwest of McDonough, and 26 miles south of downtown Atlanta.

John W. Rooker and Associates will build the new PDC, designed by the engineering firm of Brumbley and Associates to include attractive landscaping. Employment at the facility will remain at the level of the present PDC, 280. However, about 200 construction jobs are expected to result from the project.

The East Point facility will be made available for sale. Other occupants of that building moved to a north Atlanta office building this past summer. They were the Atlanta Districts of Ford Division and Ford Parts & Service Division.

CARTHAGE, MO. (NOV. 7) PR NEWSWIRE - The board of directors of Leggett & Platt Inc. (NYSE: LEG) today declared a 21 cent per share fourth quarter cash dividend on the company's common stock. The dividend is payable Jan. 2, 1991 to shareholders of record on Nov. 23, 1990.

Dividends declared for all four quarters of 1990 total 84 cents per share, up 14 percent over the 74 cents per share declared in 1989. This is the 19th consecutive year that the board has increased the cash dividend rate on Leggett's common stock.

Headquartered in Carthage, Leggett & Platt is a Fortune 500 company that specializes in manufacturing and marketing a broad line of components used by companies making furniture and bedding for homes, offices and institutions. Other home furnishings products include select lines of finished furniture and carpet cushioning materials. A variety of diverisified products are also produced and sold in several different markets unrelated to the home furnishings industry. The company's common stock is listed on The New York and Pacific Stock Exchanges.

#90311p4285 11/07/1990 ~PR Newswire

LANSING, MI (NOV. 7) PR NEWSWIRE - Maxco, Inc. (NASDAQ: MAXC) today announced improved operating earnings and higher sales volume for the second quarter and half ended Sept. 30, 1990.

Sales rose 16 percent to $24,965,000 from $21,486,000 for the quarter. Operating earnings increased 28 percent to $1,207,000 from $943,000 in the year-earlier quarter.

Net income was $605,000, or 12 cents a share, compared to $1,016,000, or 20 cents a share. Year-earlier results included $650,000 or 13 cents a share, from an accounting change.

For the six months, sales grew 12 percent to $48,775,000 from $43,437,000. Operating earnings were up 3 percent to $2,200,000 from 2,139,000 in the year-earlier half.

Net income was $1,211,000, or 24 cents a share, compared to $1,321,000, or 25 cents a share. Year-earlier results included $650,000, or 13 cents a share, from the accounting change.

There were approximately 4.8 million weighted average shares outstanding in this year's reporting periods compared to 4.9 million the year before.

Maxco's results in the half benefited from $98,000 equity in the earnings of affiliated companies, primarily earnings of Medar, Inc. (NASDAQ-NMS: MDXR), of which Maxco holds 40-percent equity as an investment. Year-earlier net was affected by Maxco's $420,000 equity share in losses of affiliated companies, of which $398,000 was attributable to losses incurred by Medar.

"The $25 million sales we reported for the quarter came from across the board increases at all Maxco operating companies," said Max A. Coon, chairman and president.

"This gain was led by Finishmaster, our auto paint distributor, which was up over $1.7 million -- a 25-percent gain over last year's second quarter. About $1 million of this increase came from three metro Chicago locations that we've added in the past year," he said.

"Maxco also benefited from improved operating margins at Wright Plastics. Akemi Plastics, one of our smaller units, is also making a stronger contribution due to early success of our Tri Diem process with the aerospace industry.

"Maxco is now generating consistently positive results. We believe the realignment and focus that we've made over the past several years give Maxco the flexibility and strength to perform well regardless of the economy," Coon said.

"Our stock is selling close to book value, and we're showing stronger earnings one of the reasons we've made purchases in the open market. Since March 31, Maxco has purchased 185,000 shares in the open market. Working capital is $8.2 million, up from $7.1 million on March 31, and our current ratio is 1.5.

"We always see a slowdown in our construction supply business during the winter months, so that factor will impact results in the second half," Coon said. "Our other businesses, notably Finishmaster, have potential to perform somewhat independently of economic conditions. With a group of good performers and a clear focus, we are more optimistic than ever about the company's future."

Maxco distribution businesses include Finishmaster, Inc., and the construction supply group (Ersco and Wisconsin Steel) which markets commercial and highway construction materials throughout Michigan, Wisconsin and Indiana. Wright Plastics, Pak Sak Industries and Akemi Plastic are other Maxco businesses.

CINCINNATI (NOV. 7) PR NEWSWIRE - The board of directors of Cincinnati Milacron Inc. (NYSE: CMZ) has elected Daniel J. Meyer chairman of the board, effective Jan. 1, 1991. Meyer is also president and chief executive officer.

As chairman, Meyer will succeed James A. D. Geier, who, as previously announced, will retire at the end of the year. Geier will remain a member of the board and chairman of the board's executive committee.

Meyer, 54, joined Cincinnati Milacron in 1969. He served as chief financial officer from 1977 to 1987, first as vice president of finance and then as executive vice president of finance and administration. He was elected a director of the corporation in 1985, president and chief operating officer in 1987, and chief executive officer in April 1990. He holds a B.S. degree in electrical engineering from Purdue University and an M.B.A. from Indiana University.

Geier, 64, joined the company in 1951, after serving in the U.S. Army Air Corps and attending Williams College. He was elected president and chief executive officer in 1970 and chairman in 1981. He is the son of Frederick V. Geier, who was president of the company from 1934 to 1958 and chairman from 1958 to 1963, and the grandson of Frederick A. Geier, founder of the company.

LAUREL, MD (NOV. 7) PR NEWSWIRE - Agripost, Inc. (NASDAQ: AGRI) and F&E Resource Systems Technology, Inc. (FERST), publicly traded over-the-counter (pink sheets), announced today that negotiations with regard to the

combination of the two companies have been postponed temporarily.

According to John Forrer, chairman of Agripost, "negotiations have been delayed because both Agripost and FERST have recently focused their time and efforts on strengthening the financial basis of their first waste processing facilities," located in Dade County, Fla., and Baltimore, respectively. Forrer adds that "these efforts will not only make future discussions between Agripost and FERST more concrete, but positive outcome of these efforts would also make a conbined company stronger and more attractive to investors."

Agripost is refinancing its existing solid waste composting project in Dade County, the largest of its type in North America. The refinancing will include several million dollars in capital improvements which will allow the plant to process over 1,000 tons of mixed municipal solid waste per day. FERST is seeking to finance a new project in Baltimore, which will also process and recover mixed municipal solid waste through a combination of recycling and composting.

Ron Pickett, chairman and chief executive officer of FERST, reported that both companies have engaged in a constructive dialogue with regard to the combination and that he looks forward to resumption of negotiations after financing is in place for both projects.

Agripost also announced last week that it has elected to its board of directors Steven Engel, president of John Hancock Resource Development Corporation, a New York City-based investment bank. Engel has been a key advisor to Agripost with regard to the financing of its Dade County project and its corporate financing, including its negotiations with FERST. Engel and John Hancock Resource Development Corporation have also been actively involved in FERST's project and corporate financing efforts.

#90311p4300 11/07/1990 ~PR Newswire

DULUTH, MI. (NOV. 7) PR NEWSWIRE - Minnesota Power's (NYSE: MPL) core electric business expects record sales for 1990, and the company's non-electric businesses have promising expansion potential, the Duluth, Minn.-based utility's chief executive said today.

Speaking to the New York Society of Security Analysts, Arend Sandbulte, said that while MP's primary business will continue to be electric power, the company's paper manufacturing, coal mining and water/wastewater utilities make it "logically diversified" and give it added future growth potential.

The company's earnings began reflecting profits from non-electric businesses

in the mid-1980s, Sandbulte said. In 1989, a record earnings year for MP, the sale of its Universal Telephone, Inc. subsidiary contributed $1.10 of its $2.90 earnings per share.

He said the company's goal is to expand its water and wastewater treatment businesses, currently located in Florida and the Carolinas, to the point where they are contributing one-third of earnings by the year 2000.

"As an avenue for diversification, we like water," Sandbulte said. "It's a basic commodity everybody needs. It also plays to our strengths: specifically, the know-how to provide reliable utility service and operate under regulation."

Sandbulte said the company also sees expansion potential for its other non-electric businesses, which include BNI Coal, which mines lignite-coal in North Dakota, and Lake Superior Paper Industries, a Duluth mill that makes supercalendered paper used in catalogs, advertising supplements and magazines.

Minnesota Power's core electric business is "sound," Sandbulte said. "Because of our strong competitive position, we think we have opportunities to expand our energy business in non-conventional ways such as cogeneration and the sale of other energy- or resource- conservation services in the region."

Although the taconite industry is having its third-straight good year in 1990, MP and its service territory will continue to diversify, reducing their dependence on taconite, Sandbulte said.

"In 1990 about 47 percent of our electric revenue will come from sales to taconite plants, compared with 52 percent in 1980 and 39 percent projected for 1994," Sandbulte said.

Despite expectations that taconite production will decline moderately over the next two decades, Sandbulte said his company believes taconite's future is "secure" because the industry trimmed its capacity and costs by one-third in the early- and mid-1980s.

Sandbulte also said: -- The company's electric utility business is anticipating record kilowatt-hour sales in 1990, largely the result of heavy production by taconite customers and wood-products firms.

-- While MP's industrial rates are 25 percent below the national average, the company does not expect to file for higher electric rates "until sometime in 1991, if then."

-- Minnesota Power, in contrast to some coal-burning electric utilities, is "in good shape" environmentally and anticipates little trouble complying with new federal clean-air laws aimed at reducing acid rain and nitrous oxides, because the company's major power plants burn low-sulfur coal and are equipped

with scrubbers.

-- The recent sale of a 100-megawatt interest in Minnesota Power's Clay Boswell Unit 4 power plant to Wisconsin Public Power, Inc. balances MP's supply and demand for the next decade.

-- Minnesota Power's wood-products and taconite customers, served under long-term contracts, increased their contractual commitments to the company by 40 percent earlier this year.

FLAT ROCK. MI (NOV. 7) PR NEWSWIRE - Indonesia's Minister of Industry, H.E. Hartarto, and executive vice president of Mazda Motor Corporation, Y. Wada, today attended the official opening ceremony of P.T. Mazda Indonesia Manufacturing (MIM), signaling Mazda's growing presence in that region.

MIM is a joint venture of Mazda Motor Corporation, Indo Mobil Group and Sumitomo Corporation. Indo Mobil Group is Mazda's business associate for assembling and distributing Mazda cars in Indonesia.

The new company will machine and assemble engines and manufacture body sub-assemblies. Initial targeted production is approximately 1,500 units per month.

Products manufactured at the plant will mainly be used in new passenger cars and commercial vehicles scheduled to be introduced in the Indonesian market early in December. Body assembly, painting and final vehicle assembly functions will be completed by a local Indonesian assembler.

These new vehicles will join Mazda's existing model lineup in Indonesia, which includes the 323 and 626 models. With these additions, Mazda expects to boost its share in the Indonesian automobile market, which has experienced strong growth during 1990 -- up 35 percent from 1989 level.

MIM is evidence of Mazda's ongoing strategy to strengthen its operations in Southeast Asia. Mazda's future plans for growth in the area include the development of a regional network of local production facilities to complement one another.

Other recent Mazda efforts in the region include expansion in Thailand, Taiwan Malaysia and the Philippines.

In Thailand, Mazda opened a new distribution and marketing company in operation from August of this year, and will begin production of transmissions

in a new manufacturing plant in 1992. In Taiwan, Mazda has commissioned Ford to produce Mazda 323s for marketing by Mazda Corporation (Taiwan). Mazda is one of three equal partners, along with Ford Motor Company and Sanyo Electric Company, Ltd., that will manufacture automotive audio products in Malaysia. The company is scheduled to launch operations in June 1992. In addition, Mazda recently expanded its model lineup of commercial vehicles in the Philippines.

SACRAMENTO, CA (NOV. 7) PR NEWSWIRE - Occupational-Urgent Care Health Systems Inc. (OUCH) (NASDAQ: OUCH) today announced third quarter 1990 results. Revenue was $5,327,000, up 18 percent from the third quarter of last year. Net income was $677,000 or 7 cents per share, compared to $967,000 or 10 cents per share in the same period of 1989.

"We curtailed our sales effort longer than originally expected while working with Electronic Data Systems Corp. (EDS) to significantly upgrade our processing capability. As forecast, OUCH also incurred higher than historical expense levels to improve systems, marketing and customer service. We are now beginning to see the results of these investments," stated OUCH President W. Robert Keen.

"In October we announced the signing of 26 new clients and a letter of intent to provide service to General Motors in Michigan. This business will be phased in through February of next year. We are continuing to add customers and have also begun providing cost containment services directly in some clients' offices demonstrating the flexibility we now offer."

OUCH provides cost management services designed to reduce medical and processing costs for workers' compensation and group health clients. The company serves clients in California, Texas, Arizona, New Mexico and Oregon and will add Michigan and Florida in the first half of 1991. The company's stock trades on the NASDAQ National Market System under the symbol OUCH.

FRESNO, CALIF. (NOV. 7) PR NEWSWIRE - Gottschalks Inc. (NYSE: GOT) announced that October 1990 sales increased 32 percent to $21.4 million from $16.2 million for the prior year October. Same store sales for the October period increased 13.8 percent. Total third quarter sales increased 25.5 percent, to

$65.2 million, with same store sales increasing 11.8 percent. For the 39 week 1990 period to date, total sales increased 25.1 percent to $179.3 million from $143.4 million for the year earlier 39 week period. Same store sales on a year-to-date basis increased 11.6 percent over the prior year.

"We are pleased with these outstanding October sales results," stated Robert Lawson, the company's Chief Financial Officer. "Our sales increases were broad based with significant growth in all classifications of the business. I believe these results are indicative of our conclusion that the markets we serve are economically strong and certainly were not negatively affected by recession fears.

"The sharp improvement in our sales results provide Gottschalks with a confident basis as we move forward into the critical holiday season. We are well-positioned to take advantage of improved market penetration in the areas currently served by our stores. We are confident that 1990 will be an outstanding year for Gottschalks," concluded Lawson.

Gottschalks is a regional department store chain, currently operating 22 department stores and 34 specialty apparel stores in the Central Valley and Central Coast areas of California. Gottschalks offers moderately to upper moderately priced brand-name fashion merchandise, and is in its 86th year of continuous family management.

SAN DIEGO, (NOV. 7) PR NEWSWIRE - Following over two years of construction and an $11 million dollar investment, USAIR today dedicated its new terminal operation at Lindbergh Field.

Edwin I. Colodny, chairman and chief executive officer of USAIR, served as keynote speaker for the dedication ceremony. Also participating were San Diego Councilmember Ron Roberts, and the chairman of the Port of San Diego Board of Airport Commissioners, Milford Portwood.

Included in the 25,000-square-foot facility are eight new gates on an upper level, modern jetways, plus enhanced customer services including a new USAIR Club.

According to Colodny, the USAIR project goes a long way in making Lindbergh Field more efficient and convenient and subsequently a more pleasant experience for the millions of passengers who travel each year.

Starting Thursday, Nov. 8, passengers departing from the USAIR terminal will ride escalators beneath a bright, glass-domed skylight to the second level.

There, they will encounter new gates in a spacious rotunda which includes a gift shop as well as dining and lounge services.

Information on flight numbers and schedules will be electronically displayed at each gate. New seating designed for added comfort has been located at each gate area.

Departing passengers will no longer be subject to the weather. They will now board their flights through modern jetways which have replaced the stairs previously used.

Members of the USAIR Club will be able to wait for their flights in the new 4,100-square-foot facility, one of 26 in the USAIR system and the third club to open on the West Coast. The facility includes conference rooms, work areas telephones, fax machines, refreshments, television and reading materials.

USAIR has approximately 40 flights per day out of San Diego. Local passengers can travel to more than 250 national and international destinations on the USAIR system.

CINCINNATI (NOV. 7) PR NEWSWIRE - A 113-percent increase in sales of the all-new 1991 Ford Explorer, a 103-percent increase in sales of the Ford Crown Victoria, and sales gains for the Mercury Sable were recorded by both the Cincinnati Ford and Lincoln-Mercury Sales Districts for October. Ford dealer sales of compact sport utility vehicles registered a 55-percent increase over the same period last year.

"Nationally, October was the seventh time in the past eight months that Ford's share of the truck market increased over a year ago," said J.P. (Pat) Snook, Ford Division's Cincinnati District sales manager.

"But Explorer is not the only factor in this achievement. The continuing strength of both the Ford Aerostar and the Ford Ranger contribute to our truck success, as well as America's best-selling vehicle, the F-Series pickup."

Cincinnati District Lincoln Mercury dealers - ranging from Indianapolis to Pittsburgh - registered increases of five percent in the Mercury Sable line for October. They were the only Lincoln-Mercury dealers nationally to show an increase in Mercury Topaz sales through October vs. the prior year.

"Conventional wisdom seems to be that, sooner or later, the barrage of bad news since early August is bound to take its toll on the automotive market," said Don Kaegi, Lincoln Mercury Division's District sales manager. "So far,

however, sales have exhibited more resilience than anticipated, especially considering the steep declines in consumer confidence.

"Now that the deficit-reduction agreement has been reached, we hope that interest rates will be reduced, and, thus, bolster consumer confidence and enable the national economy to minimize a possible recession."

#90311p4326 11/07/1990 ~PR Newswire

WESTMINSTER, COLO. (NOV. 7) PR NEWSWIRE - R.F. Engineering Inc. today shipped the SI series of automatic speaker switches. The SI series of automatic speaker switches allows two different audio amplifiers (i.e., a stereo television and a hi-fi system) to be connected to a single pair of loudspeakers. The SI detects which source is delivering a signal and routes the signal to the speakers. This ends the need for extra speakers and for running the stereo TV through the amp's auxiliary input.

Many people with stereo television sets have been inconvenienced by multiple speakers cluttering a room or by the need to turn on their complete hi-fi systems to watch television in stereo. Many have installed manual A-B switches in their systems to allow them to switch their speakers between the hi-fi and television. The manual switch remedies the excess speaker problem, but the owner must still manually activate the switch to the device running. The SI series will automatically switch by detecting which device is sending a signal.

The home theater and complete home installation is also becoming very popular. There are many times when an audio system is running in every room in the home. These whole house systems are well designed, but when someone wants to listen to their own hi-fi or TV in a particular room, they must manually switch off the whole house system in that room. The SI series will automatically switch out the whole house system and switch in the local system. It will always do this without requiring any aid from the home owner.

"The custom installation of home audio and video systems is becoming very popular" said Cynde Fleck of R.F. Engineering. "There are many obstacles in making the systems easy to use. You don't want the owner to have to remember to switch a lot of equipment on and off. That is where the SI comes into play. It automatically does the switching and the owner never has to worry or remember what to do."

R.F. Engineering's Richard Reisbick said, "Most of our sales go to the professional installer. They are interested in making their installations as easy to use as possible for the home owner. Many of the installers use the SI switches to allow a TV to use the same speakers as the whole house system.

Others have used them to switch children's hi-fi systems in their room from the whole house system. Some installers have even used the SI to override the stereo systems so the telephone or doorbell chimes can be heard. When these chimes are activated the SI switches off the stereo signal and turns on the chimes."

BOISE, IDAHO, (NOV. 7) PR NEWSWIRE - William J. Agee, chairman and chief executive officer of Morrison Knudsen Corp. (MK) (NYSE: MRN), today announced that MK has acquired Centennial Engineering Inc. Centennial, headquartered in Arvada, Colo., is a major regional transportation engineering and construction-management firm with offices in Oakland and Irvine, Calif.; Salt Lake City; and Colorado Springs, Colo.

"Centennial is a firmly established company with a strong management team," Agee said. "Its excellent reputation throughout the Rocky Mountain and central plains areas and its very strong engineering presence in California will reinforce MK's strategy to expand our efforts in growing transportation markets."

Agee added that acquisition of the 225-person firm will provide a platform to enhance MK's ability to secure highway, airport, rail and commercial real estate projects. "We welcome Centennial into the MK family," said Agee. "It's a good fit for both companies."

Morrison Knudsen Corp., headquartered in Boise, is an international engineering/design, construction, environmental, rail systems and mining company.

MIAMI (NOV. 7) PR NEWSWIRE - Burger King Corporation announced today the purchase of 27 Burger King(R) restaurants from Erin Food Systems, Inc. in New Hampshire and Massachusetts.

The $48 million purchase represents one of the largest acquisitions in the history of Burger King Corporation. Burger King Corporation assumes ownership of the restaurants and their related real estate and other assets.

"This agreement not only represents one of our largest acquisitions of company restaurants," said Barry J. Gibbons, chief executive officer, Burger King

Corporation, "it demonstrates our continuing commitment to develop the Burger King Brand and the opportunities we see in the Northeast region of the United States." Burger King has recently developed two other restaurants locations in New Hampshire and will continue to assess growth potential in the area.

The acquisition now positions Burger King Corporation as one of the largest employers in New Hampshire with more than 1,200 employees. The former restaurant employees of Erin Food Systems, Inc. will be offered similar positions within Burger King Corporation.

Burger King Corporation was acquired by Grand Metropolitan in January 1989. One of the United Kingdom's largest international companies, Grand Metropolitan is a world leader in the food, drinks, and retailing businesses.

U.S. subsidiaries also include The Pillsbury Company, Haagen-Dazs, Alpo Pet Foods, Carillon Importers, Heublein, Inc., The Paddington Corporation, and Pearle, Inc.

Burger King Corporation and its franchisees operate more than 6,000 restaurants in 36 countries worldwide. In Fiscal Year 1989, Burger King had systemwide sales of $5.7 billion.

NEW YORK, (NOV. 7) PR NEWSWIRE - Kidder, Peabody & Co. Incorporated announced today the appointment of Richard A. Buch as vice president and portfolio manager of its High Yield Asset Management Group. He will report to Jim Tucker, senior vice president and head of the group. The appointment is effective immediately.

Buch was recruited from Reliance Group Holdings where he was part of a three person team managing a $2.3 billion high yield bond portfolio. "Richard Buch brings to Kidder strong credit analysis and portfolio management skills that will enhance the groups existing capabilities," said Tucker.

Buch received an M.B.A. from Cornell University in 1985 and a B.S. in management from the State University of New York at Binghamton.

Kidder, Peabody, a subsidiary of General Electric Company (NYSE: GE), is a leading global investment banking and brokerage concern with 5,500 employees and over 50 offices worldwide.

TORONTO (NOV. 7) PR NEWSWIRE - Agnico-Eagle Mines Limited (NASDAQ: AEAGF) announced today the discovery of a significant new gold zone in Joutel during ongoing surface exploration. The new discovery is located 2600 feet west of the Eagle Mine shaft on claims wholly owned by Agnico-Eagle Mines.

The Exploration Division of Agnico-Eagle Mines has been aggressively exploring the extensive Joutel land-holdings over the last two years. The exploration has resulted in a detailed understanding of the regional geology and the environment and controls of the Eagle-Telbel deposits. In the spring of 1990, diamond drilling confirmed the extension of iron carbonate horizons, the host to the Eagle-Telbel deposits, over a distance of 7 Km to the west of the deposits. These horizons were previously unexplored and are located approximately 1000 feet south of the Mine Horizon.

Three diamond drill holes have recently tested this stratigraphy where it lies adjacent to a major structure near the Eagle-Telbel Mines. These holes have confirmed that a major stratigraphic package similar to the one at Eagle-Telbel Mines exists in this location and that the structure is parallel, and has many similarities with, the structure which controls the Eagle and Telbel deposits. Alteration and gold mineralization is very similar to better parts of the known deposits.

The results from the three holes are:

Hole No.	Section	Elevation (feet)	Core Length (feet)	Grade (oz/ton)	True width (feet)
AE 90-13	66+00W	120	18.0	0.621	13.0
		including	13.0	0.806	9.4
AE 90-16	67+00W	100	55.5	0.315	42.5
		including	19.0	0.429	14.0
		and	10.0	0.486	7.5
AE 90-17	66+00W	220	30.0 plus?	(A)	23.0

A -- Currently unavailable, coring in mineralization. Eight feet of core was lost in the intersection AE 90-16. Lost core has been included at Nil grade.

The known Eagle and Telbel deposits have a surface-projected strike length of 7000 feet and have been the focus of production from surface to a depth of 3600 feet. The known deposits have produced over 1 million ounces of gold and past production and reserves for the deposits total 8 million tons grading 0.188 oz Au/ton.

The new zone is open in all directions. Only one previous hole has tested the horizon 1300 feet to the west of Hole AE 90-13. The stratigraphy can be traced to the current limit of surface geophysics for a strike length of 3000

feet. The location of the Eagle and Telbel Mine workings will easily facilitate the drill testing of the new zone to depth. A second surface diamond drill will be mobilized at the site shortly and underground diamond drilling with two machines will commence shortly thereafter.

Agnico-Eagle is unaware of any other corporate developments that would account for the recent activity in the stock.

CONTACT: Paul Penna, president of Agnico-Eagle, 416-947-1212.

#90311p4359 11/07/1990 ~PR Newswire

TULSA, OK (NOV. 7) PR NEWSWIRE - Samson Energy Co. Limited Partnership (AMEX: SAM) announced today the recent completion of an acquisition from Seagull Energy Corp. of 37 producing properties located in seven counties in southeastern Texas, three parishes in Louisiana, and Columbia County in southwestern Arkansas. Interests acquired in these properties represent estimated proved reserves of approximately 383,000 barrels of oil and .7 billion cubic feet of natural gas. The purchase price is approximately $3,000,000, subject to post closing adjustments. Affiliates of Samson Energy also purchased interests in the same properties. 88 of the acquired wells located on these producing properties will be operated by Samson Resources Co.

"This acquisition provides a significant increase in the company's proved oil reserves. The reserves acquired in this purchase increase Samson Energy's proved oil reserves as of Dec. 31, 1989 by 35 percent and represent more than 150 percent of the expected 1990 oil production of Samson Energy (excluding production from these acquired properties). Coupled with additional producing property purchases and new development drilling in 1990, Samson Energy is expected once again to more than replace its 1990 oil and natural gas production," according to Dennis R. Neill, senior vice president and chief operating officer of Samson Properties Inc., the general partner.

"The purchase of these properties, which are primarily producing oil, appears

to be very favorable at the current time, given the higher price being received for crude oil and the relative importance of domestic energy reserves. Several of the properties are located on Gulf Coast salt domes, which tend to provide significant redrill opportunity. Several drilling locations on these properties will be identified and drilled over the next two years, which should further enhance the total expected reserves," stated Mr. Neill.

Samson Energy Co. is a publicly traded master limited partnership whose principal business activities include the development and operation of oil and gas properties and the acquisition of additional producing properties. Depository receipts evidencing units are traded on the American Stock Exchange under the symbol "SAM".

GLENWOOD, ILL. (NOV. 7) PR NEWSWIRE - Tech/Ops Landauer Inc. (AMEX: TO) reported net income of $6,509,000, or $1.54 per share, in the fiscal year ended Sept. 30, 1990. The company, a recognized leader in radiation monitoring services, had 1989 net income of $6,389,000 or $1.51 per share. Revenues for the year were $24,736,000, compared to $25,902,000 recorded in 1989.

While the company's traditional radiation dosimetry business continued to increase from year-to-year, revenues from radon gas testing services were well below year-earlier levels, when in the first quarter of FY '89 there was a large but brief volume of such business.

For the fourth fiscal quarter, the company had net income of $1,775,000 or $.42 per share on revenues of $6,694,000, compared to fourth quarter 1989 net income of $1,675,000, or $.40 per share, on revenues of $5,811,000.

NEW YORK (NOV. 7) PR NEWSWIRE-- The Turner Corporation (AMEX: TUR), the nation's leading general builder, today announced a net income of $1.76 million or $0.36 per share for the third quarter of 1990. This compares with net income of $1.49 million in the third quarter of 1989 and $1.78 million in the second quarter of this year.

"Our earnings are generally on target so far this year; however, we are also experiencing some of the effects of the industry-wide slowdown in construction starts from new construction sales for this year," commented Alfred T. McNeill chairman of The Turner Corporation. "This slowdown may have an adverse impact on earnings in the fourth quarter and, therefore, our targeted earnings for the year."

During the third quarter of 1990, Turner completed $817 million of construction and secured $780 million of new contracts.

Based in New York City, The Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest builder of commercial, industrial, hospital and healthcare, institutional, government building and multi-unit housing projects. Operating through 34 offices, Turner has construction projects underway throughout the United States and abroad.

During 1989, the Turner Corporation put in place $3.6 billion of new construction.

#90311p4369 11/07/1990 ~PR Newswire

DALLAS, (NOV. 7) PR NEWSWIRE - Hinderliter Industries Inc. (AMEX: HND) announced today a year-end loss for fiscal year ending June 30, 1990, of $8,362,000 compared to a loss for the same period a year earlier of $24,000. The loss amounted to $2.32 per share compared to a loss of 1 cent per share in 1989. Hinderliter intends to mail its Annual Report to the shareholders before the end of November.

Richard H. Hughes, chairman of the board and chief executive officer of Hinderliter, stated that the 1990 loss resulted from Hinderliter's commitment to divest of all assets unrelated to its 80 percent owned subsidiary, Corken International Corp., and to reserve for all contingencies. Hughes pointed out that the company's operating profit before consideration of non-recurring

charges was $547,000 in 1990 compared to an operating loss of $206,000 in 1989. Of the non-recurring charges incurred in 1990, approximately $3,700,000 related to Hinderliter's litigation with Signal Capital Corp.; $800,000 to the termination of all refinancing activities, including withdrawal of an S-1 Filing; and $900,000 for retirement, severance and relocation costs. Hinderliter's operational profit in 1990 improved over 1989 by $753,000 before consideration to these one-time charges.

Hinderliter previously announced that an adverse verdict was rendered in the State Court of San Antonio, Texas, for approximately $3,300,000 relating to legal fees and trial expenses in the counter-claim lawsuit by Signal Capital Corp. against Hinderliter, which arose from Hinderliter's $28 million lender liability suit against Signal Capital Corp. Hughes said that the company intends to vigorously appeal the verdict, and at the present time, the court plans to hear arguments on the verdict on Dec. 17, 1990. Consequently, Arthur Andersen's audit has been prepared assuming that the company will continue as a going concern. Hughes also said that Hinderliter is exploring all options to protect Hinderliter's shareholders, assuming the jury verdict becomes a judgment, including but not limited to, seeking protection by filing for a Plan of Reorganization in Bankruptcy under Chapter 11.

Hughes further announced that Hinderliter's board of directors had approved a Shareholders' Right Plan and declared a dividend distribution of one share purchase right on each outstanding share of Hinderliter common stock. Each right will entitle shareholders to buy one share of Hinderliter common stock for each share owned. The rights would not be exercisable until 10 days after an acquired purchased 20 percent of the outstanding common stock of Hinderliter, or 10 days after a tender offer or an exchange offer is announced which would cause the offer to own 25 percent of the outstanding common stock of Hinderliter, whichever is earlier. The rights expire 10 years after issuance and may be redeemed at a cost of 1 cent per right at any time not later than 10 days after the acquisition of a 20 percent position by any person or group, subject to extension by the board of directors. A 20 percent threshold is increased to 35 percent in the case of Richard H. Hughes, affiliates, and associates who own approximately 29 percent of Hinderliter common stock.

Hughes stated the Shareholders' Rights Plan is designed to assure that all Hinderliter Shareholders receive fair and equal treatment in the event of any proposed takeover of the company and to guard against partial tender offers and other abusive tactics to gain control of Hinderliter without paying all shareholders an appropriate price. Richard H. Hughes stated the Rights are intended to enable all of Hinderliter's shareholders to realize the long-term value of their investment in the company, particularly given the performance of Hinderliter's 80 percent owned subsidiary, Corken International, and may not prevent an acquisition, but are designed to encourage anyone seeking to acquire the company to negotiate with the board of directors. The Rights dividend distribution will be made to the common shareholders of record as of

Oct. 1, 1990. Separate Rights certificates will not be distributed until such time as they become exercisable. The Rights will expire Oct. 1, 2000. The Rights distribution is not taxable to the shareholders.

The American Stock Exchange haulted trading on the AMEX on Oct. 1, 1990, just after the jury verdict of $3,300,000 was announced. The AMEX has notified Hinderliter that effective Nov. 9, 1990, Hinderliter will resume trading. There can be no assurance that the listing will be continued because the company has not satisfied the Exchange's financial guidelines for continued listing.

Corken International, Hinderliter's 80 percent owned subsidiary, recently announced its third consecutive year of record earnings and sales. Corken's net income increase 12.4 percent to $1,278,000 on a sales increase of 16.7 percent to $13,360,000. Earnings per share increased from $.38 per share in 1989 to $.43 per share in 1990. Hughes stated that Hinderliter owns 2,500,000 shares of Corken and is consequently doing everything possible to protect this fine-growth company for Hinderliter's shareholders.

FAIRFIELD, NJ (NOV. 7) PR NEWSWIRE - Clinical Homecare Ltd. (NASDAQ: CLHC) today reported increased revenues for the third quarter and nine months ended Sept. 30, 190.

Revenue for the quarter amounted to $5,150,155, an increase of 52 percent over the $2,834,522 reported for the same period in 1989. Revenue for the nine months amounted to $12,653,477 increasing 82 percent over the same period last year.

Fully diluted earnings per share for the quarter was $.04 increasing $.02 over the last quarter. Fully diluted earnings per share for the nine months amounted to $.08.

Revenue, for the period, increased primarily due to the acquisition of NMSA, in April, 1990 coupled with the company's expansion into new markets. Earnings per share have increased from the second quarter 1990 to the third quarter 1990 due to the increased revenues, coupled with the company's ongoing plan to eliminate duplicate expenses and inefficiencies within the NMSA organization by integrating it into the company's operations.

CHC is engaged in home infusion therapy and the distribution of medical products used in hemodialysis. On Oct. 29, 1990 the company announced that it was withdrawing from the hemodialysis product sales business effective Dec. 31

1990 due to inadequate margins and a $120,000 loss through Sept. 30, 1990.

One of the company's manufacturer's, Haemotronic, SRL of Italy will be taking over the product sales business subject to the signing of a definitive agreement. The company expects no adverse effect on its balance sheet as a result of withdrawing from this business and anticipates an improvement in margins.

ST. PAUL, MN (NOV. 7) PR NEWSWIRE - Northwest Airlines passenger traffic grew 14.7 percent last month compared with October 1989, NWA Inc., Northwest's parent, said today.

Northwest flew 4.25 billion revenue passenger miles in October, up 14.7 percent from the 3.7 billion revenue passenger miles flown in October 1989. Capacity was up 6.9 percent to 6.54 billion available seat miles in October from 6.12 billion a year earlier. Load factor jumped 4.4 points to 64.9 percent.

The airline's cargo ton miles decreased 5.9 percent to 170.5 million from 181.2 million a year earlier.

"We've achieved substantial domestic load factor increases despite the fact that ticket prices increased starting in September," said A.B. Magary, Northwest executive vice president of marketing.

For the first 10 months of 1990, Northwest flew 43.54 billion revenue passenger miles, an increase of 13.6 percent over the 38.33 billion flown in the first 10 months of 1989. Available seat miles were up 11.1 percent to 64.63 billion from 58.17 billion in 1989. Load factor for the 10-month period increased 1.5 points to 67.4 percent from 65.9 percent. Cargo ton miles were down 3 percent to 1.51 billion from 1.55 billion.

INDIANAPOLIS (NOV. 7) PR NEWSWIRE - An 84-percent increase in sales of the all-new 1991 Ford Explorer, along with strong gains for the Ford Aerostar, Ford Probe, and Mercury Sable, helped Ford Motor Company (NYSE: F) dealers in Indiana finish October with strong sales momentum. For the month, Ford Aerostar and Ford Probe sales increased 16 percent and 64 percent over 1989, respectively.

"Strong light truck sales mirrored a national trend," said Don Laye, Ford Division's Indianapolis District sales manager. "Nationally," said Laye, "October was the seventh time in the past eight months that Ford's share of the truck market increased over a year ago."

In the Cincinnati Lincoln-Mercury Sales District, Mercury Sable sales rose five percent for October. The Lincoln Continental also showed a four-percent sales increase for the first ten months of 1990.

Don Kaegi, sales manager of the Cincinnati Lincoln-Mercury District, which includes most of Indiana, said, "Conventional wisdom seems to indicate that, sooner or later, the barrage of bad news since early August is bound to take its toll on the automotive market."

"So far, however, sales have shown more resilience than anticipated, especially considering the steep declines in consumer confidence. We hope that the recent deficit-reduction agreement will lead to lower interest rates that would bolster consumer confidence."

DALLAS (NOV. 7) PR NEWSWIRE - National Heritage Inc. (NYSE: NHR) reported today that it has completed the sale of its retirement community management subsidiary, Retirement Corporation of America, to The Fourmidable Group Inc. of Farmington Hills, Mich., and Ronald Cates of Atlanta, Ga., for approximately $2,000,000 in cash and notes.

Robert M. Galecke, President of National Heritage, commented, "This sale is another important step in our strategy to divest of non-core businesses and to focus on our core business, managing long-term care facilities."

In June 1990 National Heritage sold its healthcare products and services subsidiaries and the company is currently in discussions to dispose of its institutional pharmacy operations.

Ronald Cates, speaking for the new owners of Retirement Corporation of America said, "This acquisition better positions The Fourmidable Group to perform asset management and property management on a nationwide basis with locations in over 20 states. As a registered contractor with the Resolution Trust Corp. and the FDIC, we are now able to serve their needs over a much wider geographic area."

Retirement Corporation of America manages 18 retirement communities in 15 states, with approximately 3,000 units, owns one retirement community with 269 units, and leases two retirement communities with 532 units.

The Fourmidable Group Inc. is a property management company with 14,000 residential units (6,000 of which are senior housing units) and several million square feet of commercial office and industrial space under management.

National Heritage Inc. is one of the nation's leading managers of long-term care facilities for the elderly.

ATLANTA, (NOV. 70 PR NEWSWIRE - Cotton States Life and Health Insurance Co. (NASDAQ: CSLH) reported per-share earnings from operations of 20 cents for the third quarter 1990, compared to 28 cents for the third quarter 1989.

Investment transactions produced a 2 cent loss per share for the quarter, compared to a 6 cent gain per share for the third quarter of 1989. Year-to-date earnings from operations increased 5 cents per share from 45 cents to 50 cents per share, while per-share earnings from realized investment gains decreased from 20 cents per share to 6 cents per share.

President and CEO Ridley Howard said the increase in year-to-date earnings from operations was due to the decrease in individual death benefits and an increase in investment income.

One of the company's subsidiaires, CSI Brokerage Services Inc., earned 1 cent per share for the third quarter, while the other, RK Marketing Resources Inc., lost 2 cents per share for the quarter, which is an improvement of 2 cents per share over second quarter 1990.

Howard announced that the company is now licensed to sell life insurance in

Louisiana and has obtained a certificate of authority in Virginia.

Cotton States Life and Health Insurance Co. actively markets life insurance in Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina and Tennessee. Its common shares are traded Over-the-Counter under the NASDAQ symbol CSLH.

LOUISVILLE, KY (NOV. 7) PR NEWSWIRE - The board of directors of Capital Holding Corporation (NYSE: CPH) today declared a dividend of 30 cents per share of outstanding common stock for the first quarter of 1991. The dividend up 3 cents from the fourth quarter of 1990, represents an 11 percent increase and will be payable March 15 to shareholders of record on March 1, 1991. The company has increased the dividend paid on its common stock every year since its founding in 1969.

The board also approved, by an additional 4 million shares, an increase in the maximum number of shares which can be purchased under the corporation's stock repurchase program.

"We continue to believe that our stock holds exceptional value, especially at today's market prices," said Irving W. Bailey II, Capital Holding's chairman, president and chief executive officer. "Repurchase is one way for the company to provide added shareholder value.

"We reactivated our repurchase program on September 17, 1990, and since then the company has bought approximately 1.1 million shares. Treasury shares at the end of October represented approximately 22 percent of shares outstanding

since we began repurchases in 1979," Bailey said.

Also in September, the company's employee pension fund announced that it would purchase up to an additional 550,000 shares. Since that time, the fund has acquired approximately 200,000 shares.

The board also declared a fourth quarter dividend of 27 cents per share of outstanding common stock. The dividend will be payable on December 14, to shareholders of record on November 30, 1990.

A per share dividend of $1.8875 for Capital Holding's adjustable-rate preferred stock will be payable January 15, 1991, to shareholders of record on December 31, 1990. The rate, which was previously announced, represents an annualized yield of 7.55 percent.

Capital Holding is one of the nation's five largest shareholder-owned life insurance organizations, with $16.2 billion in assets and $45.6 billion of life insurance coverage in force.

The corporation offers a broad range of financial services and products through agents, direct-marketing media, investment professionals and retail locations. Its common stock is listed on the New York and Pacific Stock Exchanges under the ticker symbol CPH; its preferred stock is listed on the New York Stock Exchange under the symbol CPHF.

#90311p4395 11/07/1990 ~PR Newswire

RESEARCH TRIANGLE PARK, NC (NOV. 7) PR NEWSWIRE - A member of Microelectronics Center of North Carolina's (MCNC) technical staff has come up with a more exact way to etch designs on computer chips and he's agreed to put that process to work for IBM, which will use it for chip packaging.

Steve Bobbio, principal investigator for plasma research programs at MCNC, and Yueh-Se Ho, who has since left MCNC, patented the idea for a split cathode magnetically enhanced reactive ion etcher (MERIE).

They built two units that are now being used at MCNC. One machine is used daily in advance packaging studies of computer chips in MCNC's clean room; the other is used for chip fabrication experiments and demonstrations.

As engineers put together tiny multi-layered packages for complex computer chips which are many times smaller than a human hair, they must create very precise connections that will carry electric current when the chip is in use.

Etching of micro wire patterns is one way to make those precise pathways. Etching requires engineers to lay down a thin film of metal and then chemically or physically remove only the parts that are not needed. What remains are the critical connections.

The MCNC researchers developed a new configuration for the critical portion of the apparatus in which etching occurs. Their design makes that etching process much more accurate and more reliable than ever before. The improvement, Bobbio says, lies in greater control of moving positively-charged particles, called ions, generated from a cloud of plasma gas under pressure that fills the etching chamber.

Inside the chamber, Bobbio has split the energy source, called a cathode, and surrounded it with an external magnetic field or magnetron. When the cathode is powered up, the plasma begins to glow and give off ions.

Bobbio's design lets scientists control the number of ions and their activity by the strength of the magnetron and by the amount of voltage applied to the split cathode. The ions are drawn from the plasma by the magnetron to the edge of the plasma, they strike the surface to be etched and stimulate the chemical process which strips away unwanted material.

By controlling the ion energy, Bobbio says, he makes the etching of the micro wire connections more precise and there is less contamination from loose particles. In addition, he says, he can vary the ion energy to accomodate variations in the pressure on the plasma gas, the kind of gas that is used and the type of chips or packaging material he wants to etch.

RAHWAY, NJ (NOV. 7) PR NEWSWIRE - Students gathered at more than 600 colleges and universities across the country recently to participate in a live teleconference, "Why Graduate School in Science and Engineering?", a program sponsored by Merck & Co. Inc.

Produced by the GEM program (National Consortium for Graduate Degrees for Minorities in Engineering and Science, Inc.), the program was aimed at increasing the dwindling number of U.S. students choosing graduate school to prepare for jobs in science and technology.

Participating New Jersey schools included DeVry Technical Institute, Woodbridge, Drew University, Madison, New Jersey Institute of Technology, Newark, Rutgers University, Piscataway, Stockton State College, Pomona, Stevens Institute of Technology, Hoboken, and William Paterson College, Wayne, and Princeton University. The live teleconference originated from The Johns

Hopkins Applied Physics Laboratory in Laurel, Md., and the University of Houston.

NASA astronaut Col. Charles F. Bolden, Jr. warned students of the lure of business and finance. "We want to make money instead of widgets," he said. "I think if we can get kids starting in kindergarten and elementary school to understand that it's widgets, it's nuts and bolts, that make things, then we're well on our way to recovery."

Other panelists included industry executives who expressed alarm over the competition within U.S. industry for a small number of scientists. Dr. Barry C. Buckland Sr., director of research and development at Merck and a conference panelist said, "Our future growth depends on having talented...students entering the field."

Students calling in from downlink sites asked questions concerning the disparity of salary between industry and academia for graduating science students, the value of full-time over part-time study, the availability of financial support to continue study, and other topics.

The GEM program is a nonprofit consortium based at the University of Notre Dame. Founded in 1976, GEM's primary mission is to provide fellowship support to minority students at the graduate level in science and engineering.

In addition to sponsoring the videoconference, Merck supports the consortium by offering internships to GEM students. Representing 54 different engineering schools, GEM interns work for their sponsoring organization each summer until they earn their graduate degrees.

In 1987 Merck began to work with some promising GEM engineering students. "I'm getting the kind of experience I could never get in the college setting. I've done research and lab work in industry before, but this is much more challenging," said Darrin Holly, one of Merck's GEM interns.

CAMBRIDGE, MA (NOV. 7) PR NEWSWIRE - Polaroid Corporation (NYSE: PRD) announced today it has been awarded a $3.9 million contract with the U.S. Marine Corps Research, Development and Acquisition Command in Arlington, Va. The contract, which was awarded to Polaroid's Holographic Products Division, calls for the production of laser protection devices.

Polaroid's Holographic Products Division entered the defense sector in late 1987 with a contract from the U.S. Army Natick Research Development and Engineering Center, Natick, Mass. Research and development has been proceeding

since then for laser protection for soldier eyewear.

"This contract is an opportunity for Polaroid to apply multiple technologies to meet a difficult technical and operational challenge," said Douglas Marks, holographic products division manager.

"We will be mass-producing products of high quality at low unit cost to meet government needs on a quick turnaround basis." The Polaroid Holographic Products Division develops and manufactures products for display, security, automative and laser eye protection applications.

Polaroid Corporation, with sales of almost $2 billion, is the worldwide leader in high-quality, hard copy instant imaging. The company supplies instant photographic cameras and film; and conventional and electronic visual communication products to the consumer, business, industrial, and scientific markets.

SIOUX CITY, IOWA (NOV. 7) PR NEWSWIRE - The merger of Iowa Resources Inc. (NYSE: IOR) and Midwest Energy Co. (NYSE: MWE) into a new holding company, Midwest Resources Inc., became effective today.

The merger, which was announced March 16, 1990, was approved by shareholders on May 23, 1990. The merger was approved by the Iowa Utilities Board in July, the Securities and Exchange Commission in September, and the Federal Trade Commission in early November.

As required by the merger agreement, Midwest Energy and Iowa Resources have each declared adjustment dividends payable to the holders of record of each company as of the close of business on Nov. 6, 1990. The Iowa Resources adjustment dividend is 2.34 cents per share, reflecting the fact that shareholders of Iowa Resources received a quarterly dividend of 42.5 cents per share on Nov. 2, 1990. The Midwest Energy adjustment dividend is 30.19 cents per share reflecting the fact that shareholders of Midwest Energy received a quarterly dividend of 41 cents per share on Sept. 1, 1990.

The board of directors of Midwest Resources has declared a dividend of 10.29 cents per share payable on Dec. 1, 1990 to shareholders of record on Nov. 19, 1990. This dividend reflects a quarterly dividend rate of 39 cents per share prorated over the period from Nov. 7, 1990 to Dec. 1, 1990.

The common stock of Midwest Resources will be listed on the New York Stock Exchange under the symbol MWR. Trading is expected to begin on Nov. 8, 1990.

Shareholders will soon be sent information regarding the exchange of their common stock certificates into certificates of Midwest Resources.

As a result of the merger, Midwest Resources will own two utility operating companies, Iowa Power Inc. and Iowa Public Service Co. Midwest Resources will also own Midwest Capital Group Inc., under which nonutility subsidiaries will operate. The combined operations of Midwest Resources represented total annual revenues in 1989 of approximately $933 million and total assets of $2.3 billion. Midwest Resources is headquartered in Des Moines, Iowa.

Iowa Power is an electric utility company serving 250,000 customers in central and southwest Iowa, including Des Moines and Council Bluffs. Iowa Public Service provides electric service through its IPS Electric division to 156,000 customers in Iowa and southeastern South Dakota, and natural gas service through its Midwest Gas division to 347,000 customers in Iowa, Minnesota, South Dakota and Nebraska.

AUSTIN, TEXAS (NOV. 7) PR NEWSWIRE - Tracor Applied Sciences Inc., a subsidiary of Tracor, has recieved a contract from the Naval Coastal Systems Center (NCSC), Panama City, Fla., to provide acoustic simulation and modeling

services to support U.S. Navy Acoustic Warfare Programs. The contract is for one base year, representing $3.36 million, and four option years for a total potential value of $17.5 million.

K. Bruce Hamilton, president of Tracor Applied Sciences, said, "Tracor will provide the simulation and modeling disciplines necessary to support NCSC in weapons and countermeasures development programs."

Tracor has provided acoustic simulation and modeling support for NCSC Acoustic Warfare programs since 1973. Hamilton said the contract will be performed by the Tracor Applied Sciences' Analysis & Applied Research Division under the direction of Homer E. Wieland, division vice president, from its operations in Austin, Texas, and Panama City. Wieland said the program will be managed by Terry D. Plemons under the direction of Jerry J. Dow, director of Signal Processing.

Tracor, owned by privately held Westmark Systems Inc. is an international technological products and services company with headquarters in Austin. The company is a significant engineering and support contractor in sonar, communications, and aviation; a leader in the development and production of electronic countermeasures systems and other advanced defense electronics; and a major manufacturer of electrical components.

MIAMI (NOV. 7) PR NEWSWIRE - Margo Nursery Farms, Inc. (NASDAQ: MRGO) today announces its sales and earnings for its third fiscal quarter ended Sept. 30, 1990.

The company's consolidated sales for the three months ended Sept. 30, 1990 were $1,921,000 compared to $1,973,000 for the same period last year. The company's consolidated sales for the nine months ended Sept. 30, 1990 were $6,876,000 which represents a 15 percent increase in sales compared to $5,947,000 for the same period in the prior year.

The company's consolidated pre-tax earnings for the three months ended Sept. 30, 1990 decreased from $28,000 profit to $50,000 loss. Pre-tax earnings for the nine months ended Sept. 30, 1990 were $855,000 compared to $316,000 for the same period in the prior year.

The company's consolidated net loss for the three months ended Sept. 30, 1990 was $55,000 or .03 per common share, compared to $188,000 profit or .11 per common share for the same period last year. However, the prior years third quarter earnings include $168,000 of extraordinary gain which is a non-recurring item. The company's net profit after taxes, for the nine months

ended Sept. 30, 1990 were $823,000 or .49 per common share, compared to $454,000 or .27 per common share for the same period in the prior year.

#90311p4425 11/07/1990 ~PR Newswire

ARCADIA, CA. (NOV. 7) PR NEWSWIRE - The Vons Companies Inc. (NYSE: VON) reported sales for the 16-week quarter ended Oct. 7, 1990 of $1,638.5 million compared with $1,598.4 million in the year ago quarter, a 2.5 percent increase. Sales performance reflects a decrease in the number of stores from 334 at the end of the third quarter of 1989 to 321 at the end of the third quarter of 1990, a decrease of 13 stores. Sales in the third quarter on a

same store basis increased 4.5 percent over the comparable year ago quarter. In the third quarter, sales on a same store basis in the original Vons stores increased 1.2 percent and in the acquired stores same store sale increased 11.1 percent.

Third quarter 1990 income before extraordinary item was $13.4 million or $.34 per share compared with a third quarter 1989 loss before extraordinary item of $5.9 million or $.15 per share. Net income for the third quarter of 1990 was $21.4 million or $.55 per share compared with a third quarter 1989 net loss of $5.9 million or $.15 per share. Net income for the third quarter of 1990 reflects an $8.0 million or $.21 per share extraordinary item for utilization of net operating loss carryforwards.

Operating cash flow (defined as operating income plus depreciation and amortization of property, amortization of goodwill and other assets and LIFO charge) increased to $78.6 million or $2.02 per share in the third quarter of 1990 compared with $49.3 million or $1.27 per share in the year ago quarter. Operating cash flow as a percent of sales was 4.8 percent in the third quarter 1990 compared with 3.1 percent a year ago.

Third quarter 1990 operating improvement over the year ago quarter reflects increased management focus on inventory shrinkage control, buying activities, promotional strategy, product mix and increased labor productivity in the manufacturing and distribution facilities. Additionally, the company achieved selling and administrative benefit from store labor scheduling systems and programs implemented during 1989. However, these improvements were offset by contractual increases in union wages and fringe benefit contributions.

Sales for the 40-week period were $4,072.0 million compared with $3,976.6 million in the year ago period, a 2.4 percent increase. Sales on a same store basis increased 4.0 percent over the comparable prior year period.

For the 40-week period, sales per selling square foot were $673 on an annualized basis. In the original Vons stores, sales per selling square foot were $710 on an annualized basis. For the 40-week period same store sales per selling square foot in the acquired stores were $615 on an annualized basis.

Income before extraordinary item for the 40 weeks ended Oct. 7, 1990 was $32.0 million or $.82 per share compared with a loss before extraordinary item of $28.1 million or $.73 per share in the same period a year ago. Net income of $52.5 million or $1.35 per share for the first three quarters of 1990 compares with a net loss of $28.1 million or $.73 per share in the comparable prior year period. Year to date results in 1990 also reflect a $20.5 million, or $.53 per share, extraordinary item for utilization of net operating loss carryforwards.

At the end of the third quarter, the company had unused bank lines of $208.4 million. Senior debt and capital lease obligations at Oct. 7, 1990 were

$361.2 million, reflecting a decrease of $17.1 million over the second quarter 1990 and a decrease of $52.6 million over year-end 1989. The ratio of operating cash flow to interest expense was 2.7 in the third quarter of 1990.

Cash capital expenditures for the three quarters of 1990 consisted of $74.9 million for new stores, remodels and upgrades and $26.8 million for manufacturing, distribution and support facilities. During the third quarter of 1990, the company's financing strategy was changed from leasing to purchasing for store fixtures and transportation equipment, thereby, increasing cash capital expenditures.

During the first three quarters of 1990 one store was opened and eight stores were closed.

The company also announced that it has adopted an employee stock purchase plan effective Jan. 1, 1991. The source of the stock will be open market purchases and the company will absorb all administrative and commission costs associated with the purchase of the stock.

Vons, headquartered in Arcadia, is the largest retail supermarket in Southern California. The company currently operates 321 stores under the names Vons, Pavilions, Pavilions Place and Tianguis and operates the Jerseymaid dairy and ice cream plant. The Vons Companies Inc. is traded on the New York Stock Exchange under the symbol VON.

RICHMOND, VA (NOV. 7) PR NEWSWIRE - MARKEL CORPORATION (NASDAQ-NMS: MAKL) has announced increased operating revenues and pre-tax operating income for third quarter and nine months ended September 30, 1990. Operating revenues for the third quarter increased 43 percent to $33.2 million and pre-tax operating income increased 6 percent to $2.7 million. For the nine month period, operating revenues were $93.5 million for 1990 compared to $65.3 million for 1989, an increase of 43 percent and pre-tax operating income was $8.1 million for 1990 compared to $7.6 million in 1989, an increase of 7 percent. Net income decreased 17 percent to $3.2 million for the third quarter and decreased 10 percent to $8.6 million for the nine months, due to reduced earnings from investments in unconsolidated subsidiaries caused by lower realized gains on investments. On a per share basis, net income for the quarter was $0.59 in 1990, compared to $0.73 in 1989 and for the nine months, $1.59 per share, in 1990 from $9.6 million, or $1.83 per share, in 1989. Average shares outstanding for the quarter and nine months ended Sept. 30, 1990 was 5.4 million compared to 5.2 million in 1989.

Revenue growth for the quarter and nine months ended Sept. 30, 1990 was

realized in all areas of operations. Brokerage commissions increased primarily due to the October 1, 1989 acquisition of certain assets of Rhulen Agency, Inc. Claims operating revenues increased due to internal growth and expansion of new offices. The underwriting operations continue to benefit from greater investment income and profitable underwriting experience. Earnings from investments in unconsolidated subsidiaries was $1.4 million for the quarter and $3.4 million for the nine months in 1990 compared to $2.2 million for the quarter and $4.7 million for the nine months in 1989.

Book value per common share decreased from $11.98 in December 31, 1989 to $10.14 at September 30, 1990 due primarily to unrealized losses on equity securities held by the Company and its unconsolidated subsidiaries.

Markel Corporation is a diversified, specialty insurance organization with operations in the claims management, brokerage and underwriting segments of the industry.

#90311p4427 11/07/1990 ~PR Newswire

WILMINGTON, DE (NOV. 7) PR NEWSWIRE - The Columbia Gas System Inc. (NYSE: CG) today reported net income for the third quarter of $900,000 or two cents a share, compared to a loss of $7.2 million, or 16 cents a share, in the third quarter of 1989. The earnings improvement resulted from the effect of recent favorable court rulings, partially offset by the effects of several one-time items.

At the same time, Columbia reported that as a part of its plan to improve the future marketability of its gas supply, it is attempting to renegotiate certain Southwest gas purchase contracts and, in some cases, settle related producer litigation. In addition, Columbia said an expected judge's ruling will settle a West Virginia suit involving just compensation to Columbia for condemned coal acreage.

Columbia also announced today that it is filing a registration statement with the Securities and Exchange Commission which describes a proposed offer to sell 2.6 million shares of common stock (approximately 5.5 percent of Columbia shares outstanding).

Columbia's oil and gas and transmission earnings improved in the third quarter while earnings for distribution and other operations declined. Net income from oil and gas operations of $6.4 million was $2.3 million higher than the same period in 1989. The improvement was due largely to higher oil and gas prices and to increased oil production.

Net income from transmission operations increased $8.6 million to $17.6

million primarily because of the court rulings that allow Columbia Gas Transmission Corp. to recoup costs previously paid to other pipelines for expenses related to natural gas production.

The rulings' positive effects were offset in part, however, by additional reserves for future environmental cleanup costs and non-recoupable take-or-pay costs. In addition, Transmission customers carried forward undelivered prepaid volumes from the 1989-1990 heating season, lowering Transmission's gas sales in the third quarter.

Distribution operations had a higher loss than normally experienced in the summer months. The loss rose to $21.7 million from $19.4 million, in spite of increases in sales and transportation volumes, largely because distribution operating expenses continue to outpace authorized rate recovery.

For the nine months ended Sept. 30, 1990, Columbia's net income was $43.9 million, or $.94 a share, compared to $73.1 million, or $1.61 a share in 1989. Warmer weather was a primary reason for the $29.2 million decline. Both 1990 and 1989 were warmer than normal, but the first nine months of 1990 have been almost 14 percent warmer than the same period last year.

WILMINGTON, DEL. (NOV. 7) PR NEWSWIRE - The Columbia Gas System Inc. (NYSE: CG) announced today the filing of a registration statement with the Securities and Exchange Commission concerning an offering of 2.6 million shares of common stock.

Of the shares, 2.2 million will be offered in the United States and Canada by a syndicate headed by Morgan Stanley & Co. Inc.; Donaldson, Lufkin & Jenrette Securities Corp.; The First Boston Corp. and Prudential-Bache Capital Funding.

A group of international underwriters headed by Morgan Stanley International; Credit-Suisse First Boston Ltd.; Donaldson, Lufkin Jenrette International and Prudential-Bache Capital Funding will offer 400,000 shares internationally. Columbia will grant the U.S. underwriters an option to purchase up to 390,000 additional shares for the purpose of covering overallotments.

The last reported sales price of Columbia's common stock on the New York Stock Exchange on Nov. 6, 1990, was $53 per share.

The Columbia Gas System Inc. is one of the largest natural gas systems in the United States and is composed of the parent holding company, a service company and 19 other subsidiaries. Columbia subsidiaries form an integrated natural gas system which has three primary business segments engaged in the

exploration for and production of oil and natural gas, natural gas transmission and natural gas distribution. Columbia Gas was organized under the laws of the State of Delaware on Sept. 30, 1926, and is a registered holding company under the Public Utility Holding Company Act of 1935.

#90311p4435 11/07/1990 ~PR Newswire

VIRGINIA BEACH, VA. (NOV. 7) PR NEWSWIRE - Clarence W. Keel, President and Chief Executive Officer of Seaboard Bancorp, Inc. (NASDAQ: SEAB), the holding company of Seaboard Savings Bank, F.S.B., announced net operating losses for the nine months ended September 30, 1990, totalling $299,352 or $.34 per share. This compared to an operating loss of $818,102 or $.92 per share for the comparable nine months of 1989.

During 1990, after tax losses for the third quarter were $84,830 as compared to losses of $92,891 for the second quarter and $121,632 for the first quarter. This improvement was due primarily to an increase in net interest income. For the third quarter of 1989 the net after tax loss was $850,563.

The effect of non-earning assets on interest margin was a major cause of the reported losses. Interest income not recorded on non-earning assets during 1990 totalled approximately $480,000 of which approximately $115,000 related to the third quarter. Also, for the nine months ended September 30, 1990, Seaboard increased its provision for loss reserves on loans and foreclosed real estate by $181,576. During the comparable period of 1989, this provision was $722,122.

Total assets at September 30, 1990, were $106,974,037 as compared to $115,038,818 at September 30, 1989. Stockholders' equity at September 30, 1990, was $6,438,142 or 6.02 percent of total assets. Seaboard Savings Bank, F.S.B. met all of its regulatory capital requirements as of September 30, 1990.

Seaboard Bancorp, Inc. is a savings and loan holding company which resulted from the conversion of Seaboard Savings and Loan Association into Seaboard Savings Bank, F.S.B., a federally chartered savings bank, and its reorganization into the holding company structure. The conversion and reorganization were effective October 31, 1990. The Savings Bank provides mortgage and retail banking services principally in the Hampton Roads area of Virginia. Headquartered in Virginia Beach, Virginia, Seaboard has five offices, two in Virginia Beach, one in Chesapeake, one in Norfolk, and one in Portsmouth. Currently Seaboard Bancorp has approximately 900 stockholders and 891,184 shares of stock outstanding.

MINNEAPOLIS (NOV. 7) PR NEWSWIRE - Ciprico Inc. (NASDAQ: CPCI) today announced that its board of directors voted in favor of authorizing a cash dividend of 20 cents per share to holders of its common stock. The dividend will be payable on Nov. 29, 1990, to holders of record at the close of business on Nov. 20, 1990.

Robert H. Kill, president and chief executive officer said, "The past year was a challenge for us as well as our shareholders. We want to reward their patience and commitment. Ciprico has approximately $5 million in cash with no debt. Payment of the dividend will not inhibit our future growth plans."

Ciprico is a designer, manufacturer and marketer of intelligent controllers and adapters for disk and tape storage drives. The company's common stock trades on the NASDAQ national market system under the symbol CPCI.

LONDON (NOV. 7) PR NEWSWIRE - Robert Maxwell's Mirror Group is to launch a U.S. daily racing paper, The Racing Times, next spring. Steven Crist, formerly chief racing writer of the New York Times, is to be the paper's editor-in-chief.

Maxwell's Mirror Group Newspapers publishes The Sporting Life, the world's oldest and most prestigious racing daily, in the United Kingdom.

The Racing Times will be a quality daily making full use of the new page make-up and color printing technologies so successfully exploited by the Life in the U.K., although the style of the paper will be necessarily tailored to the U.S. market.

Mirror has also acquired the database of past racing results previously used to publish Figs Form. The database has the U.S. racing results for the last four years.

Maxwell said: "The spread of off-track betting in the U.S. presents The Racing Times with a tremendous opportunity to replicate The Sporting Life's U.K. success story across the Atlantic."

Crist said: "This is an important step forward for American racing and I am looking forward to it immensely. The Daily Racing Form monopoly has not served U.S. racing well and I am sure our entry into the market will benefit both handicappers and industry professionals."

EDMONTON, ALBERTA (NOV. 7) PR NEWSWIRE - Banister Inc. (Montreal, Toronto: BAC) announced today net income of $1,704,000 or 29 cents per share on revenues of $189,616,000 for the three months ended Sept. 30, 1990. This compares with a net loss of $4,118,000 or 69 cents per share on revenues of $216,980,000 for the same period in 1989.

For the nine months ended Sept. 30, 1990, net loss was $5,828,000 or 98 cents per share on revenues of $516,943,000. This compares with a net loss of $3,832,000 or 64 cents per share on revenues of $454,164,000 for the corresponding period in 1989.

The third quarter profit is mainly due to increased pipeline construction activity.

At Sept. 30, 1990 the corporation reported a backlog of work amounting to $371,407,000, compared to $637,246,000 for the corresponding period in 1989.

Banister Inc. is a Canadian construction firm specializing in civil, marine, utility, building, pipeline and industrial construction.

#90311p4469 11/07/1990 ~PR Newswire

DALLAS (NOV. 7) PR NEWSWIRE - The Missiles Division of LTV Missiles and Electronics Group has received a full-scale production contract from the U.S. Army for a new conventional, surface-to-surface missile known as the Army Tactical Missile System, or Army TACMS.

The U.S. Army Missile Command awarded LTV a $126.3 million fixed- price contract for full-scale production of 318 Army TACMS missiles together with associated equipment and repair parts. The Army this week announced a $63.1 million incremental payment on the contract.

Work will be performed principally at the Missiles Division headquarters near Dallas. Final assembly of the missiles will be done at LTV's El Paso, Texas, facility. Delivery of the 318 missiles is expected to be completed by late 1992.

The Army awarded LTV its first low-rate initial production contract for Army TACMS in February 1989. The $44.6 million fixed price contract was for delivery of 66 missiles together with associated equipment and repair parts. In February 1990, LTV was awarded its second low-rate initial production contract for $66.4 million for 104 missiles and associated equipment and repair parts.

The Army TACMS full-scale development program was successfully completed in June with the test firing of the last missile of the operational test phase at White Sands Missile Range, N.M. During operational testing, the Army tests the system under actual field conditions.

LTV won the competition to design and produce Army TACMS in March 1986 after almost a decade of research and testing. The resulting conventional missile will give Army battlefield commanders the capability to attack enemy ground targets at long ranges and disrupt the flow of reinforcements.

Each missile is approximately 13 feet long, 2 feet in diameter and has a range of more than 60 miles (100+ kilometers).

The launcher for Army TACMS is another LTV product, the M270 launcher which also fires Multiple Launch Rocket System (MLRS) rockets. Each M270 launcher

is capable of carrying two Army TACMS missiles packed in individual containers. Both the launcher and the MLRS rockets are produced at LTV's Camden, Ark., facility.

The addition of Army TACMS to the arsenal of M270-delivered weapons will provide Army commanders with two options. They can attack ground targets near the front line of battle with MLRS rockets or attack long-range with Army TACMS missiles from the same launcher.

The initial production missiles will be for attacking enemy troops, supplies and equipment. Each missile warhead will contain about 950 M-74 high-explosive bomblets, approximately the size and shape of a tennis ball. They are dispersed over the target area, detonating on impact.

Key features of the Army TACMS missile include a solid fuel rocket motor and a ring laser gyro inertial guidance unit.

Atlantic Research Corp. of Alexandria, Va., is the rocket motor supplier. The Military Avionics Division of Honeywell Inc., in Clearwater, Fla., produces the H700-3A guidance unit.

#90311p4476 11/07/1990 ~PR Newswire

WAUKEGAN, ILL. (NOV. 7) PR NEWSWIRE - Outboard Marine Corp. (OMC) (NYSE: OM) today reported losses for its 1990 fiscal year and fourth quarter, which ended Sept. 30.

The recreational marine products company attributed its losses to reduced sales resulting from a cyclical downturn in its industry and a general slowdown in the U.S. economy, as well as a number of restructuring and other one-time charges taken to reduce costs and improve its competitive position.

For the year, OMC reported a net loss of $75.5 million or $3.89 per share. According to OMC, $28.5 million after tax, or $1.47 per share, of the 1990 net loss was attributable to restructuring and other one-time charges. The company reported net earnings of $21 million, or $1.09 per share, from continuing operations in 1989.

OMC said its 1990 sales fell 22 percent to $1.15 billion from $1.46 billion in 1989. In the severely depressed U.S. marine products marketplace, OMC's sales fell 29 percent in 1990 from 1989, while its sales outside the U.S. increased 4 percent in the year. OMC's 1989 sales and earnings exclude the contributions of its former Lawn-Boy and Cushman divisions, which were sold in the fall of 1989.

For its fourth quarter, OMC reported a net loss of $41.4 million, or $2.13 per share. The company said $18.8 million after tax, or 97 cents per share, of the net loss was the result of restructuring and other one-time charges. By comparison, it reported a net loss from continuing operations of $1.7 million, or eight cents per share for the same quarter in 1989.

OMC reported sales of $293 million for the 1990 fourth quarter, compared with sales of $386 million for the same quarter in 1989. The company said its U.S. sales fell 32 percent in the 1990 fourth quarter, while its sales outside the U.S. were flat.

On a pre-tax basis, OMC said its restructuring and other one-time charges totaled $46 million for the past year and $30.4 million for the fourth quarter. Approximately $27 million of the total pre-tax charges for the year according to OMC, were for severance costs and expenses to close facilities. Approximately another $15 million of the total pre-tax charges for the year were for costs associated with a previously announced product recall of the company's stern drive engines. The remainder of the charges were incurred for other one-time costs related to OMC's engine manufacturing and distribution systems.

In its cost reduction efforts, OMC has closed or mothballed a total of 10 outboard motor and boat manufacturing plants in the U.S., Canada and Australia consolidating manufacturing into other plants. The company also reduced its salaried staff by approximately 16 percent, or more than 600 jobs, during the year.

Outboard Marine Corp. is a leading international marketer of marine engines, boats, accessories and services.

#90311p4477 11/07/1990 ~PR Newswire

PANAMA CITY, FL (NOV. 7) PR NEWSWIRE - Florida First Federal Savings Bank (NASDAQ-NMS: FFPC) announced that it experienced a loss for the quarter ended Sept. 30, 1990 of $277,000 or $.15 per share compared to a loss of $362,000 or $.19 per share for the quarter ended Sept. 30, 1989.

For the nine-month periods ended Sept. 30, 1990 and 1989, the savings bank recorded losses of $960,000 or $.51 per share and $1.2 million or $.62 per share, respectively.

However, losses before income tax benefits decreased substantially to $277,000 and $960,000 for the three and nine months ended Sept. 30, 1990 as compared to

$406,000 and $1.6 million for the same periods in 1989.

Total net non-performing assets, which include non-accrual loans, real estate owned ("REO") and troubled debt restructurings, totaled $28.2 million at Sept. 30, 1990 compared to $29.5 million at Dec. 31, 1989.

The provision for loan losses decreased by $128,000 for the three months ended Sept. 30, 1990 and increased $48,000 for the nine months ended Sept. 30, 1990 as compared to the same periods in 1989.

The decrease for the third quarter of 1990 reflected a reduction in the amount of new non-performing assets during such period as compared to the quarter ended Sept. 30, 1989. The nine month comparative increase reflected the effects of erosion on the market values of collateral securitizing loans held by the savings bank.

Andrew W. Stein, president and chief executive officer stated, "We will never be pleased reporting quarterly losses to our shareholders, but we are encouraged by the improving financial condition of the savings bank. The 1990 third quarter operating results are the best in eight quarters reflecting a trend of gradual quarterly improvements. Our loans on non-accrual and REO totaled $24.4 million at Sept. 30, 1990, the lowest level since 1987 while our net interest spread of 2.15 percent is the best since 1988."

For the nine months ended Sept. 30, 1990 compared to the same period in 1989, total operating expenses decreased by $831,000 reflecting improvements in all categories of non-interest expenses (except professional fees) with significant reductions in compensation and benefits, advertising costs, real estate owned operating expense and other operating expense.

For the same comparative periods, other operating income decreased by $383,000 primarily due to decreases in gains on the sale of investments and real estate. Total assets decreased from $284.4 million at Dec. 31, 1989 to $280.1 million at Sept. 30, 1990.

This decrease primarily reflected decreases in net loans receivable, cash and interest-bearing deposits offset partially by increases in investments. Liquid assets were used to fund maturing public deposits of approximately $8.4 million. Total deposits concurrently decreased from $208.1 million at Dec. 31, 1989 to $203.5 million at Sept. 30, 1990 while total borrowings increased slightly by $189,000.

Stockholders' equity at Sept. 30, 1990 was $12.0 million or $6.41 per share compared to $12.9 million or $6.92 per share at Dec. 31, 1989 reflecting the loss incurred for the first nine months of 1990.

The savings bank continues to meet all three capital requirements applicable under current regulations. Core and tangible capital both amounted to 4.3

percent of total adjusted assets, which is in excess of the 1.5 percent and 3.0 percent requirements, respectively. Risk-based capital was 6.5 percent of total risk-based assets, slightly exceeding the current requirement of 6.4 percent.

However, the savings bank does not believe that it will be able to meet the higher risk-based capital requirement which will go into effect on Dec. 31, 1990.

The savings bank expects in the near future to enter into a supervisory agreement with the Office of Thrift Supervision due to the savings bank's high level of nonperforming assets. It is expected that the agreement will substantially limit the savings bank's ability to originate commercial and multi-family mortgage loans.

The savings bank had already limited such activities prior to the proposed imposition of the supervisory agreement. The savings bank does not anticipate that the agreement will have any material adverse impact on its operations since the savings bank had already modified its operations in the manner expected to be required by the agreement.

The savings bank conducts business through nine full-service offices and is the largest thrift institution headquartered in the Florida Panhandle. Florida First Federal's common shares trade under the symbol "FFPC" on the NASDAQ National Market System.

CHICAGO (NOV. 7) PR NEWSWIRE - Tom Cato has been appointed to the newly created position of executive vice president logistics and David J. Warnimont has been named vice president product service for Montgomery Ward & Co., according to Bernard F. Brennan, chairman and chief executive officer. The appointments are effective immediately.

Cato, 48, was formerly senior vice president logistics since February 1989, responsible for management information systems, operations, importing and distribution. In his new position, he retains these responsibilities and adds those of product service. He reports directly to Brennan. Cato joined Montgomery Ward in 1986 as vice president distribution; the following year he was named vice president logistics. He has had extensive prior experience in managing distribution systems for other retailers including TG&Y Stores, Ben Franklin Stores and Sav-A-Stop.

Warnimont, 53, was formerly director of transportation, a position he held since 1986. In his new position, he has responsibility for all of Montgomery Ward's product service operations, reporting to Cato. He joined Montgomery Ward in 1983 as manager distribution planning, and in 1985 he was named director of distribution administration. Earlier, Warnimont held various marketing positions with Mobil Oil, including manager of market planning. In 1980, he joined Meenan Oil Co. as director of planning, the position he held prior to joining Montgomery Ward.

DALLAS (NOV. 7) PR NEWSWIRE - American Medical Holdings Inc. (AMEX: AMI) today reported quarterly and full year results for the fiscal year ended Aug. 31, 1990. AMI's adjusted fourth quarter 1990 operating income was $62.6 million (before interest, taxes, depreciation and amortization), a 16.8

percent profit margin on net revenues of $373.1 million. Actual results for the fourth quarter and full year have been adjusted to exclude the operating results of assets sold or to be sold. This is for the period from November 1989 to August 1990. Results before these fourth quarter adjustments were net revenues of $694 million and operating income of $110.4 million.

Fiscal 1989 results are presented as they were reported last year. In the fourth quarter of 1989 operating income was $77.6 million, a profit margin of 11.0 percent on net revenues of $705.2 million.

The company reported an adjusted net loss in the quarter of $13.2 million vs. a net loss of $52.4 million in the same quarter of the prior year.

Net revenues, adjusted to exclude operations sold or to be sold, for the combined 12 months of 1990 totaled $2.54 billion vs. $2.75 billion in 1989. Adjusted 1990 operating income of $471.1 million (before interest, taxes, depreciation and amortization) was 16.5 percent higher than $404.4 million achieved in the prior year. The company's operating profit margin rose to 18.5 percent from 14.7 percent in 1989.

The pre-tax loss for the 12 months of 1990 was $112.1 million vs. a 1989 loss of $20.6 million due to one-time merger costs totaling $128.2 million and higher interest expenses related to the buyout. The net loss for the same period was $82.3 million vs. a net loss of $12.8 million in the prior year.

AMI, the founder of the investor-owned hospital industry, operates acute care hospitals in the United States.

ST. LOUIS (NOV. 7) PR NEWSWIRE - At its regularly scheduled meeting held on Nov. 7, 1990, the IE Industries Inc. (NYSE: IEL) board of directors increased the quarterly dividend to 52 1/2 cents per share. This increase to an indicated annual dividend of $2.10, compared to $2.06 for the previous year, is the 15th consecutive annual increase in the common stock dividend. The dividend is payable Jan. 1, 1991, to shareholders of record Dec. 14, 1990.

Also at the meeting, the board reaffirmed its previously stated diversification policy and authorized its management to utilize the proceeds from the recent sale of Telecom USA stock to selectively pursue investments in targeted industries in order to provide an overall return on equity higher than is achievable in the regulated sector and thereby maximize shareholder value.

In separate actions, the board of directors of Iowa Electric Light and Power Co., IE Industries' principal subsidiary, continued dividends for each of its preferred and preference stock issues.

TORONTO (NOV. 7) PR NEWSWIRE - Wharf Resources Ltd. (NASDAQ-NMS: WFRAF; TSE: WRF) today announced earnings for the nine months ended Sept. 30, 1990, were $4,644,000 or 23 cents per share on revenues of $22,522,000, compared to $5,328,000 or 28 cents per share on revenues of $23,312,000 for the same period last year.

Earnings for the three months ended Sept. 30, 1990, were $1,254,000 or 6 cents per share on revenues of $7,516,000, compared to $1,631,000 or 9 cents per share on revenues of $9,902,000 for the same period last year. Lower gold production resulted in the decline in earnings during the current period.

Gold production for the third quarter was 19,670 ounces compared to 27,003 ounces for the same period in 1989. Total gold produced for the nine month period was 58,849 ounces compared to 61,280 ounces a year earlier.

The decline in gold production during the period was due to lower rate of gold recovery from leach pad Number Two. However, gold recoveries from the three other leach pads continued to meet expected results. The company's estimated total gold production for 1990 is 81,000 ounces compared to 77,000 ounces produced in 1989.

All dollar amounts are expressed in United States currency.

#90311p4502 11/07/1990 ~PR Newswire

TORONTO (NOV. 7) PR NEWSWIRE - Dickenson Mines Limited (AMEX: DML) today announced third quarter results. Total revenues increased significantly during the third quarter and the first nine months of 1990 compared to the corresponding periods in 1989. The increase was due to higher gold production from the Red Lake Mine and the addition of Saskatchewan Minerals, a sodium sulphate operation, acquired by the company in October 1989.

Earnings for the three months ended Sept. 30, 1990, were $286,000 or 2 cents per share on revenues of $15,013,000. For the corresponding period in 1989, earnings were $1,427,000 or 9 cents per share on revenues of $13,205,000.

Earnings for the nine months ended Sept. 30, 1990, were $2,591,000 or 15 cents per share on revenues of $47,203,000. For the corresponding period in 1989, earnings were $8,003,000 or 49 cents per share on revenues of $39,124,000.

While the revenues and gold production increased, the earnings declined during the first nine months of 1990 compared to the same period in 1989. In April 1989, the company realized a gain of $4,365,000 ($3,675,000 net of tax) or 20 cents per share, on the sale of its investment in the shares of Kam-Kotia Mines Limited. This transaction contributed to the higher earnings in 1989.

Additional factors affecting earnings were a lower realized average gold price a stronger Canadian dollar, lower earnings of Wharf Resources Ltd., an equity accounted investment and certain non-recurring administrative costs.

Gold production at the Red Lake Mine for the third quarter, excluding concentrate, was 19,445 ounces compared to 18,397 ounces for the same period in 1989. Total gold produced for the nine month period increased by 6 percent to 59,884 ounces from 56,557 ounces a year earlier. Custom processing of concentrate material containing gold is not expected during this calendar year.

DALLAS (NOV. 7) PR NEWSWIRE - In response to investor inquiries, NACO Finance Corp. today reported that it has not yet received a proposal for certain transactions involving NACO Finance which are related to the proposed sale of San Jacinto Savings Association's recreational land subsidiaries. Both NACO Finance and San Jacinto are subsidiaries of Southmark Corp. (NASDAQ: SMRK).

As previously disclosed, San Jacinto has signed a Letter of Intent to sell its interest in Thousand Trails Inc. and certain assets of National American Corp. to Delta Campground Management Corp. Among the contingencies of the proposed transaction, Delta Campground Management Corp. would purchase the capital stock of NACO Finance Corp. or substantially all of its business assets, and restructure NACO Finance Corp.'s 12 percent Senior Notes due 1994. The Letter of Intent does not specify the terms or conditions of the proposed transaction related to NACO Finance Corp. or its Senior Notes.

NACO Finance Corp. announced that further disclosure would not be made until an agreement in principle to purchase NACO Finance Corp. or its assets, and for restructuring of its senior notes, has been negotiated and executed or negotiations regarding such transactions have been terminated.

NACO Finance Corp., based in Dallas, Texas, provides receivables financing to Thousand Trails Inc. and National American Corp., both operators of membership-based campground sites.

#90311p4506 11/07/1990 ~PR Newswire

CHICAGO (NOV. 7) PR NEWSWIRE - United Airlines today reported that its total scheduled revenue passenger miles (RPMs) increased 11.5 percent in October compared with October of 1989.

The airline's total scheduled RPMs were 6,505,331,000, compared with 5,834,309,000 in October of 1989.

The passenger load factor was 64.1 percent, a decrease of 1.5 points from 65.6 percent a year ago.

In commenting on the month, Stephen M. Wolf, chairman and president, said, "Our October traffic shows that United is continuing to grow in both domestic and international markets. While that result alone normally would be encouraging, the growth in traffic last month failed to keep pace with our growth in capacity. Without question, the sharp fuel price increases posted since the onset of the Persian Gulf crisis have impacted the worldwide economy and many industries, including our own."

For October, domestic revenue passenger miles totaled 4,708,344,000, an increase of 3.6 percent from 4,545,436,000 accumulated in October a year ago. Pacific revenue passenger miles totaled 1,707,343,000, an increase of 32.5 percent from 1,288,873,000 a year ago. Atlantic revenue passenger miles totaled 89,644,000.

Total scheduled available seat miles (ASMs) were 10,147,201,000, up 14.1

percent from 8,892,728,000 a year ago. Domestic ASMs were 7,531,474,000, an increase of 6.6 percent from 7,067,405,000 a year ago. Pacific ASMs totaled 2,486,182,000, up 36.2 percent from 1,825,323,000 a year ago. Atlantic ASMs totaled 129,545,000.

The airline flew 4,978,000 passengers in scheduled service in October, an increase of 8.2 percent from 4,601,000 flown a year earlier.

Total cargo ton miles for October were 135,414,000, up 13.1 percent from 119,736,000 a year ago.

Total RPMs, including charter flights for October, were 6,534,295,000, up 11.9 percent from 5,839,182,000 a year ago.

JANUARY-OCTOBER TRAFFIC For the first 10 months of 1990, total scheduled RPMs increased 9.1 percent to 63,898,690,000 from 58,579,763,000 in the same 1989 period.

Total scheduled ASMs increased 9.2 percent to 95,272,599,000 from 87,237,703,000 last year.

Passenger load factor during the 10-month period was 67.1 percent, unchanged from 1989.

Total cargo ton miles were 1,155,601,000, an increase of 6.1 percent from 1,089,587,000 in the first ten months last year.

Total RPMs including charter for the first ten months were 64,019,009,000, an increase of 9.2 percent from 58,616,739,000 in the first ten months of 1989.

#90311p4510 11/07/1990 ~PR Newswire

TORONTO (NOV. 7) PR NEWSWIRE - GW Utilities Limited (AMEX: GWT), Toronto today announced that the proposed sale by GW of its 82 percent interest in The Consumers' Gas Company Ltd. to British Gas plc has been approved by the Lieutenant Governor in Council for the Province of Ontario.

The sale of Consumers is still subject to approval of Investment Canada. If such approval is obtained, British Gas will make an offer to purchase all of the outstanding common shares of Consumers at a price of $34 per share. In view of the extended period of time necessary to receive regulatory approval, the date for payment of interest, net of dividends, on the $34 per share purchase price has been changed from Aug. 20 to Nov. 20, 1990.

The approval of the Ontario Cabinet, acting as the Lieutenant Governor in Council, is subject to British Gas accepting a number of undertakings including substantially those recommended by the Ontario Energy Board in its report issued Oct. 26. British Gas has accepted those undertakings. The undertakings agreed to by British Gas relate to research and development, employment levels and the re-establishment and maintenance of a public float in Consumers shares.

On June 12, 1990, Olympia & York Developments Limited and GWU Holdings Limited announced that GWU Holdings intended to increase the price to be offered to the public shareholders of GW in connection with the previously announced "going private" proposal from $36 to $40 per GW common share if the sale of Consumers and the transaction proposed by Olympia & York concerning Interhome Energy Inc. and Gulf Canada Resources Limited are completed and no material adverse change occurs in the business and affairs or prospects of GW or any of its investments.

Under the proposed transaction concerning Interhome and Gulf, Gulf would be combined with Home Oil Company Limited, a wholly owned subsidiary of Interhome and Interhome, shareholders, including GW, would be provided with direct ownership of Interhome's interest in the combined oil and gas business and continuing direct ownership of Interhome's pipeline business. GWU Holdings also stated that if such transactions are not completed, GWU Holdings intends to proceed with the original "going private" proposal, taking into account circumstances as they may exist at that time.

GWU Holdings is a private corporation, beneficially owned, directly or indirectly, by members of the Reichmann family. GWU Holdings owns approximately 89.33 percent of the issued and outstanding common shares of GW.

SAN FRANCISCO (NOV. 7) PR NEWSWIRE - Leopold Korins, chairman and chief executive officer of the Pacific Stock Exchange (PSE), announced seven promotions, which were approved by the PSE Board of Governors at its October meeting.

Charles A. Rogers, 44, was named to executive vice president, Trading Floor Operations, from his position as senior vice president, Derivative Products. Rogers will be responsible for all PSE trading floors in Los Angeles and San Francisco. Stephen M. Pettibone, 33, has been promoted to vice president, Option Trading Services, and Nancy A. Olmstead, 40, and Gary K. Staggs, 40, have both been named to vice president, Equity Floor Operations, in Los Angeles and San Francisco, respectively. Olmstead, Pettibone, and Staggs will report to Rogers directly.

In addition, Erin E. Cosgrove, 33, was promoted to vice president, corporate secretary; Joseph F. Humphrey, 49, to vice president, finance; and Steven Schwartz, 43, to vice president accounting.

Korins commented, "These promotions acknowledge the organizational responsibilities of the individuals and the professionalism they have demonstrated in key positions at the exchange. With a strong management team in place, we will be ready to meet the competition of the 90s and beyond."

MOSCOW (NOV. 7) TASS - ABOUT 100,000 PEOPLE MARCHED THROUGH MOSCOW'S RED SQUARE TODAY TO MARK THE 73RD ANNIVERSARY OF THE 1917 SOCIALIST REVOLUTION.

THE OFFICIAL CELEBRATIONS WERE SPONSORED BY THE MOSCOW CITY COMMUNIST PARTY COMMITTEE AND SEVERAL AFFILIATED ORGANISATIONS, SUPPORTING SOCIALISM AND NATIONAL RECONCILIATION.

IN AN UNPRECEDENTED MOVE, PRESIDENT MIKHAIL GORBACHEV, PARLIAMENT CHAIRMAN ANATOLY LUKYANOV, PRIME MINISTER NIKOLAI RYZHKOV, RUSSIAN PRESIDENT BORIS YELTSIN AND MOSCOW MAYOR GAVRIIL POPOV DESCENDED FROM THEIR STAND ATOP THE LENIN MAUSOLEUM TO LEAD THE PROCESSION THROUGH RED SQUARE.

DEMONSTRATORS HALTED NEAR THE LENIN MAUSOLEUM AND A DELEGATION OF PARTY AND STATE LEADERS AND VETERANS PLACED FLOWERS AT THE FOOT OF THE MARBLE STRUCTURE.

SLOGANS CARRIED BY PARTICIPANTS CALLED FOR SOCIAL JUSTICE AND CIVIL PEACE.

TODAY'S MARCH WAS ATTENDED BY REPRESENTATIVES OF VARIOUS TRENDS INSIDE THE SOVIET COMMUNIST PARTY -- ITS MARXIST AND DEMOCRATIC PLATFORMS, THE UNITED WORKERS' FRONT AND SEVERAL OTHER PRO-SOCIALIST MOVEMENTS.

"WE ARE PROUD THAT SUCH A GREAT EVENT AS THE OCTOBER REVOLUTION HAPPENED IN THE HISTORY OF OUR PEOPLE. WE ARE MARKING THIS ANNIVERSARY AS A NATIONAL HOLIDAY AND A HOLIDAY OF ALL PROGRESSIVE MANKIND," VLADIMIR STRADYMOV, MEMBER OF THE COORDINATING COMMITTEE OF THE UNITED WORKERS' FRONT, TOLD TASS.

WHEN THE DEMONSTRATION WAS IN FULL SWING, A MAN FROM LENINGRAD FIRED TWO SHOTS INTO THE AIR FROM A SAWN-OFF SHOT GUN. LUCKILY, NO ONE WAS HURT. THE INCIDENT OCCURRED NEAR A DEPARTMENT STORE OPPOSITE THE LENIN MAUSOLEUM. AUTHORITIES ARE

INVESTIGATING THE INCIDENT.

#90311u0046 11/07/1990 ~United Press International
CANBERRA, Australia (NOV. 6) UPI - Foreign Affairs Minister Gareth Evans

said Wednesday he was pleased that Iraq agreed to release two Australian hostages but cautioned against viewing it as a public relations victory for Saddam Hussein.

''The trouble with efforts of this kind (private) is that they do give a propaganda advantage to Saddam, where peoples' minds are taken off the enormity of the crime that is being committed by having anyone kept in custody at all,'' Evans said.

Sydney poet Anne Fairbairn, who has written extensively on the Middle East and who has contacts in the region, Wednesday reported the partial success of her private mission to help secure the release of the 34 Australians being held in Iraq.

In a radio interview with the Australian Broadcasting Commission, Fairbairn reported from Baghdad that Iraq had agreed to release two Australians, Graham Lightfoot and James Strong.

She said she also asked for the transfer to Baghdad of the only two Australians believed to be detained at strategic installations, Greg Pollock, a visiting businessman, and Nick Fitz-simon, an engineer.

A Foreign Affairs official said Wednesday the two hostages to be released were ''in the older brigade'' of the Australians held.

The official said the other two men, although Australian, held British passports and said this was ''significant'' because they were the only Australians being detained at strategic installations.

All others, although being prevented from leaving the country, were in hotels.

Lightfoot's wife Shirley, who lives in Sydney, also expressed her delight over her husband's pending release.

''I'm so glad for Graham, because he hasn't been well and I think it has been very stressful for us all,'' she said.

She said she expected to be reunited with her husband in Australia by the weekend.

Among those Fairbairn lobbied in Iraq was Sadi Mehdi Saleh, the speaker of the Iraqi National Assembly.

#90311u0117 11/07/1990 ~United Press International

BOSTON (NOV. 6) UPI - Democratic gubernatorial candidate John Silber and Republican William Weld were in a virtual dead heat and a billion-dollar tax

rollback referendum was headed for a stunning defeat Tuesday as Massachusetts voters turned out in near-record numbers.

First-term Democratic Sen. John Kerry, who became embroiled in one of the bitterest races in the country, won re-election, despite the efforts of millionaire real estate developer James Rappaport, who spent $3 million of his own money on a massive negative media campaign.

Kerry claimed victory, telling his supporters he had emerged from the race with ''a sense of trepidation'' about the electoral process and promised to return to Washington to work for campaign finance reform.

''Twenty-five years ago some of us jumped around to a song with the title, 'Money Can't Buy Me Love.' Today in Massachusetts we have proven that money can't buy you a U.S. Senate seat,'' he said.

With 938 of 2,138 precincts reporting, Silber and Weld were deadlocked at 50 percent each and Kerry was leading Rappaport 58-42 percent. The tax rollback referendum sponsored by Citizens for Limited Taxation was losing by a 60-40 percent margin.

Silber had 449,522 votes to Weld's 441,009.

However, exit polling by a number of television stations indicated Weld, the former assistant U.S. attorney general who walked out on the Reagan administration to protest the actions of Attorney General Edwin Meese, would win the governorship.

Tax-cut advocates urged passage of a referendum that would have reduced state revenues by about $1.2 billion in the next fiscal year, charging the government was rife with waste and duplication. Opponents, including most of the state's major public employee unions, said it would lead to unacceptable cuts in human service programs.

Voters flocked to the polls after months of intense campaigning from the top to the bottom of the ballot in an election that could chart a new political and economic course for Massachusetts.

Frightened by the crash of the state's once booming economy and infuriated over the inability of state government to deal with the crisis, voters chose between two gubernatorial candidates who promised radical change and a return to prosperity.

The secretary of state's office said as many as 2.5 million, or 78 percent of the state's 3.2 million registered voters would go the polls, the highest turnout for a gubernatorial race since 1962.

The enthusiastic turnout was helped by the weather as early morning rain gave

way to mostly sunny skies across much of the state with temperatures in the 40s and 50s.

Both Silber and Weld promised to bring government spending under control and return the state to economic health.

But Weld supported the tax rollback while Silber said it would mean ''disaster'' for a state that has had budget deficits for the last three years and whose credit rating has plummeted to the lowest of any state.

#90311u0167 11/07/1990 ~United Press International

WASHINGTON (NOV. 6) UPI - Mayor Marion Barry, who was sentenced to six months in prison 11 days ago for drug possession, was rejected by voters in the nation's capital Tuesday in his bid to capture a seat on the City Council.

The defeat of Barry, who finished a very distant third in a field of eight candidates for two at-large seats, culminated 12 years of domination in District of Columbia politics as mayor and nearly 20 years in office in the city.

Based on votes counted as of 10:30 p.m. in all of the district's 140 precincts Barry had 25,604 or 18 percent of the vote. Incumbent City Council member Hilda Mason had 42,052, or 30 percent of the vote, while Democratic nominee and former school board member Linda Cropp had 53,957 or 39 percent of the vote.

''Although this election didn't go our way, our campaign has been successful '' said Barry, who addressed about 100 supporters in his concession speech. ''We have taken our case to the people.

''To our supporters, this is not the time for tears,'' Barry said. ''This is the time for feeling that we have succeeded in taking our case to the people.''

Barry congratulated Cropp and Mason on their victories, as well as Democrat Sharon Pratt Dixon on her landslide victory over Republican Maurice Turner to succeed Barry as mayor.

Barry's political downfall began Jan. 18, when he was arrested in an FBI sting operation in which he was videotaped smoking crack cocaine.

His subsequent trial last summer on drug and perjury charges ended with a federal jury convicting him on one misdemeanor cocaine possession count, acquitting him of a second, and deadlocking on 12 other charges.

Barry, who announced at the start of his trial that he would not seek a fourth term as mayor, switched his political affiliation from Democrat to independent

after the trial to run for City Council.

Last month, U.S. District Judge Thomas Penfield Jackson said Barry gave ''aid, comfort and encouragement'' to the drug culture and sentenced him to six months in prison. Barry is appealing.

Barry, 54, first came to the nation's capital in 1965 to oversee the local office of the Student Non-Violent Coordinating Committee, and quickly developed a reputation as a leading black activist.

The 1970s saw Barry move from activism into electoral politics. He was elected to the D.C. School Board in 1971 and was its president until 1974, when he won an at-large seat on the City Council.

In 1978, Barry became the district's second elected mayor, beating two other candidates who were a part of the city's old-line black establishment.

John Wilson, who was elected in a landslide victory Tuesday as chairman of the City Council, said Barry's defeat and the overwhelming mandate received by Dixon - who was the only candidate in the mayoral primary to publicly criticize Barry and call for his resignation - reflected the drastic change that district voters wanted in city government.

''I think that what happened is that a lot of people don't give voters in this city credit,'' Wilson said. ''People wanted a dramatic change and they voted for people that they thought would bring them that. The city will be looked at in a different light from here on out. We definitely surprised people.''

#90311u0189 11/07/1990 ~United Press International

HARTFORD, CT (NOV. 7) UPI - Former Sen. Lowell P. Weicker Jr. was elected governor in a bitter three-way race Tuesday - the first independent to win the office in Connecticut since before the Civil War.

With 92 percent of the vote, unofficial results showed Weicker with 434,281 votes, or 41 percent, compared with 406,066 votes, or 38 percent, for Rowland and 216,783, or 20 percent, for Morrison.

A fourth-party candidate, Joseph Zdonczyk, had 15,094 votes, or 1 percent.

Weicker, who served three terms in the Senate as a maverick, liberal Republican, based his campaign on high name recognition and voter anger at what he lambasted as ''politics-as-usual.''

''Perhaps the state of Connecticut was not ready for a new generation of leadership,'' Rowland, a three-term congressman, said in his concession speech. ''But maybe some time in the future they will be.''

Morrison conceded early to Weicker, urging the governor-elect not to forget the Democrats who voted for him in large numbers.

''Democrats elected Lowell Weicker governor,'' Morrison said. ''I hope Lowell Weicker understands that his election depended on Democratic votes. I don't want to see Lowell Weicker fail because I care too much about Connecticut.

Weicker, 59, a Greenwich millionaire heir to a pharmaceutical fortune, gained national attention as a critic of President Nixon during the televised Watergate hearings and made integrity a key to his campaign.

He is the first independent elected governor in Connecticut since 1857, when Alexander H. Holley won as the candidate of the hybrid American-Republican Party.

Weicker faced economic problems of historic proportions, with the latest projected budget deficit for the current fiscal year hitting $473.5 million, despite tax hikes of nearly $1 billion.

#90311u0502 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - Jesse Jackson, the preacher-politician who twice ran for president, coasted to victory Tuesday in his first election to public office - as one of two ''shadow senators'' from the District of Columbia.

Jackson finished far ahead of the pack in a field of 11 candidates vying for

the two non-paid ceremonial posts, created by the City Council to act as super lobbyists in Congress for district statehood.

Jackson garnered 105,633 votes, or 46 percent of the ballots cast Tuesday to easily win the first seat, according to an unofficial count by city election officials.

The second seat went to city public school employee Florence Pendleton, also a Democrat, who was next in line behind Jackson with 58, 451 votes, or 26 percent of the tally.

While Jackson was the most high-profile politician seeking office in the district, his campaign was overshadowed by races to succeed Marion Barry as mayor and Walter Fauntroy as the non-voting House delegate from the nation's capital.

Jackson, one of the best vote-getters nationally in the Democratic Party, ran a strong second to Massachusetts Gov. Michael Dukakis for the 1988 Democratic presidential nomination with a liberal-populist campaign that led to primary wins in many states.

Although largely absent from the local stump this year, Jackson has tried with some success to remain in the public spotlight with a weekly television show on 130 stations, a journey to Iraq, a visible presence during the Senate debate on civil rights and many speeches in inner-city schools.

Statehood for the District of Columbia, a federal enclave without voting representation in Congress, has been a long-cherished dream for city residents that still appears far from realization.

A previous bid for statehood, which ultimately must be achieved through a constitutional amendment, was approved by Congress but fell far short of the 37 states needed to grant the district admission to the union.

A renewed attempt is certain to meet strong resistance from Republicans who realize it would virtually guarantee the addition of two Democratic senators.

Nor is it clear how the Senate will accept the presence of shadow senators and what role they will be allowed to take.

#90311u0543 11/07/1990 ~United Press International

(NOV. 7) UPI - Pete Peeters, a one-time Vezina Trophy winner who has been plagued by inconsistency for the last two years, suddenly has become a valuable stop-gap goaltender for the Philadelphia Flyers.

Peeters stopped 25 shots Tuesday night, posting his second straight win in leading the Flyers to a 4-2 victory over the Winnipeg Jets.

Just a week ago, Peeters was ticketed for Philadelphia's minor-league affiliate at Hershey of the American Hockey League. Once one of the NHL's dominant goaltenders, Peeters won the Vezina Trophy with Boston in 1983 and

led the league in goals-against average as recently as 1987-88, but age had slowed down his skills.

Now with both Ron Hextall and Ken Wreggett sidelined with injuries, Peeters has been performing at a level resembling his play five years ago.

''I have no long-range plans,'' Peeters said. ''They have a committment to Hextall and his contract, and Kenny has played so well. Where I fit in the picture - it's turned out really well with Kenny and Ron hurt.

''Some days you're down, but the majority of the days (I have) the support of my wife and family. Having a strong belief, something will work out down the line.''

Rick Tocchet collected a goal and an assist in the third period as Philadelphia broke a 2-2 tie.

Tocchet slipped Kjell Samuelson's rebound between goaltender Stephane Beauregard's pad and the pipe at 6:01 of the period to give the Flyers a 3-2 lead. At 14:42, Tocchet fed a pass to Sutter, who slipped a shot through the Winnipeg defense to forge a two-goal cushion.

''When you're 2-2 after two (periods) on the road, you feel you are in the game.'' Tocchet said. ''Everybody concentrates more. The concentration was 110 percent.''

Prior to Tocchet's heroics, Beauregard had single-handedly held the Flyers at bay. One of the Winnipeg goaltender's saves included sticking his head in front of a Ron Sutter shot.

''That third period was inexcusable, intolerable and embarassing,'' Jets left wing Doug Smail said. ''That should never happen in your own building. We should never be outworked in our own building in a 2-2 game. There are no excuses.''

In other NHL games Tuesday night, the New York Islanders nipped Toronto 4-3, Pittsburgh outlasted Calgary 6-5, Washington bombed Quebec 4-1, St. Louis edged Edmonton 2-1, Vancouver doubled up Detroit 6-3 and Hartford and Chicago tied 1-1.

-- AROUND THE NHL --

Islanders 4, Maple Leafs 3

At Uniondale, N.Y., Randy Wood scored two goals to help the Islanders hand Toronto its fourth straight loss. Toronto has lost all eight road games this season and has the worst record in the NHL at 2-14-1.

Penguins 6, Flames 5

At Pittsburgh, Paul Coffey's power-play goal with 14 seconds left in the third period lifted the Penguins to victory. With Doug Gilmour in the penalty box for hooking, Coffey's wrist shot from 50 feet sailed over goaltender Mike Vernon's left shoulder to give Pittsburgh its fourth straight victory.

Capitals 4, Nordiques 1

At Quebec, Peter Bondra scored twice and John Druce added a goal and two assists as Washington handed the Nordiques their seventh straight loss. The Capitals scored power-play goals on the first two penalties by the Nordiques and never were challenged.

Blues 2, Oilers 1

At St. Louis, Brett Hull scored his league-leading 17th goal and Geoff Courtnall added another goal to spark the Blues. St. Louis is 8-1- 1 in its last 10 games, while the Oilers have lost a club-record seven consecutive games.

Canucks 6, Red Wings 3

At Vancouver, British Columbia, Trevor Linden scored one power-play goal and assisted on another 41 seconds later to spark a four-goal Vancouver outburst late in the third period. The barrage allowed the Canucks to rally from a 3-2 deficit.

Whalers 1, Blackhawks 1

At Hartford, Conn., Pat Verbeek scored at 2:31 of the third period to help the Whalers end their six-game losing streak. Hartford registered its first point since an Oct. 17 win at Toronto. Steve Thomas scored for Chicago.

-30- 4265

#90311u0617 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - Top Democrats moved into position for potential runs at the 1992 Democratic presidential nomination Tuesday with runaway wins, but the hopes of Sen. Bill Bradley, D-N.J., may have been undercut by his struggle against a Republican sacrificial lamb.

Even a few months ago, the prospect of running against President Bush scared off the Democrats' big-name candidates, who were waiting for the perfect moment to get into presidential politics.

All of the talk centered on fielding a token candidate, perhaps the 1998 vice presidential candidate, Sen. Lloyd Bentsen of Texas, and holding back their

strongest challengers for 1996.

But that attitude changed in the weeks before the election when Bush's sky-high popularity plummeted dramatically when he deserted his ''no tax'' pledge, the economy went into a tailspin and he confounded voters with his almost daily shuffling of campaign themes.

All of a sudden, 1992 looks much better for the Democrats and it would be surprising if some of them do not gear up, and rather quickly, their presidential campaigns.

At this stage of the election process four years ago, Rep. Richard Gephardt of Missouri was commuting to early caucus and primary states and former Arizona Gov. Bruce Babbitt had taken up residence in Iowa.

The one Democrat frequently mentioned as a presidential candidate who was badly hurt in Tuesday's election was Bradley, a Rhodes scholar and former pro basketball player.

Bradley, the prohibitive favorite, barely won a third term against Christine Todd Whitman, a Republican sacrificial offering. Bradley raised $12 million and spent $10.5 million on his campaign. Whitman scrounged up $600,000.

But Bradley became the unwitting victim of a backlash against the $2.8 billion tax raise imposed by new New Jersey Gov. James Florio, a fellow Democrat.

A CBS exit poll showed that New Jersey voters by 48-41 did not think that Bradley would make a good president.

The other Democrats frequently mentioned as possible 1992 presidential candidates fared far better and showed once more their vote-getting clout.

Sen. Sam Nunn, D-Ga., the chairman of the Senate Armed Services Committee, was so strong the Republicans did not even field a candidate.

New York Gov. Mario Cuomo, the candidate most party leaders would like to see run, won against two opponents, but by a surprisingly small margin, probably the result of the state's financial problems.

Sen. Albert Gore of Tennessee who lost in 1988, and Sen. Joseph Biden of Delaware, who had to pull out of the race two years ago after acknowledging plagiarizing a speech, won re-election easily.

And Jesse Jackson, who won numerous primaries in 1988 before losing the presidential nomination to Massachusetts Gov. Michael Dukakis, was elected ''shadow senator'' for the District of Columbia, the first office for which he has been elected.

Gephart also was an easy winner but he promised not to run in 1992 when he was elected House Democratic leader.

The elections did not produce a new shining star for the Democrats but not all the possible presidential contenders were up for election Tuesday.

Senate Democratic leader George Mitchell, Sen. Bob Kerrey of Nebraska, Sen. Chuck Robb of Virginia and Gov. Douglas Wilder of Virginia also could run.

Bush's popularity would have to plunge much deeper and the nation would have to move deeper into a recession before the Republicans would deny him a second nomination.

But the elections did produce a new, potential Republican candidate for 1996, Sen. Phil Gramm of Texas, a formidable vote-getter and fund raiser, who swept to a landslide victory.

SANTA CLARA, Calif. (NOV. 7) UPI - The San Francisco Giants were on the brink of striking out for a third time with voters Tuesday as ballot proposals for a new baseball stadium in Santa Clara County were trailing by a narrow margin.

With 656 of the 1,028 precincts reporting, the stadium measure - which would have levied a 1 percent utility tax countywide to finance the $152 million facility - was being rejected by a 75,442 to 78,400 vote margin.

Two accompanying measures were also running into opposition. Proposition N, which would have given Santa Clara County permission to put up the land for the stadium, was ahead by about 1 percent. Proposition H, which would have given the city of San Jose the authority to oversee the building and operation of the stadium, was being defeated.

The early returns appeared to be part of a nationwide trend rejecting any candidate or issue that would involve new taxes. The stadium tax would have cost each of the effected households about $100 a year.

''Everybody saw through this thing,'' said Eva Lash, leader of a grassroots effort to defeat the proposals. It just wasn't reasonable. ''

The potential defeat leaves the National League team's immediate future up in the air. Giants owner Bob Lurie threatened to move his team from the area six years ago if a new stadium was not built to replace wind-swept Candlestick Park. And, after each election setback, he renewed that pledge.

The marketplace, however, has changed drastically since Lurie first threatened to move the team back in 1986. The National League has announced it will expand by two teams by the middle of the decade, pulling some potential suitors away from the Giants.

''I don't expect that Mr. Lurie will even begin to contemplate any alternatives until the election is over,'' said Corey Busch, the club's executive vice president on election day. ''None of the alternatives is particularly attractive. The fact is, we haven't spent any time thinking about what will happen if it (the ballot issue) loses.''

However, a report surfaced Tuesday suggesting that San Francisco 49ers owner Edward DeBartolo Jr. may pursue buying the team and construct a privately-funded football and baseball stadium in Santa Clara County.

''I have always thought about doing something with both teams,'' Debartolo told the Santa Rosa Press Democrat. ''I think it would depend on what type of ownership would be premitted.''

Currently, the Major Leagues have rules barring its owners from purchasing controlling interest in other sports leagues.

A loss would mark a third setback for the Giants by Northern California voters in as many years. Twice before, the National League club has come up empty in the city of San Francisco.

The defeat also would be professional baseball first setback in stadium vote after victories this year in Denver and Cleveland.

The stadium proposal was in trouble from the start even though Baseball Commissioner Fay Vincent personally campaigned for the issue. In a poll by the San Jose Mercury News, the stadium was shown to be trailing by a 59 percent to 34 percent margin among those surveyed. The pro-stadium campaign also had the issue lagging behind by a 49 percent to 39 percent margin with less than a week to go before the election.

Pro-stadium forces sent out 100,000 direct mailers in support of the issue and started an intensive phone campaign in the final days before Tuesday's election.

WASHINGTON (NOV. 7) UPI - An angry American electorate, upset with the economy and the direction of the nation, gave Democrats some new hope Tuesday that they can use pocketbook issues to make a reinvigorated run for the White House in 1992.

However, despite voters' obvious indignation, the meaning of their message in the 1990 midterm election was far from crystal clear, allowing Republicans to claim that they had successfully held their own and may have even bolstered President Bush.

Walking into voting booths across the land with promises to ''throw the rascals out,'' the public generally refused to follow through.

As a result, when the 102nd Congress convenes in January, Democrats will hold bulges roughly similar to what they have enjoyed for the past two years. But in state capitals, Democrats scored more significant gubernatorial gains.

In the 100-member Senate, Democrats picked up one seat to hold a new 56-44 edge, while in the House they were on a pace to add to their majority by about a half dozen. They currently dominate the chamber by a 258-175 margin with two vacancies.

In the most closely watched races of the night:

-Sen. Jesse Helms, the arch-conservative Republican from North Carolina, defeated liberal black Democrat Harvey Gantt. ''I'm sorry I'm late,'' Helms told his cheering supporters. ''I've been at home watching the grieving face of Dan Rather. ... The mighty, ultra-liberal establishment has struck out again.''

-In the very bitter and very expensive Texas gubernatorial battle, Democrat Ann Richards won over Republican Clayton Williams.

-Republican Sen. Pete Wilson, trying to become California's governor, held a lead over Democrat Dianne Feinstein, the former mayor of San Francisco.

-In Minnesota, Democrat Paul David Wellstone beat Republican Sen. Rudy Boschwitz, the only Senate incumbent to lose.

-Former U.S. Sen. Lawton Chiles, a Democrat, ousted Republican Florida Gov. Bob Martinez.

-Sen. Bill Bradley, D-N.J., won a third term, barely edging out Republican Christine Todd Whitman. Bradley, hailed as a potential presidential contender, had far more money than Whitman but was hurt badly by an anti-tax fever sweeping New Jersey.

-Assistant House GOP leader Newt Gingrich of Georgia, a fiery conservative, barely survived a tight fight against Democrat David Worley.

-In Kansas, Democrat Treasurer Joan Finney beat Republican incumbent Gov. Mike Hayden.

-Former Republican Sen. Lowell Weicker won the three-way Connecticut governor's race as an independent.

-Incumbent Democrat Sen. Tom Harkin rather easily defeated Republican Tom Tauke in what had been billed as perhaps the tightest Senate race in the nation.

-In Massachusetts, William Weld defeated Democrat John Silber to become the first Republican elected to the post in 16 years.

Overarching themes were difficult to determine from the results, although combining the vote returns with network exit polling figures provided some insights that bolstered Democrats.

About three-quarters of voters questioned by the networks said they believed the nation was on the wrong track and predicted that the country's economy would only get worse.

About 57 percent of the people said they approved of President Bush and - in a repeat of their usual bizarre pattern - vast majorities disapproved of Congress, while approving of their own representative and senator.

#90311u0680 11/07/1990 ~United Press International

BEIJING (NOV. 7) UPI - China's flagship Communist Party newspaper Wednesday called the U.S. midterm elections a ''great satire,'' citing low voter turnout and an apparently misinterpreted poll to paint American-style democracy as a grim capitalist tool.

The signed commentary on the front page of the People's Daily, the party's official mouthpiece, took the opportunity of Tuesday's U.S. vote to renew the Chinese leadership's periodic attempts to portray Western political freedoms in their worst light.

The sarcastically worded article cited American voter turnouts of recent years that in presidential elections have been below 50 percent and during midterm elections for Congress and state offices have hovered around 30 percent.

''In the country claiming to be democratic, citizens being unwilling to use their right of democracy is a great satire on American-style democracy,'' the People's Daily said.

It noted a U.S. media poll from last month that it said indicated more than 70 percent of respondents believed members of Congress were less interested in serving the people than in serving special interest groups.

''Who are these special interest groups? Of course, this refers to those who

have money to support the candidate, not homeless vagrants,'' the commentary said.

On the issue of the two-party system, it noted, another U.S. survey showed that ''only 33 percent supported the Democratic Party and only 28 percent supported the Republican Party, while 39 percent of voters supported neither.''

The commentary's author appeared to have misinterpreted the results as indicating those indicating no party affiliation were expressing distaste, and did not note that many American voters characterize themselves as independent.

''It is well known that the two U.S. parties have a difference - supporting different financial groups' interests,'' the commentary said. ''It is almost the same thing to elect either.

''It is completely understandable for so many people to support neither of them and not even to take part in the election.''

The hard-line Chinese leadership has regularly painted such dim pictures of Western-style political concepts since the violent crackdown in June 1989 on pro-democracy protesters in Beijing after six weeks of demonstrations for greater freedom.

The government propaganda has continued to discourage admiration for those concepts in a continuing campaign against so-called ''bourgeois liberalization '' a catch phrase for Western political and cultural influences.

''Some people admire American-style democracy very much,'' the People's Daily said. ''In fact, the American people do not show great concern about their right of democracy.''

#90311u0725 11/07/1990 ~United Press International

ANCHORAGE, Alaska (NOV. 7) UPI - Alaskans voted Tuesday to join the national war on drugs by outlawing marijuana, which has been legal in the state for 15 years.

With two-thirds of the vote counted by midnight, 54 percent supported a proposition to make possession of marijuana a crime punishable by up to 90 days in jail.

It was not the 2-1 ratio pollsters predicted for passage of the marijuana recriminalization measure, but it was enough to outlaw the drug.

''We would have preferred to win,'' said Anchorage lawyer Bill Bryson of Alaskans for Privacy, the group battling the recriminalization measure.

Advocates of the status quo - keeping pot possession legal - argued that the issue was privacy. The state Supreme Court ruled in 1975 that the privacy clause of the state constitution protected adult possession of marijuana - in small quantities and in the privacy of their homes.

But the recriminalization movement said the issue was drugs, not privacy, that Alaska should join the rest of the United States in outlawing the drug.

Bryson predicted that the issue would land in court again and said, ''There's no doubt about it. We're not going to quit.''

It was a court challenge in the first place that prompted the state Supreme Court to throw out Alaska's pot law. State legislators later set the legal amount at less than 4 ounces.

Even Gov. Steve Cowper, who supported recriminalization of marijuana, predicted that outlawing pot possession will lead to new court battles by the privacy advocates who got it legalized in the first place.

Federal drug czar William Bennett campaigned in Alaska for Proposition 2 to outlaw marijuana, but Bryson said Bennett's role was negligible.

Bryson said voters simply failed to accept the proposition as a privacy issue and jumped on the national anti-drug bandwagon.

''I don't think people personalized it as their privacy rights,'' Bryson said.

Although Alaskans for Privacy outspent Alaskans for Recriminalization of Marijuana, Bryson said that a constant barrage of publicity, including numerous editorials in the Anchorage Times, played a role in the vote to outlaw pot.

Passage of the marijuana proposition makes possession of any amount of marijuana a misdemeanor. Alaska will go from having the most liberal marijuana law in the nation to having one more punishing that many states.

#90311u0727 11/07/1990 ~United Press International

UNIVERSAL CITY, CA (NOV. 7) UPI - A spectacular fire erupted on the backlot at Universal Studios, causing millions of dollars in damage to at least three

major attractions, and disrupting the Republicans' election night party.

Flames broke out on a sound stage of one of the world's most popular tourist attractions about 7:20 p.m. Tuesday and, fanned by winds gusting to more than 50 mph, quickly spread to brush-covered hills nearby, city fire spokesman Pat Marek said.

At least five buildings were engulfed in flames by the time firefighters arrived.

County Fire Chief Michael Freeman said the ''Dick Tracy,'' ''King Kong'' and ''Back To The Future'' attractions were heavily damaged in what he called a ''firestorm.''

The flames came right up to the Universal film vault, but firefighters were able to save the priceless archives.

Freeman said one firefighter was treated for burns, and the flames caused damage that will ''run into the millions of dollars.''

Fire Inspector Jim Gandee termed the sets ''matchbox structures'' and said it was strange fighting a fire in a movie lot.

''You recognize some of the structures,'' he said. ''It kind of pulls at your heart strings a little bit. It was very difficult.''

More than 400 firefighters and six water-dropping helicopters had the fiercest portion of the fire out in about 2 1/2 hours, but flames continued to burn in pockets of surrounding brush well into the night.

A full moon helped firefighters see through the thick black and gray smoke and glowing red embers that spewed from the burning structures. The dramatic scene caused gawking motorists to slow on at least two major freeways.

At least 200 employees of the amusement park were evacuated. At least two restaurants - Tony Roma's and Victoria Station - and the huge Odion Cineplex theater complex were also evacuated as a precaution.

George Geller, a manager at Tony Roma's about 100 yards from the fire coughed as he said, ''There's a lot of smoke... a lot of wind. You can't see any flames, just a lot of smoke, a lot of orange stuff.''

The blaze could be seen for miles, and firefighters said chemicals and explosives used in filming and on the tram tour fed the fire.

Dan Schnur, a spokesman for the Republican Party, said many of those scheduled to attend an election night celebration at the Universal Hilton were delayed because there were road blocks all around the fire.

The hotel, about a half-mile from the fire, was not evacuated, although the ceremonies and speeches were delayed.

Also a possible victim is the planned $8 billion purchase of Universal and its parent company MCA by Japan's Matsushita Electric Industries Corp., usually known as Panasonic. The studio, amphitheater and other facilities on more than 400 acres north of downtown Los Angeles are worth an estimated $500 million.

Arson investigators had not determined the cause of the fire by late Tuesday night.

#90311u0777 11/07/1990 ~United Press International

ATHENS, Greece (NOV. 7) UPI - A powerful earthquake measuring 6.6 on the Richter scale hit a mountainous area of southern Iran, killing at least 21 people, injuring 80 others and leaving 21,000 homeless, a report said Wednesday.

The temblor, coming four months after a devastating quake struck northern Iran rocked a sparsely populated region in the quake-prone Zagros mountains Tuesday. The Tehran University Geophysical Institute said the quake struck at 9:57 p.m. and was centered at Darab, some 500 miles southeast of Tehran.

The official Islamic Republic News Agency, monitored in Athens, said at least 21 people were killed, 80 injured and more than 12,000 made homeless in Darab and villages nearby. Darab is close to a major natural gas field at Kangan, on the Persian Gulf coast.

An aftershock measuring 5.6 on the Richter scale was felt in the area about 65 minutes after the initial shock.

IRNA said President Akbar Hashemi-Rafsanjani sent a team headed by his Executive Vice President Hamid Mirzadeh to tour the stricken area and supervise rescue and relief work.

In Washington, a spokesman for the Mojahedin Khalq Organization, an exiled Iranian dissident group, said at least 100 people were killed or injured by the quake.

An earthquake measuring 7.7 on the Richter scale destroyed several towns and villages in the Alborz mountains northwest of Tehran June 21, killing more than 35,000 people, injuring another 100,000 and leaving some 400,000 homeless.

Reports on the strength of the Darab quake were conflicting. The Tehran Geophysical Institute put it at 6.6 on the Richter scale, but Rebecca Phipps of the U.S. Geophysical Survey near Washington said it measured 7.0 and was

centered 550 miles south of Tehran.

The variance mirrored the difference between the figures issued by the two institutes for the June quake, which the Tehran institute put at 7.3.

Mojahedin Khalq spokesman Alireza Jaafarzadeh said according to information received from inside Iran about one hour after the Darab quake, ''at least 100 people were injured or killed, about 50-50.''

He said the quake struck ''late at night when most people were in their homes. The toll will probably go higher. Most of the homes are made of clay and arent resistant to earthquakes.

Iran is still recovering from the economic shock of the June quake. Rafsanjani who visited the quake-hit area only last week, said his government had to build some 137,000 new homes, or the equivalent of a whole new city of more than 1 million people.

Iran is building one of the world's largest natural gas refineries in an area some 100 miles from the epicenter of the latest quake.

There were no immediate reports of damage to the partially built facility, but earlier reports said it was being made quake-proof.

#90311u0783 11/07/1990 ~United Press International

TONOPAH, NE (NOV. 7) UPI - Joe Richards, an owner of three legal houses of prostitution in Nye County, was defeated Tuesday in his bid for a seat on the county commission.

Richards joins a list of brothel owners who in past years tried their luck in politics and failed.

Richards, a Democrat, was beaten by Republican Dave Hannigan 458 to 366. Richards had won the party nomination in the September primary election.

He sought the seat held by Robert Revert who retired.

Both Richards and Revert were indicted by a Nye County grand jury on bribery charges last year. Revert was accused of accepting a $20,000 bribe from Richards in exchange for his vote favoring Richards' three brothel licenses and against the application of a competing brothel owner.

Both Richards and Reverts said the $20,000 transaction was a business loan.

The Nye County district attorney asked the court earlier this year to dismiss the indictments.

#90311u0804 11/07/1990 ~United Press International
JOHANNESBURG, South Africa (NOV. 7) UPI - President Frederik de Klerk faced an important test of urban support for his racial reform initiatives in a parliamentary by-election Wednesday between candidates of the ruling National Party and the right-wing Conservative Party.

De Klerk's candidate, Marthinus van Schalkwyk, was certain to win control of the seat. The only major question was by how much and whether a sharp swing of voters to white-supremacist Conservative Party candidate Leonie Steele would demonstrate increasing wariness over de Klerk's reforms.

Polls opened at 7 a.m. in unseasonably chilly weather in Randburg, a white-collar satellite city on the edge of the greater metropolitan area of

Johannesburg. It has traditionally voted in favor of a liberal member of parliament.

The polling ends in the constituency of about 14,000 at 9 p.m. and results were expected about two hours later.

CP leader Andries Treurnicht earlier this week predicted a substantial shift in support to his party in a popular rejection of the government's plans to share power with South Africa's black majority.

De Klerk has appealed for a major victory to blunt the right-wing claims of a swelling support base and warned Randburg's voters that the Conservative Party was using ''all the venom, bitterness and dirty tricks'' at its disposal.

The seat became vacant with the resignation of Wynand Malan of the liberal Democratic Party, forcing the second by-election of the year.

Because of improving relations with the National Party, the Democratic Party agreed not to field a candidate, making the Randburg contest a straight battle between the forces for reform and the forces against.

State-run radio reported the poll was ''one of the country's most important by-elections in this country's history'' and said the results would have ''an important bearing on the political road to be followed in the future.''

Other analysts believed the polling would only have a substantial impact if the Conservative Party makes major inroads among English- speaking voters in the urban area or if the National Party fails to attract the traditional liberal support.

In the last election, the CP won fewer than 1,000 votes in Randburg. It expects to poll at least 2,800 in this poll. But a generally lower voter interest in by-elections and the absence of a ''liberal'' candidate may cloud the results.

Continued white support for the National Party becomes increasingly important as de Klerk lays the groundwork for the start of full-blown negotiations with black leaders as early as next year on a post- apartheid constitution. The 54-year-old president has pledged to hold a referendum among whites for the new constitution, which the CP has vowed to oppose.

#90311u0811 11/07/1990 ~United Press International

KIEV, Ukraine, U.S.S.R. (NOV. 7) UPI - Soviet riot police beat and detained students camped out in a Kiev square Wednesday trying to prevent the Ukrainian capital's Revolution Day military parade from taking place, witnesses said.

Activists in the Rukh nationalist organization later disrupted the Communist procession with chants of ''traitors, traitors'' and ''down with the occupiers.''

About 200 students occupied Victory Square overnight to await the 10 a.m. opening of the military parade on the anniversary of the 1917 Bolshevik Revolution.

Sergei Koniukhov, one of the student activists, said that about 2,000 club-swinging riot police appeared at the square at 5:15 a.m. in a dawn raid to disperse the students before the parade.

''I cannot tell you exactly how many, but I think several students were injured,'' Koniukhov said. ''At least 20 of the students were loaded into paddy wagons and carried away.''

Konikhov said his ripped coat was torn in the clash with police and quoted a doctor who arrived in an ambulance as saying that one girl suffered a concussion when she was struck on the head with a club.

Koniukhov said some of the injured students walked or were carried to the Rukh headquarters, a two-story building on Victory Square.

A 10-day hunger strike by students in Kiev last month led to the resignation of the government in the giant Ukraine, where the nationalist-controlled parliament passed a declaration of sovereignty during the summer.

When the military parade began Wednesday in strong rain and wind, Victory Square was sealed off by thousands of army and police troops standing shoulder to shoulder along surrounding streets.

About 60 Rukh activists appeared on the roof of their building with blue-and-yellow national Ukrainian flags and shouted, ''Traitors, traitors'' as 3,000 Communists marched across the plaza.

During the procession of army, navy and air force troops, the Rukh nationalists chanted: ''Down with the occupiers.''

''The Rukh building looks like a reviewing stand,'' one Ukrainian remarked as he watched troops, tanks, armored personnel carriers and rocket launchers rolled across the square in a 30-minute parade.

Some of the marching soldiers smiled and waved at the Rukh activists, but others in tanks aimed their anti-aircraft machine guns at the Rukh building.

''You should fire at them,'' one Communist activist shouted from the audience.

Several windows in the area were decorated with black ''mourning flags'' to

express popular opposition to Communist rule.

An hour after the parade, Mikhail Horyn, a Rukh leader, addressed a rally of about 4,000 activists in front of the city's monument to Bohgdan Smirnitsky, the 17th-century Ukrainian patriot, and urged the crowd to fight for free Ukraine.

''Everything depends on every one of you - whether the Ukraine will be free or not,'' Horyn said. ''But the Ukraine must be free, must be free.''

The crowd shouted back: ''Glory to the Ukraine.''

Horyn asked the demonstrators to remove their hats and stand in a minute of silence to mark the deaths of millions of Ukrainians killed in the Ukrainian famine of the early 1930s.

Following the rally, thousands of people marched down Kiev's main Kretschatik Avenue, hoisting the blue-and-yellow Ukrainian flags with black ribbons attached.

Miran Kolodko carried a white-and-red banner of Poland's Solidarity trade union.

''I am carrying it because Solidarity was the first to kick out the Communists'' in Eastern Europe, he said.

HONG KONG (NOV. 7) UPI - Hong Kong's first direct legislative elections scheduled for next year have failed to attract large numbers of new voters but the government said Wednesday that it would not compel people to vote.

Chief Secretary, Sir David Ford, said despite a $700,000, 10-week promotion to attract new voters, only 430,000 had sent in registration forms. nearly half were notifications of a change of address from those already registered to vote.

''We expect that we will have 241,530 voters in addition to the existing 1,597,567,'' he said. ''After we have taken into account deletions on account of death, emigration or loss of contact, the provisional register will contain about 1.8 million electors.''

Members of the colony's law-making Legislative Council expressed disappointment that so few of Hong Kong's 5.8 million people had registered, but Ford said the government would not automatically register people to vote nor force them to participate in democracy.

''In free society such as ours, we firmly belive that it should be left to the free, conscious choice of the individual to exercise this right.'' he said.

Hong Kong reverts to Chinese control in seven years and calls for more democracy in the colony on the run up to 1997 greatly increased in the wake of Beijing's brutal crackdown on China's pro-democracy movement in June 1989.

Seats on Hong Kong's local councils have been directly contested for the past decade, but the government has restricted representation in the legislature to

mostly appointees.

Only 18 out of the 60 seats in the legislature will be directly elected in next year's electoral race.

#90311u1003 11/07/1990 ~United Press International

CHICAGO (NOV. 7) UPI - Republican Jim Edgar, taking the traditionally Democratic role of tax champion, Tuesday won a narrow victory in the Illinois governor's race.

Democrat Sen. Paul Simon, a presidential candidate in 1988 and a top target of the national GOP this year, easily won re-election over Rep. Lynn Martin, a personal friend of President Bush.

Edgar, 44, campaigned on a platform of extending a 20 percent state income tax surcharge scheduled to expire after this year. His Democratic opponent, Attorney General Neil Hartigan, opposed an extension and said he would make up the lost revenue by trimming wasteful state spending.

Edgar said his victory showed a candidate can win while ''leveling with the voters.''

''I wish him ... well in the coming years,'' Hartigan said in conceding the election. ''This has been a long and a hard-fought campaign. The differences have been real. In the end it is the people of Illinois who must come through. People in every section of the state have spoken.''

With 98 percent of the vote counted, Edgar led Hartigan by nearly 100,000 votes, 52 percent to 48 percent.

Edgar is a protege of outgoing Republican Gov. James R. Thompson, who retires as the nation's senior governor after a record 14 years in office.

Simon originally was thought vulnerable this year, in part because of the time he spent away from his Senate duties while campaigning for the White House.

Instead, he blew by Martin almost effortlessly. With 98 percent of the vote tallied, Simon held a lead of nearly 1 million votes - 65 percent to 35 percent.

Claiming victory Tuesday night, Simon said the Republican national campaign committee ''spent more money to defeat me than any other candidate in the nation. That has made this more than an Illinois battle.''

He has not, however, discussed any plans for another try at the presidency.

The bowtied senator drew a laugh from his faithful when he credited Martin political consultant Roger Ailes with helping cement his victory. Simon hit hard on Ailes' reputation as a negative campaigner - a reputation Ailes furthered by publicly calling Simon ''a weenie'' late in the campaign.

The GOP also lost Martin's House district for the first time in its history. Democrat John Cox, a former county prosecutor, defeated Republican John Hallock Jr. by a 55-45 percent margin. The northern Illinois district includes the homes of former presidents Ulysses S. Grant and Ronald Reagan.

Elsewhere in Illinois, the all-black Harold Washington Party flexed newly organized muscle in Chicago, helping to defeat the incumbent Cook County state's attorney and contributing to Hartigan's defeat by withholding black votes from his candidacy.

Black activists, including Rep. Gus Savage, immediately promised to bring their new clout to bear in next February's mayoral primary, when Mayor Richard M. Daley will seek a full term.

Democrats also picked up four seats in the Illinois House, further ensconsing House Speaker Michael Madigan as the state's most powerful Democrat.

#90311u1065 11/07/1990 ~United Press International

(NOV. 7) UPI - Stock prices on the Tokyo Stock Exchange fell nearly 2 percent Wednesday for a second consecutive day in nervous trading.

The Nikkei Average of 225 selective issues, which lost 419.58 points Tuesday, sagged another 465.50 points to 23,500.25.

The broader-based Tokyo Stock Exchange Price Index, which lost 19.61 points Tuesday, fell 29.30 points to 1,752.32.

Selling was broad-based, with declines outpacing advances by more than a 4-to-1 ratio.

An estimated 330 million shares changed hands, up from 295 million Tuesday.

Elsewhere in Asia, stocks closed lower in listless trading on the Hong Kong Stock Exchange, dampened by continued fear of war in the Middle East and losses in Tokyo and New York.

The Hang Seng Index, which shed 0.53 points Tuesday, dropped 11.52 to 2,955.19.

Among the narrower indexes, financials gained 3.82 points, industrials shed 29.42, utilities lost 4.82 and properties fell 27.88 points.

Volume was thin as an estimated 774 million shares changed hands, up from Tuesday's turnover of 741 million.

In Singapore, stocks slumped in light trading on the Singapore Stock Exchange in line with the drop in Tokyo and continuing fears of war erupting in the Persian Gulf.

The Straits Times Industrial Index, which fell 12.58 points Tuesday, fell 11.87 points to 1,108.47. The broader-based All Singapore Index fell 3.00 points to 310.18.

Volume amounted to around an estimated 29.4 million shares, compared with 31.4 million shares Tuesday.

Elsewhere around the region, in Bangkok, stocks closed slightly higher in light trading on the Thailand Stock Exchange.

In Seoul, stocks closed sharply higher in active trading on the Korean Exchange.

In Taipei, stocks closed sharply higher on the Taiwan Exchange.

In Australia, prices were sharply higher in active trading on the Sydney Sharemarket.

In Wellington, stocks closed sharply higher in active trading on the New Zealand Exchange.

#90311u1096 11/07/1990 ~United Press International

PHOENIX, AZ (NOV. 7) UPI - Arizona voters narrowly rejected a state holiday to honor Martin Luther King Jr. and sent Democrat Terry Goddard and Republican Fife Symington into a probable runoff for governor.

With only six scattered precincts left to report early Wednesday, Symington led by 3,559 votes out of more than 1 million cast. Voters marked 7,050 ballots for write-ins, leaving both major candidates short of a majority.

Arizona adopted a rule that requires candidates for governor to win a majority of the vote after Evan Mecham became governor four years ago by winning a plurality in a three-way race. Mecham was impeached and removed from office after gaining negative publicity for the state by revoking a King holiday and making controversial statements.

Voters narrowly defeated a proposal that would have celebrated both a King Day and a Columbus Day holiday for state workers. CBS News reported only days before the election that the National Football League would pull the 1993

Super Bowl out of Phoenix if Arizona refused to mark the holiday.

Another proposal that would have substituted a King holiday for Columbus Day was defeated by a wide margin.

Voters approved a state constitutional amendment to create a victims' bill of rights.

#90311u1161 11/07/1990 ~United Press International
LOS ANGELES (NOV. 7) UPI - California voters elected Republican Pete Wilson as governor over Democrat Dianne Feinstein, but they also voted to remove him in eight years.

Voters also rejected the sweeping environmental protection measure known as Big Green by a wide margin and approved measures to ''throw the rascals out'' by limiting their terms in office.

With 98 percent of the state's 26,060 precincts counted early Wednesday, Wilson led Feinstein 48.6 percent to 46.5 - a margin of fewer than 145,000 votes out of more than 6 million cast. Wilson collected 3, 231,951 to Feinstein's 3,376,404.

Proposition 128, the so-called Big Green initiative that would have banned cancer-causing pesticides and offshore oil drilling, restrict emissions, protect ancient redwood forests from logging and create the elected post of state environmental advocate, lost 63-37 percent with 98 percent of the precincts counted.

Voters narrowly approved a proposal to limit politicians' terms in office and slash legislative spending, but soundly defeated a rival term limit plan that would have set up a system of taxpayer-funded campaigns.

Voters passed Proposition 140 - which limits statewide elected officials and state senators to two terms - by 52-48 percent with 98 percent of the precincts reporting. They defeated a milder term limit measure, Proposition 131, by 62-38 percent.

With about 20 percent of all voters casting their ballots by mail, the outcome of some races - especially close ones - may not be known for days because of the unusually high number of absentee ballots, election officials warned.

Turnout was low Tuesday and the Secretary of State's office predicted only 62.1 percent of California's 13.5 million registered voters cast ballots, the second-lowest since World War II.

The first general election of the 1990s presented voters with a mind- boggling 28 ballot measures that included proposals ranging from increasing the sales and liquor tax, enacting sweeping environmental reforms, limiting officeholders' terms and banning certain types of fishing nets.

The two gubernatorial candidates raised an unprecedented $37 million in their efforts to win over voters and become California's 36th governor.

The victor, as the leader of the nation's most populous state, will immediately be vaulted into the ranks of potential presidential candidates, and will influence the process of drawing new congressional district lines for California's half-dozen or so new seats in the House of Representatives.

In other areas, voters were asked to chose the state's first elected insurance commissioner in a race that grew out of the landmark insurance reform measure adopted in 1988. With 98 percent of the votes tabulated, Democratic state Sen. John Garamendi was declared the winner over Republican Wes Bannister, an Orange County insurance agent, by a margin of 53-37 percent.

California's environment and how it should be protected loomed as the largest single issue facing voters. A number of ballot measures in addition to Proposition 128 would have given voters unprecedented power to regulate pollution, pesticide usage, the logging industry and commercial fishing. They were all defeated.

#90311u1172 11/07/1990 ~United Press International

(NOV. 7) UPI - .Soviet President Mikhail Gorbachev broke precedent today by leading the Revolution Day parade across Red Square in Moscow. Gorbachev stood in the traditional spot atop Lenin's mausoleum for his speech. Later, he climbed down from the mausoleum and marched at the front of a row of Communist Party activists. Police in the Ukrainian capital of Kiev fought with students who tried to block tanks in another military parade. Several activists were injured.

NON-aligned countries in the U-N Security Council have called for a U-N peace force made up of Arab soldiers in the Persian Gulf region. Malaysia, Yemen, Cuba and Colombia said their objective is to get Iraq to comply with resolutions that it withdraw its troops from Kuwait. The nations urged quick action to avoid a possible war between Iraq and the U-S-led force in the region.

New York City investigators believe El-Sayyid Nosair acted on his own in killing Rabbi Meir Kahane, the militant founder of the Jewish Defense League. Police searched Nosair's house in New Jersey and seized some personal papers. They did NOT reveal the contents. Police believe the suspect was NOT connected with any groups.

The 81-year-old executor of the Jack Ruby estate, Jules Mayer, was removed yesterday by a probate jury in Dallas. The jury accused Mayer of ''gross mismanagement'' and ''negligence.'' Mayer said he will appeal. Ruby was the killer of Lee Harvey Oswald, President Kennedy's assassin. The court has been holding a hearing to determine who has the right to sell Ruby's possessions. The gun he used to kill Oswald has been estimated to bring 100-thousand dollars.

Black religious leaders called a boycott of Miami schools yesterday to protest the choice of a superintendent by the Dade County School Board. The board turned down a black with 30 years experience in favor of a Cuban with only seven. 70 percent of the county's bus drivers stayed home. Administrators used the few drivers working to transport young children and let high school students get to school on their own.

#90311u1196 11/07/1990 ~United Press International

ANCHORAGE, AK (NOV. 7) UPI - Independent Wally Hickel, riding a wave of conservative support, declared himself Alaska's new governor Wednesday, beating a Democrat and a Republican supported by President Bush.

Hickel, 71, a former Republican governor of Alaska and Interior Secretary under President Nixon, collected 63,558 votes, 38.5 percent, as candidate of the Alaskan Independence Party.

''If there ever was a populist election, this is it,'' Hickel told cheering supporters early Wednesday.

Hickel ran a pro-development, can-do campaign that promised jobs and economic development, and he picked up solid support from the anti- abortion movement, the GOP right wing and the Moral Majority.

Democrat Tony Knowles, a former two-term mayor of Anchorage, and his Eskimo running mate, Willie Hensley, came in second with 50,775 votes, 30.7 percent.

Republican state Sen. Arliss Sturgulewski - endorsed by President Bush, the state's all-Republican Congressional delegation and party regulars - sought to become the first woman to govern Alaska but mustered only 44,156 votes, 26.7 percent.

Green Party candidate Jim Sykes picked up 5,418 votes, 3.2 percent - just above the 3 percent required to make his environmentalist party an official state party automatically qualifying for future ballots.

Although Alaska elected a developer as its new governor, it also became the first state to formally recognize the Green Party as a legitimate party with a

guaranteed spot on the ballot.

Voter turnout was 60 percent, despite severe winter weather in some locations. With 95 percent of the vote counted, the results were unlikely to change, but Knowles and Hensley were still hoping for votes from remote native villages where they are strong.

''Why don't we call it a win,'' Hickel said at 2 a.m. Wednesday. ''They can't catch us.''

The Alaskan Independence Party already was a recognized third party in Alaska but, with its call for independence and separation from the United States, it never won much support.

Hickel rejected any talk of secession and used the Alaskan Independence Party as a vehicle for a conservative ticket, which stressed wresting control of Alaska from federal domination.

''It's going to be a unique country, this Alaska,'' Hickel said. ''We're bringing the decision-making process back to Alaska. We think we can do as good a job as the federal government. I think you'll see a change.''

Hickel jumped into the race late, Sept. 19, at the urging of arch-conservatives unhappy with Sturgulewski's moderate positions. Sturgulewski's ultra-conservative running mate, Jack Coghill, quit the GOP ticket and helped recruit Hickel for an independent bid while Sturgulewski scrambled for a replacement at the last minute.

But Hickel, who won the governship in 1966 and tried unsuccessfully to win it back several times, said the thing that pushed him into the race was an attempt by White House Chief of Staff John Sununu to talk him out of running.

Hickel said Sununu threatened his pet project - a proposed $11 billion trans-Alaska natural gas pipeline. So Hickel resigned as chairman of Yukon Pacific Corp., the company seeking to build the pipeline, in order to run.

Hickel said Sununu tried to dissuade him from running, saying it would divide Republicans and be fatal to the GOP ticket, handing victory to the Democrats. Hickel did split the GOP and his candidacy was fatal to Sturgulewski's hopes. But it was the moderates and liberals who split 57.4 percent of the vote while conservatives united behind Hickel.

President Bush held a fundraiser for Sturgulewski and pushed her candidacy in the state. But the state GOP chairman and other Alaska Republicans rallied behind Hickel.

Hickel won by ''bashing the federal government and saying he's going to do this and do that right away by executive order,'' said former Democratic Gov.

Bill Sheffield. ''It's nonsense, but it sells good. And he picked up the Moral Majority and pro-life people who had nowhere to go.''

Abortion became an issue because Knowles and Sturgulewski supported women's abortion rights and both sought the women's vote. Hickel said he would outlaw abortion.

#90311u1207 11/07/1990 ~United Press International

MANILA, PHILIPPINES (NOV. 7) UPI - Philippine Defense Secretary Fidel Ramos Wednesday ordered the military to negotiate the release of an American reportedly kidnapped by communist guerrillas in the northern province of Cagayan.

Ramos told reporters he had directed armed forces chief Gen. Renato de Villa to enlist the help of local officials in attempting to negotiate the release of Arvy Duane Drown, who was reported kidnapped by rebels on Oct. 19.

U.S. embassy officials said they were working closely with Philippine police to determine the whereabouts of Drown and secure his safe release. They declined to disclose further details.

The Philippine military said Drown, described as a missionary and ex- Marine who holds a U.S. passport issued in Seattle, Wash., was abducted in Aparri town, Cagayan province, 260 miles north of Manila, by guerrillas of the communist New Peoples Army.

Philippine army Col. Miguel Fontanilla said the kidnapping took place after guerrillas ambushed two army teams. The rebels, he said, apparently seized the American as hostage in the face of troop reinforcements.

Kidnapped with Drown were a Philippine soldier, a woman and the driver of a jeep in which they were riding.

The 19,000-member NPA has been battling the Manila government for 21 years.

''We're trying to determine his whereabouts and if the reports are true about the kidnapping to try and seek his safe release,'' U.S. Embassy spokesman Hugh Hara said.

Hara said no one has claimed responsibility for the kidnapping.

It was not immediately known if the abduction was related to the talks on the future of six U.S. military facilities in the Philippines. U.S. basing rights expire next year.

The NPA has warned it would attack Americans unless Washington withdraws from

the Philippines.

Travel for 40,000 Americans at the bases has been restricted since Saturday as a precaution during the talks on the bases scheduled to resume Thursday.

On June 13, guerrillas kidnapped U.S. Peace Corps volunteer Timothy Swanson in the central island of Negros and released him unharmed after 50 days in captivity.

#90311u1208 11/07/1990 ~United Press International

CHAMPAIGN, IL (NOV. 7) UPI - The NCAA will place the University of Illinois basketball program on probation for three years and ban the team from postseason play for one year, the Chicago Sun-Times and Chicago Tribune reported Wednesday.

The NCAA scheduled a news conference later in the day at its headquarters in Overland Park, Kan., to announce penalties stemming from its 17-month investigation into alleged recruiting violations by the Illini.

School officials received the news Tuesday night, the papers said, and were to meet with reporters after the NCAA announcement.

Among the other major sanctions will be a one-year ban on off-campus recruiting with lesser restrictions the following year and a two-year limit on scholarships, calling for only two in the first two seasons of the probation.

The ban on off-campus recruiting means a student athlete wanting to visit the university must pay his own way during the first year of probation, and recruiting must be accomplished through telephone calls and letters.

However, the verdict does not include a ban on television appearances by the Illini, and the school will not have to return the $250,000 it received for its first-round appearance in the NCAA tournament this year.

Reports indicate Illinois will not fight the sanctions because the school was not found guilty of the most serious charges. One involved allegations that assistant coach Jimmy Collins offered cars and cash in recruiting Deon Thomas and LaPhonso Ellis. Thomas is a sophomore at Illinois while Ellis is enrolled at Notre Dame.

The investigation was triggered by Iowa assistant coach Bruce Pearl, who said he taped a phone conversation between himself and Thomas during which Thomas allegedly acknowledged an improper Illinois offer of $80, 000 and a Chevrolet Blazer.

Thomas apparently will not be forced to resign.

#90311u1214 11/07/1990 ~United Press International

TOKYO (NOV. 7) UPI - Cecil Fielder, a former star player in Japan and now with the Detroit Tigers, blasted a game-tying three-run homer Wednesday to highlight the U.S. All-Stars' eight-run barrage in the last two innings, pacing the major leaguers to a 10-5 victory over a Japanese team.

It was the first win for the U.S. team after four losses in the eight-game Super Major Series.

Hiromichi Ochiai and Katsumi Hitosawa ripped a pair of homers off Randy Johnson of the Mariners to give Japan a 4-1 lead.

Trailing 5-2 in the eighth, the U.S. major leaguers scored five runs, with Fielder delivering three of them, to take a 7-5 lead. Jesse Barfield of the New York Yankees smashed his second home run of the tour for two more runs.

In the ninth, Ken Griffey Jr. and Barry Bonds cracked a pair of homers to drive in three runs to widen the lead to 10-5.

Rob Dibble of the Cincinnati Reds pitched two innings to gain the win while Japan's reliever Shinji Imanaka took the loss.

The seventh game of the U.S.-Japan tour will be held at Chiba Marina Stadium, Chiba, east of Tokyo, Thursday.

#90311u1225 11/07/1990 ~United Press International

ANKARA, TURKEY (NOV. 7) UPI - Secretary of State James Baker reiterated Wednesday the use of military force could not be ruled out in the Gulf and there could not be a partial solution to the crisis caused by the Iraqi takeover of Kuwait.

Baker was speaking to reporters at Ankara's Esenboga airport after holding discussions with Turkish President Turgut Ozal on the Gulf crisis. He left for Moscow shortly afterward on the fifth leg of his tour of Middle Eastern and European countries.

''Obviously, we would all like to see a peaceful, diplomatic and political solution to this problem,'' the secretary said. ''At the same time ... we cannot rule out the possible use of force.''

On his meeting with Ozal and other Turkish leaders, Baker said: ''We talked about the importance of insisting that there not be a partial solution to this problem.''

Ozal and Prime Minister Yildirim Akbulut ''were both very supportive of the full implementation of the U.N. Security Council resolutions,'' Baker said. ''It is our view ... that the credibility of the U.N. is at stake.

''This, after all, is the first real crisis of the post-Cold War era and its very important that when the U.N. takes an action, that is, passes a resolution, those resolutions and actons be implemented. This was the purpose of our conversations.''

The secretary, who arrived in Ankara late Tuesday, rested overnight before beginning his contacts with Turkish leaders. Besides Ozal and Akbulut, he also met Foreign Minister Ahmet Kurtcebe Alptemocin.

His discussions with Ozal lasted two hours, officials said. The talks were held amid signs that the patience of the Turks with Iraqi President Saddam Hussein was wearing thin.

A Foreign Ministry official said that although Ankara's stance was that it does not wish to get embroiled in an all-out war with Iraq, public opinion in Turkey has undergone a dramatic change since Baker's last visit in early August, when the crisis began.

Turkish newspapers have expressed the view that Turkey does not wish to live side by side with a dictator like Saddam, saying he does not hestitate to use chemical weapons when it pleases him.

The Turks were uneasy about the use of chemical weapons against Iraqi Kurds near Turkey's southeastern borders during the 1980-88 Iran-Iraq war.

There was no immediate confirmation of speculation that Baker sought permission from Ankara for U.S. forces to use the Incirlik air base in the southeast of the country for operations against Iraq if war broke out in the region.

In his tour, aimed at drumming up support for the military option against Iraq Baker visited Bahrain, Saudi Arabia and Egypt before flying to Turkey.

In Cairo, he also met Chinese Foreign Minister Qian Qichen, who was on a visit to Egypt at the same time. Baker denied he gave an ultimatum to Saddam through the Chinese minister to pull his forces out of Kuwait in two weeks.

Besides the Soviet Union, Baker is scheduled to visit Britain and France.

Ozal is scheduled to visit Iran Friday, en route to Tokyo, and will hold discussions with President Akbar Hashemi-Rafsanjani.

Officials said Ozal would not be carrying any messages from Washington to

Tehran, but would offer reasurances to the Iranians on the role of U.S. forces in the region.

Rafsanjani, who said last week that war appeared to be imminent in the Gulf, earlier expressed the view that the United States may use the Gulf crisis as an excuse to establish long-term bases in the region.

Official statements after Baker's talks in the Saudi Arabia, where Cairo officials say 20,000 Egyptian troops are stationed on the front line ahead of U.S. and other Western troops, did not mention a timetable for a military strike against Baghdad.

#90311u1227 11/07/1990 ~United Press International

VIRGINIA BEACH, VA (NOV. 7) UPI - The Navy Wednesday investigated the crash of an A-6E Intruder that went down in the Atlantic, narrowly missing an oceanfront hotel after the pilot and bombardier ejected.

The aircraft, which had just taken off from the Oceana Naval Air Station, narrowly missed the Station One Hotel Tuesday before going into the ocean about a quarter-mile from the beachfront.

The pilot, whose identity was not revealed, was taken to Virginia Beach General Hospital for observation and released within an hour.

The bombardier-navigator was taken to the Naval Air Station Oceana Branch Clinic for treatment of minor cuts and was released.

Virginia Beach Police reported one incident of minor property damage caused by falling debris from the jet.

Witnesses told the Virginian-Pilot they heard an explosion shortly after the $33 million jet took off.

''It was flaming fully,'' said Greg White, 19, a Tidewater Community College student. ''We didn't know what had happened.''

White and a friend, Ron Welch, 19, were working on a car when the jet blasted overhead. They were on the scene where the crew parachuted to safety - two blocks from the oceanfront - before officials arrived.

''We talked to the one pilot,'' Welch said. ''We asked what happened, he said, 'All of a sudden, BOOM, and it caught on fire.' We could see cuts on his neck and on his wrist.''

#90311u1235 11/07/1990 ~United Press International

GENEVA (NOV. 7) UPI - Governments at a world climate conference recognized Wednesday the dangers of steady global warming but put off possible concrete international action until another meeting in 1992.

A declaration ending the 10-day conference of 105 nations ackowledged warnings by scientists that emissions of carbon dioxide and other greenhouse gases must be reduced to prevent oceans rising and deserts spreading.

It confirmed that negotiations on international measures would begin in Washington next Feb. 4.

Binding commitments at another full conference in Brazil in 1992, however, were described only as ''highly desirable.''

''We recognize that it is highly desirable that an effective framework convention on climate change, containing appropriate commitments and any related instruments as might be agreed upon on the basis of consensus, be signed in Rio de Janeiro during the United Nations Conference on Environment and development,'' the declaration said.

All the same, west European countries, Australia, Canada, Japan and New Zealand did undertake at Geneva to stabilize emission of carbon dioxide, carbon monoxide and sulfur dioxide ''by the year 2000 in general at 1990 levels.''

Scientific reports presented to government delegates warned that the Earth will at current atmospheric warming rates be hotter next century than at any time in the past 100,000 years.

The scientists predicted a one degree celsius warming by 2025 and three degrees by the end of next century without emission reductions of as much as 60 percent.

The U.N.'s World Meteorological Organization (WMO) and Environment Program (UNEP) warned that oceans could rise by 2.5 inches a year, causing catastrophic flooding.

The Geneva political declaration said there is still uncertainty about the rate and effects of greenhouse gas emissions although ''the potential impact could pose an environmental threat of an up to now unknown magnitude.''

''Where there are threats of serious or irreversible damage, lack of full scientific certainty should not be used as a reason for postponing cost-effective measures to prevent such environmental degradation,'' it said.

The statement said ''response strategies'' should include sustainable forest management and reforestation, contingency plans to protect low- lying coastal

regions, and lower or even no emissions of greenhouse gases.

The scientific reports called specifically for urgent development of solar, wind and thermal energy.

British prime minister Margaret Thatcher in an speech on Tuesday also said there was a need for continued use of nuclear energy for electric power but that alternative source was not mentioned in the declaration.

#90311u1252 11/07/1990 ~United Press International

MANILA, PHILIPPINES (NOV. 7) UPI - The United States announced Wednesday it would withdraw all of its fighter aircraft from the Philippines next year when its basing rights in the country expires.

Special U.S. negotiator Richard Armitage made the announcement during a private meeting with Philippine Foreign Secretary Raul Manglapus on the eve of the second round of talks on the future of six U.S. facilities in the country, a U.S. statement said.

Manglapus told reporters late Wednesday the American decision to withdraw was ''a partial victory.''

''Now the United States position coincides with the Philippine position,'' he said.

The 1947 lease on the sprawling Clark Air Base, Subic Bay Naval Station and four smaller facilities expires on Sept. 16, 1991. Clark and Subic are the oldest and largest U.S. facilities overseas and are manned by some 14,500 troops.

Armitage arrived earlier Wednesday for the two days of talks scheduled to begin Thursday. He immediately went to the meeting with Manglapus.

The statement said Armitage informed Manglapus Washington has decided not to station F-15-E aircraft at Clark beginning in 1991 as originally planned to replace the aging F-4-E fighters.

It said the F-15-E would instead be based in Elmendorf Air Base in Alaska.

Manglapus also was informed the 3rd Tactical Fighter Wing currently based at Clark will be removed.

''As previously announced in April 1990, the 90th Tactical Fighter Squadron's F-4-G will be removed from the Philippines in May 1991. The wing's second squadron consisting of F-4-E aircraft was to have been replaced by the F-15-Es. This unit (the 3rd Tactical Fighter Squadron) will indeed be removed

by Sept. 1991, but not replaced.

''The net effect of this decision is that at some point in 1991, the U.S. will have no fighter aircraft permanently based in the Philippines and that more than 1,800 military personnel will have departed,'' the statement said.

It said the decision to withdraw was made in Washington and was influenced by the Philippines' ''publicly expressed position that the fighters should be removed by 1991.''

''The decision was based on assessment of where best to allocate highly valuable resources to maintain our long-term commitment in the region,'' the statement said.

It said the United States was notifying allies in the region of the decision which it stressed ''in no way diminishes our commitment or ability to meet our responsibilities in the Pacific.''

In addition to the two fighter squadrons, the United States maintains the Military Airlift Command at Clark, which employs huge transport planes.

U.S. officials have expressed interest in retaining the airlift command terminal at Clark, but the decision to withdraw the attack jets was certain to come as a surprise to the Philippine panel whose members were not immediately available for comment.

During talks in September, Armitage indicated Washington wanted a phase down of the six facilities in 10 to 12 years and a limited military presence after that.

The Philippines, on the other hand, served notice it would take over Clark and four smaller facilities upon the expiration of the bases pact. However, the Philippines said it would consider a phase down of Subic, a repair and logistics center for the U.S. 7th Fleet.

Washington provides the Philippines $481 million annually for the bases, which Filipino nationalists regard as an infringement of national sovereignty.

The United States said it still was interested in ''reinvigorating'' ties with the Philippines and expressed hopes the decision to withdraw the aircraft from Clark would lead to a successful conclusion of a new relationship with its former colony.

''The American offer of partnership in the process of transforming military facilities by phasing down the U.S. presence while phasing in joint use, commercialization and new economic enterprises, remains on the table,'' the statement said.

#90311u1263 11/07/1990 ~United Press International
PANAMA CITY, PANAMA (NOV. 7) UPI - The U.S. military took control of Panama within a few hours last December, but the conflict over how the invasion should be remembered may last for years.

Invasion critics want Dec. 20, the one-year anniversary of the attack, to be declared a national day of mourning. Others say they were liberated when 25,000 U.S. troops overthrew military ruler Gen. Manuel Noriega and installed President Guillermo Endara.

Last week, the National Assembly rejected a bill to name Dec. 20 a day of mourning.

Some observers say such a bill would be an embarassment for a government installed during the fighting, but legislators said it was killed because most Panamanians support the invasion.

''In order not to favor either side, we have not taken any action,'' said Fernando Escobar, a Christian Democrat legislator. ''To decree a national day of mourning would contradict the huge majority who feel they have a right to celebrate a day of liberation.''

But opposition lawmaker Mario Rognoni said Panamanians are disappointed with Endara and will be in no mood to party Dec. 20.

During his first weeks in office, Endara waded into huge, adoring crowds to kiss babies and hug supporters. Now, however, he is criticized for everything from government cronyism to the clothes worn by his fashion-conscious wife.

Protestors clog Panama City streets every month to demand jobs while police officers were recently arrested and charged with plotting against Endara.

The economy is recovering slowly from the invasion damage and two years of U.S. economic sanctions. Most of a $420 million U.S. aid package has not yet arrived.

''With the results we have had after the invasion, I don't think anyone will celebrate,'' Rognoni said.

Opposition groups have planned a protest march for Dec. 20 which could turn into the largest anti-government demonstration since the invasion, said Isabel Corro, who heads a group of war widows.

In the schools, teachers interpret the invasion as they see fit. Most, however refer to Dec. 20 as the day democracy returned to Panama, said Laurentino Gudino, vice minister of education.

Gudino said the invasion will probably be chronicled in next year's public school textbooks, which must be approved by the Education Ministry and by Endara's cabinet.

Those hardest hit by the invasion continue to weigh its merits. Thousands of Panamanians lost homes when the El Chorrillo ghetto burned down during the U.S. attack on Noriega's headquarters.

''It (Dec. 20) has to be considered a day of mourning because so many innocent people died,'' said Antonio de Lefante, who lives in a hangar at Albrook air field, which has been converted into a refugee camp.

Human rights groups say between 500 and 700 Panamanians were killed in the invasion. Some Panamanians claim thousands died.

Most of the 16,000 people who lost their homes have been relocated. The U.S. government provides about $7,300 for families to buy new homes but has refused to compensate those who were injured or lost family members. The invasion caused more than $1 billion in damages, according to most estimates.

Ashton Bancroft, who helps run the Albrook camp, complained that the government closed down for a day to honor a former president - declaring a national day of mourning when former President Marco Aurelio Robles died in Miami earlier this year - yet it appears content to ignore victims of the most violent day in Panamanian history.

Although legislators have been unable to arrive at a consensus on how to mark the invasion anniversary, Escobar said Endara could take action on his own. A spokesman for Endara said the government was busy with other issues and has made no plans for Dec. 20.

Bill Ormsbee of the U.S. Southern Command said the U.S. military has no plans to mark the invasion anniversary.

(NOV. 7) UPI - .The Soviet Union celebrated its traditional Revolution Day- the anniversary of the 1917 Communist anniversary- but sometimes in NON-traditional ways. In Kiev, students tried to block tanks in the military parade. Police clashed with them and injured several. Parades in some localities were canceled. Two non-Communists- Boris Yeltsin and Moscow Mayor Gavriil Popov- joined President Mikhail Gorbachev in reviewing the Moscow parade.

A fire fanned by 50-mile-an-hour winds spread through Universal Studios in Los Angeles last night. Damage was estimated in the Millions of dollars. Major

attractions at Universal's amusement park were heavily damaged. However, the studio's priceless film archives were saved. The blaze could be seen for miles. Roadblocks around the fire delayed Republicans going to an election night celebration at the Universal Hilton.

The Washington Post reports that William Bennett is resigning as head of the federal government's war on drugs. He is leaving at a time when cocaine is becoming more scarce and expensive. But violence connected with drug use and trafficking is increasing. Bennett was secretary of education before becoming chief federal drug enforcer. The newspaper quotes officials as saying he has no other job lined up.

Record cold hit the Plains states this morning. The Norfolk, Nebraska, temperature fell to seven degrees. Scottsbluff, Nebraska, was three. Casper, Wyoming, tied a record with five degrees. A cold front is moving east and caused frost in nearly all of Kentucky. High winds hit along the Pacific coast and in New England.

Iran's news agency says at least 21 people have been killed in an earthquake during the night in southern Iran. Thousands of people were left homeless. The earthquake shook a sparsely populated area of the Zagros mountains. A spokesman for an Iranian group in Washington says the quake struck late at night when most people were at home. He said most homes in the area are clay and NOT resistant to earthquakes.

#90311u1282 11/07/1990 ~United Press International

BEIRUT, LEBANON (NOV. 7) UPI - The government of Lebanese President Elias Hrawi moved Wednesday to establish a militia-free unified Beirut starting Saturday and to build a presidential headquarters on the ruins of the capital's hippodrome.

''The plan to establish a free-militia unified Beirut will be initiated no later than Nov. 10 and completed by midnight Nov. 19,'' said an official statement following a cabinet meeting.

The statement failed to set the boundaries of what it called ''Greater Beirut '' but Hrawi said Tuesday it will include the capital and a 9-to-16 mile semi-circular area stretching to the Damour village in the south and the Kalb (Dog) River in the north.

The plan aims at deploying Lebanese troops in ''Greater Beirut'' after the withdrawal of all militiamen to areas outside it.

All militias, including the pro-Iranian Hezbollah, or Party of God, and the Christian Lebanese Forces of Samir Geagea, had agreed to pull out from the capital.

Hrawi said the next step would be forming a government of national unity that would include militia leaders as ministers without portfolios.

The president pledged that all militias will disband by March 21, 1991.

The three steps were part of an internationally backed peace agreement endorsed by Lebanese lawmakers in Taif, Saudi Arabia, in October 1989.

The government also decided Wednesday to build presidential headquarters and another to house the cabinet on the ruins of Beirut's once-famous hippodrome that is located on the ''Green Line'' and had served as a crossing point between Christian east and Moslem west Beirut over 15 years of civil war.

The devastated sandy yard remained until 1975 the favorite gathering place of thousands of horse race followers, among them a number of politicians.

Since he was elected president last November, Hrawi has been running the nation from temporary headquarters in Syrian-policed West Beirut in anticipation of the ouster of Christian rebel Gen. Michel Aoun from the Presidential Palace of Baabda in the eastern part of the capital.

Aoun was driven out of the badly damaged Baabda Palace by a joint Syrian-Lebanese force Oct. 13. Last week, presidential spokeswoman May Kahale led reporters in a tour at the palace and said it needed $4 million and at least two months before it can be partly restored and used.

DAMASCUS, SYRIA (NOV. 7) UPI - A senior U.S. official arrived unexpectedly in Damascus Wednesday to brief Syrian leaders on Secretary of State James Baker's current Mideast-European tour.

The official, Assistant Secretary of State for Middle East and South Asian affairs John Kelly, met with Syrian Foreign Minister Farouk Sharaa.

They iscussed the latest developments in the Gulf crisis, including Baker's talks with the leaders of Kuwait, the United Arab Emirates, Saudi Arabia and Egypt.

''During the meeting, future steps on implementing U.N. Security Council resolutions calling for Iraq's withdrawal from Kuwait were discussed,'' a Syrian government source said.

''Joint efforts to exercise further pressure on Iraq should be continued to avert a military confrontation that could be a catasrophe for the entire region.''

Syria, Egypt and Morocco are the only Arab countries to have sent troops to Saudi Arabia and the United Arab Emirates to deter Iraqi aggression.

Earlier this week Syria, sent more armored formations to Saudi Arabia. Syrian President Hafez Assad has promised to send 20,000 Syrian troops to Saudi Arabia.

#90311u1347 11/07/1990 ~United Press International

(NOV. 7) UPI - .Attorney General Dick Thornburgh says the Justice Department has prosecuted more than 500 figures in the S-and-L scandal in the past two years. He says the department obtained 328 indictments charging 519 people. 355 have been convicted. They have been ordered to pay 211- Million dollars in restitution. But a United Press International survey of the cases shows that some involved relatively small offenses.

Police are waiting for the suspected assassin of Rabbi Meir Kahane to recover in Manhattan's Bellevue Hospital. El-Sayyid Nosair was shot in the jaw when he was captured Monday. Police believe the Egyptian native was NOT part of a conspiracy when he gunned down Kahane. Police searched his home last night and seized some papers. They did NOT reveal the contents.

Kuwait's exiled premier is calling for a military strike by the United States against Iraq. Premier Sheikh Saad said- ''The only option available now is the military one.'' His remarks confirm that the exiled Kuwaiti leaders are losing patience with the U-N sanctions and other peaceful methods. The four NON-aligned nations in the U-N Security Council have called for an Arab U-N force to enforce U- N sanctions.

Researchers in Singapore are using acupuncture without needles to help smokers cut down their puffing. They report an 80 percent success rate. The researchers use a device caled Likon which combines acupuncture with modulation electrotherapy. The device uses a 12-volt battery. It has been approved for use in the United States and is for sale in several other nations.

Japanese lawmakers have decided one thing they can do about overcrowding in Tokyo is to leave. Both houses of the Diet, Japan's parliament, adopted a NON-binding resolution today saying they want to move out of the capital. NO decision is expected for a number of years. The resolution did NOT stipulate a

deadline or specify where the parliament should go.

-30- 2110
#90311u1370 11/07/1990 ~United Press International
NEW YORK (NOV. 7) UPI - John F. Kennedy Jr. is very happy that folks will stop calling him ''the hunk that flunked.''

The handsome Kennedy learned during the weekend that he passed the New York Bar examination after failing it the first two times.

''I got the word. I'm very relieved,'' Kennedy, 29, said Wednesday, managing a grin at a crowd of reporters and photographers waiting for him as he arrived for work in at the Manhattan district attorney's office.

If Kennedy had failed the bar exam again, he would have lost his $30,000-a-year job and his chances of passing on the third try were a point of conversation around town for weeks.

Once the state Appellate Division formally admits him to the bar, he will get a $1,000 raise.

The son of the late president and Jacqueline Kennedy Onassis failed in two earlier attempts since graduating in 1989 from New York University Law school. As a newly hired assistant district attorney, he had to pass on his third try.

Kennedy also heard last weekend that he had passed the Connecticut Bar exam.

Kennedy has been assigned to a unit that concentrates on white-collar crime, low-level political corruption and other felonies and was part of a three-member team of prosecutors who investigated illegal wiring of drug money from storefronts to the Dominican Republic.

His cousin, Robert F. Kennedy Jr., failed the bar exam in 1982 and resigned as an assistant district attorney amid charges of drug abuse. He entered a drug treatment program and received a suspenxded sentence and probation, and eventually was admitted to the bar in 1985.

Kennedy's sister, Caroline Kennedy Schlossberg, 32, passed the bar exam on her first try three years ago. She is the mother of two small children and not currently practicing law.

A bachelor, Kennedy leads a relatively quiet life but attracts attention every time he shows up at a fashionable restaurant or nightspot.

#90311u1372 11/07/1990 ~United Press International

BY JOSEPH MIANOWANY - UPI

WASHINGTON (NOV. 7) UPI - An angry American electorate, upset with the economy and the direction of the nation, gave Democrats some new hope Tuesday that they can use pocketbook issues to make a reinvigorated run for the White House in 1992.

However, despite voters' obvious indignation, the meaning of their message in the 1990 midterm election was far from crystal clear, allowing Republicans to claim that they had successfully held their own and may have even bolstered President Bush.

Walking into voting booths across the land with promises to ''throw the rascals out,'' the public generally refused to follow through.

As a result, when the 102nd Congress convenes in January, Democrats will hold bulges roughly similar to what they have enjoyed for the past two years. But in state capitals, Democrats scored more significant gubernatorial gains.

In the 100-member Senate, Democrats picked up one seat to hold a new 56-44 edge, while in the House they were on a pace to add to their majority by about a half dozen. They currently dominate the chamber by a 258-175 margin with two vacancies.

In the most closely watched races of the night:

-Sen. Jesse Helms, the arch-conservative Republican from North Carolina, defeated liberal black Democrat Harvey Gantt. ''I'm sorry I'm late,'' Helms told his cheering supporters. ''I've been at home watching the grieving face of Dan Rather. ... The mighty, ultra-liberal establishment has struck out again.''

-In the very bitter and very expensive Texas gubernatorial battle, Democrat Ann Richards won over Republican Clayton Williams.

-Republican Sen. Pete Wilson defeated Democrat Dianne Feinstein, the former mayor of San Francisco, to become California's governor.

-In Minnesota, Democrat Paul David Wellstone beat Republican Sen. Rudy Boschwitz, the only Senate incumbent to lose.

-Former U.S. Sen. Lawton Chiles, a Democrat, ousted Republican Florida Gov. Bob Martinez.

-Sen. Bill Bradley, D-N.J., won a third term, barely edging out Republican Christine Todd Whitman. Bradley, hailed as a potential presidential contender, had far more money than Whitman but was hurt badly by an anti-tax fever sweeping New Jersey.

-Assistant House GOP leader Newt Gingrich of Georgia, a fiery conservative, barely survived a tight fight against Democrat David Worley.

-In Kansas, Democrat Treasurer Joan Finney beat Republican incumbent Gov. Mike Hayden.

-Former Republican Sen. Lowell Weicker won the three-way Connecticut governor's race as an independent.

-Incumbent Democrat Sen. Tom Harkin rather easily defeated Republican Tom Tauke in what had been billed as perhaps the tightest Senate race in the nation.

-In Massachusetts, William Weld defeated Democrat John Silber to become the first Republican elected to the post in 16 years.

Overarching themes were difficult to determine from the results, although combining the vote returns with network exit polling figures provided some insights that bolstered Democrats.

About three-quarters of voters questioned by the networks said they believed the nation was on the wrong track and predicted that the country's economy would only get worse.

About 57 percent of the people said they approved of President Bush and - in a repeat of their usual bizarre pattern - vast majorities disapproved of Congress, while approving of their own representative and senator.

BUDAPEST, HUNGARY (NOV. 7) UPI - Publishing magnate Robert Maxwell's Mirror Group has purchased a 40 percent stake in the former communist party newspaper Esti Hirlap, the official MTI news agency said Wednesday.

The 33-year-old evening newspaper is now the second Hungarian daily partially controlled by Maxwell, who bought 40 percent interest in the Magyar Hirlap earlier this year.

The Esti Hirlap, formerly the mouthpiece of the Budapest branch of the communist Hungarian Socialist Workers' Party, has a circulation of 80,000 and is sold at newsstands in the capital and other large cities.

Besides the Mirror Group, the other partners under the new arrangement are the Hungarian Newspaper Publishing Co., which holds a 40 percent stake, and the newspaper's editorial staff, which control 20 percent, MTI said.

Pending formal government approval of the joint venture, the newspaper is expected to be published in a newly constructed printing shop where the Magyar Hirlap also will be produced, and its format and design will be modernized, the news agency said.

LUSAKA, ZAMBIA (NOV. 7) UPI - South African Foreign Minister R.F. ''Pik'' Botha won a round of applause Wednesday from Southern African leaders when he said apartheid has disappeared.

''We in Africa, we ourselves, must now join hands and move together. ... We must turn together, apartheid is gone,'' Botha told representatives of six African nations and the African National Congress at a special meeting to pray for peace, unity and reconciliation in southern Africa.

Organization of African Unity Chairman and Ugandan President Yoweri Museveni led the applause.

''There can be no winner when people die but ... we can all be winners if we talk peace,'' said Botha, invited to the meeting by Zambian President Kenneth Kaunda as a result of President Frederik de Klerk's nine months of sweeping racial reforms.

Kaunda said he called the morning meeting to pray for southern Africa, shaken by apartheid, the civil wars in Angola and Mozambique and widespread economic instability.

Observers saw Museveni's presence as especially significant and indicating an OAU endorsement of de Klerk's reforms. The Ugandan leader said Africans should look to God for guidance.

''Human beings are blind, they don't know what they are doing,'' he said.

Other heads of state present were Mozambique's President Joaquim Chissano and the pro-ANC military ruler of South Africa's nominally independent tribal territory of Transkei, Maj. Gen. Bantu Holomisa.

Countries that sent foreign ministers or ambassadors were Botswana, Lesotho and Zimbabwe. The ANC was represented by International Affairs Secretary Thabo Mbeki.

Kaunda had said the meeting would focus only on ways to peace, but analysts believed the Zambian leader was also seeking credibility among his people as he prepares for an election that will end his 17 years of one-party rule and bring the country democracy.

WASHINGTON (NOV. 7) UPI - The volatile abortion issue, which dominated political debate in the last half of 1989, moved to the back burner in Tuesday's election but was still critical in some of the toughest and closest races.

With a slumping economy dominating the issues, abortion was not the ''silver bullet'' that some candidates thought it would be.

But in the two places where the issue was directly confronted - ballot initiatives in Nevada and Oregon - supporters of legal abortion had the upper hand.

Nevadans voted to retain liberal abortion law. With more than 20 percent of the vote counted, an amendment to put abortion rights protection in the state constitution, was winning by a 60-40 margin and carrying even in the most conservative parts of the state.

In Oregon, a virtual ban on abortion trailed badly in early returns, but the race was much closer on a parental notification measure.

With 35 percent of the precincts reporting, Ballot Measure 8, which would ban abortion except in cases of rape, incest and a threat to the life of the mother, trailed 67 percent to 33 percent. Measure 10, which trailed 52 percent to 48 percent, would require doctors to give 48 hours' notice to the parents of any girl under 18 seeking an abortion.

But both sides could claim some important victories.

The election of Democrat Lawton Chiles in Florida over staunch anti- abortion Republican Gov. Bob Martinez was a major victory for supporters of legal abortion while the re-election of Sen. Jesse Helms, R-N.C., the Senate's most militant abortion opponent was a significant win for the anti-abortion movement.

In Pennsylvania, anti-abortion Democratic Gov. Bob Casey easily won re-election over a woman candidate in favor of abortion rights, but Idaho Gov. Cecil Andrus, a prime target of abortion opponents after he vetoed a tough anti-abortion measure passed by the state legislature, won 62 percent of the vote and sharply beat back an effort to oust him.

In House races, the ouster of Rep. Stan Parris, R-Va., by Alexandria Mayor James Moran, who campaigned heavily on the ''choice'' issue, was called a major victory by abortion rights advocates.

Kate Michelman, executive director of the National Abortion Rights Action League, was especially jubilant about the Martinez defeat in Florida.

Martinez had called a special session of the Florida state legislature almost immediately after the July 3, 1989, Supreme Court ruling giving states wide latitude to restrict abortion and has been a target of supporters of legal abortion.

''Bob Martinez has been the nation's most prominent anti-choice governor, and today he paid the price at the polls,'' Michelman said. ''Bob Martinez was out of touch with his state's pro-choice majority - now he is out of office.''

NARAL invested heavily in the Chiles race - an investment that paid off as Florida political analysts credited the ''choice'' issue with helping Chiles win the election.

But Nancy Myers, spokeswoman for National Right to Life Committee, the nation's major anti-abortion gropup, pronounced herself equally pleased with the election results.

''I think we've learned a couple of lessons from the 1990 election cycle,'' she said.

''One is that it doesn't pay to flip-flop on the abortion issue,'' she added, noting especially the defeat of Democrat Anthony Celebrezze in the Ohio governor's race. ''The second is that Democrats who buck the party platform (which supports legal abortion) can win.'' She specifically cited the victory of Democrat Joan Finney in the Kansas governor's race.

But a sign that the issue is no longer foremost on voters minds was provided by an ABC exit poll. Abortion came in dead last on a list of ''very important'' voting issues, far behind the federal budget, the national economy the Persian Gulf crisis and taxes, and behind the environment and the savings and loan scandal.

#90311u1460 11/07/1990 ~United Press International

MONTREAL (NOV. 7) UPI - Air Canada, the country's largest airline company, Wednesday reported a 38 percent drop in earnings in the third quarter to $37.4 million, or 50 cents a share, from $60.4 million, or 81 cents a share, a year ago.

Revenues increased to $952 million from $886.6 million in third- quarter 1989.

Earnings for the first nine months stood at $42.5 million, or 57 cents a share down from $77.4 million, or $1.04 a share, in 1989. Revenues increased to

$2.58 billion from $2.38 billion a year earlier.

The third quarter is traditionally the period in which Air Canada makes most of its profits for the year, the company said.

Air Canada Chairman Claude Taylor said higher fuel prices and softening world airline markets will mean the company's 1990 annual results will be below expectations.

''Although we are well positioned in Canada with an approximate 56 percent of market and a basically strong balance sheet, the contribution of airline operations to earnings still needs to be significantly improved,'' Taylor said.

On Oct. 9, Air Canada announced plans to lay off 2,900 employees, cut and postpone several international routes and sell four aircraft.

The 2,900 employees, representing 12.6 percent of the company's 23, 000 work force, will be let go by Jan. 31.

Air Canada will suspend service to Bombay-Singapore, Lisbon-Madrid and Athens and postpone two new 1991 routes to Singapore, including Seoul-Singapore and Frankfurt-Delhi-Singapore.

Air Canada said the cuts will reduce capital requirements in 1991 by $484.5 million and improve operating income by $52.7 million.

The company became a fully publicly traded entity in July 1989 after years as a government-owned corporation.

DUBLIN, IRELAND (NOV. 7) UPI - Irish voters voted for their seventh president Wednesday, choosing between the first woman candidate for the post and a disgraced former deputy prime minister who was sacked last week for alleged

improper conduct.

About 2.4 million people were eligible to participate during the daylong voting, and officials said a result would be declared Friday.

It was the first presidential election in 17 years. Outgoing President Patrick Hillery was appointed to the office in 1973 and served two uncontested seven-year terms.

The election battle has been heated and dirty because of a controversy that engulfed Brian Lenihan, the former front-runner who had served as deputy prime minister and defense minister until his dismissal last Wednesday.

Opinion polls list him as being 5 points behind Mary Robinson, an independent candidiate nominated by two opposition socialist parties. She has exploited the Lenihan scandal, accusing him of dishonesty.

Prime Minister Charles Haughey was forced to sack Lenihan in order to defeat a motion of confidence against his government by the opposition over the dispute about allegations that Lenihan used unconstitutional means during a political crisis in 1982.

The Democrat Progressive party said it would only give its crucial six-vote backing to Haughey's Fianna Fail party if he sacked Lenihan, who had refused to resign, and the confidence vote passed 83 to 80 with two abstentions.

The controversy was sparked by Lenihan's admission in a taped interview with a political science student that he phoned Hillery in 1982 to persuade him to allow the now-ruling Fianna Fail party to try and form a government on the floor of Parliament. Lenihan denied making the statements.

The coalition Labor-Fine Gael government had collapsed after losing a confidence vote, but Hillery resisted Lenihan's scheme - which was deemed an improper tactic of trying to subvert the head of state - and instead allowed prime minister Garret Fitzgerald to form a new administration.

Although Lenihan was last week sacked from the Cabinet, under Irish law he could not withdraw his candidacy for the presidency.

His campaign had aimed at highlighting his political integrity, but shifted during the past week to try and capitalize on a backwash of sympathy that followed his dismissal.

Analysts believe perceptions of personal integrity will be the deciding issue because the president is an apolitical ceremonial figure, whose only executive task is to dissolve Parliament at the request of a prime minister who has lost a confidence vote, a function Lenihan tried to undermine.

A third candidate, Austin Currie, has trailed substantially behind the other two and tried to mainly campaign on issues linked to the war in Northern Ireland, an issue that was eclipsed by the Lenihan dispute.

#90311u1508 11/07/1990 ~United Press International
PHILADELPHIA (NOV. 7) UPI - The city is suing seven top manufacturers of lead-based paint in an attempt to recover the cost of ridding city properties of the health threat.

The suit, filed in federal court Monday, names as defendants Atlantic Richfield, Sherwin Williams, Glidden and four other major paint manufacturers.

First Deputy City Solicitor Thomas Wamser said Wednesday that the class-action suit was filed on behalf of the city and its housing authority, as well as on behalf of any other large cities or housing authorities elsewhere in the nation that choose to join in the action.

''We're seeking to make it a nationwide issue,'' Wamser said, once it is certified as a class-action by the court.

A suit filed by New York City seeking recovery of cleanup costs from the seven companies is also pending, while a suit in Massachusetts is seeking to recover damages for children who suffered ill effects after ingesting lead-based paint.

Philadelphia's suit contends the seven companies conspired over the past several decades to rebut or play down evidence that lead pigments are hazardous to human health.

The suit seeks an injunction that would require the manufacturers to cover the cost of lead cleanup projects in public housing and other units owned by the city.

Recently enacted federal regulations require such abatement programs to rid public properties of dangerous levels of lead.

Medical research indicates that lead exposure can poison the liver, kidneys and other organs, and can severely impair a child's intellectual development, a condition that can be permanent. Once thought to be a danger only if swallowed, lead is now known to also enter the human body by being inhaled.

City officials have estimated that 35,000 children in Philadelphia may be at risk of brain or nerve damage from the lead they breathe or swallow.

#90311u1516 11/07/1990 ~United Press International

CAMP PENDLETON, CA (NOV. 7) UPI - Flames fanned by gale-force winds scorched up to 2,000 acres of grass and brush on the sprawling Camp Pendleton Marine Corps base, shut down train service and 20 miles of freeway, triggered a nuclear plant alert and forced up to 300 evacuations, authorities said Wednesday.

The fire broke out about 7:30 p.m. Tuesday at the northern end of the base in northern San Diego County and had consumed between 1,600 and 2, 000 acres by 8 a.m. Wednesday, Marine Cpl. Linda MacTavish said. The cause was not known Wednesday.

Pushing the flames were northeast winds up to 30 mph that occasionally gusted to 50 mph, MacTavish said.

Fire crews from Camp Pendleton, San Diego and Orange Counties and the state and federal Departments of Forestry were fighting the flames.

Heavy smoke forced closure of Interstate 5, the main artery between Los Angeles and San Diego, for about 20 miles from San Clemente to Oceanside and blocked the tracks for the northbound Amtrak train from San Diego to San Clemente and Oceanside, California Highway Patrol Officer Steve Parr said.

Officials would not predict when the freeway would reopen.

The fire was burning on both sides of Interstate 5 in an 8 square- mile area, and firefighters from San Diego and Orange counties were waiting until daylight to begin an aerial attack on the flames, MacTavish said.

Officials at the San Onofre Nuclear Generating Station north of Camp Pendleton declared ''an unusual event'' at 12:45 a.m. Wednesday when flames jumped the freeway and came within a quarter-mile of some support buildings at the plant, Southern California Edison spokesman David Barron said.

However, the fire soon veered southeast away from the plant without causing any damage.

About 300 residents of a base trailer park were evacuated Tuesday night, and were allowed to return after the fire passed by.

No structures were threatened in the fire, MacTavish said.

Another fire was sparked about 5:30 p.m. Tuesday by a downed electric power line at the south end of the camp. It was contained at 240 acres.

#90311u1526 11/07/1990 ~United Press International

MIAMI (NOV. 7) UPI - The head of the secretive black Yahweh religious cult

and several members were arrested early Wednesday and charged with murdering ''white devils'' in order to become members of the brotherhood.

Leader Yahweh Ben Yahweh, also known as Hulon Mitchell Jr., was arrested in New Orleans about 3:30 a.m. under a three-count federal indictment returned in Miami. It charged him and the others with 18 acts of racketeering, including 14 murders, two attempted murders, arson and extortion.

They allegedly plotted ''To murder at random individuals in the community as a rite of initiation into an ultra secret group within the Yahwehs called the 'Brotherhood,''' said U.S. Attorney Dexter Lehtinen.

''One could only be admitted into the Brotherhood after killing a 'white devil' and bringing a severed body part back to Mitchell as proof of a confirmed kill.''

The indictment, returned Tuesday and unsealed early Wednesday, named Yahweh and 16 others. Lehtinen said it was the culmination of four years work by a joint task force.

All of the charges center around the alleged attempts by Mitchell and the other defendants to murder Yahweh followers who dissented from Mitchell's leadership, who violated Mitchell's orders to retaliate against members of the community, or who interfered with the sect's efforts to solicit donations and property.

Mitchell, a former professional football player for the St. Louis Cardinals and Oakland Raiders, claims to be the second coming of Christ. He calls his followers disciples and requires them to turn over all worldy goods to his so-called Temple of Love.

Lawyer Ellis Rubin, who has represented the sect during several past brushes with the law, said the indictment stemmed mainly from information volunteered by Robert Rozier, a former Yahweh member known as Nehriah Israel who confessed to four murders in 1986.

''In exchange for bringing down the organization he was given a 22- year sentence and he has been cooperating with federal authorities ever since,'' Rubin said. ''It makes good reading, but it's not true.''

The FBI and other law enforcement investigators conducted predawn raids at Yahweh headquarters in northwest Miami and more than 12 other places in search of the defendants.

By noon, nine of them had been apprehended, including Linda Gaines, also known as Judith Israel, Mitchell's chief assistant who was arrested in Atlanta.

Other defendants were arrested in Durham, N.C., and Lafayette, La. Rubin said

he had advised them to waive extradition to face the charges in Miami.

The Yahwehs, who wear flowing white robes and take the surname Israel, are a group of black Hebrew Jews who own millions of dollars in real estate and businesses in Dade and Broward counties. Included are a fleet of white vehicles, a convention center, a school, grocery stores, motels and a recording studio.

The Temple of Love in Miami's Liberty City neighborhood is headquarters for the group, which claims to have thousands of members nationwide.

#90311u1542 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - President Bush and the Republican Party emerged bruised but hardly battered Wednesday from midterm elections that did little to define the political landscape the president may face as a candidate for re-election in 1992.

After weeks of bitter partisan attacks, public outrage over the budget mess and predictions of gloom and doom, the 1990 elections left the GOP only marginally weakened with no sign of any lasting implications for Bush.

Historically, the party in control of the White House has lost ground in off-year elections. At the cost of a single Senate seat and an estimated eight House seats, the White House claimed an above-average showing for the GOP.

And despite major losses in Texas and Florida, the party's success in picking up governorships through the Midwest and Northeast and holding on to ones in California and Illinois enabled the White House to proclaim the election results a wash, the political map relatively unchanged.

''All in all, it looks like a pretty standard off-year election that has something in it for everybody,'' White House press secretary Marlin Fitzwater told reporters.

Bush could take solace in the fact that the apocalyptic forecasts of some pundits and the worst fears of some party strategists failed to come true. The numbers produced no broad themes or clear trends to suggest what kind of challenge, if any, he may face in 1992.

Overlooked in the raucous days leading up to the election, marked by sometimes shrill attacks by Bush and widespread attention on his drop in the polls, was the fact that races for Congress and governor, traditionally have turned more on localized concerns and even personalities than overarching national issues.

For his part, Bush raised money and generated enthusiasm for Republican candidates, but held limited sway in the outcome of their races. Fitzwater

acknowledged the losses in the House and Senate will make it ''harder to work with the Congress,'' but only nominally more difficult for Bush to wield his veto pen with impunity, as he has 16 times to date.

Overall, he said, Bush will not shy from using his veto power as leverage to get what he wants, confident he will be dealing with ''essentially the same kind of opposition in Congress that he has faced in the first two years.''

Republican strategist Haley Barbour characterized Tuesday as ''a stand-pat election in the Congress'' that should have surprised no one and said nothing about the conditions that will confront Bush in 1992.

At the same time, he saw possible danger signs for Bush in the strong anti-tax sentiment and economic anxiety that seemed to have been directed helter-skelter against incumbents without regard to partisan label.

''There was confusion over who to blame, but there's no question people were looking for somebody to blame,'' Barbour said. ''If Bush hasn't resolved that by 1992, that could become a problem for him.''

Even Fitzwater was forced to take note of the anti-tax undercurrent of the election, if not its potential lesson for Bush. ''Generally speaking,'' he said, ''you don't win points by raising taxes.''

If the election proved a less conclusive test of Bush's strength or weaknesss than Democrats might have hoped, they nevertheless expressed hope of keeping alive the tax fairness issue he handed them weeks ago in their bickering over a budget deal.

With no prominent Democrat yet rushing in as challenger, Democratic National Chairman Ron Brown's description of Bush as ''extraordinarily vulnerable'' seemed premature and not supported by the arithmetic of the election.

Whether that proves to be wishful thinking or a dream come true will depend not on how Tuesday alters the makeup of Congress or the control of statehouses around the country, but on how well Bush navigates the country through the threat of war and recession between now and 1992.

#90311u1550 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - Nationwide voter turnout in this week's midterm election may have hit a 50-year low, with no consistent pattern from state to state, analysts said Wednesday.

Going into the voting, independent projections based on registration figures indicated that the turnout may be worse than the 36.4 percent level reached in the last midterm election of 1986. That was, in turn, the poorest voter showing since the 1942 midterm election.

Curtis Gans, director of the Committee for the Study of the American Electorate, described Tuesday's turnout as a ''cliffhanger'' in the sense that with only a small segment of the vote still not counted as of Wednesday afternoon, the turnout was almost exactly at the 1986 level.

''If there are 3 million votes out there it will be lower than in 1986, if there are 4 million it will be about the same,'' said Gans.

Gans added that turnout for Democrats held fairly steady, while Republican turnout was down by only a slight margin.

However, Gans added that an analysis of the figures from across the country showed no pattern except that turnout appeared driven solely by the importance and closeness of the top race from state to state.

Of the 46 states that had statewide races on tap, Gans said turnout increased from the last midterm election in 23, while dropping in the other 23.

And in some of the places where the key races were viewed as critical, the turnout showed it, regardless of whether the contest was close.

For example, in the District of Columbia, Democrat Sharon Pratt Dixon was elected mayor with an astounding 86 percent of the vote. Turnout was a record 53 percent.

In that case, even though the outcome was not in doubt, the race was viewed as critical because it represented a changing of the guard from the troubled administration of Mayor Marion Barry, who was convicted of drug charges earlier this year and was not in the race.

Meanwhile, the North Carolina Senate race - a much closer affair won by conservative Republican incumbent Jesse Helms over liberal black Democrat Harvey Gantt - also generated large voter interest.

''In that race you probably had the highest midterm turnout since women were given the franchise (to vote),'' said Gans.

Historically, turnout in midterm elections is much lower than in years when the presidency is at stake and the race for the White House sparks more interest in politics.

-30- 2634

#90311u1556 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - Democrats won two of the three big Sunbelt state elections for governor Tuesday in Florida and Texas, but the biggest prize of them all, California, got away.

Former Sen. Lawton Chiles dumped Republican Gov. Bob Martinez in Florida and Democratic state Treasurer Ann Richards defeated Republican millionaire William Clayton in Texas to succeed GOP Gov. William Clements.

But Sen. Pete Wilson, a moderate-conservative Republican, downed former San Francisco Mayor Dianne Feinstein, allowing the GOP to hold on to the governor's mansion in the nation's largest state.

While changes were minimal in Senate and House elections, there were a number of upsets and numerous close races for governor in every area of the country.

Going into the election, Democrats held the governship in 20 states and the Republicans in 16. The others were not at stake.

Although the reasons varied from state to state, governors who raised taxes, such as Martinez, appeared to be the most vulnerable.

The election of governors was crucial for both the Democrats and Republicans

because the winners will have veto power over congressional redistricting in the coming year based on the 1990 census.

Although the actual drafting of the new districts will be the work of the state legislatures, governors have a major say and Republicans were banking heavily on holding on to Florida and Texas.

The failure to hold those two governships could make it even more difficult for Republicans to capture control of the House, which they last had in 1953.

Underscoring the importance of the gubernatorial races, President Bush campaigned hard on several trips for Martinez and Williams, as he did for Wilson in California.

Republicans won back some ground when former Cleveland Mayor George Voinovich beat Attorney General Anthony Celebrezze for Ohio's governship now held by Democrat Richard Celeste.

Former U.S. Attorney William Weld upset Democrat John Silber, outspoken president of Boston University, succeeding Democratic Gov. Michael Dukakis who did not seek re-election in Massachusetts, costing the Democrats one of their bastion states.

And in another large state, Illinois, Secretary of State Jim Edgar held the governorship for the Republicans, beating Attorney General Neil Hartigan. Gov. Jim Thompson, a Republican, did not seek a fifth term.

Some of the closest races took place in the Midwest states of Michigan, Minnesota, Nebraska, Oklahoma and Kansas.

In a razor-thin race in Michigan, John Engler, leader of the state Senate's Republicans, defeated incumbent Democrat James Blanchard who was seeking a third term. In Nebraska, Omaha attorney Ben Nelson barely defeated Republican Gov. Kay Orr.

With 96 percent of the vote counted in Minnesota, last-minute substitute Arne Carlson, the state auditor, defeated Democratic incumbent Gov. Rudy Perpich, 51 percent to 49 percent. With 96 percent of the vote counted, Carlson had 761,239 votes to Perpich's 740,435.

But Democrats swept through Kansas with State Treasurer John Finney beating incumbent Republican Gov. Mike Hayden, and through Oklahoma where Democrat David Walters, making his second run, beat Republican U.S. Attorney Bill Price to replace GOP Gov. Henry Bellmon.

They also picked off a Republican governship in Rhode Island where Democrat Bruce Sundlun, in his second try, dumped Republican Gov. Ed DiPrete, but lost Vermont when former Republican Gov. Dick Snelling beat Democrat Peter Welch.

Even New York Gov. Mario Cuomo, one of the Democrats' premier vote getters, came in for a shock, winning with only about 53 percent of the vote. In Connecticut, former Republican Sen. Lowell Weicker beat both the Republican and Democratic candidates.

In Maine, Republican incumbent John McKernan defeated Democratic challenger Joseph Brennan.

In other states, incumbents won re-election, some by narrow margins and others by lopsided counts.

ISLAMABAD, PAKISTAN (NOV. 7) UPI - New Prime Minister Nawaz Sharif said Wednesday courts would continue to investigate corruption charges against Benazir Bhutto and members of her ousted administration, but said the process would also be extended to include his own party.

He also announced an immediate lifting of a state of emergency imposed when President Ghulam Ishaq Khan dismissed the 20-month-old Bhutto government and dissolved the National Assembly last Aug. 6.

Sharif spoke in an address to the nation on television and radio one day after being sworn in as prime minister. His Islamic Democratic Alliance, a disparate army-backed coalition of anti-Bhutto parties, scored a convincing win over the ex-prime minister's Pakistan People's Party in the Oct. 24 elections.

Bhutto, 37, now leader of the opposition, and members of her former administration are facing corruption charges in Special Disqualification Courts set up by Ishaq Khan. If found guilty they could be barred from politics for seven years.

''The process of accountability will continue,'' Sharif said, referring to the

investigations into those suspected of misuse of power. But he said ''we will also present ourselves for accountability.''

Sharif, in his 40-minute speech in the Urdu language, also announced plans to reduce bureaucracy and speed up industrialization.

''I cannot bring back the years that have been lost, but I can put the country back on the rails that lead to progress and prosperity, development and industrialization.''

Sharif, 42, is a wealthy self-made industrialist, unlike most other senior Pakistani politicians, who come from feudal landowning families. He was formerly finance minister and subsequently chief minister of Punjab, Pakistan's most populous province.

On the question of Pakistan's alleged program to build nuclear weapons, he said ''we will continue our policy which is not a destructive policy.''

The United States on Oct. 1 suspended millions of dollars in aid to Pakistan because President Bush was unable to certify to Congress that Islamabad is not trying to manufacture nuclear weapons.

But Sharif said Pakistan will ''try to keep our friendship and maintain cooperation with the United States. On Afghanistan, we will continue to play our role.''

The United States backs Pakistan-based Afghan guerrillas fighting the pro-Soviet government in Kabul since 1979. However, Pakistan's strategic value to Washington has diminished following last year's Soviet pullout from Afghanistan.

Sharif also called on India to implement U.N. resolutions calling for a plebiscite in the disputed region of Kashmir. Relations between the the arch-rivals have nose-dived since a popular uprising began in January against New Delhi's rule in the Indian-controlled section of Kashmir.

#90311u1655 11/07/1990 ~United Press International
SANTA CLARA, Calif. (NOV. 7) UPI - Intel Corp. plans to announce next week the development of a powerful supercomputer that could be the fastest in the world, the San Francisco Chronicle reported Wednesday.

The experimental computer will be built by Intel's supercomputer operation in Beaverton, Ore., and will be installed at the California Institute of Technology in Pasadena, Calif., where it was expected to be made available to researchers around the globe, the San Francisco Chronicle reported.

The machine is based on an emerging technology known as ''parallel processing '' which uses hundreds of microprocessors working together to solve complex scientific problems.

The machine will have a theoretical top speed of 30 billion so-called floating-point operations a second, a standard measure of a computer's speed at complex number-crunching. That compares with 27 billlion operations a second claimed by NCube, an Oregon supercomputer company that has yet to sell a machine that powerful.

''It's arguably the highest-performance supercomputer anybody has ever shipped in the industry, '' Andy Grove, Intel's chief executive officer, told analysts Oct. 26.

The Defense Department has invested in parallel processing technology as a key component of future defense systems, for such tasks as breaking codes and simulating the effects of nuclear explosions. The Defense Advanced Research Projects Agency has spent at least $32 million to foster developments in the technology by private companies.

Intel's machine reportedly links together up to 512 of Intel's powerful i860 microprocessors. Intels' most powerful machine to date uses 128 of the speedy chips.

Intel was expected to announce the machine next Tuesday at a supercomputer conference in New York, the Chronicle reported.

#90311u1671 11/07/1990 ~United Press International
WASHINGTON (NOV. 7) UPI - Yields declined on 10-year T-notes Wednesday to an average of 8.52 percent on the second day of the government's quarterly refunding, the lowest since 7.94 percent Nov. 13, 1989, the Treasury Department announced.

The department said it auctioned about $11 billion of the 8 1/2 percent interest rate notes at an average of $99.867. At the last auction Aug. 8, the average yield was 8.77 percent.

The Treasury Department also revised down its borrowing needs for the current quarter to $87.5 billion from $97.75 billion to pay for the cost of government operations and borrowing, including the savings and loan crisis.

''The downward revision reflects a shift in the timing of Resolution Trust Corporation expenditures,'' the department said. The RTC is charged with disposing of the assets of failed thrifts.

The United States is offering a record $34.25 billion in notes and bonds during the three-day refunding to pay off securities reaching maturity and raise a total of about $10.725 billion in new cash.

Wednesday's bids totaled more than $29 billion.

At the start of the effort Tuesday, yields declined on 3-year T-notes to an average of 7.78 percent at the start of the government's quarterly refunding, the lowest since 7.77 percent Nov. 9, 1989.

The department said it auctioned $12.6 billion of the 7 3/4 percent interest rate notes at an average of $99.921. At the last auction of 3- year notes Aug. 7, the average yield was 8.10 percent.

The refunding ends Thursday. The government will offer $10.75 billion in 29 3/4-year bonds and $12 billion in a 161-day cash management bill on the final day of the marathon sale.

The minimum denomination on the 10-year note and 29 3/4-year bonds is $1,000. The minimum purchase for the cash management bills is $10,000. The minimum denomination on the 3-year notes sold Tuesday was $5,000.

At a news conference Oct. 31, the Treasury Department announced it anticipated a net market borrowing need of between $47 billion and $52 billion in the first quarter of next year. That estimate has not changed, officials said Wednesday.

#90311u1693 11/07/1990 ~United Press International

MIAMI (NOV. 7) UPI - Pan Am Corp. Chairman Thomas Plaskett said Wednesday he views the airline's controversial $400 million sale and marketing pact with United Airlines as an ''evolutionary'' agreement that may lead to further consolidation of the two carriers.

''It is my view that our relationship with United will be an evolutionary relationship, that we will do the things that we have said we were going to do in this agreement and look for additional opportunities, and if that develops into something more definitive, so be it,'' Plasket told reporters.

''But there are no expectations or representations that it will go beyond the agreement as it is specified today,'' he said.

Plaskett, who came to south Florida to tout Pan Am's Miami expansion, also disparaged an effort by Robert Crandall, chairman of American Airlines, to scuttle the deal, saying American had plenty of chances to propose a deal.

American has said it is prepared to bid more for assets included in the deal, notably the five Pan Am routes linking the United States with London. The pact with United also has been criticized by leaders of the Teamsters union, which represents Pan Am workers.

''We have had a for-sale sign or a bring-us-a-proposal sign on the company for two and a half years, so I don't have much sympathy for someone who got beat out by somebody else's proposal,'' Plaskett said.

Plaskett also said he does not believe American can block the deal.

''We have a binding agreement with United that our board feels brings real value to Pan Am,'' Plaskett said. ''Simply standing up and yelling about it doesn't change the basic value of the deal.''

The agreement with United benefits Pan Am in several ways, Plaskett said.

United plans to add service and coordinate flights from Chicago, San Francisco and possibly other points to Miami to connect with Pan Am service to the Caribbean and Latin America.

Plaskett also said the agreement to link the frequent flier programs of the two airlines will provide substantial benefits to Pan Am.

''There is a tremendous value in the marketing agreement between Pan Am and United, and irrespective of the cash we receive for the transaction - which we believe is a fair deal for everyone - the hidden value of the marketing agreement is significant,'' he said.

''The incremental revenues opportunities for Pan Am as a result of the frequent flier program linkage will be substantial,'' he said. ''That is a value that will go on for years.''

Plaskett said the company's expansion in Miami will be accelerated because of the United transaction, and he said that expansion has begun to pay dividends.

''We have been very pleased with our performance at Miami and our Miami hub startup. Our revenues are up over 20 percent. Our profits in the Miami hub are up over 32 percent. We have had a substantial increase in load factor - some 4 points - and our yields have been up,'' Plaskett said.

''We have clearly demonstrated that Pan Am can produce a product that is not only fully competitive but superior in all aspects to the competition.''

Plaskett also told reporters Pan Am has talked with five or six ''serious'' parties about the possible sale of its Pan Am Shuttle, but may decide not to sell the operation after all.

Although Pan Am's pilots union has yet to submit a bid, several other parties have done so, Plaskett said.

''There are enough offers that we have an interesting, competitive situation '' he said. ''These are very difficult times for such transactions both in terms of valuation and the availability of financing. ... So we haven't made a determination yet as to whether we will accept any of the proposals that we have received. ... We may decide that it is appropriate not to sell the shuttle at this time.''

-30- 4051

#90311u1707 11/07/1990 ~United Press International

BOSTON (NOV. 7) UPI - A combination of cholesterol-lowering drugs and a low-fat diet can open clogged arteries in some men with heart disease and allow them to avoid surgery, researchers said Wednesday.

The ''surprising'' results of a 32-month study found that men given intensive drug therapy had half as much disease progression and three times more reversal of blocked arteries than those given dummy drugs, said Dr. Greg Brown of the University of Washington in Seattle.

Brown said 74 men in two drug therapy groups had 73 percent fewer heart attacks or other symptoms such as angina than 46 men in a comparison group. During the study, all of the participants ate a diet that limited fats to 30 percent of total calories.

''I was quite surprised by the amount of disease regression we saw,'' said Brown, noting that researchers initially expected that the drugs would at best halt the progress of heart disease. ''I had seldom seen arteries get better, so I was unimpressed with that possibility when we started.''

However, in findings reported in The New England Journal of Medicine, Brown and colleagues said 35 percent of the men who were given some combination of the drugs lovastatin, colestipol and niacin had decreases in amounts of fatty substances known as plaque which clog arteries and make it more difficult for

blood to pass through. In addition, the men experienced significant drops in their total cholesterol levels, the study found.

About 1.5 million Americans suffer heart attacks each year, which are triggered when the blood supply to the heart is cut off. About 500,000 heart attack victims die each year.

Brown said the findings from the Familial Atherosclerosis Treatment Study, or FATS, may mean that in some cases, drugs can be used to treat people with blocked arteries instead of coronary bypass operations or balloon angioplasty.

An estimated 330,000 bypass operations and about 190,000 angioplasty procedures are performed annually in the United States. Angioplasty involves opening narrowed arteries with a tiny balloon.

''I can foresee the day when one pill a day can take people from dangerous cholesterol levels to safe levels'' and in the process, halt or reverse heart disease, said Brown, who reported the study's initial finding last year at an American Heart Association meeting.

The role that cholesterol plays in heart disease has been the subject of long debate. But in an editorial accompanying the journal study, Dr. Joseph Loscalzo of Brigham and Women's Hospital in Boston said the report and another recent study offer ''important information'' showing that lowering cholesterol can affect the course of heart disease and cut the heart attack rate.

In their study, Brown and co-researchers gave 38 men daily doses of lovastatin combined with colestipol and another 36 a daily regimen of niacin and colestipol. The other 46 received dummy drugs for comparison purposes.

The men, who were 47 years old on the average, had histories of heart disease and also had high cholesterol levels when the study began.

Brown said lovastatin, made by Merck and Co. of Rahway, N.J., works by inhibiting the action of the principle enzyme involved in manufacture of cholesterol in the liver. Colestipol, made by the Upjohn Co. of Kalamazoo, Mich., interferes with the ability of the intestinal tract to absorb cholesterol, he said. The role that niacin plays in cholesterol reduction is not fully understood, he said. Niacin is commonly sold in health food stores.

During the study, 46 percent of those given the dummy drugs experienced increased clogging of arteries and only 11 percent had partial clearing. By contrast, clogging became worse in only 21 percent given lovastatin and colestipol and blockages decreased in 32 percent.

Of the men who received niacin and colestipol, artery clogging became worse in 25 percent and better in 39 percent.

-30- 4168
#90311u1733 11/07/1990 ~United Press International
WASHINGTON (NOV. 7) UPI - The White House had words of warning Wednesday for foreign officials flocking to Baghdad to seek the release of hostages held by Iraq: good intentions may only play into the propaganda hands of Saddam Hussein.

''The officials and others going there walk a very fine line,'' said White House press secretary Marlin Fitzwater, ''between trying to help their countrymen and and being used by the Saddam Hussein for the inhuman treatment of the hostage families and the hostages themselves.''

On a day that saw Saddam promise freedom for 120 more hostages after meeting with former West German Chancellor Willy Brandt, Fitzwater accused the Iraqi leader of ''using the hostages to piecemeal out propaganda for his regime.''

Brandt was only the latest in a succession of foreign politicians, including former prime ministers of Britain and Japan, to visit Baghdad to appeal for the release of their foreign nationals in Iraq and Kuwait.

Fitzwater criticized Saddam's well-publicized meetings with them as ''obvious, very cynical attempts to propagandize'' his control over the hostages.

In being courted by foreign politicians and offering telephone calls and holiday season visits to relatives of the hostages, Fitzwater assered Saddam was ''cruelly toying with the emotions of families who obviously want to see their relatives.

''If he wants them to get together, he ought to let those hostages come home '' he added.

Fitzwater discouraged relatives of the hostages and even members of Congress from accepting any invitations to visit Iraq, emphasizing to reporters that ''these people are being used and we want to point that out in the strongest terms.''

(NOV. 7) UPI - Election coverage '90 is winding down with just a few more ballots to count. And while the ''throw the rascals out'' movement gained support on the state level it changed little in Washington. Democrats control the House roughly 25845. And they won at least four governorships.

Minnesota's Democratic Governor, Rudy Perpich, appears ready to concede defeat to Republican Arne Carlson. A Perpich aide told United Press International it's ''a fairly safe bet at this point'' that Perpich will acknowledge defeat

at a news conference. Carlson leads Perpich by about 20-thousand votes with 95 percent of the Minnesota votes counted.

Secretary of State Baker, continuing an overseas swing, has again said there will be NO partial solution to the Persian Gulf crisis... that it must either be decided one way or the other. And he again declined to rule out the use of military force if diplomacy doesN'T do the job. Baker spoke to reporters at Ankara airport on his way to Moscow.

Administration officials say President Bush plans to announce the resignation tomorrow of William Bennett as the nation's first drug czar. The sources report Bennett is satisfied that he has put the nation's drug strategy in place and simply wants to move on. He will become the second high level administration official to quit recently. Elizabeth Dole resigned as labor secretary last month.

The United States says it will withdraw all of its fighter aircraft from the Philippines next year when its basing rights in the country expire. Special U-S negotiator Richard Armitage made the announcement today during a private meeting with the Philippine foreign secretary. The announcement comes on the eve of the second round of talks on the future of six U-S facilities in the country.

The Philipine military has been ordered by the government to negotiate release of an American missionary held by Communist guerrilas. Ex-Marine Arvy Drown, who holds a passport issued in Seattle, was taken prisoner on October 19th. The abduction took place some 260 miles north of Manila.

New York City police believe the firebombing of a Brooklyn grocery store is tied to the often-violent 12-day-old strike against the tabloid Daily News. The store was fire-bombed last week and the owner was warned NOT to sell the Daily News. The store was nearly destroyed in this second fire.

A psychiatrist has testified in a Wisconsin rape trial that her client now has 28 more distinct personalities added to the 28 she already had before she was attacked June 11th. The testimony in Oskosh, Wisconsin, comes in the trial of 29-year-old Mark Peterson, charged with second-degree sexual assault.

#90311u1775 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - Democrats strengthened their control of Congress in the midterm elections but the gains in the Senate and House were too small to shackle President Bush's masterly use of the veto.

The ''firestorm'' that many Republican leaders feared would engulf GOP candidates after Bush's tax debacle split their ranks barely singed them and left the makeup of the Senate and House numerically almost the same.

In the 102nd Congress, which convenes Jan. 3, Democrats will control the Senate 56-44 and the House 268-167.

Socialist Bernard Sanders of Vermont, only the third member of his party to serve in Congress and the first in 62 years, is expected to be welcomed by the Democratic Party as a member.

In the Congress that just adjourned, the Democrats held a 55-45 edge in the Senate and 258-175 (two vacancies) in the House, giving them a one-seat gain in the Senate and a net gain of eight in the House.

The turnover is far from the numbers reached by the party not controlling the White House in many previous midterm elections and very close to what most political analysts concluded in the last days of the campaign.

Predictably, Democratic leaders were elated by the results of the elections.

Sen. John Breaux, D-La., chairman of the Senate Democratic Campaign Committee, said, ''Two years ago, I said our goal for this cycle was to hold our 55 seats.

''We had gained Senate seats for three consecutive election cycles,'' he said Wednesday. ''And the last time the Democratic Party gained seats for four consecutive cycles was during the New Deal realignment.

''Our incumbents were heavily targeted and conventional wisdom said that we would lose seats because of the strength of their congressional challengers,'' Breaux said. ''So much for conventional wisdom.''

Sen. Rudy Boschwitz, R-Minn., a two-term senator and former chairman of the Senate GOP Campaign Committee, was the only Senate incumbent to lose. Some others - Sens. Jesse Helms, R-N.C., Mark Hatfield, R-Ore., Tom Harkin, D-Iowa, and Daniel Akaka, D-Hawaii - were considered vulnerable but won comfortably.

A number of House incumbents, none of them senior members or chairmen of committees, were felled. Two of them, Reps. Charles Payshayn, R- Calif., and Denny Smith, R-Ore., were the first victims of the fallout from the S&L scandal.

''Republicans are now at a 50-year low of House seats held entering a reapportionment year,'' Rep. Beryl Athony, D-Ark., chairman of the Democratic Congressional Campaign Committee, said. ''I would say that Republican dream of taking control of the House in 1992 has turned into a nightmare. Democrats look almost certain to hold the House until the next century.''

The Democratic gains in Congress, as minute as they were, gave them needed protection against a GOP takeover in the 1992 elections, especially in the House.

Before the optimism was extinguished, Republicans had hoped to pick up two or more Senate seats, positioning themselves to take control in 1992.

In the next election, Democrats will have to defend 20 seats to 14 for the Republicans and any gains this year would have put the GOP well within striking distance of a majority.

But the one-seat gain in the Senate still makes Congress vulnerable to Bush's vetoes and guarantees another two years of warfare between the White House and Capitol Hill. In his first two years, Bush vetoed 16 bills and Congress failed to override any of them.

White House press secretary Marlin Fitzwater said the veto ''will continue to be a legislative strategy tool,'' but said the election outcome ''also means that you've got to work harder to work with the Congress.''

The re-election of two hard-line conservative ideologues, Sen. Jesse Helms, R-N.C. and House GOP whip Newt Ginrich of Georgia assures two more years of obstruction and delay in the Senate and a split in Republican ranks in the House.

#90311u1787 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - The last votes from this year's midterm election were still being counted Wednesday as the focus of both political parties turned firmly to the 1992 race for the White House.

And, not surprisingly, both Democrats and Republicans used the results of Tuesday's voting to argue why their claims on the presidency were strengthened.

There was legitimacy to both sides.

National Democrats were quick to argue that their gains in some Sun Belt gubernatorial races, coupled with network exit polling data, proved that they could use pro-middle class pocketbook themes to make a strong 1992 push for the White House and win their second presidential race in seven tries.

''The agenda is really our agenda now,'' Democratic National Chairman Ron Brown argued. ''I think people have awakened to the 1980s. We're on the brink of a recession. Reaganomics is dead. George Bush is in a slide. I think George Bush is clearly vulnerable in 1992. I think we can see a strong base for 1992.''

''The voters reacted to the inability of the president and his party to handle the budget crisis and looked to the Democratic Party for leadership,'' noted Rep. Beryl Anthony, D-Ark., the head of the Democratic Congressional Campaign

Committee. ''President Bush should beware. He is next in 1992.''

''Out of the budget battle has emerged a much clearer focus on the differences in the parties ... and the differences are cutting to our favor,'' added Senate Democratic leader George Mitchell, playing on the same theme.

But Republicans contended that if the new budget agreement helped the economy in the next year, that would not hurt President Bush in 1992 because the public would be satisfied.

Instead, they argued that their ability to pick up gubernatorial seats in the industrial states of Michigan and Ohio would help the GOP in those states establish a base for Bush in 1992.

At the same time, they downplayed Democratic gubernatorial gains in Texas and Florida. ''George Bush can win those states on his own,'' said Charles Black, the top spokesman for the national GOP. ''Looking down the list, I don't think there is a Democrat who can beat Bush in Florida or Texas in '92.''

Black said while the Democrats may push economic issues, the GOP would go on the attack on crime and drugs - a plan that could set the stage for a resurrection of attacks on liberals.

Some Republicans also pointed to possibly serious wounds suffered Tuesday by two potential Democratic candidates: New York Gov. Mario Cuomo and Sen. Bill Bradley, D-N.J.

In New York, Cuomo easily outdistanced his four opponents. However, after governing the Empire State for eight years, he pulled only 53 percent of the vote, while three far more conservative candidates split 46 percent.

In the Garden State, Bradley, considered a sure bet for a third term, had far more money than his opponent, little-known Republican Christine Todd Whitman, but still squeezed out only a 51-49 win.

''The other factor in '92 will be who the Democrats run against George Bush,'' noted Black. ''Senator Bradley might be off the charts now after taking such a big scare trying to carry his own state while outspending his opponent 10-to-1. I see no evidence that Governor Cuomo can get any anti-incumbent trend going against George Bush. The president's in very strong political shape.''

''They ought to be glad Bradley and Cuomo weren't running against Bush yesterday,'' said Black. ''They might not have won their own states.''

For his part, Bush was low key Wednesday and his aides tried to put the best spin on the results, contending Republicans did better than usual for midterm elections.

''All in all, it looks like a pretty standard off-year election that has something in it for everybody,'' noted White House press secretary Marlin Fitzwater.

#90311u1794 11/07/1990 ~United Press International
UNIVERSAL CITY, Calif. (NOV. 7) UPI - A Universal Studios security guard was arrested Wednesday in a spectacular multimillion-dollar fire that ravaged the studio's back lot, destroying several sets and scorching attractions on the popular studio tour, authorities said.

Michael J. Huston, 40, was arrested at Universal Studios shortly after dawn, Los Angeles County Sheriff's Arson Sgt. Dale Underwood said. Huston was booked on suspicion of arson and held on $1 million bail.

Deputies released little information about the suspect or a possible motive, except to say he was on duty shortly after 7 p.m. Tuesday, when the blaze erupted on a sound stage on the back lot at one of the world's most popular tourist attractions.

The blaze, fanned by gusty Santa Ana winds, burned for nearly three hours in what one official called a ''fire storm'' that lit up sets seen in dozens of films and television shows, including ''Dick Tracy'' and ''Back To The Future.''

About 200 studio employees still on the lot, some tour groups, nearby restaurants and theaters were evacuated, but no injuries were reported. At the Universal City Hilton about a half-mile away, officials temporarily blocked access to the Republican Party's election-night celebration.

No exact damage estimate from the fire, which raged across five acres, was immediately released. But official estimated it to be in the millions of dollars.

Portions of the back lot destroyed included Courthouse Square, where ''Back to the Future'' was filmed; the Dick Tracy Building; the New York Street and New York Alley; Brownstone Square and the set where portions of ''Ben Hur'' were filmed.

The fire also heavily damaged the King Kong exhibit on the Universal Studios tour and the tour's Earthquake exhibit. The vaults containing the studio's priceless film archives were saved.

The blaze could be seen for miles, and firefighters said chemicals and explosives used in filming and on the tram tour fed the fire.

The Universal Studios Tour was open for business Wednesday, with the King Kong and American Tail attractions closed, and reported a heavier- than-usual turnout, spokeswoman Christine Hansen said.

MCA Inc., the parent company of Universal Studios, said that the fire destroyed about 20 percent of the backlot facades. It said the damaged sets would be restored ''promptly,'' but did not elaborate.

It also said, ''MCA believes that the loss is fully covered by fire and business-interruption insurance.''

The fire will probably not have any impact on Matsushita Electric Industrial Co.'s pending buyout of MCA. Such a deal could be worth as much as $8 billion.

MCA has been negotiating a possible deal with the Japanese firm since late September, but both companies have imposed a news blackout on the discussions. Hansen refused to comment Wednesday on whether the fire will have any effect on the deal.

However, entertainment analysts said that the deal probably will still go through.

''The fire is a tragedy that has come at an inopportune moment, but it's our opinion that this is not a deal-breaker,'' said Jeff Logsdon of Seidler Amdec Securities of Los Angeles.

Logsdon noted that the studio's ''core'' assets - its film vaults, the distribution arm and sound stages - were undamaged.

''What was damaged is clearly rebuildable,'' Logsdon said. ''However, the damage from the fire will clearly delay some film and television production, and that is a negative development.''

Dennis McAlpine of Oppenheimer & Co. in New York said that the fire will have only a mild impact, since many of the sets were not in active use anyhow.

#90311u1795 11/07/1990 ~United Press International
NEW DELHI, INDIA (NOV. 7) UPI - Prime Minister V.P. Singh resigned his National Front coalition government Wednesday after he lost a vote of confidence during a day-long special session of the lower house of Parliament.

Singh submitted his resignation to President R. Venkataraman, thus bringing to an end his 11-month-old government.

''Consequent to the voting ... on the motion of confidence, I and my colleagues in the Council of Ministers hereby tender our resignations so that the process of formation of a new goverment could begin,'' Singh said in the resignation letter.

''I wish to express to you my gratitude and of my council for the consideration and courtesy you have always extended to us.''

Venkataraman was expected to begin the process of forming a new government on Thursday.

The collapse of the government came at the conclusion of a day of lengthy debate and political rhetoric over the leadership of the world's largest democracy.

When it came time for a vote of confidence, 346 members of the 488 legislators voted against the prime minister and his administration.

The Singh government was the first Indian government to be defeated by a Parliament vote.

''We will continue to fight for the principles for which we have sacrificed the government,'' Singh said after his defeat.

Although the future of India's leadership was still in doubt, it appeared that Chandra Shekhar, a dissident leader of Singh's Janata Dal party, might be allowed to form a government with the backing of former prime minister Rajiv Gandhi.

Shekhar and Gandhi met Tuesday and agreed to ''work together.'' Later, a Congress (I) spokesman said the party had decided to support the dissident leader in his efforts to form a government.

After Singh's defeat, Gandhi was asked what steps would be made to set up a new government.

''Please wait until tomorrow,'' Gandhi said, declining to elaborate.

Former deputy prime minister Devi Lal said he was ''delighted'' with Singh's defeat.

Shekhar emerged as the leading contender for the prime ministership on Monday when he and Lal split Singh's Janata Dal into two more or less equal factions.

Singh's political fortunes went into a nosedive Oct. 23 when the Hindu fundamentalist Bharatiya Janata Party (BJP) withdrew its crucial support from his coalition government.

The blow came just hours after authorities arrested BJP president L.K. Advani when he failed to heed a government warning to halt a drive, or ''rath yatra '' to relocate a Moslem mosque and begin construction of a Hindu temple to honor an important Hindu god.

The government feared the campaign would spark violence between Hindus and Moslems. The BJP pressed ahead with its plan, storming the complex surrounding the mosque in the northern Uttar Pradesh town of Ayodhya. Clashes between radical Hindus and police in Ayodhya and between members of both religions in six states left more than 200 people dead.

During a speech in Parliament Wednesday, Singh said he did not regret his decision to stop Advani and the temple construction plan.

"We had taken our decision with our eyes open when we stopped the rath yatra," Singh said. ''We staked the government for upholding principles. It is not a question of (the temple movement) alone but of other related issues. The government would have survived if we made a compromise on the (temple) issue."

Singh's coalition government ruled with the unlikely support of the Communist Party of India (Marxist), its left-wing allies and the right-wing BJP.

Support of the BJP was necessary for the survival of the coalition government, although the party was not a member of the coalition.

Hindu radicals claim that the mosque that occupies the Ayodhya site was built by the Moghul emperor Babbar after he destroyed a temple marking the birthplace of Lord Rama, one of the most important gods in the vast Hindu pantheon.

Moslem leaders refute the claim and contend that no temple ever existed at the disputed place.

The Ayodhya dispute has been smoldering since February 1986, when a court agreed to allow Hindus to worship in the mosque. The move led to widespread communal riots in northern India.

#90311u1819 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - ''My head is bloody,'' Mayor Marion Barry acknowledged, pausing confidently for the inevitable roar of the crowd. When the cheering subsided, he added, ''but unbowed.''

It was vintage Barry, a performance befitting the high drama of Tuesday night's tragic end of a once brilliant political career.

Trounced at the polls for the first time, the beleaguered mayor of the nation's capital for the past 12 years admitted to his devotees that he had failed in his desperate bid for an at-large seat on the City Council.

There was no joy at this election party in the ballroom of a downtown hotel. There was some ironically upbeat band music but nobody danced.

Barry's head was indeed unbowed as he faced the faithful, deposed in disgrace and facing six months of hard time on a cocaine conviction.

Drug-busted in an FBI sting at a downtown hotel last Jan. 18, the outgoing mayor finally had lost his fight for political survival.

It was an ignominious end to a remarkable career that sprang from a dirt-poor Mississippi childhood.

The son of sharecroppers, Barry became a hero of the civil rights movement before his mayoral tenure in which he presided over a spectacular downtown building boom and expanded services to the poor.

In recent years, the mayor was dogged by rumors of drug use, which he steadfastly denied. His dalliances with women other than his wife outraged his opponents but were met with amused tolerance by many of his supporters.

When his trial ended in August with a conviction for cocaine possession, Barry thought he still could parlay his political skills into a council seat.

That was not to be, so the rejected mayor once more faced the blinding television lights, a loser still flashing a winner's smile.

''Amazing grace, how sweet the sound,'' he said, employing again the words of the hymn he quoted when he faced the voters after his conviction. ''People use those words in a time of triumph, but they're also important in times of trial.''

Alluding to his continuing sobriety, the admitted alcoholic and drug abuser said, ''This is a victory for people who believe in themselves.''

In acknowledging his unbowed head had been bloodied, Barry quoted liberally from the poem ''Invictus'' by William Ernest Henley.

''Out of the night that covers me, black as the pit from pole to pole,'' the mayor intoned, ''I thank whatever gods may be for my unconquerable soul.''

Barry's performance temporarily enlivened a crowd continually apprised by television with the depressing news that their candidate was running a distant and hopeless third.

A longtime Democrat, Barry abandoned his campaign for a fourth term as mayor and switched to independent to make the council race. Many Democratic leaders worked actively against him.

When it all was over, the consummate politician who had fought so hard to retain some of his power abandoned his attempts at drama and eloquence.

Facing six months in prison if his appeal fails, the mayor whose shenanigans had generated headlines throughout the world summed up his feelings with unaccustomed brevity, sighing, ''What a relief.''

(NOV. 7) UPI - The Bush administration is about to lose its second high-ranking official in two months. Administration officials report the formal announcement will say that William Bennett is leaving as the nation's first anti-drug chief. The 41-year-old Bennett has lead the Office of National Drug Policy Control since March of 1989. He joins Labor Secretary Elizabeth Dole who announced last month that she would step down November 23rd.

Aides to Minnesota Governor Rudy Perpich tell United Press Intrenational that it appears he is ready to concede defeat in yesterday's elections to challenger Arne Carlson. The latest check of 95 percent of the votes shows Carlson leading by 20-thousand. And Nebraska Secretary of State Allen Beermann says absentee ballots may determine the governor's race there. Democrat Ben Nelson leads Governor Kay Orr by roughly five-thosuand votes with all but two precincts reporting. The nine-tothousand absentee ballots will be counted starting tomorrow.

That should about wrap election news as Democrats claim at least four governorships, including the hotly contested Texas race where Ann Richards beat Republican Clayton Williams. The flip side of the coin finds Republican Senator Pete Wilson winning against former San Franciso Mayor Dianne Feinstein in the California governorship race.

Secretary of State Baker headed to Moscow today on the next leg of a tour of Mideast and European allies. Speaking to reporters in Turkey before departing, Baker said he could NOT rule out the use of the military forces now drawn up against Iraq in the Persian Gulf area. Turkey supports the U-N stand against Iraq and public opinion has undergone a major change in the past weeks. Newspapers now report the average Turkish citizen is uneasy about having Saddam Hussein as a neighbor to the country's southeast, believing he would NOT hestitate to use chemical weapons if it pleased him.

The Food and Drug Administration has banned 223 ingredients in everything from treatments for acne to dandruff in a broad clean-up of over-the-counter drugs it says are ineffective. The F-D-A says it took the action because the companies could give it NO proof that the ingredients in the medications did what they were said to do. The agency said that some of the ingredients had been found to be of use in treating other conditions.

#90311u1891 11/07/1990 ~United Press International

NEW YORK (NOV. 7) UPI - Great news from Rikers Island this harvest season - a bumper crop of fruit and vegetables in the city's prison complex.

The Department of Corrections reported Wednesday the jail's farm program had produced a record crop of 132,000 pounds of tomatoes, eggplant, cucumbers, zucchini, green peppers, lettuce and string beans. The harvest was almost double 1989's crop.

The eight-acre farm on the western edge of the 440-acre island is tilled by nearly 100 prisoners who are paid up to 50 cents an hour.

''The farm program teaches the values of hard work, discipline and cooperation said Harry Bragg, the Correction Department's farm director.

''Many of the inmates have never been involved in an extended team project before, and when they see a tiny seed grow into a large, juicy- red tomatoes, they have a real sense of accomplishment.

''After a few weeks on the farm, they begin talking about 'my' tomatoes and 'my' eggplants. You can see the grin on their faces.''

The fruit and vegetables are distributed to dozens of feeding programs throughout the city, authorities said.

''Fresh produce is always in great demand among the people we service, and the Rikers Island vegetables are top quality,'' said Bret Suval, Executive Director of City Harvest. ''They were a hit wherever we brought them.''

#90311u1894 11/07/1990 ~United Press International
WASHINGTON (NOV. 7) UPI - Vermont voters have made Bernard Sanders the first socialist member of the House in more than 60 years, but the 49-year-old freshman said Wednesday he expects to camp with the Democrats on Capitol Hill.

Sanders, a self-described socialist and former Burlington, Vt., mayor, defeated one-term Republican Rep. Peter Smith to win Vermont's only House seat Tuesday.

The vote will make Sanders only the third socialist to hold a seat in the House, according to associate House historian Bruce Ragsdale, who said Victor Berger of Wisconsin, serving from 1911-13 and 1923-29, was the last socialist elected to Congress.

A Berger contemporary, Meyer London of New York, was also elected as a socialist, serving from 1915-19 and from 1921-23. Some reports also include New York's Vito Marcantonio, who served in the 1940s and '50s, as a socialist, but Ragsdale said the one-time Republican doesn't count.

''Marcantonio was a member of the American Labor Party,'' Ragsdale said. ''Most people would consider him a small 's' socialist.''

Sanders, who ran a campaign that blamed both Democrats and Republicans for botching the federal government and ignoring the needs of all but the wealthy, said Wednesday he'll carry the socialist standard in Washington, ''by raising the issues that the vast majority of members of Congress ... choose not to touch,'' such as national health insurance.

But Congress's only socialist said he expects ''to function within the Democratic caucus'' in the House. ''I have pledged to vote with and to do what other Democrats do,'' Sanders said.

House Speaker Thomas Foley of Washington and other Democratic leaders had earlier indicated Sanders would be welcome in the Democratic fold. Sanders said he has already spoken with ''many of the Democrats'' and Caucus Chairman Steny Hoyer of Maryland about joining the caucus.

Despite his campaign rhetoric against the party, Sanders said he would feel comfortable within its ranks, aligning himself with the more liberal Democrats he admires, including Rep. Ronald Dellums, D-Calif., Rep. John Conyers, D-Mich., Rep. Peter DeFazio, D-Ore., and Rep. Barney Frank, D-Mass.

#90311u1925 11/07/1990 ~United Press International
CAPE CANAVERAL, FL (NOV. 7) UPI - The shuttle Atlantis was cleared Wednesday

for a blazing nighttime takeoff Nov. 15, six days later than originally planned because of problems with the ship's spy satellite payload, officials said.

While the exact launch time is classified, sources who requested anonymity said Atlantis and its five-man, all-military crew are scheduled to blast off at 6:46 p.m. EST next Thursday and that the flight will last three days, 23 hours and five minutes.

NASA also is readying the shuttle Columbia for launch on a long- delayed astronomy mission. NASA usually requires three weeks between shuttle missions so data from one flight can be studied before the next.

But shuttle program director Robert Crippen said he hopes to reduce that time, setting the stage for an early December takeoff.

On another front, William Lenoir, associate administrator for space flight, said an investigation into a series of nine embarrassing mishaps at the Kennedy Space Center in the past 13 months did not find any ''common threads'' and that in general, the agency was maintaining high standards.

In the most recent incident, a 70-pound, 9-foot-long beam inadvertently left in Atlantis's engine room fell as the ship was hoisted into the vertical launch position.

A panel headed by former astronaut John Young made several recommendations to improve quality at the Florida shuttleport, including improved communications.

''They determined they could not find a pattern to the occurrences, they could not find a common thread that said the training was bad, or the workers were sleepy, or they were overworked, there was no common thread that they could find,'' Lenoir said.

As for Atlantis, whatever was wrong with the ship's classified satellite apparently has been fixed and engineers plan to begin the shuttle's carefully scripted countdown Monday afternoon, leading to a launch attempt three days later.

On board will be Air Force Col. Richard Covey, 44, the commander; Navy Cmdr. Frank Culbertson, 41, the co-pilot; Army Maj. Charles Gemar, 35; Air Force Lt. Col. Carl Meade, 39; and Marine Corps Col. Robert Springer, 48.

NASA had hoped to launch Atlantis Nov. 9, but Air Force mission managers ordered a delay because of problems with the shuttle's satellite cargo.

As usual with such military missions, the exact launch time will not be revealed until nine minutes before blastoff. As it is, NASA will only say liftoff is scheduled between 6:30 p.m. EST and 10:30 p.m. on Nov. 15.

The goal of the flight is classified as well, but Atlantis's crew reportedly plans to deploy a large reconnaissance satellite in low-Earth orbit that could be used to help spy on the Persian Gulf region.

The payload is not equipped with an ''inertial upper stage'' rocket booster, sources told UPI, making it highly unlikely the satellite is an early warning or electronic eavesdropping spy station, which typically operate in orbits 22,300 miles above the equator.

Atlantis originally was scheduled for launch in mid July, but the flight was put on hold when a hydrogen leak was detected during a fueling test June 29. At least two such leaks were blamed for grounding the shuttle Columbia in May and September, but both spaceships have since been repaired.

The space agency hopes to launch Columbia around Dec. 3 - six months behind schedule - to finally kick off a 10-day astronomy mission to study especially violent stars and galaxies.

On board will be commander Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 44, Robert Parker, 53, Jeffrey Hoffman, 46, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 47.

Columbia and its payload of four ''Astro 1'' telescopes originally were scheduled for launch May 30, but the flight was grounded when sensors detected explosive hydrogen gas leaking into the ship's engine room.

Engineers found and fixed a leak in a 17-inch-wide hydrogen fuel line connector and, after Atlantis was grounded in July, Columbia was rescheduled for launch. But another leak was detected during two subsequent launch tries and the flight was put on hold indefinitely.

Finally, after replacing two damaged seals and tightening up every fitting and connector that could have contributed to the problem, Columbia passed a fueling test last month without any signs of leakage.

NASA wants to launch Columbia as soon as possible so ground crews will be able to ferry the spaceplane back to the Kennedy Space Center from its California landing site before the Christmas holidays.

#90311u1936 11/07/1990 ~United Press International

OSHKOSH, WI (NOV. 7) UPI - A woman whose psychiatrist says has 46 personalities testified Wednesday that an Oshkosh man raped her by taking advantage of one of those personalities' unfamiliarity with sex.

The 27-year-old Oshkosh woman told a Winnebago County Circuit Court jury the personality named ''Jennifer'' did not know what was happening to her when she and the man had sex in a car in an Oshkosh park June 11.

Testifying as the personality of Jennifer, described as a fun-loving 20-year-old who likes music and dancing, the woman said, ''I didn't know what he was doing.''

Mark A. Peterson, 29, of Oshkosh, is charged with second-degree sexual assault.

During four hours on the witness stand Wednesday, the third day of the trial, the woman, testifying as ''Jennifer'', said she did not know what sex was.

When asked if ''Jennifer'' and Peterson had sex, ''Jennifer'' responded, ''I don't know. What's sex?''

District Attorney Joseph Paulus asked if she enjoyed the sex act and the woman responded, ''Tell me what sex is and I'll tell you if I enjoyed it.'' After the district attorney explained the sex act, the woman responded, ''I don't know what that means.''

During the testimony, the woman also became ''Franny'', a 32-year-old woman, who testified she had told Peterson before the alleged assault, ''We share the same body.''

Testifying as her primary personality, the woman said she had been in Oshkosh since 1986 and had been taking some medication for her personality problems and had been hospitalized.

She also said she had taken some criminal justice classes and learned some basic procedures about the judicial system and investigation techniques.

Still testifying as the primary personality, she said after the assault she told Peterson, ''I know who you are. I know what you did. Are you aware that while you were raping Jennifer, you were also molesting a 6-year-old child?''

The woman has said while Jennifer was assaulted, ''Emily,'' the personality of a 6-year-old, watched.

On Tuesday the woman's psychiatrist, Lori Warchol of Clinical Services in Oshkosh, testified the woman had 18 distinct personalities at the time of the alleged assault June 11.

Since then, Warchol testified, the woman has shown at least 28 more personalities.

''I've worked with the woman for 2 1/2 years and I know she is not faking,'' Warchol said.

''Some of the personalities are new and some aren't new but were only recently discovered,'' she said.

Peterson has contended that the woman consented to having sex but the prosecution argues he knew of the woman's disorder and seduced a vulnerable personality - ''Jennifer.''

Ruth Reeves, a neighbor and close friend of the woman, testified Tuesday she had told Peterson about the woman's multiple personalities.

''I explained to him that some of her personalities were vulnerable and that she was mentally handicapped. I mentioned mental illness,'' she said.

Paulus then asked her what Peterson said when told of the woman's mental state.

''He said, 'I see,''' Reeves said.

Other personalities described in testimony include:

-''Sam,'' who at one time expressed himself only through noises and crouching

like an animal.

-''John,'' who is very angry.

-''Ginger,'' who likes alcohol and must be careful not to drink and drive.

-''Evan,'' who likes cigarettes.

-''Eleanor,'' a prim and proper woman who speaks eloquently.

-''Leona,'' who has the role of making internal imagery.

-''Frank,'' an avid reader.

-''Beth,'' a personality that emerged after the alleged assault.

-''Kim,'' a personality that also emerged after the incident but is more upbeat than Beth.

-''Brian,'' a bodybuilder who protects the whole group. This personality also emerged after the alleged assault.

Inam Haque, another psychiatrist who has treated the woman, earlier told the jury the woman is not capable of judging her actions. Haque says the woman was traumatized when she saw her father crushed while he was working under a car.

#90311u1960 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - A Georgia man convicted 18 years ago of possessing a pipe bomb was charged Wednesday in a 70-count indictment with making the mail bombs that killed a federal judge and a lawyer last year.

Attorney General Dick Thornburg announced that the charges against Walter Leroy Moody Jr. include murder, assault, transporting and mailing explosive devices and mailing threatening letters. If convicted on all counts, Moody faces seven life terms plus 110 years in prison and $3.7 million in fines.

''Tracking down the person responsible for these terrible murders, and other acts of violence and threatened violence, has been a top priority of the Department of Justice for the past 11 months,'' Thornburgh said at a Washington news conference to announce the indictment.

FBI Director William Sessions said several agencies cooperated in the case and it consumed more than 140,000 man-hours.

In an affidavit made public last week, federal agents said Moody was a chief suspect in the 1989 bombings because the devices resembled a bomb he made in 1972 that exploded, injuring his wife. Moody has been in federal prison on unrelated charges since July.

Moody, 56, of Rex, Ga., was described as someone bent on revenge against lawyers and the court system for his 1972 bomb conviction, although there has been widespread speculation that the bombings were racially motivated.

Judge Robert S. Vance, 58, of the 11th U.S. Circuit Court of Appeals died Dec. 16 after opening a powerful package bomb at his home in Mountain Brook, Ala. Robert Robinson, a 41-year-old alderman and lawyer who was active in the NAACP, died two days later when he opened a letter bomb at his Savannah, Ga., office.

Two other bombs mailed to the 11th U.S. Circuit Court of Appeals in Atlanta were disarmed, but the incidents struck fear in the heart of Dixie that a mad bomber was on the loose.

The search warrant affidavit, obtained by government investigators in February and made public last week, found striking similarities between the bomb Moody had in 1972 and devices that killed Vance and Robinson.

The affidavit concluded the bombs were the only ones among 10,000 examined by federal agents since 1975 that resemble each other. The common element was the use of ''square end plates with threaded rods extending from plate to plate within the pipe and secured with nuts,'' the warrant said.

The construction is ''unique to the explosive device'' Moody was convicted of having in 1972 and ''three of the four explosive devices received through the United States mail in 1989,'' wrote federal Bureau of Alcohol, Tobacco and Firearms agent Frank P. Lee.

Vance and Robinson were struck by a barrage of 8-penny nails packed in the bombs.

Wednesday's indictment also charges Moody with sending threatening letters to federal judges in Georgia, Alabama and Florida.

On suggestions that the bombings were racially motivated, Thornburgh said: ''That's not discussed in the indictment and I think it would be inappropriate at this time to comment on the matter.''

However, the indictment does charge that Moody with mailing a threatening letter to the Atlanta office of the NAACP, and for sending a letter to an Atlanta television station shortly after the bombings saying: ''Two more prominent members of the NAACP shall be assassinated, using more sophisticated means, as part of the same reprisal.''

In addition, the indictment charges that Moody mailed a tear gas bomb to the Atlanta NAACP office on Aug. 20.

Moody, 56, and his wife, Susan, 28, were arrested at their home in July and charged in a separate 13-count indictment with perjury, obstruction of justice, obstruction of a criminal investigation, witness tampering and trying to bribe witnesses in his efforts to overturn the 1972 pipe bomb conviction.

Federal agents said it was Moody's anger over his 1972 conviction that prompted the bombings last year. Atlanta lawyer Michael Ford, who represented Moody in his bomb-possession appeal before the 11th Circuit, worked for the same law firm as Robinson from 1977 to 1979, although in a different office.

Noting that Moody appealed his 1972 conviction all the way to the Supreme Court, the affidavit says his efforts ''reflect an individual obsessed with a legal dispute involving the courts, judges, the 11th Circuit and a claim of ineffectiveness of trial counsel.''

In the 1972 case, federal prosecutors said Moody planned to send the bomb and an extortion note demanding $65,000 to an Atlanta car dealer who had repossessed his car. The bomb exploded when Moody's first wife, Hazel, accidentally opened the package at their home in suburban Macon.

Moody, who calls himself a ''literary consultant,'' served three years in prison for his 1972 conviction, and filed repeated appeals in that case, including one that went to the 11th U.S. Circuit Court of Appeals in Atlanta.

A federal judge ordered Moody be held without bond, although his wife was freed on $250,000 bond. Since then, Moody's wife has filed for divorce, and asked for a separate trial, saying her defense will be antagonistic to Moody's.

PARIS (NOV. 7) UPI - South African black leader Nelson Mandela met with President Francois Mitterrand Wednesday and lambasted what he called the hypocrisy of Western nations who send armies to contain Iraq but remain silent about U.S. invasions and Israeli policy.

''The United Nations have enunciated very good principles,'' the African National Congress leader told reporters after meeting the Socialist leader at the Elysee Palace.

''But I do not accept the hypocrisy of the West. The fact that we are not in accord with Saddam Hussein does not justify the West sending armies into the gulf,'' he continued.

''When Reagan attacked Grenada, the West remained silent. When they invaded Panama, the West was silent.

''Israel assassinates innocent defenseless Arabs in the occupied territories and there is no protest from the West,'' said Mandela.

Mandela said he believed Iraq was being discriminated against in its invasion of Kuwait because it was a ''black'' country, meaning part of the Third World.

''Because it is a case now of Iraq, a black country, the West screams and sends armies to the gulf. There is no reason to continue with this hypocrisy.''

Mandela seemed to spare Mitterrand from his tirade, even though he has sent thousands of French troops to the gulf. He said the French president was ''one of the greatest friends of the oppressed South African people.''

The meeting at the Elysee was ''cordial,'' and the two discussed the situation in Africa in general and in particular the problems of reintegration into South African society of militants who are released from jail or return from exile.

(NOV. 7) UPI - William Bennett is resigning as the nation's first anti-drug chief. The White House confirms that he plans to step down and says President Bush will formally accept Bennett's resignation tomorrow. Spokesman Marlin Fitzwater also says a search is under way for a new director of the Office of Nationial Drug Policy Control. Fitzwater says there's been ''a turnaround'' in the nation's drug problem during Bennett's 20-month reign.

Results from yesterday's nationwide elections are still coming in as Minnesota Democratic Governor Rudy Perpich concedes defeat to Independent-Republican challenger Arne Carlson. Democrat Ben Nelson may have won the governor's job in Nebraska, depending on the count of about 10-thousand absentee ballots

tomorrow. Nelson leads Republican Governor Kay Orr by some five-thousand votes with all but one precinct reporting.

A 10-day conference of 105 nations on the dangers of global warming has ended in Geneva. But NOthing was done. Instead, the governments recognized that there was a problem but they put off any possible action until they hold another meeting now set for 1992. Scientific reports given during this session indicate that current warming trends will make the next century the hottest for the planet in the past 100-thousand years.

In Jerusalem, security was heavy today for the funeral of ultra right-wing Rabbi Meir Kahane. There were still reports of scattered clashes, despite warnings by authorities that violence would NOT be tolerated during the funeral. Angry mourners stabbed an Arab, attacked two policemen, and stoned journalists covering the funeral and Arab drivers throughout the city. Kahane's body was flown to Israel from New York, where the extremist leader was shot and killed Monday night.

Miami authorities arrested the head of the secretive black Yahweh religious cult and several members early today on murder charges. U-S Attorney Dexter Lehtinen says the cult allegedly plotted to commit random murders as a rite of initiation into an ultra secret group within the Yahwehs called the ''Brotherhood.'' Leader Yahweh Ben Yahweh, also known as Hulon Mitchell Junior was arrested in New Orleans. He and cult members are charged in a three-count federal indictment with 18 acts of racketeering, including 14 murders, two attempted murders, arson and extortion.

The art world's boom of last year may have gone bust this year. The first big auction was held in New York at Sotheby's Gallery on Monday and officials now report that half of the contemporary items offered for sale actually were sold. The results produce sales of just under 20- Million dollars, well below the 40-Million to 52-Million dollars that had been expected.

MOSCOW (NOV. 7) UPI - President Mikhail Gorbachev used the Revolution Day holiday Wednesday to deplore the country's totalitarian legacy and declare that human rights must be the highest value of society.

Gorbachev, in an address before the annual Nov. 7 military parade at Red Square, also said his perestroika reforms have moved the Soviet Union away from the darkest chapters of its past, but he acknowledged that the ''renewal process turned out to be much more painful and dramatic than expected.''

Despite his criticism, Gorbachev said he remains faithful to the ideals of Vladimir Lenin, leader of the 1917 Bolshevik Revolution and Soviet state founder, which he insisted are still inspiring after five decades of distortion.

''We all now stand a real chance to transform our society into a normal, healthy, just and ultimately prosperous society through the second great revolution,'' Gorbachev said.

The 59-year-old Soviet leader remembered the millions of people who suffered under the regime of terror built by dictator Josef Stalin and perpetuated by his successors.

''Today we also recall those compatriots who had their honor, dignity and life itself stripped from them without any guilt on their part,'' Gorbachev said. ''This terrible lesson should serve as an eternal reminder: A righteous goal cannot be attained by unfair means.

''Human rights and respect for human dignity must be recognized as the highest value in society.''

Under his leadership, Gorbachev said, the Soviet Union has taken ''a radical turn toward government by the people, economic freedom, a state committed to the rule of law and a civil society.''

He cited freedom of thought and the active involvement of people in new political processes as a major achievement of his 5 1/2 years as Soviet leader.

At the same time, Gorbachev acknowledged the depth of the country's economic crisis and the gravity of other problems facing him.

''All of us are seriously concerned by the unsettled nature of life - the scarcity of goods, long lines, high prices, and the slackening of law and order,'' he said. ''Ethnic discord also causes anguish. But one should not panic, still less call for a reversion to the old ways.''

Gorbachev, sounding a familiar theme of national unity, said the Soviet people ''do not want for industriousness and talent'' and live in a land of great natural resources that will be tapped as the country moves toward a market economy.

''At the hour of trial, every true patriot must discard everything petty and extraneous and realize his or her responsibility for the motherland,'' he said.

NEW YORK (NOV. 7) UPI - Despite their anger over gasoline shortages and

rising prices, Americans were generally unconcerned about energy even during the height of the Persian Gulf oil crisis, a nationwide survey indicated Wednesday.

A nationwide poll of 3,600 conducted in the days immediately following Iraq's Aug. 2 invasion of Kuwait found that energy ranked ninth among issues Americans considered most important.

The survey by New York management consultant Booz Allen & Hamilton Inc. showed that only 11.9 percent placed energy among the three most- important issues. Only 1.4 percent considered it the issue of highest importance.

''In the heat of the Persian Gulf crisis in August and early September that energy was so far down the list - I guess that was my biggest surprise,'' said Bruce Pasternack, Booz Allen senior vice president, at a news conference.

The survey found that 47 percent of the population believes the United States now has the technical capability to run automobiles economically on electricity instead of gasoline.

Education, crime, health costs, environment, the deficit, substance abuse, health and defense ranked ahead of energy, the survey found.

''The real message here is one that the government should recognize that there is no national consensus on energy. It's time to get on with recognizing that and therefore stop the dream of a national energy policy to be embraced by all because it isn't going to happen in the 1990s,'' Pasternack said.

The survey found attitudes toward energy generally followed those indicated in less-comprehensive studies of three and four years ago, he said.

Even though energy in general was far down the list, three-quarters of those surveyed were concerned about gasoline shortages, the executive said.

Two-thirds of those surveyed also thought the nuclear industry was harmful to the environment, he said.

Pasternack concluded from the survey that ''there is a substantial gap between public perception and energy realities (and) the public really doesn't want to pay for energy security.''

''Almost 40 percent said they don't trust the oil industry at all and three-quarters of the people filled out either 'not at all' or the next degradation of that,'' he said, and ''1 percent of the people said they trust the oil industry a lot.''

The study concluded, ''The oil industry's PR efforts are not improving its image.''

About half of those in the survey would agree to a 5 cent-a-gallon tax on gasoline to reduce oil imports or to protect the environment. The percentage slipped to 16 percent agreement when the tax was raised to 10 cents a gallon.

The new Clean Air Act recently approved by Congress raises the tax 5 cents. A draft bill approved earlier by White House and congressional negotiators had proposed a 12 cent a gallon tax.

#90311u2092 11/07/1990 ~United Press International

SALT LAKE CITY (NOV. 7) UPI - Four scientists conducted a one-day inquiry Wednesday into controversial claims by chemists at the University of Utah that they produced nuclear fusion in a simple tabletop experiment.

The inquiry was requested by state lawmakers, who appropriated $5 million to establish the National Cold Fusion Institute at the university to investigate the claims.

Electrochemists Stanley Pons of the University of Utah and Martin Fleischmann of England's Southampton University claimed in March 1989 that they had produced nuclear fusion at room temperature. The claim raised hopes that the reaction could provide an inexpensive, safe source of energy.

But the claims have largely been discounted by the scientific community because most other scientists have been unable to duplicate their findings, although some researchers continue to produce results they cannot explain.

One member of the review panel, chemist Stanley Bruckenstein of the State University of New York, said the team would ''do the best we can in one day. We'll give it our best effort and go from there.''

Bruckenstein was joined by Dale Stein, president of Michigan Technological University, Robert Kemp Adair, a physics professor at Yale University, and Loren Hepler, a professor of chemistry and chemical engineering at the University of Alberta in Canada.

Stein, a member of an Energy Department team which recommend against special funding for cold fusion research, pledged complete objectivity. He said panel would not release findings until they were given to the university on Dec. 15.

Pons, who has been spending much of the summer and fall in Europe, returned to Utah for the review and Thursday's meeting of the Utah Energy-Fusion Advisory Council, which is monitoring the state funding for the fusion research.

In announcing Pons's involvement with the review, institute director Fritz Will would not discuss the future of the elusive chemist, who has withdrawn

his son from a Utah public school, put his Salt Lake City house up for sale and asked his department chairman for a year's leave. He still owns a condominium in the Park City resort community.

Pons' recent actions and reluctance to share findings angered the state advisory committee, which demanded he attend Thursday's meeting. The university said Pons would attend.

LOS ANGELES (NOV. 7) UPI - Defense giant Northrop Corp., responding to cuts in defense spending, said Wednesday it will close its plant in Newbury Park in Ventura County, Calif. by the end of next year, resulting in the loss of about 800 jobs.

The plant, part of Northrop's Aircraft division, works on missiles such as the new Tacit Rainbow and targets such as "drone" aircraft used for gunnery training by the military.

Aerospace analyst Lawrence Harris of Bateman Eichler, Hill Richards in Los Angeles said the closure of the facility was not a surprise, given that Northrop has been cutting operations for the past 18 months. "Northrop is continuing the same trend of adjusting to lower defense spending and improving its return on investment," Harris said.

Kent Kresa, Northrop's chairman, president and chief executive officer, said, "We are making Northrop a new kind of company for the new business environment we have ahead of us."

Work at the 28-year-old plant, located in suburban Ventura County about 45 miles northwest of downtown Los Angeles, will be transferred to Northrop plants in two other Los Angeles suburbs: Hawthorne and Pico Rivera.

Northrop said it would concentrate management and operations of its missiles and unmanned vehicles segment at the Aircraft Division facility in Hawthorne. Northrop also said it will sell the 670,000-square-foot Newbury Park facility. Harris said that the 100 acres of land at the plant are worth about $40 million to $45 million and the buildings are worth about $60 million.

Northrop said the missiles and unmanned vehicles part of its business is expected to generate about $500 million of revenue this year, slightly less than ten percent of its total revenue. In the third quarter, its operating profit was $5.2 million on sales of $99.7 million.

Harris said the unit has been performing at improved levels in recent quarters but added that there may be some problems with its Tacit Rainbow missile, which is being developed to attack enemy radar systems.

Northrop also announced that it is reorganizing its three electronics operations into a single Electronics and Avionics division, headquartered at its Defense Systems plant in Rolling Meadows, Ill.

The reorganization also involves its Precision Products plant in Norwood, Mass., its Electronic Systems plant in Hawthorne, Calif., and two small facilities in Warner-Robins, Ga., and New Town, N.D. Northrop said that the move will not have any significant impact on employment.

Precision Products has been suspended from conducting normal business with the Defense Department for more than a year in the wake of charges that it falsified tests on the cruise missile and the Navy's Harrier jet. Harris said that the unit is continuing work on its backlog, but it is not able to operate profitably with the suspension. Northrop spokesman Tony Cantafio said the company is trying get the suspension lifted.

Kresa said that the two moves announced Wednesday are being made to develop "coordinated centers of technical excellence, rather than emphasizing semi-autonomous profit centers as we have in the past."

Aerospace analyst Paul Nisbet of Prudential-Bache Securities in New York said that the changes make logistical sense for Northrop. "These moves make the company better able to compete when they need to use a multi-disciplinary approach," Nisbet said.

The new Electronics and Avionics unit will be headed by Wallace C. Solberg, who has been vice president and general manager of Northrop's Defense Systems Division since 1974.

#90311u2155 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - Democrats claimed two out of three key governorships in the 1990 elections, but Republicans scored impressive late victories in several Midwest industrial states, final poll results showed Wednesday.

While the numerical shift is expected to be slight, Democrats enhanced their prospects for 1992 with victories in Texas and Florida, two states that are expected to gain seven congressional seats after reapportionment.

Meanwhile, the GOP retained control over California's governorship, with a narrow victory by Republican Sen. Pete Wilson over former San Francisco Mayor Dianne Feinstein. California could gain seven congressional seats after the census figures are tabulated.

Among tight races too close to call Tuesday night, incumbent Gov. James Blanchard, D-Mich., was narrowly defeated by Republican challenger John Engler.

In Nebraska, Democrat Ben Nelson appeared to edge out incumbent Republican Gov. Kay Orr, who has not yet conceded defeat.

The GOP scored late gubernatorial victories in Illinois, where a Republican was stepping down, and Minnesota, which was held by a Democrat.

Arne Carlson's gubernatorial victory over incumbent Gov. Rudy Perpich of Minnesota was particularly stunning because the GOP candidate entered the race only 10 days ago, after the sudden withdrawal of Jon Gunseth, following allegations of sexual misconduct.

But Carlson's surprise victory was of no help to Sen. Rudy Boschwitz, R-Minn., who was defeated by Democrat Paul Wellstone, a Carleton College professor. Boschwitz's defeat enabled the Democrats to pick up one Senate seat. They now hold a majority of 56-44.

In the House, Democrats gained eight congressional seats, for a total of 268 and 167 for Republicans. A ninth seat went to socialist Bernard Sanders of Vermont, who ran as an independent but is only the third socialist to sit in Congress.

Leaders of both parties spent Wednesday trying to put the best face on defeats and assessing what if any damage GOP losses would have on President Bush's 1992 re-election prospects.

''I think George Bush is extremely well prepared for 1992,'' said a tired Edward Rollins, co-chairman of the National Republican Congressional Committee. ''I don't think anything that happened yesterday matters,'' he said.

Predictably, Ron Brown, chairman of the Democratic National Committee, thought otherwise.

''Reaganomics is dead. I think George Bush is clearly vulnerable in 1992,'' Brown said.

Charles Black, acting GOP national chairman, said the Republicans ''defied history'' by losing fewer seats than most presidential parties do in off-year elections.

He said his party was well positioned for the congressional redistricting battle that will come in the next two years by winning governor's chairs in the Midwest and holding on in California and keeping control of the New York Senate.

John Breaux, chairman of the Democratic Senatorial Campaign Committee, said, ''I think that if there was an anti-incumbent sentiment it was played out against George Bush.''

''Where he campaigned the hardest - in Florida, in Texas - his candidates lost '' Brown said.

Indeed, despite Rollins' assertion that ''a president is not able to transfer his popularity to another candidate,'' Bush tried and apparently failed.

Bush made more trips to Florida and Texas to campaign for Republicans than any other states, with the exception of California.

Texas State Treasurer Ann Richards became the second woman governor in Texas history by defeating Republican Clayton Williams for the seat being vacated by a Republican in one of the bitterest gubernatorial races in the country.

In Florida, former Sen. Lawton Chiles came from behind to defeat Republican Gov. Bob Martinez.

While narrow victory margins were recorded throughout the nation, the Arizona gubernatorial race featured the closest contest that will require a runoff election.

Republican Fife Symington captured barely 50 percent of the vote against Democrat Terry Goddard, who gained 49 percent. The balance went to write-in candidates. But Arizona state law requires candidates to capture at least 51 percent of the electoral vote to win.

In Massachusetts, Republican moderate William Weld, a former Justice Department official, defeated the ascerbic Democrat John Silber for the seat held by outgoing Gov. Michael Dukakis, the 1988 Democratic presidential candidate.

Kansas featured one of the most surprising races in the nation, where Democrat Joan Finney defeated incumbent Republican Mike Hayden by a 54- 46 percent margin.

In Rhode Island, Democrat Bruce Sundlun beat Rhode Island Gov. Edward DiPrete. Republican George Voinovich snagged the open Democratic governorship in Ohio.

In Oregon, Mark Hatfield, one of the last GOP liberals in the Senate who was considered vulnerable in the final days of the campaign, defeated Democrat Harry Lonsdale.

The last polling places to close were in Hawaii, where Democratic Sen. Daniel Akaka, named to the post after the death of Democratic Sen. Spark Matsunaga, defeated Republican Rep. Patricia Saiki.

In one of the closest watched races in the nation, arch-conservative Republican Sen. Jesse Helms won a fourth term in North Carolina, defeating former Charlotte Mayor Harvey Gantt.

Democrats were nearly shell-shocked over the near defeat of Sen. Bill Bradley, D-N.J., who was expected to coast to a third term victory. Bradley faced a surprisingly stiff challenge from Republican Christine Todd Whitman.

And in New York, Gov. Mario Cuomo, considered invincible, captured only 53 percent of the vote. Republican Pierre Rinfret won only 22 percent of the vote but disenchanted Republicans apparently threw their support behind Herbert London, an independent candidate who won 21 percent of the vote.

-30- 6126

#90311u2159 11/07/1990 ~United Press International

(NOV. 7) UPI - The White House says yesterday's vote ''looks like a pretty standard off-year election that has something in it for everybody.'' Spokesman Marlin Fitzwater does admit that Republican losses in the House and Senate will make it ''harder to work with the Congress,'' but WON'T prevent Bush from using his veto power.

In races for governors mansions, Democrats won two of the three big Sunbelt elections in Florida and Texas, but a Republican got the grand prize in California. Senator Pete Wilson slid by former San Francisco Mayor Dianne Feinstein, allowing a Republican to hang on to the top political job in Sacramento.

Lots of candidates were elected yesterday... but NOT a relatively large number of voters turned out to elect them. Election analysts say nationwide voter turnout in this week's midterm election may have hit a 50-year low. Historically, turnout is much higher when the presidency is at stake.

The exiled premier of Kuwait today urged the Unites States to launch a military strike against Iraq. He told a newspaper in Bahrain that ''the only option available now is the military one'' because Iraq has NOT freed all its hostages and is violating the will of the international community.

Voters in Ireland are turning out in droves today for the country's first presidential election in 17 years. The choice comes down to the first female contender for president or a disgraced former deputy prime minister sacked last week for alleged improper conduct. Results are expected Friday.

Prime Minister V-P Singh of India resigned today, bringing an end to his 11-month-old coalition government. The resignation follows a NO confidence vote during a day-long special meeting of the lower house of parliament. The world's largest democracy will try to form a new government tomorrow.

Soviet authorities today detained a man who fired two shots into the air from a sawed-off shotgun during a Revolution Day parade led by Soviet President Gorbachev. NO one was hurt in the shooting, which occurred on the opposite side of Red Square where Gorbachev stood atop the Lenin tomb.

The Navy is investigating the crash of one of its jets in the Atlantic at Virginia Beach yesterday. The pilot and bombardier of the A- 6-E Intruder aircraft ejected before it narrowly missed an oceanfront hotel and plunged into the sea. The jet had just taken off from the Oceana Naval Air Station.

Now folks can stop calling John F. Kennedy Junior ''the hunk that flunked.'' The handsome young Kennedy says he's very relieved he finally passed the New York Bar examination after failing it the first two times. The 29-year-old son of the late president grinned broadly as he told the news to reporters and photographers as he arrived for work today at the Manhattan district attorney's office.

#90311u2230 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - The number of women who ran as political candidates in the 1990 elections was a record high, feminist groups said Wednesday, but women's efforts to break the ''glass ceiling'' of high office was frustrated more often than not.

Women could claim a number of significant victories, especially Democrat Ann Richards' victory in the Texas gubernatorial race but feminists lost the equally important California contest for the governor's mansion with the defeat of former San Francisco Mayor Dianne Feinstein.

Women also won the two top elected posts in the District of Columbia, with Sharon Pratt Dixon becoming mayor and former Carter administration official Eleanaor Holmes Norton picking up the non-voting delegate seat in the House.

''These elections will go down in history as a turning point for the power of women candidates, women's votes and abortion in electoral politics,'' said Eleanor Smeal, president of the Fund for a Feminist Majority.

According to Fund figures, over 2,000 women ran for state legislative office, 80 sought statewide seats and close to 70 took a shot a races for the House and Senate.

''The record nubmer of women running fundamentally changed the issues debated in campaigns,'' Smeal said. ''The fact that so many women were in prominent races forced many male candidates to take more aggressive positions on women's rights issues. More candidates than ever before had to take a stand on abortion and other women's rights issues.''

But a woman candidate and support for legal abortion are not automatically linked as Democrat Joan Finney, an abortion opponent, showed in her successful race to be governor of Kansas.

Nor could women challengers break into the male-dominated ranks of the U.S. Senate.

Although Sen. Nancy Kassebaum, R-Kan., was re-elected, all women challenging incumbent senators - including some who gave up safe House seats to mount their challenge, such as Reps. Claudine Schneider, R- R.I., Lynn Martin, R-Ill., and Patricia Saiki, R-Hawaii - were defeated, generally by handy magins.

Women also won the gubernatorial race in Oregon, with the election of Barbara Roberts, but two women incumbents - Gov. Kay Orr, R-Neb., and Rep. Olympia Snow, R-Maine - were locked in such close races they still had not been called late Wednesday afternoon.

Feminist groups were also savoring the defeat of a number of male candidates,

often at the hands of other men, who were perceived to be anti-women in their rhetoric and stands, especially Richards' defeat of Clayton Williams in Texas and Republican William Weld's defeat of neo- conservative Democrat John Silber in Massachusetts. Both men had offended feminists with their campaign rhetoric.

In Texas, in particular, according to Sharon Rodine of the National Women's Political Caucus, ''an enormous gender gap'' opened, with women voting overwhelmingly for Richards. Exit polls showed about 61 percent of women voters in Texas went for Richards and only 45 percent of Williams' votes came from women.

Leftist Paul Wellstone's upset victory over Sen. Rudy Boschwitz, R- Minn. - the only incumbent senator to be turned out of office - was also attributed to the gender gap.

But as Smeal acknowledged, women make up only 5 percent of the members of Congress and just 20 percent of state legislators.

''Electoral and party rule changes are the next step for the feminization of power,'' she said.

TORONTO (NOV. 7) UPI - Brascan Ltd. Wednesday reported earnings of $23.4 million, or 16 cents a share, down 61 percent from $60.3 million, or 62 cents a share, a year earlier. Revenues at the diversified company edged up to $2.17 billion from $2.09 billion at the end of 1989's third quarter.

Brascan's nine month earnings fell to $105.9 million, or 92 cents a share, from $183.6 million, or $1.90 a share, in 1989. Revenues increased to $6.59 billion up from $6.05 billion a year ago.

Brascan said the results reflected a decline in its natural resources earnings due to lower commodity prices, the high Canadian dollar and higher interest costs.

Improved earnings from its consumer and industrial products segment and financial services segment also was reported, the company said. These results from these operations acted as a stabilizer on the company's lower overall earnings.

Brascan said it expected the "less favorable" business environment to continue to place downward pressure on its natural resource earnings. Brascan has interests in various companies including Noranda Inc., John Labatt Ltd. and Trilon Financial Corp..

#90311u2246 11/07/1990 ~United Press International
WASHINGTON (NOV. 8) UPI - Rural America, stunned by the recession that hit industry and farming in the 1980s, is showing an upturn in population but its growth rate still is far behind the urban rate, researchers said Wednesday.

Retirement areas were one of the brightest spots in the rural population picture, averaging a growth rate of 2 percent a year during the decade, twice the U.S. average.

At the same time, the rural birth rate, traditionally higher than the urban rate, declined so there is no difference between the two. It was a long-held image that families in small towns and on the farm had more children.

''Unhappily for those concerned with the vitality of rural and small- town America,'' government figures show the growth in the nonmetropolitan population from 1984-1988 was the slowest in years, wrote Calvin Beale and Glenn Fuguitt.

''Yet there is a brighter note. The nadir of rural and small town population retention seems to have been reached in the year July 1985- July 1986 when the

nonmetro population grew by just 0.15 percent.''

Growth rates quickened in the following two years and reached 0.48 percent in 1987-1988, the final year of study, they said. Economic conditions improved in the final years of the decade, they said, so the trend probably continued.

The recovery trend was ''most manifest in the Corn Belt, the lower Great Lakes industrial belt and several parts of the Northeastern states,'' they said.

Beale is a senior demographer at the Agriculture Department and Fuguitt is a sociology professor at the University of Wisconsin.

There are 2.14 million farms in the nation, a drop of 1 percent from 1989 according to the latest government estimate. The number of U.S. farms has been declining since the Great Depression when there were 6.8 million farms and a quarter of the population lived on the farm.

In an interview, Beale said preliminary results of the 1990 census suggest nonmetro areas would show a growth rate for the 1980s ''at the outside not more than one-third of what it was in the 1970s.'' Half of the nonmetro counties probably lost population during the 1980s, he said.

The 1970s were hailed as an era of rural renassaince with a net immigration of 4.5 million people. It followed the exodus of 1.7 million people during the 1960s.

Fuguitt and Beale, writing in Rural Development Perspectives magazine, said the balance sheet for the 1980s ''will fall between'' the two preceding decades.

''We believe that we see reliable signs of at least partial demographic and economic recovery in the last years of the 1980s,'' they said.

While they declined to predict what would happen in the 1990s, they said the population base in agriculturally dependent counties ''is no longer large enough to dominate the trend of the total nonmetro population.''

''For most nonmetro areas, population change will probably be determined by the degree of success in retaining industrial employment, the extent to which jobs in business services grow ... and the pace of growth in retirement-communities, and commuting to nearby cities,'' they said.

In their magazine article, Beale and Fuguitt said most of the nonmetro counties that attractted large numbers of residents during the 1980s were in retirement and recreation areas. They include Florida, the Southwest, the South Atlantic coast, the Ozarks, Hawaii, north central California and the Pacific Northwest.

Farm counties showed an uptick in growth beginning in 1986-1987. Manufacturing counties edged upward in population in 1986-1988, but mining counties had five straight years of population losses from 1983- 1988.

NEW YORK (NOV. 7) UPI - British Prime Minister Margaret Thatcher's blunt warning to Iraqi strongman Saddam Hussein that "time is running out" for him to pull out of Kuwait helped the dollar to pull out of a selloff and end mixed Wednesday.

The tough talk from Thatcher, who in 1982 sent British troops to war with Argentina to wrest back the Falklands Islands, heightened sentiment in the New York currency market that warfare in the Persian Gulf was imminent and prompted dollar buying.

"The market is saying she means what she says, given what she did in the Falklands," said Albert Soria, a first vice president and currency manager for the Kansallis-Osake-Pankki investment bank in New York.

Protective dollar purchases on the strength of Thatcher's remarks reversed the dollar's earlier plunge, brought on by talk the Federal Reserve would lower the key Fed funds rate by 1/2 percentage point to stave off recession. The Fed had eased the funds rate - charged on bank-to-bank reserve loans for short periods - to 7 3/4 percent from eight percent Oct. 29.

In late New York trading, the dollar was quoted at 1.4875 German marks, down from 1.4930 Tuesday, and at 128.90 Japanese yen, up from 128.15.

However, during Wednesday's highly volatile session, the dollar plunged to an all-time intraday low against the deutsche mark of 147.95, Soria said. Only war fears were keeping the dollar from sliding more dramatically.

"I think people are very concerned," said Michael McGuinness, a Harris Bank vice president and currency adviser. "They don't know where a bottom will be since we're making new lows against the mark and the Swiss (franc)."

But he said the dollar was finding takers when it dipped below 1.48 marks. The U.S. unit also was showing strength against the yen, as players considered Japan's high level of dependency on imported Mideast oil.

Other New York dollar rates: 1.2475 Swiss francs, down from 1.2540; 4.9850

French francs, down from 5.0080; and 1,117.50 Italian lire, down from 1,121.50. The pound moved up to $1.9695 from $1.9660.

In Europe, the dollar closed mostly lower amid recession worries and investors' belief that official U.S. interest rates will be cut.

"The dollar is trickling down, slowly but surely," said analyst Mark Brett of Barclays de Zoete Wedd. Brett said Democrats' gains in the U.S. mid-term elections had no real impact on the currency markets.

In London, the pound gained on the dollar, closing at $1.9765 vs. $1.9750. In Frankfurt, the dollar rebounded somewhat to close at 1.4862 German marks against 1.4858 on Tuesday.

But it was another story in Zurich, where the dollar slipped to an historic low, closing at 1.2405 Swiss francs compared with 1.2480. "There seems to be nothing to prevent the (dollar's) fall from continuing," said a Zurich trader.

The dollar also declined in Paris, Brussels and Milan to, respectively: 4.9865 French francs vs. 4.9990, 30.55 Belgian francs vs. 30.67 and 1,116.65 lire vs. 1,118.55.

Earlier in Tokyo trading, the dollar initially gained on the yen but lost its strength on U.S. election results and on late profit-taking. The dollar closed at 127.55 yen, up from Tuesday's close of 127.20. The closing rate, however, was lower than the opening of 128.10 yen.

In Zurich, gold climbed to $387.50 an ounce vs. $379.50 Tuesday. London gold also moved up, closing at $387.25 an ounce compared with $380.

Silver closed higher in both Zurich, at $4.30 an ounce vs. $4.20, and London, at $4.28 an ounce vs. $4.23.

Republic National Bank in New York closed cash gold at $386.25 an ounce, down from $386.50 Tuesday. The New York Commodity Exchange settled contract gold at $386.30 an ounce, down from $386.60.

Republic closed cash silver at $4.28 an ounce, up from $4.26. Comex silver closed at $4.287 an ounce, up from $4.257.

#90311u2315 11/07/1990 ~United Press International
(NOV. 7) UPI - Election victors celebrate their spoils... talk of war in Gulf intesifies... an arrest is made in a spectacular studio fire that causes Millions in damage... and Meir Kahane is buried in Israel... These stories and more, next, from U-P-I:

Democrats and Republicans alike are celebrating their victories today as the White House looks at how this year's mid-term elections will affect the way President Bush takes care of future business.

Democrats gained one additional seat in the Senate and wrestled at least four governorships away from the G-O-P. But they lost the California statehouse to Senator Pete Wilson, a moderate-conservative Republican.

There were a few upsets in House races.

Six-term Republican Stan Parris of Northern Virginia was kicked out by Alexandria Mayor James Morran. But the assistant House Republican leader, firebrand Newt Gingrich of Georgia, won by only about one- thousand votes in his contest.

The only senator to lose his job was Republican Rudy Boschwitz of Minnesota. He lost to Democrat Paul Wellstone, who traveled the state in an old school bus. The defeat lifts the Democratic edge in the Senate to 56-44.

Oregon's Republican Senator Mark Hatfield won re-election.

And in Texas, voters chose Democratic State Treasurer Ann Richards in one of the toughest gubernatorial contests in the country. She beat Republican Clayton Williams for the seat being vacated by a Republican, becoming only the second woman governor in Texas history.

While the net gain for the Democrats in gubernatorial races was as high as five, it drops to four with the victory in Massachusetts of Republican William Weld over Democrat John Silber. Weld will replace the now unpopular Democrat Michael Dukakis, the 1988 Democratic presidential nominee. Regarding the fates of other familiar political names...

- former Democratic Senator Lawton Chiles was elected governor in Florida over incumbent Republican Bob Martinez.

- former Republican Senator Lowell Weicker won the Connecticut governorship as an independent.

- Democrat Bruce Sundlun beat Rhode Island Governor Edward DiPrete in an upset.

- the open G-O-P seat in New Mexico went to Democrat Bruce King.

- and Republican George Voinovich snagged the open Democratic governorship in Ohio.

Among those who did NOT fare well is Washington D-C Mayor Mayor Marion Barry who lost his bid to win a seat on the city council.

Yesterday's elections and the results being reported today only lay the groundwork for 1992.

Tradition says the party in the White House loses ground in off-year elections. But the Bush White House claims an above-average showing with the just one Senate position lost and an estimated eight in the House.

The G-O-P lost governorship races in Texas and Florida, held onto California and Illinois.

Democrat Ben Nelson is the apparent winner over Republican Governor Kay Orr in Nebraska but nine-tothousand absentee votes must still be counted.

And Independent-Republican Arne Carlson has defeated Democratic Governor Rudy Perpich in Minnesota.

White House news secretary Marlin Fitzwater told reporters today that the election has- in his words- ''something in it for everybody.''

While voters sent lawmakers to the House, Senate and statehouses, they also made decisions on issues of the '90's.

Voters in Washington, D-C, for example, withdrew from the city's homeless their lawful right to a roof over their heads.

In 1984, the District of Columbia overwhelmingly approved the nation's first voter mandate guaranteeing overnight shelter to homeless people who request it.

Yesterday, in a much closer vote, the voters took it back.

At the other end of the country, Alaskan voters decided to join the national war on drugs by outlawing marijuana. The plant has been legal in the state for 15 years.

Possession of the drug is now a crime punishable by up to 90 days in jail.

And both supporters and opponents of legal abortion today are claiming victory... and are promising that the most bitterly contested social issue of the last decade will NOT go away.

Kate Michelman, executive director of the National Abortion Rights Action League, says the election results show that supporters of legal abortion have ''really made impressive gains.''

But National Right to Life president John Willke says the balloting shows that- IN HIS WORDS- ''the pro-abortionists couldn't deliver'' on their threat to turn every election contest into a referendum on abortion.

#90311u2344 11/07/1990 ~United Press International

(NOV 7) UPI - Crude oil shot up by more than $2 a barrel and heating oil by over 6 cents a gallon Wednesday as statements by world leaders reignited financial and commodities markets' fears of a war in the Middle East.

British Prime Minister Margaret Thatcher issued her sternest warning yet to Saddam Hussein, demanding the Iraqi president withdraw his troops ''soon'' from Kuwait or else the multinational force assembled against Iraq would ''remove him by force.''

''I think that started the ball rolling,'' said Ed Kevelson of Dean Witter Reynolds's International Energy Futures Group in New York.

On the New York Mercantile Exchange, the American benchmark West Texas Intermediate crude for December delivery rocketed $2.68 over Tuesday to $35.31 a barrel. Volume was a healthy 94,954 contracts.

''Once we broke through the $33.90 resistance level, we hit buy (orders). I don't think we ever looked back after that,'' Kevelson said.

The trader said Egyptian President Hosni Mubarak was also reported as warning Saddam that a countdown to war had begun.

Kuwait's exiled premier, Sheikh Saad al Abdullah al Sabah, told a Bahrain newspaper the United States should strike militarily against Iraq and rejected any territorial compromise with Baghdad.

''The only option available now is the military one, because the Iraqi regime has insisted not only on challenging the will of the international community but also continues to hold the foreign hostages, '' Saad said.

Soviet envoy Yevgeni Primakov described Secretary of State James Baker's eight-nation tour of the Mideast and Europe as crucial to developments in the Persian Gulf, in crisis since Iraq's Aug. 2 invasion of Kuwait.

''Generally, there's a feeling permeating the market that something's going to happen,'' said Peter Beutel of the Pegasus Econometrics Group, Hoboken, N.J.

December futures contracts for home heating oil zoomed 6.33 cents to 92.71 cents on the Merc, while unleaded gasoline jumped 3.44 cents to 91.19 cents a gallon.

Technical buying and selling based on the ''spread'' between the price of crude and the products also played a role in the market, Kevelson said.

There was buying of heating oil vs. both crude and gasoline and selling of gasoline vs. crude, the trader said.

The market virtually ignored a late Tuesday report of the American Petroleum Institute that U.S. crude supplies grew 5 million barrels last week. It marked the weekly industry survey's first increase in two months.

Normally, such a report would depress prices. But Kevelson said the market largely discounted the increase anyway since it was mainly confined to the West Coast, which receives much of its supplies from Alaska.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent rocketed $2.75 to $35.95 a barrel.

The United Arab Emirates' Dubai Light - the key OPEC crude from the Middle East shipped mainly to the Far East - jumped $2.70 to $30.50 a barrel.

Three refiners - Houston's Conoco Inc. subsidiary of Du Pont; Marathon Oil Co. the Findlay, Ohio, unit of USX Corp.; and Sun Co., Radnor, Pa. - raised the posted price they will pay for crude at the wellhead.

Conoco and Marathon raised it $2.50 a barrel to $34 a barrel for WTI. Sun's

$2.45 increase brought its WTI price to $33.70 a barrel.

#90311u2354 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - Environmental groups downplayed Wednesday the decisive defeat of California's ''Big Green'' ballot initiative as an isolated setback in a generally successful effort to elect more public officials sympathetic to their cause.

Despite the rejection of Big Green by a 63-37 percent vote and the failure of like-minded initiatives in other states, environmentalists maintained the election did not represent a loss of momentum for the movement.

Reid Wilson, political director for the Sierra Club, said voters were reluctant to embrace controversial ballot measures of any kind due to anxiety over the economy and the possibility of war in the Mideast.

''I think we are in a very unique and unusual period in this country, '' Wilson said. ''There is unease over whether we are going to have a shooting war. A lot of people are more focused on the possibility of an economic downturn. With all that anxiety, people are less willing to try something new.

''These are setbacks, but they are temporary,'' he added. ''People were in a 'just say no' mood.''

In regard to Big Green, Wilson said Californians also might have been put off by the complexity and sheer scope of the measure, which ran thousands of words.

The initiative would have banned cancer-causing pesticides and offshore oil drilling, restricted emissions linked to global warming and ozone depletion, protected ancient redwood forests from logging, tightened ocean pollution laws and created the elected post of state environmental advocate.

''It may have asked for too much,'' Wilson said. ''It was hard for people to grasp all of it.''

Rick Hind, environmental director for the U.S. Public Interest Research Group, noted the all-encompassing nature of Big Green also guaranteed broad and well-funded opposition from the many industries that would have been affected.

He said industry effectively played on voters' economic worries in a blitz of slick and ''misleading'' television ads. Altogether the anti- Big Green coalition outspent environmentalists and their allies by a four to one margin, he said.

''The expenditures of Exxon and its allies were very effective,'' Hind said. ''We sometimes forget they not only can pollute the environment, they can

pollute the airwaves, too.''

Overall, environmentalists said the widespread failure of their ballot measures was more than offset by the election of pro-environment governors, senators and House members in several crucial races.

In particular, they celebrated the victory of Democrat Barbara Roberts over Republican Dave Frohnmayer in the Oregon gubernatorial campaign. Roberts was favored by environmentalists for supporting protection of ''old-growth'' forests.

Other key wins, they said, included the election of Democrat Ann Richards over Republican Clayton Williams in the Texas gubernatorial race; Democrat Lawton Chiles over Republican Gov. Bob Martinez in Florida; and the ouster of Sen. Rudy Boschwitz, R-Minn., by Democrat Paul Wellstone.

In all those races, exit polling showed the environment was a key factor in voter decisions, Wilson said.

As for other ballot initiatives:

-Oregon voters rejected by a 59-41 percent vote a proposal to require more use of recyclable and recycled materials in food and product packaging. They also turned back a measure to shut down the Trojan nuclear plant if it did not meet strict earthquake safety standards.

-New Yorkers narrowly defeated a measure that would have allowed the state to issue up to $1.9 billion in bonds to finance environmental projects ranging from parkland acquisition to sewage treatment plants.

CHICAGO (NOV. 7) UPI - Wednesday's truck and rail bids for grain delivered to Chicago, including delivery time, price and change from previous business day:

No. 2 soft wheat: up to 30 days, 2.45 3/4-2.55 3/4 up 1/4.

No. 1 yellow soybeans: up to 15 days, 5.72 1/2- 5.84 up 6 1/4-6 3/4.

Terminal elevator bids: No. 2 yellow corn, up to 15 days, 2.18 1/4-2.30 1/4 unch.

Processor bids: No. 2 yellow corn, up to 15 days, 2.32 1/4-2.34 3/4 unch to up 1.

#90311u2396 11/07/1990 ~United Press International
Secretary of State James Baker and British Prime Minister Margaret Thatcher warned Wednesday that military action against Iraq is still a very real possibility, while the Baghdad government for the first time asked the U.N. General Assembly to seek the withdrawl of U.S. troops from the region.

Kuwait's exiled premier took the tough talk one step further, calling for an immediate military strike to oust Iraqi troops from his tiny emirate.

Meanwhile, in New York, the U.N. Security Council's sanctions committee warned that medicine sent to Iraq could be used in chemical and biological warfare.

Thatcher's warning to Saddam Hussein was her sternest yet, demanding the Iraqi president withdraw his troops ''soon'' from Kuwait or the multi-national force assembled against him would ''remove him by force.''

''Time is running out for Saddam Hussein,'' she said, during the opening of a new session of Parliament. ''The implacable message from this house must be either he gets out of Kuwait soon, or we and our allies will remove him by force and he will go down to defeat with all its consequences.''

Baker, in Ankara Wednesday on route from the Middle East to Moscow, said the use of force in the Gulf could not be ruled out and there could be no partial solution to the crisis caused by the Iraqi invasion of Kuwait Aug. 2.

''Obviously we would all like to see a peaceful, diplomatic and political solution to this problem,'' he told reporters. ''At the same time ... we cannot rule out the possible use of force.''

Baker has been meeting in recent days with numerous U.S. allies, reportedly canvassing their support for a possible military strike against Saddam.

Soviet envoy Yevgeni Primakov described Wednesday Baker's eight- nation Mideast-European tour as crucial to developments in the Gulf.

Iraq also stepped up its war of words, charging the United States with ''aggressive intentions'' in a letter to the U.N General Assembly. Iraq requested to add the issue of the U.S. military presence in the Persian Gulf to the current U.N. General Assembly agenda.

Iraq said the item should be included for debate because the removal of American forces is a ''humanitarian duty,'' which complies with ''all the purposes and principles of the Charter of the United Nations.''

''The starvation embargo against the people of Iraq is an inhumane, uncouth, and vexatious act which deprives the Iraqi people of the most basic human right, i.e. the right to life,'' the Iraqi government said in a four-page

letter to the General Assembly.

Iraqi President Saddam Hussein also promised Wednesday to free 120 hostages - most of them Germans but some Americans and Europeans as well - after meeting with former West German Chancellor Willy Brandt in Baghdad, the official Iraqi news agency INA said. More than 70 Japanese hostages were allowed to return home Wednesday with former Prime Minister Yasuhiro Nakasone.

But an Irish delegation to Baghdad returned emptyhanded, amid reports Mother Teresa of Calcutta had offered to replace detained Irish medical personnel with nuns of her order.

(NOV. 7) UPI - Snow fell over wide areas in the West, Midwest and the East Wednesday and record cold temperatures chilled the central Plains region.

Heavy snow warning was posted for the southwest mountains of Colorado, and forecasters said an additional foot of snow could fall on the San Juan Mountains.

Winds gusted to 62 mph near Albuquerque, N.M.

Six inches of snow fell at Fort Defiance, Ariz. A snow advisory was posted over southeast Utah and the nearby mountains. Six inches of new snow covered the ground at Monticello, Utah.

Snow also fell over upper Michigan, north-central New York state and north-central Pennsylvania.

Four inches of snow fell at Alamosa, Colo.

The interstate highway between San Diego and Los Angeles was closed earlier Wednesday by gusty winds blowing smoke from a brush fire.

A high wind warning was posted for Valdez and nearby portions of Alaska. Winds gusting to 65 mph will drop the wind chill index to 25 degrees below zero by early Thursday, the National Weather Service said.

Winds gusted to 75 mph Tuesday evening and to 63 mph Wednesday at Kodiak, Alaska.

Record cold temperatures in the single digit and teens were set in Wyoming, Colorado, Nebraska, Oregon and Iowa.

Nebraska felt the brunt of the freezing weather. Records were set in Norfolk, where temperatures dropped to 7 degrees, breaking by 1 degree a record set in

1971 and in Scottsbluff, where only 3 degrees of mercury showed on the thermometer, tying a record set in 1943.

Casper, Wyo., also tied a record set in 1971 when the thermometer hit 5 degrees.

NEW YORK (NOV. 7) UPI - Cleveland Indians catcher Sandy Alomar Jr., Wednesday became the third player to unanimously win the American League Rookie of the Year Award.

Alomar received all 28 first-place votes by a panel of two Baseball Writers' Association of America members from each American League city. He joins Carlton Fisk in 1972 and Mark McGwire in 1986 as unanimous Rookie of the Year winners.

The 24-year-old catcher, who came to the Indians as part of the deal that sent Joe Carter to San Diego, easily outdistanced Kevin Maas of the New York Yankees with the maximum 140 points. Maas received 14 second- place votes and 5 third-place votes for 47 points. Kevin Appier of Kansas City was third with 31 points.

Alomar batted .290 in 132 games with Cleveland and hit 9 home runs with 66 RBI. He became the first rookie catcher to start the All-Star Game and he collected two hits in the mid-season classic. He is currently playing in Japan with a major-league All-Star team.

Alomar became the third catcher to win rookie honors, joining Thurman Munson (1970) and Fisk. He is the fourth Indian to win Rookie of the Year, along with Herb Score (1955), Chris Chambliss (1971) and Joe Charboneau (1980).

#90311u2405 11/07/1990 ~United Press International

SANTA CLARA, Calif. (NOV. 8) UPI - A Korean computer maker and a San Diego startup company said Wednesday they had developed the first battery- powered laptop computer based on the speedy technology known as reduced instruction set computing.

The 8.5-pound computer is based on the Sparc computer architecture developed by Sun Microsystems Inc. for its computer workstations. The computer uses the Unix operating system and is designed for mobile ''power users'' in engineering, science, finance and government, its manufacturers said.

TriGem Corp., the U.S. subsidiary of TriGem Computer of Korea, will manufacture the machine for Research, Development & Innovations Inc. of San

Diego. The two companies will exhibit the machine for the first time at next week's giant Comdex trade show in Las Vegas.

The computer includes 8 megabytes of random access memory and a 100- megabyte hard disc, the companies said. Using the RISC technology, the computer can execute 15.8 million instructions per second, compared with 5 to 6 MIPS for comparable machines based on Intel Corp.'s 386 microprocessor, they said.

Reduced instruction set computing speeds up a computer's performance by streamlining the number of tasks its microprocessor must perform. The technology is particularly popular among engineers and other technical computer users.

Both TriGem and RDI will market the computer, at prices expected to range from $7,000 to $12,000.

#90311u2409 11/07/1990 ~United Press International

SEATTLE (NOV. 7) UPI - The reputed leader of an international ring of businessmen involved in smuggling sophisticated computer technology out of the United States was sentenced in federal court Wednesday to 33 months behind bars and fines totaling $1.5 million.

Shiv Mohan Mukkar, 47, of New Delhi, India, pleaded guilty last July to export violations and money-laundering charges. He admitted to smuggling a DEC VAX 8700 computer out of the United States and to transferring some $490,000 into this country from Great Britain to purchase the computer.

Federal prosecutors said the computer, which is capable of military applications, was destined for the Soviet Union.

It was smuggled out of the U.S. in March of 1989 after Mohan broke it down, crated it up and labeled it as equipment not subject to export controls. It eventually was stopped in Singapore through the combined efforts of the U.S. Department of Commerce and U.S. Customs.

Mohan's sentencing by U.S. District Judge William Dwyer capped an 18- month effort by the U.S. Justice and Commerce departments to bring to justice more than a dozen individuals and corporations - most of them foreign nationals - accused by a Seattle federal grand jury of smuggling high-level computer technology to foreign nations.

Western Washington District U.S. Attorney Mike McKay said Dwyer's sentence sends a clear message to people who think there is money to be made by breaking U.S. licensing laws.

''When people contemplate this kind of activity in the future,'' he cautioned,

''they better focus on this. Mohan was lucky to receive only 33 months. He got that because the equipment has now been decontrolled.

''People who commit similar acts with technology that is left on the control list will be looking at 10 to 12 years, perhaps more,'' McKay said, adding, ''Don't do it. This risks aren't worth it. Pick another line of work.''

Others charged included a Kirkland, Wash., man, Robert Casperson, 44, who was sentenced in August to four months imprisonment. Also sentenced in August were John Townsend, 41, of Sydney, Australia, to two years in prison, and David Whyte, 42, of Toronto, Canada, to one year.

Sham Malhotra, 47, of New York City, pleaded guilty to tax violations related to the scheme and was sentenced to probation.

#90311u2415 11/07/1990 ~United Press International

NEW YORK (NOV. 8) UPI - The sharp retrenchment on Wall Street, sparked by the October 1987 stock market crash and fueled by the drop in market prices this year, is likely to get worse before it gets better, industry watchers said Wednesday.

The number of employees in the securities industry has shrunk by 17.6 percent over the past three years, from an industry peak of 262,000 in 1987's third quarter to 216,000 in the second quarter of this year.

Most observers believe there will be further layoffs in the coming months as the U.S. economy continues to slide into recession, but they disagree about how deep the retrenchment will cut and how long it will last.

Michael Bernstein, an analyst at Sanford C. Bernstein & Co., predicted employment levels in the industry will fall as low as 175,000 - down another 19 percent from today's level.

But Kemp Fuller, president of a management consulting firm, was less pessimistic. ''My guess is that you will see thousands more jobs eliminated, but 15 or 20 percent more layoffs is preposterous,'' he said.

Fuller said he expected the industry's employment level will bottom out in the second or third quarter of 1991, depending on how long a recession hits the economy.

A fair number of Wall Street professionals who lost their jobs have found work with foreign-based firms expanding their U.S. operations.

London-based County NatWest, for example, hired almost the entire equity group of Drexel Burnham Lambert Inc., which filed for bankruptcy early this year.

Others workers have found jobs in other industries.

''The great bulk of people who have lost their jobs were back-office workers and their skills are relevant to lots of other businesses,'' said Abram Claude Jr., managing director of Russell Reynolds Associates, an executive placement firm.

But even those who have clung to their jobs are paying a price, in terms of reduced compensation. And they will continue to pay this price, observers said.

Average salaries for retail stockbrokers dropped from $97,000 in 1986 to $78,711 in 1989, the most recent year for which figures were available, according to the Securities Industry Association.

Moreover, year-end bonuses - which usually represent the lion's share of the income earned by Wall Street professionals - are expected to fall this year to their lowest levels in nearly a decade.

And many firms plan to pay part of the bonuses in stock as a means of conserving cash and instilling a stronger entrepreneurial spirit in their employees.

While middle- and lower-level executives have seen their incomes shrink, top-level executives continue to command top salaries and bonuses, said Isaac Much of Much & Co., an executive placement firm.

Part of the blame for the sharp decline in jobs over the past three years was that the industry expanded too quickly during the boom years in the mid-1980s.

''This is an extremely volatile industry, and it has the tendency to overhire in good times and to overterminate in bad times,'' said Fuller. ''It's an industry that has an excess of greed at the top and fear at the bottom.''

''The yuppies hired in the 1980s thought they were on a one-way street up. But Wall Street is a two-way street, and these people didn't have the maturity to be responsible to their clients,'' he added.

As a result of the 1987 crash and its aftermath, said Fuller, most securities firms have become more conservative in their investment strategies.

''The process, as painful as it is, will lead to a different mix of business the 1990s,'' he said.

''The '80s was a period of converting paper to cash through junk bonds, and that's just what they were - junk,'' the management consultant added. ''In the '90s, I believe the dominant investment vehicle will be equity-oriented, such as mutual funds and stocks.

''People will be more conservative. They will expect slower growth and more real growth.''

#90311u2419 11/07/1990 ~United Press International

PAINESVILLE, OH (NOV. 7) UPI - Yet another member of Jeffrey Don Lundgren's religious cult was sentenced to life in prison Wednesday for the April 1989 slaying of a family belonging to the cult.

Daniel Kraft, 26, originally from Nauvoo, Ill., pleaded guilty Monday in Lake County Common Pleas Court to five counts each of aggravated murder and kidnapping.

He was sentenced Wednesday to 20 years to life in prison for each of the aggravated murder charges and 10 to 25 years in prison for each kidnapping charge.

Conviction could have brought the death penalty but prosecutors agreed to drop that request and instead asked for at least 70 years in prison.

Kraft, who remains a solid supporter of Lundgren's teachings, was one of 13 cult members indicted Jan. 5 after the bodies of a five-member family belonging to the cult were uncovered in a barn east of Cleveland.

The Dennis Avery family, including children ages 6, 13 and 15, were shot to death by Lundgren in April 1989 before he led the cult to near Davis, W.Va., and then to Chilhowee, Mo., before breaking up in December.

Lundgren, 40, earlier was convicted of aggravated murder and sentenced to death. His 19-year-old son, Damon, was convicted of aggravated murder and sentenced to life in prison and aggravated murder charges are pending against Ronald Luff, originally of Independence, Mo.

The cult leader's wife, Alice Lundgren, was convicted of 15 lesser charges and sentenced to life in prison.

Seven other cult members have pleaded guilty to various charges and Kathryn Johnson, originally of Woodbine, Iowa, still faces charges involving an alleged plot to take over a church temple in Kirtland.

Kraft was arrested near San Diego with the Lundgrens.

#90311u2420 11/07/1990 ~United Press International

NEW YORK (NOV. 7) UPI - A decision by Arizona voters to reject a holiday

honoring Martin Luther King, Jr. is likely to cost Phoenix the 1993 Super Bowl.

NFL Commissioner Paul Tagliabue said Wednesday he will recommend to league owners that Super Bowl XXVII be moved from Phoenix ''in the best interest'' of the NFL.

''I will recommend to the NFL clubs that this Super Bowl be played elsewhere '' Tagliabue said in a statement. ''I am confident that they will endorse my recommendation.

''Arizona can continue its political debate without the Super Bowl as a factor.''

The measure to establish a holiday for the slain civil rights leader was defeated by some 15,000 votes in balloting by more than a million voters. Phoenix has never staged a Super Bowl.

Philadelphia Eagles owner Norman Braman, chairman of the Super Bowl Site Selection Committee, supported the commissioner's stand.

''I am in complete agreement with the commissioner's decision and that, as I stated earlier this year, I, too, will urge my fellow NFL owners to consider an alternate city as host ...''

Gene Uphsaw, executive director of the NFL Players Association, released a statement from his union's Washington headquarters.

''It is our belief that the Super Bowl should not be held in any state which does not recognize the Martin Luther King Jr. holiday,'' he said. ''I applaud Paul Tagliabue and support his decision ...''

NFL club owners are to meet in Dallas next week, and the Super Bowl issue could be placed on the agenda. There was speculation the 1993 game would be switched to one of three California cities - Pasadena, Stanford or San Diego.

San Diego Mayor Maureen O'Connor and Los Angeles Mayor Tom Bradley wrote letters to Tagliabue Wednesday, offering to hold the game.

''As you know, we missed having the 1991 game by one vote and we made a strong presentation for the 1993 event,'' O'Connor said in her letter.

San Diego staged Super Bowl XXII in 1989. If the 1993 NFL title game came to Jack Murphy Stadium, San Diego would play host to baseball's All-Star Game, yachting's America's Cup and the Super Bowl in a 12-month period.

San Diego also is a candidate to stage the 1992 Republican national convention.

Wrote Bradley: ''We will echo and applaud the league for its moral stance.

Also, as the runner-up bidder to Phoenix for hosting Super Bowl XXVII, we will be eager to renew our interest in providing the venue for your 1993 championship game.''

#90311u2427 11/07/1990 ~United Press International
WASHINGTON (NOV. 7) UPI - World trade negotiators may need additional time to complete work on agricultural reforms, partly because of the ''minimalist'' offer made by Europe, Agriculture Secretary Clayton Yeutter said Thursday.

The negotiations, which began nearly four years ago, were scheduled to conclude in early December. Yeutter said he believed a follow-up meeting might be needed.

''My view at the moment is there is almost no chance of finishing these talks in December. The gap ... is so large,'' Yeutter said, pointing to slow progress in agriculture discussions and unfinished work in trade and services negotiations.

Trade talks cover 15 areas. Agriculture has achieved prominence because of strong disagreements about how far to go in removing protectionists policies.

European Community leaders, after six fruitless attempts, agreed Tuesday on a package to offer at the talks. It generally calls for a 30 percent cut in trade barriers and domestic supports.

''Regrettably, it's not a very forthcoming proposal,'' Yeutter said, because the Community wants credit for cuts made during the mid-1980s.

Many nations have aligned themselves with the U.S. proposal for a 90 percent cut in export subsidies and a 75 percent reduction in unfair trade barriers and farm subsidies.

''The Community has put what we would call a minimalist proposal on the table '' Yeutter said.

-30- 1610
#90311u2437 11/07/1990 ~United Press International
(NOV. 7) UPI - Secretary of State Baker has arrived in Moscow for talks tomorrow about the Persian Gulf crisis with his Soviet counterpart Eduard Shevardnadze and President Gorbachev.

In Turkey earlier today, Baker said the use of military force could NOT be

ruled out to evict Iraq from Kuwait.

The exiled premier of Kuwait apparently agrees.

He told a newspaper in Bahrain that an immediate military strike is needed to remove Iraqi troops from his tiny country.

Baghdad is trying to counter such calls by warning President Bush that a military confrontation would mean the ''end of his political life.''

The official Iraqi news agency says President Saddam also promised to free 120 hostages- most of them Germans but some Americans and Europeans as well.

But so far, only about 70 Japanese hostages have been allowed to return home today with visiting former Prime Minister Nakasone.

In Washington, White House news secretary Marlin Fitzwater leveled some veiled criticism at the foreign officials who have been visiting Baghdad. He warns they are playing into what he calls Saddam's ''obvious, very cynical attempts to propagandize'' the hostage situation.

There was a little too much ''lights, camera, action'' on the back lot of the Universal Studio in California last night.

The lights and action were caused by a mysterious fire that ate through movie sets and the cameras were from journalists covering the spectacular multi-Million-dollar blaze.

Authorities in Los Angeles County say they've arrested a Universal Studios security guard and have booked him on suspicion of arson.

40-year-old suspect Michael Huston is being held on one-Million dollars bail. NO word yet on any motive.

The blaze lasted nearly three hours last night, fanned by gusty Santa Ana winds. About 200 studio employees still on the lot, and some tour groups and nearby restaurants were evacuated.

The five-acre fire destroyed movie sets including Courthouse Square, where ''Back to the Future'' was filmed... and areas where the movies ''Dick Tracy'' and ''Ben Hur'' were filmed.

The fire also heavily damaged the King Kong exhibit on the Universal Studios tour and the tour's Earthquake exhibit.

The vaults containing the studio's priceless film archives were NOT ruined.

Ironically, the studio tour is open for business today and is reporting a

heavier-than-usual turnout.

#90311u2442 11/07/1990 ~United Press International

WASHINGTON (NOV. 7) UPI - The United States, playing tit for tat in a dispute over U.S. meat exports, will dispatch inspectors to check sanitation at European packing plants, Agriculture Secretary Clayton Yeutter said Wednesday.

The European Community has banned imports of U.S. pork since the beginning of this month and plans to cut off shipments of U.S. beef at the end of the year. It says U.S. slaughterhouses do not meet European standards for hygiene. U.S. officials regard the complaint as a disguise for an unjustified trade barrier.

''We have concluded if the Community is going to be insistent to the 'Nth'degree ... we can be insistent too,'' Yeutter said. ''We plan to have inspection teams in Western Europe in the near future just to see that they meet our standards.''

During an interview, Yeutter noted the prompt U.S. retaliation to a 1989 European Community ban on U.S. beef produced with use of synthetic growth hormones. He said it was ''conceivable we are heading down the same road on the pork side.''

However, Yeutter also said trade ambassador Carla Hills had decided to utilize the dispute settlement procedures available under world trade rules. The first step would be a meeting between European and U.S. inspection officials to discuss the Community's complaints. If that fails to settle the matter, formal sessions will be called, he said.

The United States exported about $20 million in pork and pork variety meats annually in recent years. An Agriculture Department spokeswoman said Europe ships a much larger amount of pork and pork products to the United States.

#90311u2443 11/07/1990 ~United Press International

(NOV. 7) UPI - The man who wanted to purify Israel by expelling all Arabs was buried today in Jerusalem.

Security was very heavy as slain ultra right-wing Rabbi Meir Kahane was laid to rest. Dozens of police, many armed with Uzi sub-machine guns, lined the route of the funeral procession.

But scattered clashes broke out anyway, despite warnings by authorities that violence would NOT be tolerated.

Police say small groups of Kahane followers broke away from the three-mile funeral procession to the cemetery to attack Arabs and journalists. The extremists, chanting ''death to the Arabs,'' wounded four Arabs, stabbing one in the stomach. Two policemen also were injured trying to break up the rioters.

Authorities estimate that up to 15-thousand people joined the four- hour funeral.

Kahane's body was flown to Israel from New York, where the extremist leader was shot and killed Monday night by an Egyptian immigrant. His followers have warned of reprisals against Arabs for the assassination.

Authorities have arrested the head of the secretive black Yahweh religious cult and several of its members on murder charges.

Leader Yahweh Ben Yahweh, also known as Hulon Mitchell Junior, was arrested in New Orleans early today. He and 16 cult members are charged in a three-count federal indictment returned in Miami. They are accused of 18 acts of racketeering, including 14 murders, two attempted murders, arson and extortion.

U-S Attorney Dexter Lehtinen says the Yahweh cult allegedly plotted to murder at random as a rite of initiation into an ultra secret group within the Yahwehs called the ''Brotherhood.''

Lehtinen says NO one could be admitted into the Brotherhood until they killed a so-called ''white devil'' and brought a severed body part back to Mitchell as proof of the killing.

Mitchell, a former professional football player for the St. Louis Cardinals and Oakland Raiders, claims to be the second coming of Christ. He calls his followers disciples and requires them to turn over all worldy goods to his so-called Temple of Love, located in Miami's Liberty City neighborhood.

#90311u2469 11/07/1990 ~United Press International

UNITED NATIONS (NOV. 7) UPI - Charging the United States with ''aggressive intentions,'' Iraq requested Wednesday to add the issue of the U.S. military presence in the Persian Gulf to the current U.N. General Assembly agenda.

Iraq said the item should be included for debate because the removal of American forces is a ''humanitarian duty,'' which complies with ''all the purposes and principles of the Charter of the United Nations.''

''The United States of America supresses any attempt made for peace in its infancy, regardless of its source,'' according to a letter submitted by Iraqi U.N. Ambassador Abdul Amir Al-Anbari to the U.N. secretary general.

The four-page document blasts the United States, accusing it of offensive intentions toward Iraq from the outset of the crisis. It said the U.S. presence exposes inhabitants in the region to the dangers of a nuclear catastrophe and likens the naval blockade to ''acts of piracy.''

''The starvation embargo against the people of Iraq is an inhumane, uncouth, and vexatious act which deprives the Iraqi people of the most basic human right, i.e. the right to life,'' the letter said.

Women, children and the elderly will suffer the most from the U.N. embargo, violating the 1949 Geneva Conventions and other human rights conventions, the document said.

The item for U.N. debate is to be entitled: ''United States military concentrations in the Gulf region: threats to Arab and international peace and security.''

The request followed a call on Tuesday by non-aligned countries in the U.N. Security Council for an Arab U.N. peace force in the gulf to head off a possible war between Iraq and the U.S.-led forces.

Iraq said that the presence of an unprecedented number of U.S. troops in the region since their deployment on Aug. 7, ran counter to the international community's desire to avoid war.

The Bush administration has quashed various peace initiatives backed by world leaders including those of France, the Soviet Union, Jordan and Yemen, the letter stated.

''The frantic call for the imposition of humiliating conditions on Iraq and its people constitutes one more element of the aggression,'' it said.

-30- 2397

#90311u2559 11/07/1990 ~United Press International

(NOV. 7) UPI - The U-N Security Council's sanctions committee is warning that medicines being sent to Iraq could be diverted for use in chemical and biological warfare. Some countries have exchanged medicines for hostages.

British Prime Minister Thatcher today demanded that Saddam Hussein withdraw his forces ''soon'' from Kuwait or the multi-national force will ''remove him by force.'' The statement issued during Parliamentary debate was her toughest warning yet to the Iraqi leader.

A Rex, Georgia, man already in jail is being named in a 70-count federal indictment for allegedly making the mail bombs that killed a federal judge in Alabama and a lawyer in Savannah last year. Two other mail bombs were disarmed.

Voters gave Democrats a firm hold on Congress in yesterday's mid-term elections. In the 102nd Congress, which convenes January 3rd, Democrats will control the Senate 56167, but the gains won't shackle President Bush's masterly use of the veto.

NASA has cleared the Shuttle Atlantis for a blazing night-time takeoff one week from tomorrow. That's six days later than originally planned thanks to problems with the spaceplane's payload which is a spy satellite.

California firefighters are battling a wind-whipped blaze on the sprawling Camp Pendleton Marine Corps base in northern San Diego County. The flames have charred more than two-thousand acres of grass and brush on the base.

India's prime minister resigned his 11-month-old National Front coalition government today. V-P Singh submitted his resignation after he lost a vote of confidence during a day-long special session of the lower house of Parliament.

A Wisconsin woman testified today that an Oshkosh man raped her by taking advantage of one of her 26 personalities. The woman says the personality known as ''Jennifer'' did NOT know what was happening to her when the two had sex last June.

#90311u2576 11/07/1990 ~United Press International

NEW YORK (NOV. 7) UPI - Standard & Poor's Corp. filed suit Wednesday to terminate the licensing agreement allowing the Chicago Board Options Exchange to use the S&P 100 and S&P 500 indices - the foundations of two of the exchanges highest-volume options contracts.

The suit, filed in U.S. District Court, charged the CBOE - the world's largest options exchange - breached its contract with Standard & Poor's ''by asserting that it has the exclusive right to use the Standard & Poor's service marks and the Indexes in connection with financial products other than exchange-traded option contracts.''

It seeks an order terminating the licensing agreement effective Dec. 7 or, as an alternative, a ruling that the license does not extend to financial instruments other than exchange-traded stock options specifically defined in the 1983 license agreement between Standard and Poor's and the CBOE.

S&P's charged the CBOE was using threats of lawsuits to prevent others from licensing the S&P's indexes for use in securities and debt instruments on which the CBOE has no license.

The suit stems from the withdrawal of a proposal by Denmark to issue a note whose value would be based on the S&P's indices.

''In threatening litigation concerning the proposed Kingdom of Denmark note issue and causing withdrawal of that offering, CBOE has diminished and-or jeopardized Standard & Poor's rights in the Indexes and service marks and has confused and misled the public as to Standard & Poor's rights,'' the suit said.

''After the withdrawal of the Kingdom of Denmark offering, CBOE continued to assert that it held the exclusive right to market any equity security or debt instrument that offers a return based in any way on movements in the value of the S&P 100 Index or the S&P 500 Index.'' it said.

The suit said Standard and Poor's has ''suffered severe harm to its reputation and impairment of its licensing businesses'' as a result of the CBOE actions.

S&P said under its licensing agreement with the CBOE, the exchange's use of the indexes is limited to options contracts on the S&P 100 Index and the S&P 500 Index traded on a securities exchange and issued by and settled through the Options Clearing Corporation or a similar clearinghouse, by payment of cash or the underlying security.

CBOE officers were unavailable for comment.

#90311u2592 11/07/1990 ~United Press International

ANAHEIM, Calif. (NOV. 7) UPI - Running back Marcus Dupree, who suffered what was thought to be a career-ending knee injury five years ago, Wednesday was activated by the Los Angeles Rams.

Dupree, 26, signed a two-year contract with Los Angeles Oct. 3 and spent the last few weeks on the practice squad, waiting for a chance to return to pro football. He is expected to get that opportunity Sunday against the New York Giants.

Dupree gained 905 yards as a freshman at the University of Oklahoma in 1983. He jumped to the New Orleans Breakers of the U.S. Football League and rushed for 681 yards on 145 carries, but tore up his knee in the 1985 season opener.

Coach John Robinson said Dupree should play Sunday at Anaheim Stadium, but not much.

''He's only played seven pro football games and nine college games,'' Robinson said. ''And that was five years ago. If you get on an airplane and the pilot's only flown 15 flights and that was five years ago, you'd get your ass off that airplane.

''If it were a pre-season game I'd play him about half the game. But this is not pre-season. We're playing a team you can't afford to make a mistake against. I can't afford to have him blow an assignment.''

Dupree, who reportedly signed for the league minimum of $70,000 plus incentives, took the roster spot held by Curt Warner, who was waived Tuesday. In another move, the Rams re-signed running back Fred Whittingham to the practice squad.

#90311u2756 11/07/1990 ~United Press International

(NOV. 7) UPI - Final elections results are rolling in and they show Republicans scoring impressive late victories in several Midwest industrial states. Among tight races too close to call last night, incumbent Democratic Governor James Blanchard of Michigan was narrowly defeated by Republican challenger John Engler. In Nebraska, Democrat Ben Nelson appeared to edge out incumbent Republican Governor Kay Orr, who has NOT yet conceded defeat. The G-O-P scored late gubernatorial victories in Illinois, where a Republican was stepping down, and Minnesota, which was held by a Democrat.

Phoenix is likely to lose the 1993 Super Bowl after Arizona voters yesterday rejected a holiday honoring Martin Luther King. N-F-L Commissioner Paul Tagliabue issued a statement today saying he will recommend to league owners that Super Bowl 27 be moved from Phoenix ''in the best interest'' of the N-F-L. The measure to establish a holiday for the slain civil rights leader was defeated by approximately 15-thousand votes in balloting by more than one-Million voters.

If all goes as planned- hardly a certainty around NASA- the shuttle Atlantis will blast off one week from tomorrow, carrying a spy satellite into space. While the exact launch time is classified, unidentified sources say Atlantis and its five-man, all-military crew are scheduled to blast off at 6:46 p-m E-S-T next Thursday and that the flight will last three days, 23 hours and five minutes.

A nationwide survey indicates Americans really are NOT worried about the energy situation despite their anger over rising gasoline prices. A poll of 36-hundred Americans conducted by New York management consultant Booz Allen and Hamilton Incorporated in the days immediately following Iraq's invasion of Kuwait found that energy ranked ninth among issues considered most important by those questioned. And less than 12 percent considered energy among the three most-important issues.

Longtime ecumenical activist the Reverend Joan Campbell has been nominated to be the new chief executive officer of the financially beleaguered National Council of Churches. The 58-year-old Campbell currently heads the U-S office of the World Council of Churches. She will take over the day-to-day operations of the nation's major inter- church agency as it seeks to complete a major internal re-organization. Campbell is virtually assured of election by the council's 220-member Governing Board, which meets next week in Portland,

Oregon.

Despite the dangers, sexual activity among teen-agers is increasing. That's the word in a new study by The Alan Guttmacher Institute in Washington, D-C. It finds that the sexual activity of teen-age girls increased in the 1980's, especially among whites and those in higher- income families, but the pregnancy rate remained stable because of greater use of contraceptives. The report says that in 1988, 38 percent of girls from 15-17 were sexually active.

Some prisoners have striped suits... others have green thumbs. The bountiful news from Rikers Island this harvest season is a bumper crop of fruit and vegetables in the New York City prison complex. The jail's farm program has produced a record crop of 132-thousand pounds of tomatoes, eggplant, cucumbers zucchini, green peppers, lettuce and string beans. The eight-acre farm on the western edge of the 440-acre island is tilled by nearly 100 prisoners who are paid up to 50 cents an hour. The food is distributed to dozens of feeding programs throughout New York.

#90311u2880 11/07/1990 ~United Press International

(NOV. 7) UPI - Winners are still celebrating their mid-term election victories as both Democrats and Republicans turn their focus the next big test... the 1992 race for the White House. Democrats say their gains in Sun Belt governors races in Florida and Texas is proof their party can use middle class pocketbook themes to win only their second presidential race in seven tries. But Republicans say if the new budget agreement helps the economy in the coming year, President Bush will win if he runs in 1992 because the public will be satisfied.

Women's groups are reacting with mixed emotions to the election results. They say that while a record high number of women ran for political office, NOT all were able to break the so-called ''glass ceiling'' of higher office. One significant victory is that of Democrat Ann Richards to become governor of Texas. But the equally important California governor contest was lost with the defeat of former San Francisco Mayor Dianne Feinstein. Women did win the two top elected posts in the District of Columbia... and Democrat Joan Finney won her bid to become governor of Kansas.

The White House says a search is under way for anti-drug chief William Bennett. He is expected to formally resign tomorrow after 20 months in office. Figures show that casual drug use is down and that cocaine prices are going up... an indication that supply is tighter. But statistics also show that drug-related violence is rising, particularly in many big cities. Administraion officials say Bennett wants to move on to a news challenge, and is satisfied that he has put the nation's drug fighting strategy in place.

A Georgia man described as bent on revenge against lawyers and the court system was indicted today for making the mail bombs that killed a federal judge and a lawyer last year. Walter Moody Junior was named in a 70-count indictment announced by Attorney General Thornburgh. If convicted on all counts, Moody could face seven life terms plus 110 years in prison and three-point-seven Million dollars in fines. Moody is in jail on UNrelated charges.

Tens of thousands marched in anti-government demonstrations across the Soviet

Union today... as President Gorbachev led a Revolution Day parade in Moscow's Red Square to celebrate the birth of Communist rule. Once an annual showcase of Soviet might, the military display this year was the shortest ever held, lasting a bare 30 minutes. It also showed a shift away from the Communist Party. The lineup of leaders atop the Lenin tomb showed Gorbachev and several trusted aides... instead of an all-powerful Politburo that ruled the country without legal dissent.

Researchers report ''surprising'' results on a new treatment that can open clogged arteries in some men with heart disease. Dr. Greg Brown of the University of Washington in Seattle says a combination of cholesterol-lowering drugs and a low-fat diet can unclog arteries in some cases and allow the patients to avoid surgery. Brown says a 32- month study found that men given intensive drug therapy had half as much disease progression and three times more reversal of blocked arteries than those given dummy drugs.

#90311u3018 11/07/1990 ~United Press International

(NOV. 7) UPI - Meir Kahne was buried today in Israel in an emotional service punctured by violence. Police estimate as many as 15- hundred people joined the four-hour funeral, with small groups breaking away to attack Arabs and journalists. The extremists, chanting ''death to the Arabs,'' wounded two Arabs and two policemen trying to break up the rioters. Kahane, an ultra right-wing rabbi, was shot and killed Monday night in New York.

An endorsement of racial reforms came today in South Africa. White voters gave the ruling National Party a decisive by-election victory over the right-wing Conservative Party. The National Party candidate polled 10-thousandcollar constituency, east of Johannesburg. That compares to 19-hundredwing Conservative Party candidate.

William Bennett will be stepping down tomorrow as the nation's first anti-drug director, with President Bush planning to accept his resignation at a White House ceremony. Administration officials say Bennett simply wants to move on... but does NOT have a new job in place. Bush Spokesman Marlin Fitzwater says a search for Bennett's successor is under way.

NASA today cleared the shuttle Atlantis for a nighttime launch next Thursday, six days later than first planned because of trouble with the ship's payload. The exact takeoff time is classified, but sources say Atlantis and its five-man, all-military crew will blast-off at 6:46 e-d- t. The mission to launch a spy satellite will last three days, 23 hours and five minutes.

The F-D-A today banned 223 ingredients in over-the-counter drugs, with the rules to take effect in six months. A spokeswoman for the NON- prescription Drug Manufacturers Association says the industry group expected the action she described as a ''housekeeping process.'' A consumer group, however, terms the

F-D-A actions- quote- ''better than NOthing.''

-30- 2029
#90311u3221 11/07/1990 ~United Press International
(NOV. 7) UPI - New York police today arraigned an Egyptian-born boiler repairman on charges of killing Meir Kahane. The arraigment took place at the suspect's hospital bedside. Police say the suspect volunteered a written statement denying he shot the anti-Arab rabbi.

Mikhail Gorbachev celebrating the birth of Communist rule in the Soviet Union by leading a parade today across Red Square in Moscow. But tens of thousands of others held Revolution Day protest rallies across the Soviet Union.

Nelson Mandela today criticized what he called Western hypocrisy. The black South African leader questioned why there is NO protest from the West when- in his words- ''Israel assassinates innocent defenseless Arabs.''

A Universal Studios security guard is being held on one-Million- dollars bail, charged in a fire last night that ravaged the studio's back lot. Police say the suspect was on duty shortly before the multi- Million-dollar blaze began.

Researchers say there's hope for heart patients wanting to avoid the knife. A University of Washington in Seattle study found cholesterol- lowering drugs and a low-fat diet can open clogged arteries in some men with heart disease.

A Georgia man is charged in a 70-count indictment of making the mail bombs that killed a federal judge and a lawyer last year. Attorney General Thornburgh announced the charges against Walter Moody in Washington.

A convicted California madam testified today in the Dallas fraud trial of failed thrift owner Don Dixon. Karen Wilkening says Dixon's defunct Vernon Savings and Loan was her biggest customer.

The new chief executives of Infotechnology say they'll sell major holdings, including Financial News Network and United Press International. The crisis at Infotech was triggered by a dispute with outside auditors.

-30- 1982
#90311u3315 11/07/1990 ~United Press International
(NOV. 7) UPI - Secretary of State Baker reiterated past U-S policy statements today in Turkey... where he stopped on his way from the Middle East to Moscow. Baker says the Bush administration wants to see a ''peaceful, diplomatic and political solution'' to the standoff with Iraq. But, Baker says, Washington ''canNOT rule out the possible use of force.'' A Soviet envoy today described Baker's eight-nation Mideast-European tour as crucial to developments in the gulf.

The art world is trying to recover today from a recession-induced shock. The season's first big auction failed to sell half the contemporary works offered, with only 34 of 77 paintings and sculptures finding buyers. There was bidding on all lots at the selling yesterday at Sotheby's gallery in New York... but in 43 of the works, bidding failed to reached the reserve price. Dealers say the prices are too high in an era of economic gloom and the threat of war in the Middle East.

An unusual rape trial continued in Oshkosh, Wisconsin, today with the testimony of a woman said to have 46 personalities. The 27-year-old woman told the jury the personality named ''Jennifer'' did NOT know what was happening to her when she and the defendant had sex in a car June 11th. Earlier, a psychiatrist testified the woman was traumatized when she saw her father crushed while he was working under a car.

In Mineola, New York, an inmate with a taste for steak pleaded guilty today to charges of stealing two slabs of meat when he was let out on bail provided by a Good Samaritan. Authorities say Derrick Ponder was the first Nassau County Jail inmate in 17 years to commit a crime while free on bail provided by a local businessman. At the time the bail was posted, Ponder was awaiting sentence on a petty larceny charge for stealing three steaks.

#90311x2379 11/07/1990 ~Comtex

WASHINGTON (UPI) _ The new chief executives of Infotechnology Inc., which owns 47 percent of Financial News Network, said Wednesday they plan to sell the cable business news network and other major holdings.

Alan Hirschfield and Allan Tessler also said they have hired Wertheim Schroder & Co., an investment banking firm that deals in media properties, ''to effect the most valuable and timely transactions for both the creditors and the shareholders of FNN and Infotech.''

Hirschfield took a leave of absence from Wertheim Schroder, where he was a managing director, to work as an interim CEO at Infotech and FNN.

''Our primary objective is to maintain the substantial franchise value of FNN '' they said in a statement. ''To do this requires making the necessary overhead reductions that enable the great majority of our employees to remain on the job.''

Infotechnology also owns United Press International, which has been put up for sale. The news agency said Friday it had been approached by six potential buyers, including several ''blue-chip companies,'' and imposed a 35 percent pay cut on non-union employees for 90 days to keep UPI operating until a sale could be negotiated.

On Monday, UPI's union employees were told that unless they voted to accept a 35 percent pay cut for the 90-day period, the 83-year-old wire service could be forced to shut down as early as Nov. 17, a day after the ballots are counted.

''As a result of recent contract cancellations and other ongoing factors, UPI currently has a substantial negative monthly cash flow,'' Hirschfield and Tessler said. ''It has been necessary to make some painful decisions regarding layoffs and reduced compensation to continuing employees in order for UPI to remain in business until suitable purchasers are identified.''

Hirschfield and Tessler, who replaced Dr. Earl Brian as CEO of Infotech, said ''serious interest'' has been expressed by several parties in the purchase of UPI ''and/or some of its lines of business.''

In an interview from his New York office, Hirschfeld said, ''It's a priority from the human side'' to keep UPI alive ''but clearly in terms of relative value, our first priority is maintenance of the FNN franchise.''

Hirschfeld added, ''We're hopeful we're not going to have to shut down'' UPI.

He also said a sale of FNN or UPI is contingent on an audit of Infotech's books that is expected to be completed Nov. 21.

The crisis at Infotech was triggered by a dispute over a charge that outside auditors said FNN should take against its fiscal fourth-quarter earnings for start-up costs of a new professional investors service called FNN:PRO.

FNN said it could be placed in default on bank loans if forced to report a substantial fourth-quarter loss because of the FNN:PRO charge.

In mid-October Infotech and FNN replaced Deloitte & Touche, the outside auditors, with Coopers & Lybrand to perform the audit of the companies' financial results.

On Oct. 24, FNN said it had outstanding debts of about $49.5 million in bank loans and about $88 million in equipment lease obligations. Infotech owes about $20.7 million on bank loans. As a result, Infotech and FNN said their operating cash flows were insufficient to meet operating expenses or debts.

''Discussions with our banks are ongoing,'' Hirschfield and Tessler said. ''We hope to obtain a 90-day moratorium on interest and principal payments and on any defaults.

''Furthermore, we have met with representatives of substantially all of the lessors of equipment to the companies and are currently in negotiations with them to obtain a 90-day moratorium on all leasing payments. There there can be

no assurance that we will obtain these moratoriums.''

FNN stock gained 75 cents to $3.25 a share at Wednesday on the over-the-counter market. Infotech stock rose 37.5 cents to $1.375 a share.

''Wertheim has confirmed for us that FNN remains a very valuable franchise and is one of the top 10 leading cable programming networks in the country,'' Hirschfield and Tessler said. ''To date, indications of interest in buying FNN have been received from many of the major national and international media companies.

''Even during this difficult period, FNN continues to increase its subscriber base and gross revenues,'' they said. ''More than 80 percent of its subscribers are under long-term contracts at increasing subscriber rates.''

Hirschfield and Tessler said many inquiries have been received about FNN's subsidiaries that deliver stock and other data to investors.

FNN and the other entities hope to ''receive acceptable offers and to conclude negotiations of the contracts for such sales by year end,'' Hirschfield and Tessler said, but added there are no assurances any sales will be completed.

The executives also said Infotech and FNN are cooperating with an investigation by the Securities and Exchange Commission but noted they ''are distressed by many of the unfounded rumors surrounding current events at the companies.''

The boards of both Infotech and FNN have taken very seriously allegations of fraud and misappropriation of funds at the companies and the outside auditors are thoroughly investigating these assertions, they said.

''To date, inquiries by a special committee of the board of FNN, assisted by auditors and legal counsel, have found only one incident in which company funds were improperly paid and not properly identified on the books of the company,'' the executives said.

''That incident, previously disclosed by FNN, involved the receipt by FNN's former chief financial officer of compensation payments, which were not properly authorized, in the approximate amount of $795,000.''

C. Stephen Bolen, the chief financial officer of FNN, was fired Oct. 12. He had been on leave since FNN began questioning certain payments to him.

#90312b0011 11/08/1990 ~Business Wire

BLUE BELL, PA (NOV. 8) BUSINESS WIRE - U.S. Bioscience Inc. (ASE:UBS), Thursday reported revenues of $752,780 and a net loss of $1,129,744, or 7

cents per share, for the third quarter ended Sept. 30, 1990.

The 1990 results compare to revenues of $101,971 and a net loss of $1,585,165, or 15 cents per share, for the same period of the prior year.

For the nine-month period ended Sept. 30, 1990, revenues were $2,045,344 and the net loss was $3,643,438, or 23 cents per share, compared to revenues of $184,413 and a net loss of $4,291,513, or 41 cents per share, for the same period of 1989.

According to Philip S. Schein M.D., chairman and president, the current year's results were favorably affected by the company's public offering in February 1990 and a private placement of Common Stock in September 1989. As a result of these two financing transactions, interest income increased, interest expense decreased, and loss per share was diluted by the issuance of new shares. Operating expenses were consistent with management's expectations and pertain principally to the company's drug research and product development programs.

Based in Blue Bell, U.S. Bioscience is a pharmaceutical company specializing in the development and commercialization of drugs to increase the survival and productivity of cancer patients. The company's portfolio includes an array of compounds, some of which are in late stages of development -- one in Phase-II clinical trials, two in Phase III clinical trials, and another with a New Drug Application pending with the U.S. Food and Drug Administration.

#90312b0020 11/08/1990 ~Business Wire

BENTONVILLE, Arkansas (NOV. 8) BUSINESS WIRE - Wal-Mart Stores Inc. (NYSE PSE:WMT) Thursday reported sales of $7,930,951,000 for the third quarter and $22,242,656,000 for the nine months ended Oct. 31, 1990, a 26 percent gain over the three and nine month periods a year ago.

Net income for the quarter increased 22 percent to $282,807,000 as compared with $232,702,000 for the same quarter in 1989. Fully diluted net income per share increased to 25 cents from 20 cents in the 1989 quarter. Net income for the nine months increased 24 percent to $809,181,000, or 71 cents per share, as compared with $650,038,000, or 57 cents per share, for the corresponding nine months of last year.

David Glass, president and chief executive officer, commented: ''Our associates' superb customer service efforts and the execution of our merchandising plans and operation disciplines have enabled us to meet our

sales and operating objectives for the nine month period.

''It is imperative that we build on this sales momentum as we enter the important holiday selling season. The overall economic uncertainty will provide sufficient challenges, but we believe we are well positioned to achieve our plans for the balance of the year.''

In the third quarter the company opened 68 new Wal-Mart stores (and closed three stores) and nine Sam's clubs, for a net addition of 7,788,592 square feet of retail floor space. One hundred four new Wal-Mart stores (three were closed), 18 new Sam's clubs and one Hypermart USA unit have added 13,134,596 square feet this year.

At Oct. 31 the company had 1,503 Wal-Mart stores (includes five Supercenter stores), 141 Sam's clubs and four Hypermart USA units compared with 1,347 Wal-Mart stores (includes three Supercenter stores), 118 Sam's clubs, 14 dot Discount Drug stores and three Hypermart USA units a year ago.

Wal-Mart operates in a 34-state trade area and its securities are listed on the New York and Pacific stock exchanges.

#90312b0021 11/08/1990 ~Business Wire

TORONTO, ONTARIO (NOV. 8) BUSINESS WIRE - During the course of a Special Shareholders meeting Nov. 7, 1990 the following information was disclosed in reply to questions from shareholders.

1/ The company is currently negotiating a license with a Japanese Corp. to establish the first RAM production facility in Japan. It is proposed that the company will hold an option for a period not to exceed three months. The company has undertaken to pay $100,000 for such option if satisfied by conditions of contract.

2/ Tetravalence Electronics of Hong Kong have advised that they will be visiting Canada in December of this year to effect license agreements for manufacture of RAM cells in China.

BTI believes that it is the intention of this group to establish two manufacturers in the Peoples Republic at the earliest possible date. Requirements for advance licensing fees will be immediately payable on formal signing of licenses.

3/ As a result of testing RAM product over the last 18 months, a major U.S. Battery Manufacturer has requested a meeting with BTI during the first week of

December to negotiate conditions of Licensing BTI's RAM technology.

The company concerned has carried out exhausting tests and applications of the RAM product which meet all of their marketing criteria. Further information will become available after the December meetings.

4/ A U.S. camera manufacturer has tested the RAM product for its application to a new product launch. The findings of this test have demonstrated the suitability of ram batteries for their specific product application.

Meetings with the company are scheduled for the end of November to contract for supply of product during the second quarter of 1991. It is anticipated that the initial product requirement will amount to approximately 3 million pieces.

5/ BTI has met with a major European Battery manufacturer to discuss the possible licensing of RAM technology in Europe. The company expects to meet with the European principals in early 1991 to advance negotiations towards a contract.

6/ Negotiations with a Taiwan battery company have been initiated. The Taiwanese company has expressed its serious intention to pursue license negotiations as soon as possible. BTI anticipates that any licensee with this company would be concluded during the early months of 1991.

7/ BTI's Turnkey manufacturer is currently proceeding with plant installations and debugging is anticipated to be complete by year end. The Canadian Licensee will commence commercial production of product during the first quarter of 1991.

8/ Sherwood Engineering, the Australian RAM licensee will commence production from the AA line during the first quarter of 1991. The managing director of Sherwood has advised BTI that he is currently negotiating a joint venture of the RAM project with a major Japanese trading company. The Sherwood facility will have a production volume of 270 million pieces per year.

ST. LOUIS (NOV. 8) BUSINESS WIRE - Senetek PLC (NASDAQ:SNTKY) Thursday announced advanced testing of the company's new drug therapy for male impotency has shown excellent results with no adverse side effects.

Dr. Thomas Gerstenberg's study of Senetek VIP/phentolamine drug formula was conducted in 52 impotent patients during a 22 month interval. Gerstenberg, an associate professor of urology at the University of Copenhagen, heads the Department of Urology at Herlev Hospital, Copenhagen, where clinical trials are performed.

The patients in the study were selected because they represent the most difficult forms of impotence to treat. Gerstenberg attributes the low dropout rate of patients during the study to ''the lack of side effects of VIP/phentolamine and the more normal action of this drug combination.''

Gerstenberg believes the drug will be approved for use in Denmark within a year if positive results from his study continue. Senetek intends to seek U.S. Food and Drug Administration approval in 1991.

Senetek is negotiating joint venture agreements with companies in Asia, Europe and the United States which it anticipates will be completed by 1991.

Dr. Gerlof Homan, Senetek's president and chief executive officer, said, ''There is a great need for non-surgical therapy for the 15 million cases of impotence in the United States, with another 18 million males affected by impotence in Europe.

''During 1985, impotence in the United States accounted for more than 30,000 hospital admissions and 400,000 outpatient visits, at a cost of more than $149 million.

''Senetek believes that its proprietary drug combination will become the treatment of choice for male sexual dysfunction. This therapy will be simplified by a single-dose, automatic disposable injector in which the product is made available.''

DENVER (NOV. 8) BUSINESS WIRE - CoCa Mines Inc. earned $52,700 on revenues of $5,880,900 for the quarter ended Sept. 30, 1990 compared to net income of $254,900, or two cents per share on revenues of $6,322,300 for the same period last year. The company's 1990 third quarter earnings includes a pre-tax gain of $349,800 from the sale of its remaining shares of Equity Silver Mines Ltd.

For the first nine months of 1990, CoCa Mines reported net income of $1,437,500, or 11 cents per share, compared to a net loss of $49,900 for the same period last year.

Third quarter production of gold and its equivalent at the company's 74 percent owned Shumake and Middle Buttes mines declined from 16,000 ounces in 1989 to 14,600 ounces in 1990. Middle Buttes was fully mined in December 1989 causing a reduction in Middle Buttes production to 400 ounces in 1990 compraed to 4,200 ounces in 1989.

The forward sales program resulted in an average gold price realized by the company of $403 compared to the spot price of $382. Direct operating costs declined from $259 to $215 per ounce. CoCa Mines has increased its forecast of 1990 gold production to 58,000 ounces.

CoCa Mines is a North American gold producer. Its shares are listed on the NASDAQ National Market System (COCA) and Toronto Stock Exchange (CMI).

SANTA CLARA, CA (NOV. 8) BUSINESS WIRE - FAX-PAK, a single-board package that combines fax, modem, scanner, phone switching and remote computer turn-on capability for PC users, was introduced Thursday by OnSpec.

The FAX-PAK consists of a single PC/AT half-size board that contains a 2400 baud modem, 9600 bps fax and phone switching and remote turn-on capabilities. The board also comes with a 100/200/400/800 dots per inch (dpi) half-page scanner and scanner software. It is the first product to combine all of these features in one package.

The FAX-PAK relies on a personal computer to manage its operations. In addition to unattended sending and receiving of faxes, it permits retrieval of fax documents for further review or editing on the PC.

With the half-page scanner, FAX-PAK allows the user to scan a document into his system and then fax it. With Optical Character Recognition (OCR) software scanned-in documents can be edited on the computer before faxing. It also allows editing of documents that have that have been received.

Geared toward small business owners, the remote turn-on capability of FAX-PAK allows managers to send and receive faxes without being present. This allows them to save on telephone costs because faxes can be set to go out at night or when rates are lower.

The suggested list price for FAX-PAK is $895. It will be distributed through computer retailers, wholesale dealers and OEMs. Prima International

distributes OnSpec products outside of the United States. The product will be available in December 1990.

OnSpec is committed to developing business communications solutions for fax, voice and data. OnSpec is well-known for its development of the PC FAX-3, a low-cost fax product for the IBM PC.

LOS ANGELES (NOV. 8) BUSINESS WIRE - Solution Selling, a company providing new training methods to help high-technology and services-related companies improve sales productivity and profitability, has opened offices in Los Angeles.

The successful Solution Selling training program is now available to companies and business professionals throughout Los Angeles county.

According to Michele Wrzesinski, president of Solution Selling, the program is a complete methodology, including management tools, designed to help all professionals involved in some aspect of sales and marketing.

The method, developed by successful sales leaders from Xerox Corp. and Apple Computers, teaches the salesperson how to treat the buyer as they would like to be treated and how to lead a prospect to the solution of a problem, rather than the sale of a product.

Wrzesinski (pronounced reh-ZEN-ski) has been in sales and sales management of conceptual and intangible products and services for over 18 years. She set sales records with Xerox Computer Services and was named Business Development Manager of the Year with Apple Computer prior to forming Solution Selling.

The Solution Selling program is based on extensive research on buying and selling behaviors. The training shows salespeople how to lead a prospect through the buy cycle to the conclusion that will solve the buyer's problem, with emphasis on the buyer's needs. This enables the buyer, and, in turn, empowers the salesrep to be successful.

Key elements of the program are new and proven ways of identifying and understanding the business issues of an organization and new techniques for establishing a problem-solving relationship with the client. Wrzesinski says, ''Helping is a major theme of our training. We focus on keeping the buyer and

seller in alignment throughout the entire process.''

According to Wrzesinski, ''The professionals who have been through our program have reported dramatic increases in their ability to handle their entire business. One customer who implemented Solution Selling in January 1986 did not miss a quarterly sales forecast by more than $300,000 in one quarter and was within $100,000 in two quarters on $200 million in revenue that year. And the company grew by 79 percent.''

''The Solution Selling methodology,'' she says, ''is the only one that I am aware of that incorporates product knowledge with selling skills and allows new reps as well as veterans to come up to speed quickly in new markets or products.''

Solution Selling offers their specialized training beginning immediately. Call 714/841-2346.

YUBA CITY, CALIF. (NOV. 8) BUSINESS WIRE - After a little more than a year as a Bank of California full-service banking office, Yuba City is relocating on Nov. 13 to a new, larger facility.

Yuba City was originally established as a loan production office in October 1988. The new office is located at 998 Tharp Rd., Yuba City.

''The new location will increase our ability to serve the growing marketplace '' said John Jelavich, vice president and regional manager of the office. ''The move is important to our expansion within Yuba City and is a strong indication of our commitment to the community. We hope the larger facility will give us greater visibility in the area.''

The Yuba City office will be located in a new all-brick building on the southwest corner of Highway 20 and Tharp Road. It will be highlighted by illuminated Bank of California signage on top of the building on three sides. The full-service office will house an automated teller machine, a sit-down teller counter, and private offices for client privacy.

Since its development as a full-service office, Yuba City has grown substantially. It primariy caters to the agriculture and real estate industries.

The sixth largest bank in the state, The Bank of California was the first incorporated banking institution in the west. The 126-year-old organization

has $8.6 billion in assets, 50 offices in California, Washington and Oregon, and 14 international offices.

DUBLIN, OH (NOV. 8) BUSINESS WIRE - ACCEL International Corp. Thursday announced net income of $5,801,000 for the nine months ended Sept. 30, compared to $4,048,000 for the like period in 1989, representing an increase of 43.3 percent.

Net income per share was $1.16 and 79 cents for the nine months of 1990 and 1989, respectively. All per share figures have been adjusted for the 5 percent stock dividend paid on June 4. Realized losses on the sale of investments were $115,000 for the nine month period ended Sept. 30, 1990 compared to realized gains of $194,000 for the like period in 1989. Gross written premium for the nine months ended Sept. 30, 1990 and 1989 were $97,402,000 and $81,170,000, respectively, representing an increase of 20.0 percent.

For the third quarter 1990 net income was $2,228,000, vs. $1,326,000 for the like period in 1989, representing an increase of 68.0 percent. Net income per share was 45 cents and 26 cents for the third quarters of 1990 and 1989,

respectively. Realized pre-tax gains on the sale of investments for the third quarter of 1990 were $20,000, compared to $81,000 for the like period in 1989. Gross written premiums for the third quarters of 1990 and 1989 were $36,273,000 and $30,034,000, respectively, representing an increase of 20.8 percent.

R. Max Williamson, chairman of the board, president, and chief executive officer of ACCEL commented, ''ACCEL's year to date earnings represent the highest nine months earnings in ACCEL's 21 year history, and we anticipate positive results for the remainder of the year.'' He further noted the company continues its diversification efforts with the third quarter introduction of a new property casualty product line consisting of animal mortality and farmowners multi-peril insurance coverages.

ACCEL International Corp. is a Dublin based holding company that provides specialty insurance products and services through its life and casualty subsidiaries, operating throughout the United States.

#90312b0101 11/08/1990 ~Business Wire

TAFT, CA (NOV. 8) BUSINESS WIRE - Berry Petroleum Co. (NYSE:BRY) Thursday announced net income of $3,952,000, or 18 cents per share, on revenues of $20,253,000 for the third quarter ended Sept. 30, 1990, compared with net income of $4.16 million, or 19 cents per share, on revenues of $12,801,000 for the third quarter ended Sept. 30, 1989.

Net income totalled $10,763,000, or 50 cents per share, on revenues of $46,427,000 for the nine months ended Sept. 30, 1990, compared with net income of $9,959,000, or 52 cents per share, on revenues of $33,969,000 for the nine months ended Sept. 30, 1989.

Revenues in 1990 included $7,197,000 and $5,267,000 for the company's new blending operations for the nine and three months ended Sept. 30, 1990, respectively, with no comparable revenues for the 1989 periods. In addition to the blending operation, revenue increases resulted from higher average prices received for the company's crude oil.

For the nine and three months ended Sept. 30, 1990, average crude oil prices were $14.68 and $16.50 per barrel, respectively. The crude oil prices for the nine and three months ended Sept. 30, 1989, were $12.75 and $13.22, respectively.

Due to higher crude prices received, oil and gas revenues increased 15 percent and 27 percent, respectively, in the nine and three months of 1990 vs. 1989,

while operating income from producing operations increased only 11 percent and 18 percent, respectively.

In response to the higher crude oil prices, the company has increased steaming operations, reworked many wells on its homebase properties and returned many previously marginal wells to production to increase production and profitability. The costs incurred to implement these activities depress current profits due to the lag time from implementation to increased production.

If crude oil prices remain near current levels, the company expects to achieve increases in production and net income beginning in the fourth quarter of 1990.

Berry Petroleum is a publicly traded, independent oil and gas exploration and production company with its headquarters in Taft.

ST. LOUIS (NOV. 8) BUSINESS WIRE - Robert M. Cox Jr. has been appointed senior vice president, development, and Senior Vice President and Controller Walter J. Galvin has assumed additional financial responsibilities at Emerson Electric Co.

The announcement was made Thursday by Charles F. Knight, chairman and chief executive officer, following the resignation of Executive Vice President and Chief Financial Officer William C. Bousquette.

Cox, who was president of Emerson's Rosemount Division, assumes a newly created position responsible for Emerson's development, planning, international and treasury functions. Galvin, who currently is responsible for Emerson's accounting and financial analysis functions, will have additional responsibility for the tax function.

Cox, 45, joined Emerson in 1975 as manager of international treasury operations, and has held various management positions including assistant vice president, international; vice president, finance at Rosemount; and vice president and treasurer of Emerson. He was named president of Rosemount in 1987.

Galvin, 43, joined Emerson's Ridge Tool Division in 1973, and has held various management positions including controller at Ridge Tool; assistant vice president, investor relations at Emerson; vice president of finance at the U.S. Electrical Motors Division; vice president of financial analysis and systems at Emerson; and vice president, finance and controller of Emerson.

Galvin was named a senior vice president in 1989.

Cox holds a bachelor of arts degree in business from Drury College and a master of business administration degree from Indiana University.

Galvin holds a bachelor of electrical engineering degree from Rensselaer Polytechnic Institute and a master of business administration degree from Cornell University.

Emerson Electric Co. manufactures a broad range of electronic, electrical and other products for consumer, commercial and industrial markets. The company's fiscal 1990 revenues totaled $7.6 billion.

ENGLEWOOD, CO (NOV. 8) BUSINESS WIRE - Intercontinental Enterprises Inc. (NASDAQ:ENTI) announced Thursday that it has set its 1990 annual meeting for Monday, Dec. 10, 1990.

The meeting will be held at 9 a.m. (local time) at the company's executive offices, 6455 S. Yosemite St., Englewood, Colo.

The purpose of the meeting will be: to elect a board of four directors to seve for the next year, amend the company's articles of incorporation to limit the personal liability of directors as provided for by Colorado law; to approve or disapprove the filing of a legal action for damages against the Securities and Exchange Commission for its role in causing the company's subsidiary, Blinder, Robinson & Co. Inc., to cease operations; to appoint independent accountants for the fiscal year ending January 1991; and to transact such other business as may properly come before the meeting.

As of Nov. 6, 1990, the company had 74,989,200 shares of the $.0001 par value common stock (''common stock'') outstanding, and no shares of preferred stock were issued or outstanding. Each share of common stock of record on the books of the company at the close of business on Nov. 12. 1990, is entitled to notice of and to vote at the annual meeting.

The company's stock is quoted in The Wall Street Journal each Monday in the NASDAQ Weekly Bid & Asked Quotations, listed as IntEnt.

#90312b0148 11/08/1990 ~Business Wire

ANAHEIM, CA (NOV. 8) BUSINESS WIRE - Autodesk (NASDAQ/NMS:ACAD) announced Thursday that it has reached an agreement in principle with ESRI, the worldwide leader in mapping and geographic information systems (GIS) solutions to produce a product that allows Mapping/GIS professionals to freely exchange files between Autodesk's AutoCAD and ESRI's ARC/INFO.

AutoCAD is the world's leading desktop-based computer-aided design program, with an installed base of over 400,000. Mapping/GIS professionals are increasingly turning to the CAD industry standard as a tool for Mapping/GIS data collection and editing.

ARC/INFO is a sophisticated analytical GIS system used in over 10,000 sites, and is a top contender for almost all the major GIS bids put out by industry and government.

The file transfer system will be developed, distributed and supported by ESRI, and will be based on Autodesk's new AutoCAD Development System (ADS) programming utility. ADS makes it possible to closely link existing software applications directly to AutoCAD.

The ADS file transfer application will be made available in ESRI's next release (v.5.1) of ARC/INFO. The agreement between the two companies also outlines furthering the relationship with enhanced technology, sales and marketing programs.

ESRI was founded in 1969 as a research group devoted to improving the methods of handling geographic data. Since then, ESRI has become a leading vendor or geographic information systems (GIS) software with clients located worldwide. ESRI also performs consulting/data automation services related to geographic information management.

Autodesk develops, markets and supports a family of computer-aided design, engineering and animation software products for desktop computers and workstations. For more information, customers may call 800/445-5415 or GO ADESK on CompuServe.

SAN FRANCISCO (NOV. 8) BUSINESS WIRE - Southern Pacific Lines Thursday announced a two percent rate increase on all trailer and container traffic, effective Dec. 10, 1990.

George C. Woodward, SP's executive vice president of distribution services, said the increase is ''a reflection of the continued upward pressure in fuel markets, as well as other costs.''

The increase will apply to all trailer and container traffic not already covered by separate fuel and cost escalation provisions, Woodward said.

''This moderate increase demonstrates Southern Pacific's determined efforts to absorb as much of the escalating fuel costs as possible,'' he said, ''to keep our customers competitive in the marketplace.''

Southern Pacific will review the need for price changes in 1991 based on the evolving costs of energy, labor and materials, he said.

WORCESTER, MASS. (NOV. 8) BUSINESS WIRE - Over 300 shiping executives, brokers, distributors and others interested in freight transportation services applauded the opening of a new, rail served container yard and intermodal service center in Worcester.

Owned and operated by Intransit Container Inc. (ICI) and served by the Providence & Worcester Railroad (P&W), the facility is bonded by U.S Customs.

Worcester Mayor Jordan Levy officiated at the ribbon cutting, and was joined by U.S. Congressman Joe Early, City Manager William J. Mulford, City Councilor Ray McGrath, Deputy Director of Port of Boston Frank Sheehan and Chamber of Commerce Chairman P. Kevin Condron.

Orville Harrold, P&W president, cited the significance of the combined efforts of Conrail and the Commonwealth of Massachusetts to provide needed track improvements to accomodate double-stack container trains into Worcester. Worcester is an ideal site for double-stack service due to its excellent transporation network.

Richard Sousa, president of ICI, noted that though the facility was opened today, this is just the beginning, since the ever-changing needs of the transportation industry will require the continuing efforts of ICI and P&W to develop new and innovative techniques to respond to the dynamics of the marketplace.

NEW YORK (NOV. 8) BUSINESS WIRE - Anthony B. Gliedman, 48, is joining Amrep

Corp., a real estate developement company, as executive vice president and CEO-designate, effective February 1, 1991.

Present plans are for him to succeed the current CEO, Howard W. Friedman, the latter part of next year.

Gliedman has been serving as executive vice president of The Trump Organization in New York City, where he has been responsible for housing, office, retail and hotel development efforts in New York City and Atlantic City. He has been with The Trump Organization since 1986.

''Tony Gliedman's 23-year real estate management and development experience will enhance Amrep's industry leadership and strengthen our senior management '' said Howard W. Friedman, chairman and chief executive officer of Amrep Corp. ''His impressive credentials will help drive our growth and better position us for the challenge in this decade and beyond. This is a planned step to ensure orderly succession of Amrep's management,'' he said.

The past four-and-a-half years with Donald was an enriching experience, both professionally and personally,'' Gliedman said. ''I admire him as an astute business leader and gained a great deal from working closely with him. The opportunity, however, to run a company with Amrep's reputation and scope of operations was too exciting to pass up.''

Prior to joining The Trump Organization, Gliedman held a number of senior government positions within the City of New York. During his 19 years with the City, he was Commissioner of the Department of Housing Preservation and Development (HPD) from 1979 to 1986, Commissioner of the Department of Ports and Terminals, Assistant to the Mayor for Labor Relations and Personnel, Director of Agency Analysis for the New York State Emergency Financial Control Board, Ombudsman for the Housing Development Administration (HDA), and Deputy General Counsel for HDA.

Gliedman, a graduate of Amherst College, received a law degree from Columbia University. He lives in Brooklyn with his wife, Virginia, and two sons, Christopher and Gregory.

Amrep Corp. (NYSE:AXR), headquartered in New York City, is a leading commercial and industrial property real estate developer and builder of affordable housing in New Mexico, Florida and a number of other states. It also owns Kable News Company, an international distributor of magazines which also provides subscription fulfillment services to publishers.

#90312b0211 11/08/1990 ~Business Wire

ATLANTA (NOV. 8) BUSINESS WIRE - Georgia Federal Bank FSB, the state's largest savings institution, reported net income of $7.3 million for the third quarter ending Sept. 30, 1990, compared to $6.5 million for the same period in 1989.

Georgia Federal's annualized return on assets for the third quarter was .67 percent, compared to .63 percent for the same quarter in 1989. In this period, the bank's annualized return on equity increased to 10.65 percent, from 10.56 percent in the third quarter of 1989.

Both deposits and loans have grown during the 12-month period from September 1989 to September 1990, with deposits increasing 3.6 percent, or $98.1 million and loans (excluding mortgage backed securities) increasing 4.8 percent, or $106.1 million.

Georgia Federal continues to enjoy a strong capital position with net worth totaling $276.6 million at Sept. 30, which is well above federal regulatory requirements as illustrated below:

	Minimum Capital Requirements	Georgia Federal Sept. 30
Tangible Capital	1.50 pct.	3.25 pct.
Core Capital	3.00 pct.	3.46 pct.
Risk Adjusted Capital	6.40 pct.	7.04 pct.

Headquartered in Atlanta, Georgia Federal is a wholly owned subsidiary of First Financial Management Corp. (NYSE:FFM). Georgia Federal currently operates 59 banking offices throughout Georgia (effective Nov. 10), as well as First Family Financial Services, a consumer finance company operating 191 offices in eight Southeastern states.

SAN FRANCISCO (NOV. 8) BUSINESS WIRE - With an extremely narrow margin of deciding votes on Mission Bay, Catellus Development Corp. said Thursday the election has not altered its development plans for the 315-acre neighborhood on San Francisco's waterfront.

"We are, of course, disappointed at the outcome of the election," said Vernon

B. Schwartz, president and chief executive officer of Catellus, "especially since it was so close." (Proposition I on the San Francisco ballot lost by 584 votes out of a total 196,700 cast.)

"We attribute the decision primarily to the overall negative mood of voters in the state and to the number of complex issues on the ballot. We are, however, encouraged by the 96,000 San Franciscans who voted for Proposition I, and we thank them for their support."

Proposition I would have provided an exemption for office development in Mission Bay from a 1986 measure (Proposition M) which restricts the amount of new office space that can be built per year in San Francisco.

Many of the public amenities in Mission Bay, including affordable housing, parks, wetlands, childcare centers, economic development programs and other benefits, are linked to commercial development in the project. "Mission Bay will still happen," Schwartz said. "Our immediate goal is to win approval from the Board of Supervisors for the development agreement."

The San Francisco board of supervisors is currently holding hearings on a development agreement for Mission Bay, which outlines the scope and process of the development. The San Francisco Planning and Port commissions both have unanimously approved the development agreement.

"It has always been our intent to locate our offices in Mission Bay," Schwarz said, " and we plan to move ahead with that, under the requirements of Proposition M, as well as with the linked development of market rate and affordable housing. In order to achieve the timely development of Mission Bay, however, we intend to obtain an exemption from Proposition M, and we will go back to the voters."

Jim Augustino, Catellus vice president and Mission Bay development director, said: "We've been a part of San Francisco for many years. We're not going to walk away from Mission Bay or from our commitment to San Francisco."

Catellus Development Corp., headquartered in San Francisco, is a major owner, developer and manager of property in 13 states in the West, Midwest and Southwest. The company expects to "spin off" from its parent, Santa Fe Pacific Corp., in December, at which time it will become the largest publicly traded real estate firm in the country.

MILPITAS, CALIF (NOV. 8) BUSINESS WIRE - LSI Logic Corp. (NYSE:LSI) received

the distinguished Defense Investigative Services' James S. Cogswell Award for Outstanding Industrial Security Achievement.

The Cogswell award is named after the first director of the Department of Defenses' Office of Industrial Security, which preceded the Defense Investigative Service. The Cogswell award is presented to defense contractors who have developed and maintained an excellent industrial security program. The security organization at LSI Logic has passed four consecutive inspections without any deficiencies. At the conclusion of each inspection, LSI Logic was rated the highest level of achievement.

The following is an excerpt from the letter of congratulations written by John F. Donnelly, director of the Defense Investigative Service:

''The presentation of this award reflects your personal commitment to the development and maintenance of an exceptional industrial security program. We applaud the efforts of yourself, your security staff, and all of your employees in achieving a secure environment for the protection of classified material.''

According to Dan Roblyer, manager of corporate security, ''At LSI Logic, we believe security is everyone's responsibility. We have an aggressive industrial security program and we have worked very hard to ensure the protection of classified materials. Our employees and security staff have done a great job and we are very proud to have received this honor.''

LSI Logic Corp. is a leading supplier of high-performance semiconductors. The company is the premier manufacturer and marketer of HCMOS application-specific integrated circuits (ASICs), with over 10,000 designs completed worldwide. In addition, the company manufactures and markets MIPS and SPARC architecture RISC microprocessors as well as a growing line of digital signal-processing circuits.

The company also develops and sells chip sets and graphic boards used in IBM-compatible computers. LSI Logic employs more than 4,000 people in the United States, Europe, Japan, and Canada. The company is headquartered in Milpitas (95035), at 1551 McCarthy Blvd.

SIMI VALLEY, CA (NOV. 8) BUSINESS WIRE - Rexon Inc.(NASDAQ/NMS:REXN), a leading producer of 1/4-inch cartridge tape and DAT drives, tape drive subsystems, software for file back-up and archival systems for personal computers and computer related products, Thursday announced unaudited results of operations for its fourth quarter and fiscal year ending Sept. 30, 1990.

For the three months ended Sept. 30, 1990, the company reported revenues of $41.1 million compared to $32.8 million reported for the like period one year ago. Net earnings of $2.3 million, or 22 cents per share was achieved, compared to net earnings of $1.5 million, or 17 cents reported for the fourth quarter last year.

For the twelve months ended Sept. 30, 1990, the company reported revenues of $158.2 million compared to $146.8 million reported for the like period one year ago. Net earnings of $8.5 million, or 82 cents per share were achieved, compared to net earnings of $9.8 million, or 90 cents reported for fiscal year 1989.

Rexon operates three independent subsidiaries, including Wangtek, which manufactures and markets 1/4-inch cartridge and DAT tape drives and tape drive subsystems through its operations in Simi Valley, Calif. and Ponce, Puerto Rico; the Tecmar subsidiary produces personal computer enhancement products through its operations in Solon, Ohio; and the Sytron subsidiary develops and markets software for file back-up and archival systems for personal computers through its operations in Westboro, Mass.

CHARLOTTE, NC (NOV. 8) BUSINESS WIRE - William P. Brophey, president and chief executive officer of Brad Ragan Inc. (ASE: BRD), announced Thursday that the board of directors of Brad Ragan Inc., has received an Agreement and Plan of Share Exchange proposed by The Goodyear Tire & Rubber Co. pursuant to which Goodyear would acquire the 556,924 shares of Brad Ragan common stock that it does not already own for $22 cash per share.

The total value of the proposed transaction would be approximately $12,250,000.

The plan is subject to approval of the board of directors of Brad Ragan Inc., as well as its shareholders. If the board of directors approves the plan, it will call a special meeting of the shareholders to consider approval of it.

Proxy materials containing details and conditions of the plan will be distributed to each shareholder in advance of the meeting. Goodyear already owns approximately 75 percent of the Brad Ragan common stock.

A special committee of the independent directors of Brad Ragan has been formed to study the proposal and make a recommendation to the board of directors regarding the offer. The company has engaged Interstate/Johnson Lane Corp. as financial adviser to the special committee to give advice with regard to the

Goodyear proposal.

The board expects to receive a report and recommendation from the special committee by the end of the month.

Brad Ragan Inc. is the largest U.S. producer of retreaded tires for off-highway vehicles and distributes new and retreaded off-the-road and truck tires through a network of 50 commercial tire centers in 20 states.

The company also operates a chain of 133 retail stores in the southeast, featuring products and services for the auto and home.

#90312b0344 11/08/1990 ~Business Wire

SAN JOSE, CA (NOV. 8) BUSINESS WIRE - Worth Corp. (NASDAQ:WRTH) Thursday reported results for the third quarter ended Sept. 30, 1990.

Worth Corp. is a holding company which owns 66 percent of Keegan Management Co. (NASDAQ:KMCI) and 20 percent of Mr. Coffee inc. (NASDAQ:JAVA).

Revenues for the third quarter 1990 decreased to $4,749,000 from $13,305,000 in the third quarter 1989, principally because Keegan Management Co. sold 31 of its Nutri/System weight loss centers in May 1990, the current economic downturn and negative publicity surrounding the weight loss industry also reduced revenue levels.

The operating loss for the third quarter 1990 was $899,000 compared with operating income of $492,000 in the corresponding quarter of 1989. Despite substantially reduced revenues and operating losses the company reported net income of $80,000, or 2 cents per share, in the third quarter 1990 reflecting the company's share of strong results of Mr. Coffee inc.

Net income in the third quarter 1989 was $869,000, or 15 cents per share, which included net income of $759,600 (14 cents per share) from disposition of Keegan Management Co. stock.

For the nine months ended Sept. 30, 1990 revenue was $26,008,000, compared with $36,388,000 in the corresponding 1989 period. An operating loss of $1,896,000 was recorded for the nine months ended Sept. 30, 1990, compared with operating income of $2,088,000 in the first nine months last year.

Net income was $5,556,000 or 96 cents per share for the nine months ended Sept. 30, 1990, compared with net income of $410,000, or 8 cents per share, during the like 1989 period.

Jean R. Perrette, chairman of the board of Worth Corp., stated that, ''Keegan's operations continue to be negatively impacted by the adverse publicity surrounding the weight loss industry and is beginning to be impacted by the economic recession, however, the company is focusing its energies on returning its Nutri/System weight loss centers to operating profitability and on protecting and enhancing its stockholders' value.''

Perrette also noted that during the third quarter of 1990, Mr. Coffee's sales increased 23.5 percent and that net income was approximately $2.4 million, up 68 percent from the third quarter 1989. The contribution from Mr. Coffee inc. to Worth Corp.'s net income was $479,000, and $2,180,000 in the quarter and nine months ended September 30, 1990.

''Successful new products, improved capital structure and a strong management team have contributed to the progress of Mr. Coffee and business trends continue in a positive direction despite difficult industry conditions. Fourth quarter orders at Mr. Coffee are strong, including those for newer products,'' said Perrette.

#90312b0358 11/08/1990 ~Business Wire

CALGARY, ALBERTA (NOV. 8) BUSINESS WIRE - Ranger Oil Ltd. (TsSE/MoSE/NYSE/PSE:RGO) reported that earnings for the first nine months of 1990 increased 68 percent to U.S. $25.0 million (28 cents per share) from U.S. $14.9 million (18 cents per share) for the like period in 1989.

Earnings after the effect of extraordinary items in 1989 were U.S. $42.0 million (52 cents per share).

Funds generated from operations for the first nine months of 1990 rose 40 Percent to U.S. $66.3 million (77 cents per share) from U.S. $47.4 million (60 cents per share) for the corresponding 1989 period.

Revenues increased 17 Percent to U.S. $110.2 million from U.S. $94.3 million as a result of increased Canadian production and higher oil prices. Production averaged 17,528 barrels of oil and 42.8 million cubic feet of gas per day for the nine months ended Sept. 30, 1990 (1989 -- 16,885 barrels per day and 28.8 million cubic feet per day).

Substantially all of the company's 6-1/2 percent Eurobonds were converted into 12.5 million common shares of the company during the third quarter of 1990, retiring debt in the amount of U.S. $74.9 million.

The company's working capital at Sept. 30, 1990, was U.S. $150.9 million.

VANCOUVER, BRITISH COLUMBIA (NOV. 8) BUSINESS WIRE - The company and Michael E. Marcovsky, together with Douglas R. Casey, Frank Mirgon and the committee, announce that they have concluded settlement agreements (the ''settlement'').

Pursuant to the settlement, the parties thereto have agreed to resolve all differences between and among them. In particular, the members of the committee agreed, among other things, to withdraw their consents to act as directors of the company, and the incumbent directors have been re-elected for the ensuing year. Additionally, the settlement provides that all pending legal proceedings between and among the parties will be dismissed.

In connection with the settlement, Marcovsky agreed to and has purchased 2,350,398 common shares of the company from Frank Mirgon, Annie Mirgon, Douglas R. Casey and Anna Charlotte van Eeden. As a consequence of this purchase, Marcovsky owns 3,467,974 common shares of the company. There are no persons of common shares of the company, excepting John Wheeler, who owns and exercises control or direction over a further 69,165 common shares of the company.

The Vancouver Stock Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of the contents herein.

#90312b0369 11/08/1990 ~Business Wire

SANTA ANA, CALIF (NOV. 8) BUSINESS WIRE - Amplicon Inc. (NASDAQ:AMPI) Thursday announced that net earnings for the three months ended Sept. 30, 1990 increased 60 percent to $1,558,000, or 26 cents per share, compared with $976,000, or 16 cents per share, for the first quarter of last year.

First-quarter revenues were $37,816,000 compared with $28,803,000 during the year-earlier period. Weighted average common shares outstanding were 5,985,000 and 6,202,000 for the three months ended Sept. 30, 1990 and 1989, respectively.

Commenting on first-quarter results, Patrick E. Paddon, president and chief executive officer, indicated that ''Amplicon's first-quarter results reflect the planned benefits from the company's investment in its sales force and tightened financial controls.

''While tight credit conditions have continued to dampen our ability to generate new business, Amplicon's sales force still achieved a 31 percent growth in revenue and 33 percent increase in gross profit. At the same time, we were able to limit the increase in our S,G&A expenses to 10 percent such that S,G&A expenses as a percent of revenue decreased from 6.7 percent to 5.7 percent.

''We expect this ratio to decrease further as we progress through the fiscal year. We have started to see an improvement in the competitive environment which, we believe, is good for the long-term health of our business. As a result, despite uncertain economic conditions, we believe Amplicon can continue to show strong earnings growth in 1991.''

#90312b0384 11/08/1990 ~Business Wire

SANTA CLARA, CALIF (NOV. 8) BUSINESS WIRE - RasterOps Corp. (NASDAQ:ROPS) Thursday announced it has shattered the price barrier for customers who want 24-bit color with fully-integrated TV technology on the Macintosh.

Through Jan. 5, 1991, RasterOps is offering its Video ColorBoard 364, the industry's first 24-bit color graphics product with live digital TV-in-a-window capability, at $1,295, thousands of dollars below comparable offerings. The promotion includes NTSC and PAL versions of the 364 product.

''RasterOps is continuing its history of 'firsts' with this promotion,'' said Frank Leonardi, senior vice president of sales and marketing for RasterOps.

''We were first in bringing 24-bit color under $1,000 to the Macintosh. Our custom VLSI chip technology allows us to quickly develop new products and pass along the cost savings to our customers.

''RasterOps is committed to making the most advanced 24-bit color graphics and TV technology available as quickly and as affordably as possible, so graphic artists, page designers and publishers can realize the benefits of this technology today.

''We believe this Video ColorBoard 364 offer is one of the most attractive holiday promotions and will reinforce our position as the premier supplier of fully integrated 24-bit color and TV technology in the industry,'' Leonardi said.

With 24-bit color, framegrabbing and real-time video display, the affordable 364 provides a versatile tool for multimedia applications, presentations, graphic design and desktop publishing. When bundled with applications such as MacroMind Director 2.0 or Audiomedia, the 364 becomes even more powerful, providing complete multimedia capabilities.

RasterOps, with headquarters in Santa Clara, designs, manufactures and markets photorealistic color-imaging products for the Macintosh, IBM PC, Sun SPARCstation and Digital RISC-based workstation platforms. RasterOps products are designed primarily for the graphic arts, printing, publishing and related industries.

#90312b0426 11/08/1990 ~Business Wire

WALNUT CREEK, CALIF (NOV. 8) BUSINESS WIRE - Central Banking System Inc. (CBSI) announced Thursday its third-quarter, 1990 results.

CBSI recorded net income of $19.1 million, or $4.48 per share, for the nine-month period ended Sept. 30, which was an improvement of $47.0 million from the net loss of $27.9 million, or $6.54 per share during the like nine-month period in 1989.

The net loss of $330 thousand or 8 cents per share for the three-month period ended Sept. 30 was an improvement of $14.7 million over the $15 million, or $3.51 per share loss recorded for the like three-month period in 1989.

The net gain recorded for the nine-month period ended Sept. 30 was primarily attributable to the gain realized from the sale of CBSI subsidiaries, Central Bank and CB Insurance Agency Inc. (CBIA), to Bank of the West (BW) on May 18 and to a reduction of losses from operations. For the three-month period

ended Sept. 30, the improvement was attributable to the exclusion of Central Bank and CBIA operating losses from the operations of CBSI.

The principal reason for the loss incurred over the past quarter is that expenses associated with the class action litigation, including payment of defense costs for current and former directors, officers and employees of CBSI pursuant to contractual indemnity obligations, when added to the ongoing operating expenses of CBSI exceeded the income generated by CBSI's investment portfolio.

As previously reported, the sale of Central Bank and CBIA to BW generated cash proceeds totaling $40.8 million. Contractual and other obligations of CBSI totaling $27.4 million were satisfied after closing this sale transaction.

The remaining net assets were immediately invested. As of Sept. 30, $13.2 million was invested in short term money market instruments, of which $13.1 million was and is managed by the Asset Management Division of Wells Fargo Bank. As of Sept. 30, the aggregate yield to maturity of these investments was 7.99 percent.

#90312b0436 11/08/1990 ~Business Wire

SAN DIEGO (NOV. 9) BUSINESS WIRE - Kaypro Corp. recently filed a report detailing operations for the month of September.

The operating report, which is required by the U.S. Bankruptcy Court, showed gross sales of $818,000 and a net operating profit of $41,000. This is the second consecutive month that Kaypro has reported profitable operations.

Having experienced a considerable financial downturn, the computer company filed for Chapter 11 protection in March of this year. In June, Kaypro creditors supported a motion for Chapter 7 conversion, noting further financial difficulties. Then, pending installation of new upper management, the case was continued.

In August, the decision was again continued until Oct. 3, giving the newly appointed president and chief executive officer, Geoffrey Soule', time to take control. The October hearing resulted in a dismissal of the Chapter 7 motion and, citing positive financial progress, the case was taken off the calendar.

''Posting two profitable months in a row gives us an optimistic outlook toward Kaypro's future,'' noted Soule'. ''Many of our sales and operational strategies are beginning to take hold, producing some impressive results. I see no reason why Kaypro cannot maintain this positive trend.''

For September, Kaypro reported gross sales of $818,000 and a net profit of $41,000, the second profitable month in many years. September sales figures maintained August gains, which more than doubled July sales of $406,000. During the month of June, sales totaled $84,000. Soule' attributes this upward trend to several factors.

''Day-to-day operations at Kaypro have been streamlined considerably,'' explained Soule'. ''This has allowed us to accommodate volume orders from large mass merchandisers and to respond quickly to specialized retail dealers. These changes have resulted in higher sales figures and better profitability.''

With nearly four decades of experience in the high-tech/electronics industry, Kaypro is an internationally recognized brand name. Currently, Kaypro Corp. enjoys a user base of more than a half-million computer systems worldwide and markets a full line of microcomputers for businesses and individuals.

CANTON, MA (NOV. 8) BUSINESS WIRE - Nov. 8, 1990, Hills Department Stores, Inc. (HDS/NYSE) today announced that total sales for the four- week period ended November 3, 1990 increased 10.6% to $178.8 million from $161.7 million for the corresponding period in 1989.

Same store sales for October 1990 increased 6.0%.

Sales for the third fiscal quarter ended November 3, 1990 increased 5.9% to $557.1 million from $526.1 million for the corresponding period a year ago. Same store sales increased 1.7%.

Sales for the thirty-nine week period ended November 3, 1990 increased 8.3% to $1,467.2 million from $1,354.2 million for the corresponding period a year ago. Same store sales increased 4.7% during this period.

Hills reported sales in fiscal 1989 based on a 53-week year. Consequently, the ending dates for 1990 fiscal months are one calendar week later than the corresponding 1989 fiscal month ending dates.

Had the Company reported results based on a 52-week year, the comparable quarter calendar period would have reflected an increase of 9.2% for total sales and an increase of 4.7% on a same store basis. Results for the comparable thirty-nine week calendar period would have reflected increases of 6.2% and 2.8%, respectively.

Hills Department Stores, Inc. is a discount store chain, operating in 14 states, with 214 locations compared with 204 stores a year ago.

MIAMI (NOV. 8) BUSINESS WIRE - Advanced Viral Research Corp. announced Thursday that it entered into a preliminary agreement with Biocor - Arm, a science productive cooperative organization located in Armenia, Soviet Union, for testing of AVR's product reticulose, on approximately 2000 people in Armenia.

AVR anticipates that the testing will be primarily on influenza patients. AVR has agreed to supply the necessary ampules of reticulose for testing, and Biocor - Arm has agreed to assume the expenses of the testing and to furnish AVR with the test results.

Commencement of testing is subject to the approval of the Ministry of Health of the Republic of Armenia.

AVR also announced Thursday that its rescission offer to shareholders who exercised 6,766,350 ''B'' Warrants between May 1, 1987 and July 1, 1988 has expired. AVR will pay an aggregate of $2,330 to shareholders who exercised their recission right during the recission offering period.

For further information about AVR, contact William Bregman, secretary/treasurer, at Advanced Viral Research Corp., Dupont Plaza Center, 300 Biscayne Boulevard Way, Suite 724, Miami, Fla. 33131; telephone number 305/374-4847.

SAN FRANCISCO (NOV. 8) BUSINESS WIRE - URS Corp. (NYSE:URS) Thursday announced that it has successfully renegotiated debt agreements with Wells Fargo Bank that result in the company being in compliance with all financial covenants.

The company had previously announced that certain covenants had been violated due to the closure of its Mitchell Management Systems subsidiary in April 1990. Wells Fargo Bank had waived violations of non-financial covenants and agreed to forbear until Nov. 1 from enforcing its rights under the credit agreement.

As a result of negotiations between URS and Wells Fargo, the company's interest rate on $18,500,000 of revolving credit and short-term notes was increased by 1/2 percent to 2 percent over the bank's prime interest rate.

URS also announced that it has renegotiated the terms of the lease on its Cleveland, Ohio facility converting it from a capital to an operating lease. The change has a positive effect on the company's current financial condition and upon future operating results.

URS, through its subsidiary, URS Consultants Inc., is a nationwide consulting firm with 25 offices which provides planning, architectural, engineering and construction management services to a wide variety of public and private clients.

SAN JOSE, CA (NOV. 8) BUSINESS WIRE - CHIPS and Technologies Inc. (NASDAQ/NMS:CHPS) Thursday announced a programmable software accelerator CHIPSet which easily implements a high performance/low cost accelerator subsystem for both Industry Standard Architecture and Enhanced Industry Standard Architecture bus standards.

The Programmable Universal Micro Accelerator (PUMA) is a two chip CHIPSet which directly accelerates graphics intensive operations in applications software. PUMA functions like a co-processor: the microprocessor offloads to PUMA certain compute intensive software routines.

PUMA then sends the completed calculation directly to video memory. The result for the end user is a three- to ten-fold performance improvement for complex graphics functions. PUMA's operations are transparent to both the application software and the rest of the system.

At the Fall Comdex Show CHIPS demonstrated PUMA accelerating AutoCAD and the Windows 3.0 graphical user interface, as well as acceleration of WYSWIG printing on a laser printer under Windows 3.0. Additional functionality can be added to existing PUMA-based boards through software provided by CHIPS or third party software vendors.

At the heart of the PUMA CHIPSet is the 50 MHz 94C2001 PUMA-P processor. Using 64-bit wide microcode, PUMA-P can execute multiple operations in a single instruction which takes between two to five clock cycles.

Linking PUMA-P to the host system is the 94C2002 PUMA-I interface chip. PUMA-I has the capability to be a bus master on both the ISA and EISA buses, thus allowing PUMA-P to have complete access to the system's memory and input/output.

The PUMA architecture accelerates graphics without requiring a special frame buffer. PUMA can simply go through the bus and use the system's standard display adaptor, such as a Video Graphics Array or 8514/A-compatible video system.

The PUMA CHIPSet will be available for sampling in February 1991 and in production quantities in April 1991. Pricing for the ChipSet is $90 in volume quantities.

CHIPS and Technologies Inc. is the world's leading supplier of VLSI proprietary CHIPSets and software solutions of high-performance microcomputer systems based on evolving industry standards.

SUNNYVALE, CA (NOV. 8) BUSINESS WIRE - ILC Technology Inc. reported sales from continuing operations of $25.6 million for its fiscal year ended Sept. 30 1990, up 16 percent from comparable sales of $22.0 million reported in fiscal 1989.

Income from continuing operations was $1.78 million in fiscal 1990 compared to $1.38 million in fiscal 1989. The company completed the divestiture of its United Detector Technology division during 1990, and reported net income from discontinued operations for the year of $393,000.

The loss from discontinued operations in 1989 was $3.04 million. The combined operations resulted in net income of $2.18 million, or 95 cents per share, for fiscal 1990 compared to a net loss of $1.66 million, or 75 cents per share, in fiscal 1989.

Sales from continuing operations for the fourth quarter ended Sept. 30, 1990 were $8.07 million compared to $5.48 million for the fourth quarter ended Sept. 30, 1989. Net income from continuing operations was $726,000, or 32 cents per share, for the current quarter compared to $301,000, or 14 cents per share, for the quarter ended Sept. 30, 1989.

For the fourth quarter of 1990, net income from discontinued operations was $325,000, or 14 cents per share, and resulted from the tax benefit of utilization of net operating loss carry forwards, compared to a net loss of $1.17 million, or 53 cents per share, for the fourth quarter of 1989.

The combined operations resulted in net income of $1.05 million, or 46 cents per share, for the fourth quarter of fiscal 1990 compared to a net loss of $871,000, or 39 cents, for the fourth quarter of fiscal 1989.

ILC manufactures high performance light source products including laser flash lamps, fiberscope illumination lamps, spacecraft lighting, film set lighting, and associated equipment. The company's light source products are principally used for industrial, military and medical solid state laser excitation and for aerospace and medical illumination applications.

SAN DIEGO (NOV. 8) BUSINESS WIRE - Jostens Learning Corp., the largest educational software publisher in the United States, recorded revenues of $121 million in the fiscal year ended June 30.

This figure represents a 41 percent increase from the previous fiscal year, making Jostens Learning the strongest performer in the Jostens Inc. family and positioning it into one of the biggest microcomputer software companies in the United States.

John Kernan, chairman and chief executive officer, said: ''The decade of the '90s holds exciting potential for Jostens Learning as America's schools accelerate the use of technology.''

With its technology-based systems now utilized by over 5,000 of the nation's elementary schools, Jostens Learning has strengthened its position as the market leader. The company was formed in May 1989 as a result of the merger between Education Systems Corp. and Prescription Learning Corp.

Highlights this year included release of the Compton's MultiMedia Encyclopedia developed in cooperation with Encyclopedia Britannica, and an investment in Optical Data Corp., the New Jersey-based producer, publisher and distributor of educational videodiscs and multimedia products.

#90312b0631 11/08/1990 ~Business Wire
TAMPA, FL (NOV. 8) BUSINESS WIRE - History is coming to life from over a thousand feet below the ocean's surface.

Seahawk Deep Ocean Technology (NASDAQ:SDOT) working with Harbor Branch Oceanographic Institution has completed its initial phase of surveying and selectively recovering artifacts from its second deep water colonial Spanish era shipwreck.

According to expedition archaeologist, Robert Marx, the wreck appears to be Spanish from the early 1700s, and is located 50 miles east of St. Augustine, Fla. over 1000 feet deep.

Two cannons, a spyglass, copper cooking pots, ballast stones, leather, a mill stone and numerous cannonballs are among the first artifacts recovered from the wreck.

The predisturbance survey of the wreck site shows a dozen cannons on the surface. Some of the recovered cannonballs are too large for the visible cannons, so Seahawk expects to find additional larger cannons when full excavation begins next summer.

The predisturbance survey was conducted with Harbor Branch's Johnson Sea-Link submersible launched from the 165-foot R.V. Edwin Link. The Johnson Sea-Link is a 4-person submarine capable of working in depths up to 3000 feet. To mark where artifacts were removed, Harbor Branch designed a device called the ''Pez dispenser.''

Each time an artifact is picked up the dispenser shoots out a tiny steel weight, wrapped in florescent ribbon, with a numbered float attached. The ribbon unwraps and the number on the float points directly up about a foot above the weight, marking the spot for archaeological logging.

Full excavation of the shipwreck will be accomplished with Seahawk's remotely operated vehicle (ROV), Merlin, launched from the 200-foot Seahawk Retriever.

Currently Merlin and the Seahawk Retriever are excavating a colonial Spanish galleon in 1500 feet of water approximately 65 miles southwest of Key West, 20 miles south of the Dry Tortugas. That wreck appears to be from the 1622 fleet the same one as the famed Atocha, found by treasure hunter Mel Fisher.

To date the wreck has yielded dozens of gold bars, over 300 silver coins, three mariner's astrolabes, dozens of intact ''olive jars,'' and various one-of-a-kind artifacts such as an Italian-made ceramic plate with the Papal

seal on it, and a small silver fork with a Papal key stamped on it.

MILPITAS, CA (NOV. 8) BUSINESS WIRE - Octel Communications Corp. (NASDAQ/NMS:OCTL) and Tel Plus Communications, a Siemens company, Thursday announced the signing of a distribution and original equipment manufacturer

(OEM) agreement under which Tel Plus will purchase in excess of $20 million in Octel voice processing systems over a two-year period.

Under terms of the agreement, Tel Plus renews its contract to distribute Octel's six-product Aspen family of voice processing systems to new customers and its installed base in the United States. Tel Plus began distributing Octel systems in 1984.

Also under the agreement, Tel Plus for the first time will begin offering a small-capacity Octel voice processing system with its smaller private branch exchange (PBX) products. The OEM product is to be marketed as the Tel Plus Voice Processing Module (VPM) and sold with Siemen's HCM-200, Saturn 1, Saturn 2E and Saturn 3 PBX's.

Octel Communications Corp. designs, manufactures and markets a full line of high-performance voice processing systems. Octel's Aspen product line is sold in the United States, Canada and overseas to small businesses and large multisite corporations.

The Sierra multiple-application voice processing platform is a very large capacity system designed to meet the special needs of telephone companies and other voice information service providers. Octel was founded in 1982 and has headquarters in Milpitas.

#90312b0637 11/08/1990 ~Business Wire

NEW YORK (NOV. 8) BUSINESS WIRE - Phoenix Re Corp. (NASDAQ/NMS:PXRE) Thursday announced results for the third quarter and nine-month period ended Sept. 30, 1990.

The third quarter was profitable although the company's nine-month earnings continued to reflect the adverse effects of losses incurred from the European windstorms during the first quarter, the highly competitive pressures that exist in the insurance and reinsurance markets, and the increased cost of the company's ceded reinsurance.

Revenues for the third quarter of 1990 were $8,331,000 or 15 percent less than revenues of $9,833,000 for the same period last year, and reflected lower earned premiums in the current year.

Furthermore, the third quarter 1989 premiums contained substantial amounts of premiums charged to ceding companies to reinstate coverages exhausted by claims related to Hurricane Hugo. Net income for the quarter was $783,000 or 19 cents per share compared with $48,000 or 1 cent per share last year.

For the first nine months of 1990, the company's revenues declined 10 percent to $26,706,000 from $29,724,000 in the same period last year. The company reported a loss of $511,000 or 13 cents per share for the first nine months of 1990 versus net income of $3,006,000 or 74 cents per share in the year-earlier period.

Net premiums written for the third quarter were $7,146,000 or 15 percent less than the $8,418,000 reported in the same quarter last year. For the year to date, net premiums written were $21,256,000 compared with $24,069,000 for the year-earlier period, representing a reduction of 12 percent.

The statutory combined ratio for the first nine months was 119.9 percent and continued to improve relative to prior quarters. This compared with 102.9 percent for the same period last year.

The third quarter's combined ratio was 93.6 percent compared with 120.1 percent last year, reflecting the fact that catastrophe losses for the third quarter of 1990 were far less than those caused by Hurricane Hugo during the same period last year.

Phoenix Re provides reinsurance products and services to a national and international marketplace, with principal emphasis on commercial and personal property risks. The company's common shares trade on the NASDAQ National Market System under the symbol PXRE.

#90312b0638 11/08/1990 ~Business Wire

CHARLOTTE, NC (NOV. 8) BUSINESS WIRE - Verbatim Corp. Thursday introduces the second generation of rewritable optical disks.

The new 128MB capacity 3.5 inch rewritable optical disk is the most recent in a series of product introductions that include Verbatim 4MB floppy diskettes and 5.25 inch rewritable optical disks.

Verbatim's rewritable optical disks meet ISO standards for media compatibility and so will operate in all ISO standard 3.5 inch optical drives.

Just like the 5.25 inch rewritable from Verbatim, these disks have a proprietary layering system, making them virtually impervious to moisture, dirt, air pollution and extreme temperatures.

The media is structured for more than 1 million write/erase/read cycles. Optical disks have all the advantages of floppy diskettes -- removability,

portability and fast access to data -- yet one optical disk stores enough data to fill more than four 30MB hard drives.

Additionally, optical disks are much more durable than hard disks. This durability means that stored data is expected to last at least 10 years, and perhaps as long as 50 years on a Verbatim optical disk.

The capacity, random accessibility and durability of Verbatim optical disks make them ideal for unattended back-up; archival storage; document management; external memory for mainframes, minis, micros, word processors and local area networks; text and graphics filing systems; financial database storage; and desktop publishing and CAD libraries.

Verbatim Corp., headquartered in Charlotte, is a world leader in computer information storage products, including optical disks, floppy diskettes, reel tape and data cassettes and cartridges.

For more information about optical disk technology, write or call Verbatim Corp., 1200 W.T. Harris Blvd., Charlotte, N.C. 28262; 800/538-8589.

#90312b0639 11/08/1990 ~Business Wire

LOS ANGELES (NOV. 8) BUSINESS WIRE - Winners Circle Inc. (NASDAQ:WNRS), which does business as High Five Sportwear, Thursday announced record sales for the month of October 1990.

The company, which designs, manufactures and sells apparel for the corporate and promotional industry, posted total sales of approximately $850,000 for the month of October, far outstripping its previous monthly record of approximately $600,000. The orders taken in October are expected to be shipped in November and December of this year.

Lester D. Abrams, the company's president, noted that October's results received a substantial boost from a $560,000 order of apparel by Paramount Home Video Corp.

He went on to voice his belief that the month's results reflected the return of Winners Circle's internal sales staff to the marketing of the company's products from diversions inherent in the completion of its initial public offering and the early stages of implementing its long-range business plan.

''Prior to the completion of our offering, Winners Circle had a very small sales and administrative staff, so that, when we were forced to focus on that transaction, there were only so many people to go around, and subsequently our sales suffered during that time,'' Abrams stated.

Winners Circle's core business involves the design, manufacture and sale of garments, including jackets, sweatshirts, sweatpants and T-shirts that carry the logo, slogans or other promotional messages of customers, such as Paramount Home Video, the Disney Cos., Wells Fargo Bank, Motown Records, the Los Angeles Lakers, MGM/UA, General Rent A Car, Warner Bros., BASF Corp. and a variety of ski companies.

The products are used to enhance the customers' image, sell their products and increase employee performance and morale. The company's initial public offering was consummated in late July of 1990.

#90312b0644 11/08/1990 ~Business Wire

SAN JOSE, CA (NOV. 8) BUSINESS WIRE - Impact Systems Inc. (OTC:MPAC) Thursday announced that for the second quarter ended Sept. 30, 1990, it had net revenues of $4.9 million and a net loss of $1.2 million.

This compares to net revenues of $7.1 million and a net loss of $1 million for the comparable quarter of last year.

Revenues for the quarter were down from last year's comparable quarter due to the existing backlog which is heavily skewed to the fourth quarter.

Gross margins have increased reflecting significant progress on the newer products. Although only 2 percent higher than last year, gross margins would have been 45 percent this quarter had revenue levels been the same as last year.

This is a result of the allocation of certain manufacturing overhead costs on a lower shipment level. Operating expenses, although lower than last year's comparable quarter, were higher than the prior quarter as a result of the weakening of the U.S. dollar compared to foreign currencies, increased cost of travel, certain costs associated with the company's expansion into the Far East and non-recurring engineering material expenses.

Impact's products are sold on the basis of improved quality and efficiency of manufacturing during economic slowdowns, as well as increasing production during economic expansion periods.

PHOENIX (NOV. 8) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ:AWAL; PSE:AWA) reported October 1990 traffic rose to 963,278,000 revenue passenger miles, or 47 percent over October 1989.

Available seat miles for the month rose 39.3 percent over last year to 1,662,685,000, producing a passenger load factor of 57.9 percent.

Peter Otradovec, vice president of planning, said: ''We continue to experience very positive growth trends in our traffic. For the first 10 months of 1990, our capacity has increased 35 percent while revenue passenger miles has surged 45.4 percent. Correspondingly, America West's year-to-date passenger load factor has increased to 61.5 percent from 57.1 percent in 1989.''

America West currently operates a modern, fuel-efficient fleet of 96 aircraft including Boeing 747s, 757s, 737s and de Havilland Dash 8s. The airline employs more than 14,000 people in its 60-city route network which stretches from coast to coast and across the Pacific to Honolulu, Hawaii. The carrier recently received Department of Transportation authority to provide service between Honolulu and Nagoya, Japan.

NASHVILLE, TN (NOV. 8) BUSINESS WIRE - Dr. Jerome S. Tannenbaum, president and chief executive officer of REN Corporation-USA (NASDAQ/NMS:RENL), Thursday announced the opening of two REN Centers in Florida and one in Kentucky.

These additions bring to 27 the number of centers owned or managed by REN throughout the Southeast and Southwest.

REN Center - Sarasota is a newly developed, 17-station facility which received Medicare certification on Oct. 31, 1990. The facility in Boca Raton has 15 stations and was Medicare certified on Nov. 7, 1990.

REN Center - Hopkinsville, the first REN facility in Kentucky, was acquired from a local hospital and currently has six stations, serving 40 patients. To date in this calendar year, the company has added 12 dialysis facilities.

The new facilities in Sarasota and Boca Raton increase to four the number of centers owned or operated by REN in Florida. REN presently operates centers in Daytona Beach and Orlando. Robert Colton, M.D. and Robert Sonneborn, M.D. will serve as Medical Directors of REN Center - Boca Raton. Steve Weinreb, M.D. will serve as Medical Director of REN Center - Sarasota.

REN Center - Hopkinsville was acquired from the Jennie Stuart Medical Center. REN plans to build a freestanding dialysis center near the hospital in the near future. The projected facility will have 16 dialysis stations in a 5,000-square-foot building. The Medical Director for REN Center - Hopkinsville is Dr. Sam Traughber, who has practiced in the area for over 15 years.

REN Corporation - USA is engaged primarily in providing renal dialysis services to patients suffering from chronic kidney failure. Dialysis services are provided principally at the company's 27 freestanding outpatient REN Centers located in 10 states. The company also provides outpatient dialysis services to patients in their homes and inpatient dialysis services through contracts with 20 hospitals.

In addition, the company performs blood, tissue and urine testing services for its REN Centers, as well as for independent physicians and industry, at its three clinical laboratories. The company's common stock is included in the NASDAQ National Market System under the symbol ''RENL.''

#90312b0649 11/08/1990 ~Business Wire

CAMBRIDGE, MA (NOV. 8) BUSINESS WIRE - Genzyme Corp. (NASDAQ;GENZ) Thursday announced that it has signed an agreement with Japanese partners establishing a joint venture to develop and sell pharmaceutical proteins produced by high-yield transgenic animal production systems.

The joint venture will be owned 75 percent by the Japanese partners and 25 percent by Genzyme. The shareholder's initial capital contribution to the joint venture will amount to approximately $4 million and will be increased to approximately $7 million over a three year period.

Genzyme Corp. has achieved international recognition as a world leader in the development of transgenic animals for the production of human pharmaceutical proteins. This technology involves the microinjection into embryos of livestock species of genetic material (DNA), which encodes a foreign protein and regulates protein production in the mammary gland. These embryos are transferred to recipient mothers for gestation.

The resultant offspring, upon maturation and breeding, then secrete the foreign protein into their milk. The proteins are then purified from the milk and packaged as pharmaceuticals. It is expected that the development of this technology will enable the low cost production of large quantities of therapeutic proteins which are complex and expensive to produce by current methods.

In 1987, the company was the first to report that it had succeeded in developing transgenic mice which produce human tissue plasminogen activator in their milk. This valuable cardiovascular protein is used to treat heart attacks. Using a mouse model system, the company has since achieved levels of expression which greatly exceed those obtained to date by standards methods. Genzyme is currently developing transgenic goats for the commercial production of medically important proteins.

The joint venture has been granted an exclusive license to employ Genzyme's proprietary transgenic to produce proteins in East Asia. The joint venture will also have rights in East Asia and Europe to market proteins produced using the licensed technology. Upon incorporation, the joint venture will contract Genzyme to conduct a three-year R&D program to develop transgenic technology for the production of certain pharmaceutical proteins including a protein to combat intravascular coagulation.

Genzyme will receive approximately $5.9 million in research support payments over three years as well as milestone payments for certain technical achievements.

Genzyme Corp. is a diversified human health care products company that has a distinctive industry position based on its product development and operating strengths in three major business areas: biotherapeutics, diagnostic products and services; and pharmaceuticals and fine chemicals.

The company is headquartered in Cambridge, Mass. Production and research facilities are located in Cambridge and Framingham, Mass., and in Maidstone and Haverhill, England and the company's international sales and marketing office is located in Tokyo.

SANTA CLARA, CA (NOV. 8) BUSINESS WIRE - Newly formed Nexel Corp. announced this week the make-up of its management team and product development plans for the next year.

The new company was incorporated in the state of California in 1990. It is privately held by co-founders S.Y. Kuo, vice president of engineering, Kent Marshall, chairman, Mike Raghavan, president and Wes Sage, vice president of administration.

The first product, the SY380SX, is a cache memory controller ASIC (Application Specific Integrated Circuit) designed to improve the performance of Intel 80386SX systems and motherboards.

The second product is a single chip, integrated cache controller with the same core as the SY380SX; it is designed to upgrade existing 286 ATs and PS/2s to 80386SX systems with up to 64K bytes of cache. Four additional caching and performance enhancement products for 386SX, 386DX, 486 and SPARK microprocessors are planned for release over the next two years.

Nexel is currently self-funded, operating from offices in Santa Clara. Product sales are aimed at OEMs (Original Equipment Manufacturers) via representatives and distributors. Custom ASICs and board level solutions will be developed to meet large OEM requirements. Licensing of Nexel technology will be also offered to key strategic partners.

KENILWORTH, NJ (NOV. 8) BUSINESS WIRE - Harmonia Bancorp Inc. (NASDAQ:HBCI), the parent company for Harmonia Savings Bank, announced Thursday that it has completed a previously announced stock repurchase program involving 5 percent, or 237,500 shares, of the company's outstanding common stock.

As a result of the repurchase, Harmonia Bancorp now has 4,512,500 shares outstanding.

The company also said that its board of directors has authorized an additional stock repurchase program for up to 237,500 shares, or approximately 5.26 percent, of its outstanding 4,512,500 shares of common stock. The repurchases will be made from time to time in open market or privately negotiated transactions, based on then current market prices.

In making the announcement, Walter D. Tombs, chairman of the board and chief executive officer, said, '' Despite the prevailing regional and local economic downturn, Harmonia continues to be profitable and well capitalized. At the end of October 1990, Harmonia's net worth to total assets ratio was 12.54 percent. The board of directors' decision to undertake an additional buyback program reflects this, and demonstrates our confidence in Harmonia as an attractive investment value, particularly at current price levels.''

Through its principal subsidiary, the $699 million-asset Harmonia Savings Bank Harmonia Bancorp Inc., operates 20 offices in five central New Jersey counties. Organized in 1851, Harmonia provides traditional savings bank products and services complemented by multifamily residential loans and home equity lending.

DARIEN, CT (NOV. 8) BUSINESS WIRE - EXECUTONE Information Systems Inc. (NASDAQ:XTON) Thursday announced results for the quarter ended Sept. 30, 1990.

The company reported revenues of $70.6 million, operating income of $4.1 million and net income of $186,000, or 1 cent per share. For the same period in 1989, the company had revenues of $70 million, operating income of $4.1 million and net income of $175,000, or 1 cent per share.

For the nine months ended Sept. 30, 1990, the company reported revenues of $212.8 million, operating income of $11.6 million and net income of $431,000,

or 1 cent per share.

The comparable 1989 amounts were revenues of $219.3 million, operating income of $12.6 million and net income of $1.1 million or 4 cents per share. The 1990 year-to-date numbers reflect increased costs of $2.8 million for antidumping duties and $1.1 million of interest costs and goodwill amortization.

Alan Kessman, president and chief executive officer, stated: ''In light of the general economic condition of both the customer premise equipment industry and the U.S. economy in general, it is prudent for us to review any and all alternatives to reduce our debt service.

Kessman reported that EXECUTONE is in discussions with Contel Corp. regarding a renegotiation of the $36 million note of the company which was issued in connection with the company's acquisition of Contel Business Systems from Contel in 1988.

Kessman also stated that the company has engaged in preliminary discussions regarding exchanging or financing the repurchase of some or all of the $34.5 million face amount 7 1/2 percent convertible subordinated debentures due 2011.

EXECUTONE Information Systems Inc. designs, manufactures, sells, installs and services voice and data communications equipment for businesses with under 300 desktops, and is the leading supplier of specialized hospital communications equipment.

Products are sold under the EXECUTONE, ISOETEC and INFOSTAR brand names through a nationwide network of direct sales and service offices and independent distributors.

MINNEAPOLIS (NOV. 8) BUSINESS WIRE - Dayton Hudson Corporation today reported that its net retail sales for the four weeks ended November 3, 1990 increased 16.7 percent to $1.13 billion from $969 million a year ago.

Comparable-store sales were up 4.1 percent on the 1990 accounting calendar. Comparable-store sales on an adjusted exact-week comparison were up 2.4 percent.

Kenneth A. Macke, Dayton Hudson chairman and chief executive officer, said the tone of business continues to show mixed results across the country.

Macke said that because of the weakened economic environment, ''we were more promotional and our margins were lower than we had planned. As a result, our third quarter profits will be down from third quarter of last year.

''The most important part of our year is still ahead and our inventories are well-controlled going into the holiday season,'' Macke said.

During the month, Target opened seven new stores in California, Indiana, Michigan and Washington. Mervyn's opened five new stores in Arizona and California and relocated one store in Texas.

The Corporation's sales for the 39 weeks ended November 3 were $9.70 billion, up 13.8 percent from $8.53 billion in the same period a year ago. Comparable-store sales for the 39-week period were up 4.7 percent compared to the same period last year.

As of November 3, 1990, Dayton Hudson operated 708 stores in 33 states.

CHESTNUT HILL, MA (NOV. 8) BUSINESS WIRE - Designs Inc. (NASDAQ: DESI), operator of specialty retail stores that sell exclusively Levi Strauss & Co. clothing and accessories, announced Thursday that sales for the four weeks of October ending Oct. 27, 1990 increased to $9.0 million in the current year from $6.2 million for the same period in the prior year, representing an increase of 46 percent.

These figures include the 21 stores opened since the end of October last year. For the third quarter ending Oct. 27, 1990 sales of $35.6 million have increased 50 percent over last year's sales of $23.8 million. For the first nine months of the current fiscal year sales were $80.3 million compared with $51.1 million in the prior fiscal year, representing an increase of 57 percent.

Comparable store sales increased one percent for October, 9 percent for the quarter and 12 percent for the year to date compared with the corresponding periods in the prior fiscal year. Comparable stores are retail locations that were open a full fiscal year. Of the 102 stores that Designs Inc. operates, 59 are comparable stores.

In making the announcement, Geoffrey M. Holczer, vice president and treasurer, said, "We recently completed the current year's expansion with our 102nd store opening in Traverse City, Mich. This was the sixteenth store we opened this year. We have achieved our near term goal of building a 100 store chain and we are very pleased with the results thus far this year.

"The sales for the quarter are excellent and we look for a significant improvement over last year's earnings results. At this point we hope to achieve third quarter earnings of 30 cents per share versus ten cents per share for the quarter last year. This would make us profitable at the end of the nine months compared with a 30 cents per share loss after three quarters last year.

"As should be expected, we are entering the Holiday season cautiously as we believe it will again be a promotional year. We do feel that we are well positioned to do business in the current environment."

Designs Inc.'s 70 traditional stores and 32 outlet stores sell exclusively Levi Strauss & Co. clothing and accessories under the "Designs exclusively Levi Strauss & Co." and "Specials exclusively Levi Strauss & Co." names. The stores are located in enclosed regional shopping malls and outlet parks in 26 states throughout the eastern half of the country.
